A report on educational television issued last week by the Ford Foundation and the Fund For the Advancement of Education highlights these findings: more than half a million American students, from the first grade through college, are receiving part of their classroom instruction by tv; 117 colleges and universities offer courses for credit via tv, and 569 school districts make regular use of tv instruction.

The report, titled "Teaching by Television," concludes that there is "no significant difference in achievement between students in television courses and students in regular classes." Copies of the report are available without charge from the Office of Reports, The Ford Foundation, 477 Madison Ave., New York 22.

MBS newscast sales up 31% over 1958

Sponsors increased their use of Mutual's five-minute newscasts by 31% in March, April and May of this year over the comparable period of 1958, it was announced last week by Blair A. Walliser, executive vice president of MBS.

Mr. Walliser noted that under its arrangements with its affiliated stations, the network provides its stations with a five-minute newscast on the hour in return for a network five-minute news broadcast on the half hour. The network's option time sales, he said, are limited to its Sunday schedule.

During the three-month period this year, according to Mr. Walliser, 11 of the 17 daily newscast were sold out, as against 7 of 17 daily news programs last year. Partial sponsorship of news periods follows a similar pattern.

Among the new clients added to the Mutual roster this spring, he said, were the Pepsi Cola Co., Sinclair Oil Co., two divisions of the Sterling Drug Co. and Sea Breeze Labs.

Psst . . . radio station for sale

"tell you what I'm gonna do—gonna make you a deal—you can see by the tower that it's a fine property."

Facelifting at WJR • Approximately 700 guests attended WJR Detroit's "Goodwill Cavalcade of 1959," held in Detroit's Latin Quarter, with entertainment furnished by the station's regular musical talent staff. It marked WJR's switch to non-network operation and its "complete-range programming" concept. Among those present at the function:

L to r: J.B. Wagstaff, Chysler Corp. vice president and general manager of the DeSoto Div.; John F. Patt, WJR President; George Romney, president of American Motors; H. E. Chesebrough, Chrysler vice president and general manager of the Plymouth Div., and E. N. Cole, General Motors vice president and general manager of the Chevrolet Div.

• Media reports

• WAKO Lawrenceville, Ill., is slated to commence daytime operation today (June 1) on 910 kc with 500 w. It is owned by the Lawrenceville Broadcasting Co. Wallace C. Bruner is manager.

• Recent affiliations with the Mutual Broadcasting System include WGGG Gainesville, Fla., and WSJM Benton-Harbor-St. Joseph, Mich. WGGG, which joined MBS May 18, is owned by Radio Gainesville Inc. and operates on 250 w at 1230 kc. Carl Swanson is general manager. WSJM joins the network today (June 1). It is owned by WSJM Inc. and operates on 250 w at 1400 kc. Charles Dickoff is general manager.

• KHOU-TV will be the new call letters of the Corinthian station now known as KGUL-TV Houston, effective today (June 1).

• KUDI Great Falls, Mont., received two of three first-place awards in the local advertising club's first annual advertising contest. KMON there won the other first-place award. The contest was for locally-produced spots.

• A new service for Southern California public relations and publicity people is Transmit Inc., which has installed teletype machines in the news rooms of eight radio stations, six tv stations, two wire services (AP and UPI), 12 daily newspapers and five specialized papers p.r. material. David R. Showalter, former director of public affairs for CBS Radio in Hollywood, is president of Transmit. James H. Flint, former editor of *Western Dairy Journal* and farm editor of McClatchy Broadcasting Co., is business manager. Transmit is located at 6047 Hollywood Blvd., Hollywood 28. Telephone: 2-7377.

• National Television Monitor Inc., N.Y., which handles monitoring service in some 140 cities, tape facilities in 73 cities and offers photo reports in New York, has moved to larger quarters at 601 Madison Ave. New telephone number: Murray Hill 8-1071.

• NBC News has assigned three correspondents to augment network coverage of Canada and Latin America with regular on-scene reports. Wilson Hall and his wife, Lee, left New York last month for the Caribbean area. Willson Woodside, Canadian journalist, commentator and authority on foreign affairs, will provide Canadian reports from headquarters in Ottawa.

• Keys symbolizing the theme of NAB's "Learn—and Live" campaign have been awarded 10 educators in as many states through General Federation of Women's Clubs as part of the federation's "Teacher of the Year" project. The NAB campaign is designed to develop respect for learning and to instill pride in doing a job well through special programs and messages on the air. Keys have been presented in Arizona, Illinois, Indiana, Mississippi, Pennsylvania, South Carolina, Tennessee, Texas, Utah and Washington State. Two more will be presented during the current week in Colorado and Delaware.

• Effective immediately, H-R Representatives Inc. is working in conjunction with ABC Radio's Hollywood sales staff in selling the ABC Radio Pacific Coast Regional Network. H-R had serviced the now defunct Don Lee Network. H-R's job is to sell ABC Radio's 32 Pacific Coast stations as a unit, not individually, and to include with the sale of the coastal outlets all or a portion of ABC's Rocky Mountain area affiliates. Approximately 80 stations are included in the 11-state western group.

• *The Roguish World of Dr. Brinkley*, a biography of the onetime owner of a maverick Kansas radio station, has been written by Gerald Carson. Dr. John R. Brinkley's broadcasting license was revoked after he advertised he could graft rejuvenizing goat gonads onto aging men and other quack medical treatments. The doctor moved to Del Rio, Tex., and started another, more powerful radio station that took an international treaty to get it off the air. The book will be published in October by Rinehart & Co., N.Y.

• KMOX St. Louis, Mo. will broadcast all St. Louis Hawks professional basketball games for the next three seasons including pre-season exhibitions with co-sponsorship by Anheuser Busch Inc. it was announced last week by Robert Hyland, general manager.

• Inland Empire AP Broadcasters Assn. has been formed at Spokane, Wash. Dick Hoover of KREM there is general chairman, Bill Rhodes of KZIN Coeur d'Alene is chairman for northern Idaho and Stan Pennington of KOMW Omak is eastern Washington chairman.

• WMAL Washington, D.C., personnel, except sales staff, have moved to Transmitter Bldg., 7115 Greentree Rd., Bethesda 14, Md. Telephone Kellogg 7-1100. Copy, tapes and material for traffic supervisor should be sent to that address. Contracts and sales correspondence continue to go to WMAL, 4461 Connecticut Ave., Washington 8.

• WBEE Chicago has switched to a single rate structure for national and local clients.

• Eight new affiliates have been signed by Keystone Broadcasting System for a new total of 1,070 stations. They are: KCIJ Shreveport, La.; WSRO Marlboro, Mass.; WDOG Marine City, Mich.; WYRN Louisburg, N.C.; KWAM Memphis, Tenn.; KSOX Ray-

mondville, Texas; WRIS Roanoke, Va., and WPAR Parkersburg, W.Va.

• The WBT Charlotte, N.C., *Radio Moscow* program based on Russian propaganda (BROADCASTING, March 16, Jan. 19) is to be used by the National Education Program in its Freedom Forum at Los Angeles this month. The NEP develops and distributes educational materials and tools of American citizenship. The WBT taped program also is heard on WMBR Jacksonville and KSAY San Francisco.

• WGIR Manchester, N.H., a CBS affiliate for the past two years, shifts to NBC tomorrow (June 2). Manchester's only network-affiliated radio station, WGIR is owned and operated by the Northeast Broadcasting Corp., M. M. Girolimon, president-treasurer; Bernie Mack, general manager. The station is on 610 kc with 5 kw day, 1 kw night.

• WLYN Lynn, Mass., switches to a single rate structure June 1 with General Rate Card 11.

• To serve investors buying and selling media stocks, Media Investments Co. has been organized by Jack L. Stoll & Assoc., media brokers for over 12 years. In an announcement distributed by the new firm, media is defined as meaning "radio and television stations, daily and weekly newspapers, magazines and all the allied business such as printing, film, agencies, etc. Media Investments Co. will be issuing brochures summarizing the activities in the media field, noting trends and studies of media stocks on the market," the announcement states, adding that this service will be free for the asking. MIC has offices with its parent company at 6381 Hollywood Blvd., Los Angeles.

• Illinois News Broadcasters Assn. adopted a resolution at its May 16-17 spring meeting instituting a "Man of the Year Award" for the person making the greatest contribution to the state. The honor will not be limited to broadcasters but may be conferred on the man or woman who excels in any field —journalism, radio-tv, science and the arts. The INBA meeting, held at Southern Illinois U. in Carbondale, drew about 100 member broadcasters. Major speakers were Sam Sharkey, NBC, and Frank Edwards, WTTV (TV) Indianapolis.

• WHOM New York is initiating a blood bank for the exclusive use of its Spanish-speaking audience. The plan has been approved by the city's hospital commissioner, and is to have its experimental beginnings through cooperation with Metropolitan Hospital there. Spanish-speaking doctors and laymen have agreed to make personal appeals for the program over WHOM. Listeners sending in cards offering to participate will be advised by mail in Spanish as to the procedure. Those accepted as doners and their families will be guaranteed use of the WHOM blood bank without charge.

• WICC Bridgeport, Conn., will move its studios and general offices from Trumbull to Fairfield, Conn., in mid-July. New location, providing 7,000 square feet for the am and recently authorized fm facilities, is closer to downtown Bridgeport.

Open doors

Twice-weekly news conferences held by Gov. Foster Furcolo of Massachusetts have been opened to broadcast reporting facilities, fulfilling a promise made some time ago to the Massachusetts Broadcasters Assn.

W.C. Swartley, WBZ-AM-TV Boston, president of MBA, said the association will continue its campaign to remove barriers to electronic journalism still maintained by other public agencies.

Gov. Furcolo divides his news conference into two portions—State House press newsmen and radio-tv newsmen. The former group asks questions in the first portion; radio-tv newsmen ask questions in the second portion. All are permitted to attend both portions of the conference. Cameras and recorders must be stopped during off-record comments.

• Rep appointments

• WHK Cleveland appoints John Blair & Co.

• WCBM Baltimore appoints Peters, Griffin, Woodward.

• KPOI Honolulu, Hawaii, has named Jack Masla & Co.

• WJAC-AM-FM Johnstown, Pa., names Richard O'Connell Inc., N.Y.,

• KGEE Bakersfield, Calif., and KIIE Galveston, Tex., name Richard O'Connell Inc.

• WDAS Philadelphia appoints Bernard Howard & Co., N.Y.

• KTLE-TV Pocatello, Idaho, names Forjoe-Tv.

• WCUE Akron, Ohio, names Gill-Perna, N.Y.

• KINT El Paso, Tex., names John E. Pearson Co.

TV ABROAD: BEGINNING TO BOOM

It started late, is still behind U.S., but now it's spurting

Television circulation in foreign lands is growing at the rate of nearly a million sets a month.

New stations are going on the air at a rate mindful of the expansion of U.S. television after the lifting of the freeze. In the first three months of this year 116 new stations went into operation abroad.

These figures were reported by the U.S. Information Agency in a survey of television development in all parts of the world, excluding the U.S., its territories, its armed forces bases overseas, and Canada. The survey covered the first quarter of 1959.

In that period, the USIA said, the number of tv sets abroad increased from 22.8 million to 25.6 million. Of the sets in existence at the end of March, 21.7 million were in non-communist countries and 3.8 million in the communist bloc.

The same quarter saw the addition of 97 new tv stations in non-communist countries and 19 in the communist bloc. All told there were 855 tv stations on the air abroad at the end of March, 714 in non-communist countries and 141 behind the Iron or Bamboo Curtains.

(There are now more than 50 million tv sets in use in the U.S. [in 44 million tv homes] and more than 3.5 million sets in Canada. There is no reliable estimate of the number of sets on U.S. armed forces bases overseas. Discounting sets on those bases, the world total of television sets is about 79 million.

(There are now 562 tv stations [commercial and non-commercial] operating in the U.S. and 60 in Canada. Those added to the stations reported by USIA amount to a total of 1,477 stations in the world, again not counting stations on armed forces bases overseas.)

According to the USIA report (which the agency warned came from sources of varying reliability), tv sets in Western Europe increased from 14.6 million to 16.4 million in the first three months of 1959 and from 2.5 million to 2.9 million in the Far East, while increases were negligible in Latin America and the Near East, South Asia and Africa. Tv sets in communist countries increased from 3.3 million to 3.8 million.

Part of the USIA statement was devoted to a report by the Bavaria, Germany, government weekly *Staatszeitung* that communist East Germany has launched a big tv construction program to build stations along its frontier to telecast propaganda programs into West Germany. USIA quoted the newspaper as saying East Germany has allocated 60 million marks for this program, called "Plan West," which among other things includes construction of 15 tv transmission towers along the border, broadcasting over a strip 150 kilometers wide into West Germany.

The 1959 quarter saw addition of 97 new tv stations in non-communist countries and 19 in communist nations, USIA said, as follows: 85 in Western Europe (42 in Italy, 26 in West Germany), 9 in the Far East, 3 in Latin America, 15 in the Soviet Union and 4 in Hungary, Poland and Rumania. (Yugoslavian figures were included in those of Western Europe.)

USIA reported some exchange of tv programs across the Iron Curtain through temporary link-ups with the Eurovision network.

Some of the overseas tv developments reported by USIA by areas and countries:

World tv in summary

TELEVISION SETS		TELEVISION STATIONS	
United States	50,000,000	United States	562
Other free nations	25,200,000	Other free nations	774
Communist bloc	3,800,000	Communist bloc	141
World total	79,000,000	World total	1,477

WESTERN EUROPE

Austria: All Austrian provinces now have tv. Some 30,000 tv homes in Czechoslovakia, Hungary and Yugoslavia watch Austrian tv. Tv in Austria is expected to pay for itself when registered sets reach 220,000. The manufacturer's cartel recently reduced prices of tv sets but there's no indication it will allow the import of foreign makes.

Denmark: A reorganization of Statsradiofonien to give more importance to tv is expected to improve administration with both radio and tv programming departments. Tv set price reductions of 5% to 15% have been advertised.

Finland: Finnish viewers are promised they will see "Eurovision" programs by year's end, with transmissions via Stockholm and a relay station. Six new stations are being built.

France: Radiodiffusion-Television Francaise (RTF) becomes a public enterprise, but remains under the Ministry of Information. RTF can sell its films and make other commercial transactions, but no advertising will be permitted. A second tv channel is expected in Paris in October, devoted to cultural programs. On July 1, the license fee for a tv set will be raised 6,000 francs ($12.24) to 7,500 ($15.30), but will also cover radio sets (now 2,000 [$4.08] francs).

West Germany: The Federal Ministry for Posts & Telecommunications (BPM) will inaugurate a second tv network of 29 tv stations, together with a radio relay network for picture and sound modulation circuits, with completion expected next year. No plans for programming have been made. Radio and tv set price controls were dropped in January, but were reinstated two weeks later after prices dropped 18%. But 40% of the market retained uncontrolled prices. Tv sets are increasing by more than 5,000 daily and the 3 million mark is expected in August.

Gibraltar: One report says a 10 kw tv transmitter will be built to serve southern Spain and North Africa.

Italy: The tv network continues to grow, with 42 satellite transmitters added during the quarter.

Malta: Trade sources report a "piped" tv service is planned, but there are objections and one company hopes to build a regular tv station. Malta's 4,000 tv owners receive programs from Sicily.

Netherlands: Two more transmitters of 50 and 100 kw are to be built by 1960. Sets are expected to increase more than a million in the next four years. Two private companies have been formed and are producing commercials (Independent Tv Exploitation Co., Rotterdam, and Northern Tv Center, Gronigen) if and when the government approves tv commercials.

Norway: The Oslo Tv Center is ex-

pected to be ready for use by September and tv link connections with Sweden and Denmark by October, at which time Norwegian tv will go into regular operation.

Portugal: Radio Televisao Portuguesa's (RTP) 5-station hookup now covers 87% of Portugal with evening programs. A new studio is being built in Lisbon. The Standard Electric Co. has been authorized to produce tv sets at its Lisbon plant if it begins in 18 months.

Spain: The Barcelona tv station now is operating experimentally and a new station is being built in the Guadarrama Mountains which will be one of the most powerful in the world with an altitude of 7,545 feet, power of 200 kw and coverage radius of 186 miles. Newspapers say a series of regional stations are being built to be linked with Eurovision through the Barcelona outlet. An unconfirmed source says that commercial tv outlets will be permitted in cities which already have a government station. News reports say 20,000 new sets will be sold at $174 each.

Sweden: With the opening of six new tv stations at the end of 1958, tv set sales totaled 200,000 the first quarter, doubling sets in use. Expansion from 14 to 42 transmitters is planned by mid-1960. The commercial radio station, Radio Mecur, which operates from a ship in the Oresund, has announced plans to initiate commercial tv to both Denmark and Sweden from another vessel in the Oresund.

United Kingdom: Independent Tv Authority's eighth tv station opened Jan. 15 at Burnhope, near Durham. It serves 2½ million people and raises ITA's coverage to 85% of the population. There has been discussion in Parliament about changing the 405-line British tv standards to the 625 lines in use in Western Europe. BBC recently reported that two-thirds of homes now have tv.

Yugoslavia: The Yugoslav Tv Network will be broadcasting programs from Belgrade, Zagreb and Ljubljana soon, a government announcement reports, and a second stage will connect Sarajevo, Skoplje and Titograd this summer. Bosnia-Herzegovina will receive programs by 1960.

LATIN AMERICA

Argentina: A commission which administers Argentine commercial radio and tv stations is quoted as saying all stations under its control will be returned to private jurisdiction this year.

Brazil: The Rio press reports four, possibly six, tv stations will be completed this year and that three cities will be linked into a network and begin using video tape this year. Rio de Janeiro is expected to get its third outlet.

Chile: The Post & Telegraph Department has been asked to report on the possibility of inaugurating tv in Chile. An application has been filed for a 10-year monopoly to produce tv sets.

Colombia: The Radio Broadcasters Assn. (ANRADIO) has asked to purchase some 80 million pesos ($10 million) worth of radio and tv equipment bought by the Rojas regime and now in storage.

Dominican Republic: Ciudad Trujillo's second tv station, RAHINTEL, began Feb. 28, with U.S. equipment.

Haiti: Trade reports indicate Morris Rosemberg of New York has been granted a concession to build and operate a tv service in Haiti for 10 years.

NEAR EAST SOUTH ASIA AFRICA

Algeria: Four cities are to be added to the Algerian tv network. Simultaneous French and Arabic audio transmissions have been discontinued.

Cyprus: Cyprus Broadcasting Corp. on Jan. 1 took over broadcasting and television services from a government agency.

Ghana: One report says Ghana is considering tv services for Accra and other cities in the near future.

India: A tv outlet to cover all New Delhi was to have begun in April.

Iran: Tv is eight months old and tv set sales are reported at a 1,000 a month. About 15% of programming at the one tv outlet is sold commercially. Its owners plan to complete another outlet at Abadan by July.

Kenya: The new Associated Broadcasting Co. (Africa) plans a station in Nairobi and later another at Mombassa. The system of revenue has not been determined.

Lebanon: The first tv station is expected to be completed by year's end.

Morocco: The private company TELMA began telecasting at Casablanca and Rabat in 1954, but went off the air two years later.

Nigeria: Two stations are planned, at Ibadan and Ikeja near Lagos, for the projected West Nigerian Tv Network.

Saudi Arabia: The Aramco tv station in Dhahran, designed to cover a radius of 40 miles, is being received 100 miles away. There is considerable group viewing in homes and public places.

Union of South Africa: The government has decided against a tv service.

United Arab Republic: A tv outlet in Al-Muqattam is to begin this year and another plan under study would cover Cairo, Damascus, Aleppo, Homs, Ha-

mah, Alexandria, the Canal, Asyut and Luxor. A tv factory also is being considered.

FAR EAST

Australia: Government non-commercial tv stations are planned in Brisbane, Adelaide, Perth and Hobart and commercial tv stations have been awarded as follows: Adelaide, 2; Brisbane, 2; Perth, 1, and Hobart, 1.

Japan: Japan added 9 new stations and 350,000 tv sets during the first quarter and an expansion to 5 million sets is seen by the end of 1960. Eight more new tv stations were expected to go on the air by last April.

South Korea: Fire destroyed Korea's commercial HLKZ-TV on Feb. 2 and the U.S. Information Service in Seoul arranged to make the U.S. Armed Forces tv facilities there available to HLKZ-TV for Korean language broadcasts. HLKZ-TV is expected to resume with new equipment by the end of 1959.

New Zealand: The first tv station, at Auckland, was to have gone on the air last March 1. The next will be at Wellington. Two firms will make tv sets.

Okinawa: Okinawa-Tv expects to go on the air by July 1.

Taiwan (Formosa): The first tv station will be built by Japanese investors.

Thailand: Relay stations are planned between Bangkok and Chiengmai. Registration of sets is no longer required.

SINO-SOVIET BLOC

Bulgaria: PYE Ltd. of Great Britain will supply equipment for the first official tv station in Sofia, to be completed by July 1. An experimental tv station has operated for some years.

Czechoslovakia: The Central Moravia tv station near Krasenko, serving the Brno area, began March 3. It is linked with the Prague station via a relay station. It will be a link in the Prague-Brno-Ostrava-Bratislava chain, which will be linked later with Budapest, Warsaw and Moscow. Prague also will be linked with Berlin and Eurovision.

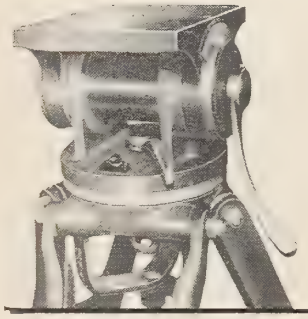
East Germany: A large tv programming center is being built in Leipzig and its first section will begin early next year. Two new tv outlets for the planned "tv offensive" toward West Germany are being built near Rhinow and Nauen. The Leipzig and Dresden outlets will increase to 100 kw. Links also will be completed next year to connect various cities.

Hungary: A tv station went on the air at Pecs in February and studies are being made to connect via microwave links to foreign countries.

Poland: The Gdansk tv station opened March 6. A long range plan (by 1975) calls for expansion of the present six outlets at Warsaw, Lodz, Poznan, Katowice, Wroclaw and Gdansk, which now cover about 44% of the population. The plan calls for 19 main stations for total coverage of 80% of the population. Poland, with the aid of Soviet experts, will lay a cable for nationwide transmission of domestic programs and those from U.S.S.R., Czechoslovakia, East Germany and Eurovision.

Rumania: A new tv transmitter was commissioned in the Bacau region on Jan. 25 and will relay programs of the Bucharest outlet.

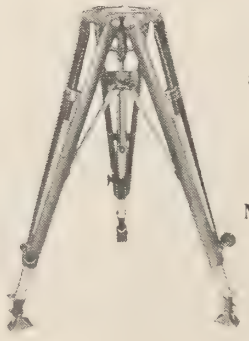
U.S.S.R.: A total of 15 new tv centers and relay transmitters went on the air in the first quarter, making a total of more than 60 telecenters and several dozen relay transmitters. Moscow will soon be experimenting with color and eventually all capitals of the republics will have color tv. By 1965 there will be 90 program centers, 80 relay stations and numerous low-power automated transmitters in operation. Tv sets will be at 15 million, serving 80 million people. There were also various delays and stoppages of construction. Maintenance of tv sets has become a serious problem, with 65%-75% of sets needing repairs during the six-month warranty period. A Tass broadcast quoted an expert as saying a single artificial earth satellite, in an equatorial orbit in the direction of the earth's rotation and at the same speed, could hang "motionless" above an area and, by relaying tv programs, replace tv centers on the ground.



Communist China: Stations are in operation at Peking, Shanghai and Harbin and preparations have started to establish 19 more in 14 provinces and major cities. Tv sets and some tv broadcasting equipment are being manufactured in China but an adequate supply is still a problem.

NTA foreign deals

NTA International, New York, is completing negotiations with the British Broadcasting Corp. and French government television authorities on agreements covering tape, film and live programming, facilities and distribution.



Harold Goldman, president of NTA International, told a news conference in New York last week that a contract finalizing the agreement was expected within a week. Mr. Goldman, who returned 10 days ago from a four-week trip abroad, said he could not give specifics about the transactions but indicated they would include co-production abroad, and distirbution in the U.S. of both British and French programming.

CECO microwave relays conquer space barriers

Whether it's a fixed station or a mobile unit, CECO microwave equipment surmounts the communication barrier. Because CECO equipment is built to a quality that is actually higher than the official standards. For dependable pickup and relay under adverse climatic conditions, you're wise to play safe with CECO.

Micro Wave Relay Beam Reflector Head
Perfect for parabolas up to 6-ft. diameter. Withstands torques of 225 ft. pounds in elevation and 150 ft. pounds in azimuth. Environmental treated for extreme weather conditions.
$285.00 Relay Tilt Head Only

ALL METAL TRIPOD
Has cast top flange and upper leg portion made of one piece aluminum alloy castings. Legs slide easily and have tie-rods to center for automatic leveling. Accepts Balanced TV Head, Micro Wave Relay Beam Reflector Head (illus.) and other similar professional tripod heads. **$260.00** Metal Tripod only.

Cuba won't take over radio-tv, says new communications chief

A beardless, 28-year-old graduate of an American university who heads the Cuban ministry of communications has a "great respect for free enterprise" and insists that Cuba will respect its international obligations in the radio field.

The new Cuban minister of communications is Dr. Enrique Oltuski, a graduate of the U. of Miami, Florida, who holds a degree in architectural engineering. He made these observations last week in Washington where he had been visiting FCC officials. Dr. Oltuski became Cuba's communications chief Jan. 13, two weeks after Fidel Castro's bearded revolutionaries took over.

Dr. Oltuski has been in the United States for 9 days returning to Cuba this past weekend. He visited RCA and NBC in New York and met with officials of educational ch. 2 WTHS-TV Miami Thursday and Friday.

He was accompanied by two aides: Frederico Belle-Lloch, technical deputy of the communications ministry, and Dr. Roberto Acosta, vice president of the Cuban Development Commission.

Dr. Oltuski succeeded the Batista communications chief, Garcia Valdez. Asked where Mr. Valdez is now, Dr. Oltuski answered shortly: "In exile." He added, "And we're sorry we couldn't catch him."

Cuban radio and tv stations are still owned and operated by the individuals to whom they are licensed, Dr. Oltuski stated.

There are five or six exceptions to this, he added. These are stations once owned by Batista adherents which have been expropriated by the new government. They will be sold at public auction, he said.

Cuba's "Mr. Radio," Goar Mestre, is still running his radio and tv properties, Dr. Oltuski stated.

"All of broadcasting is being run just the same as before," he emphasized. "We have a great respect for the free enterprise system. We do not plan to nationalize radio or tv."

Asked about the North American Regional Broadcast Agreement and charges that Cuban radio stations have violated provisions of this treaty and have interfered with U.S. stations, Dr. Oltuski smiled:

"We have ratified the treaty," he said. "We respect our international agreements and will enforce them."

The 1950 NARBA treaty is still pending ratification by the U.S. Senate.

Dr. Oltuski said that he and his group are working out a new telecommunications law to regulate both radio and tv and common carriers.

"It will be something like your FCC," he said.

He stressed that one of the new projects, still in the planning stage, is a state-supported system of educational television stations, "like you have here." He pointed out that this would be an ideal way of reaching farmers (the new government is pledged to a land reform program) and also "complementing" schools.

One innovation already has been put into practice, Dr. Oltuski said. This is the establishment of an advisory telecommunications committee. This is headed by Jose Altschuler, an electrical engineer. This is part of Dr. Oltuski's program to "technologize" the communications ministry, he said.

The Cuban communications party was brought to the United States through the State Dept.'s cultural exchange program.

Canadian saturation: 100% radio, 79% tv

Canada's estimated population of 17,180,200 in March 1959 shows an estimated 4,196,100 households, of which 100% have radio receivers and 79% (3,328,400) have television, according to the Bureau of Broadcast Measurement, Toronto. The BBM survey was taken this spring.

By provinces, Ontario has the largest number of television households with 1,295,900 out of a total 1,509,800. Quebec province follows with 937,600 tv households of a total 1,066,700. British Columbia is third with 309,000 out of 437,500, followed by: Alberta with 216,100 out of 317,200; Manitoba with 157,800 out of 225,200; Saskatchewan, 147,000 out of 237,900; Nova Scotia, 134,600 out of 168,100; New Brunswick, 86,800 out of 126,700; Newfoundland, 28,000 of 84,000, and Prince Edward Island, 15,600 tv households out of 23,000.

Urban tv coverage shows Sydney, N.S., saturated 100% in its 23,700 households. Quebec City and Windsor, Ont. (opposite Detroit) show the next highest saturation with 97% of all households having tv sets. Urban areas with nine-tenths or more tv households are Moncton, N.B., 95%; Terrebonne, Que., 95%; Sudbury, Ont., 96%; St. John's, Nfld., 91%; Halifax, N.S., 93%; St. John, N.B., 90%; Levis, Que., 92%; Sherbrooke, Que., 90%; Richmond, Que., 91%; St. Hyacinthe, Que., 93%; Montreal, Que., 94%; Three Rivers, Que., 93%; Ottawa, Ont., 93%; Kingston, Ont., 91%; Oshawa, Ont., 91%; Hamilton, Ont., 92%; Winnipeg, Man., 93%; Edmonton, Alta., 91%, and Vancouver, B.C., 90%.

World spectrum body wanted by scientists

The establishment of an international FCC was called for last week by two scientists. Sir Robert Watson-Watt, inventor of radar, and David B. Smith, Philco research vice president, asked for the creation of an international communications commission to administer and police future myriad uses of the electronics spectrum in space communications, overseas space television, weather reports and other activities.

Both agreed Russia's participation in the International Telecommunications Union indicated the probable success in an international regulatory body.

Both addressed a Washington meeting of the National Missile Conference.

FATES & FORTUNES

Advertisers

MR. CONLEY

• RUSSELL E. CONLEY, manager, advertising and sales promotion, RCA Victor Radio and "Victrola" Div., named to similar position of RCA.

• HENRY K. BERMAN, formerly head of his own marketing consulting firm, to Sofskin Inc. (hand lotion), N.Y., as national sales manager.

TEENAGERS AND TASTEMAKING

Coca-Cola franchisers use radio to round up the market

For the teen-age market, Coca-Cola bottlers are making specialized use of a middle-aged medium—radio. They are getting instant and enthusiastic response to some 300 *Hi-Fi Club* programs.

The franchiser Coca-Cola Co., through its agency, McCann-Erickson, serves up the *Hi-Fi Club* idea much as it distributes its Coke syrup internationally. Local bottlers take the basics and add the bubbles. In the case of the *Hi-Fi Club,* they take the show format and turn it into a local product. The bottlers buy time on hometown stations and merchandise the show wherever teenagers congregate—at home, in school, in recreation halls and even in skating rinks.

McCann-Erickson produces a prototype *Hi-Fi Club,* furnishing recorded music, star interviews, scripts and promotion material. The hometown disc jockey uses whatever he needs to build his own show.

Coke Crowds • Since the first of the year, when *Hi-Fi Clubs* started appearing on local radio schedules, legions of Coke drinkers have become members. The KNUZ Houston, Tex., *Hi-Fi Club* issued 31,000 membership cards in its first six weeks. The program, placed for the Houston Coca-Cola Bottling Co. by the Max H. Jacobs Agency, goes on for an hour Monday through Friday evenings and three hours Saturday nights. One of the KNUZ club's first undertakings, an "ice hop," drew 2,642 skaters, with nearly as many turned away. The second ice hop attracted some 3,000.

70% Joined • In Augusta, Ga., the club started off with 70% of the high school-junior high population committed to membership. The Augusta bottler is under a long-term contract for a half-hour show weeknights and an hour on Saturday. The five day *Hi-Fi Club* of WIBG Philadelphia signed 16,343 members in its initial months. The club on KPHO Phoenix, Ariz., had 3,000 by the end of March. The first dance staged by the KMOX Monroe, La., *Hi-Fi Club* taxed limited facilities of a local recreation center.

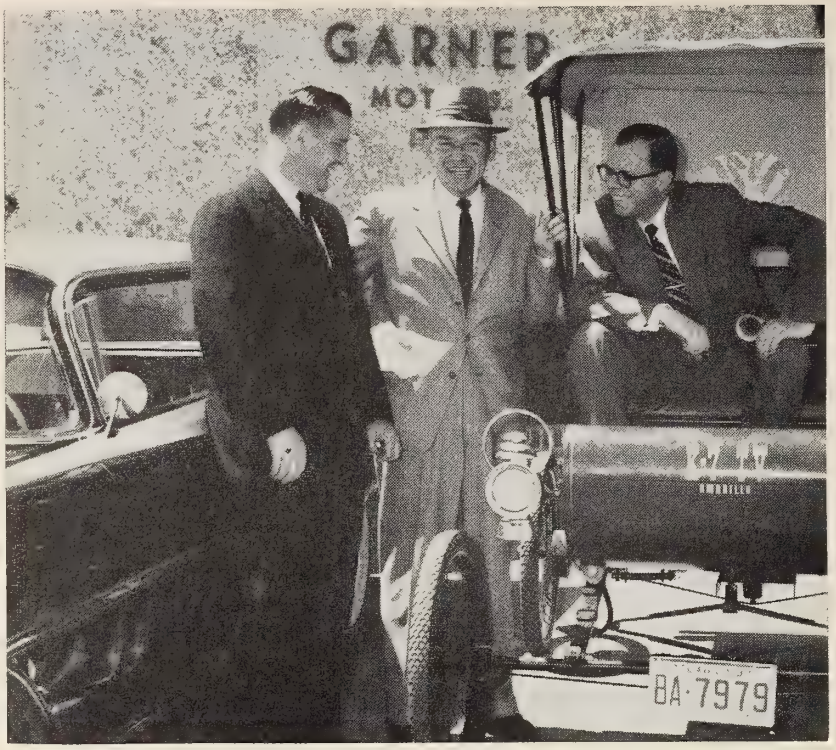
Typical of the *Hi-Fi Club* setup in towns and cities across the country is that organized through WSAZ Huntington, W.Va. The local bottler has bought the after-school hour of 4-5 p.m. on schooldays, placing a popular disc jockey in charge. Highlighting club activity are dances at area high schools, where separate clubs handle the affairs. Dances are free (unless students wish to collect money for a school project) and include doorprize awards on the entertainment bill.

The club organization varies from market to market, with wholesome activity for members a prime objective. Student representatives handle memberships in schools. Dances are chaperoned by faculty or Coca-Cola officials, in private homes as well as in schools.

Fun & Games • The Coca-Cola Co. and McCann-Erickson keep clubs supplied with show and promotional material to encourage teenage participation. Samples: especially produced records feature an orchestral background for *Hi-Fi Club* sings; Skitch Henderson serves up music in varied beats for sprightly dance contests; tunes played backward and other gimmicks provide musical games for club members.

Club members aren't limited to dancing and games. Sometimes they sit down to dine in style. A dress-up dinner was one of this last year's features for KGAK Gallup, N.M., club. Across the Canadian border, CHUM Toronto plugs club membership in its printed Hit Parade lists regularly distributed to local young people. CJMS Montreal conducts the whole thing in French daily and Saturdays.

For WLW Cincinnati, as in other markets, the *Hi-Fi Club* show serves not only its own primary ends but also serves as a bulletin board for disc jockey promotional appearances.



• Drumbeats

• "Who's laughing?" asked WMBD Peoria, Ill., as the recorded laugh of first one and then another prominent Peorian was heard on the air. A total 1,025 postcards were received in six separate two-day contests. Division of $750 worth of prizes was done by drawing from cards of listeners who correctly identified the laughs. Peorians whose laughs were used in the promotion: the mayor, the city treasurer, a basketball star, school principal, the YMCA secretary and the police captain.

• A premium tie-in with car radio sales is being used by Motorola Inc. during the spring and summer selling season. A "breezy-seat" cushion is offered by dealers as a sales clincher, traffic-builder or other tie-in with car sales. The cushion is constructed of coil spring, covered with openmesh fiber.

• NBC's Chicago stations, WMAQ and WNBQ (TV), report sales of a Space Age News Map earlier this spring exceeded 25,000. Tv mail came from 31 states, the District of Columbia and Canada, and radio orders from 40 states, D.C., Canada and the new state of Hawaii. The maps cost 25 cents and were promoted in a three-week campaign of radio and tv announcements.

• The Junior Achievement (commercial training for teenagers) program of WEIM Fitchburg, Mass., has won a national Junior Achievement Cos. award. The station organized Radio Achievers last October. Teenagers sold shares for capital, elected officers, announcers, copywriters, salesmen, a program director and conducted their promotion as a commercial enterprise. As well as the national award, Radio

By way of contrast • C. R. (Dick) Watts (seated), general manager of KVII-TV Amarillo, Tex., drives the station buggy over to Garner Motors, Amarillo, to see how many new Oldsmobiles were sold in a three-day tv *Olds-a-Thon*. The report by President Bob Garner (c) and Gene Horn (l), general manager of Garner Motors: 145 Olds' sold.

The record was chalked up with 28 night and early morning hours over KVII-TV and around-the-clock selling at the Garner showrooms one Thursday morning until the following Saturday night. The big remote was produced by KVII-TV and Garner's agency, Panhandle Adv., using a four-camera crew, name talent (Adolphe Menjou, Charlie Applewhite and others), and a variety of sales angles.

One of the Garner gimmicks was a car appraisal contest offering a vacation trip award. Cars lined up for appraisal stretched as far as five blocks in Amarillo.

KVII-TV fed portions of the show two nights to other Amarillo stations, KFDA-TV and KGNC-TV. The show over KVII-TV lasted all night, 7 p.m. to 9 a.m., May 7 and May 8, spanning the morning of May 9.

Achievers won a Junior Achievers "Best In Sales" award.

• KFPW Fort Smith Ark., covered the local Armed Forces Day parade from a jet plane. The jet T-33, courtesy of the 184th Tactical Reconnaisance Squadron of the Arkansas Air National Guard, flew over the town at 405 mph while KFPW Manager Charles Jones described the parade. His broadcast included a conversation with the flight leader of the 184th while the squadron was flying over the town. After the parade, Mr. Jones' plane performed rolls as he broadcast how it felt.

• A WERE Cleveland, Ohio, "Sweet 16 Club," organized last January, has 1,000 members. Teenagers whose names are submitted to air personality Bill Randle as they reach their 16th birthday, are sent a membership card that entitles them to dances sponsored by WERE for the club. Members also receive a half-gallon of ice cream and a phonograph record autographed by Mr. Randle.

• Clients of WSAZ Huntington, W.Va., ran the station May 20 as well as advertising on it. The occasion was WSAZ's fourth annual Radio Announcer Day in which about 50 local sponsors acted as announcers, newscasters and disc jockeys from sign-on to sign-off.

• WLOB Portland, Me., bought time on a tv station to simulcast its "Miss Greater Portland Scholarship Pageant." WLOB gave the winning beauty queen a $250 scholarship and other prizes.

Unlimited cooperation

Chicago broadcasters will play an active role at the 1959 International Trade Fair there July 3-18, based on planning by Chicago Unlimited and the Chicago Assn. of Commerce & Industry.

Local radio-tv stations are expected to give the fair intensive air support, contribute broadcast personalities for entertainment and maintain display booths. Some 400 individual exhibitors will have space at the Navy Pier exhibition hall, where 150,000 buyers are expected. Network and local radio-tv shows will originate from the fair. A $100,000 advertising program was launched in April by trade fair management. The account is handled by J. Walter Thompson Co.

Glamorizing the grocer

This spring, KNEW Spokane, Wash., decided it was time to put some new life into its *Grocer of the Week* show. So the program was cancelled for a time, while programmers got ready to blast off with a new format. Meanwhile KNEW ran a teaser campaign cueing announcements to the debut date of the re-formatted *Grocer of the Week*. A few days before the Saturday show the location was announced.

When the big day came, the promotion was staged as a venture into space. A two-hour broadcast was originated from a remote mobile unit hoisted by a crane above Albertson's Shopping Center, area supermarket. Staff "spacemen," rides for children, display vehicles, police and ambulances all were on hand to whip up excitement in the crowd. In-store announcements, product demonstration and samples highlighted the broadcast.

The result: Double traffic in the store that day and 30% better sales that weekend for KNEW's *Grocer of the Week*.

Cedar Street story

WVOX New Rochelle, N.Y., had an active role in the city's "Cedar Street Project," an urban redevelopment venture which received special community-wide support the week ending today (June 1).

Promotions by WVOX included flying a helicopter over the city with loudspeakers announcing the project; a May 31 hour-long documentary, written and narrated by tv star Dennis James; a high school essay contest; one-minute spots taped by the heads of 35 civic organizations; interviews with civic leaders and the major, plus the distribution of placards showing the station's call and dial spot to local merchants.

to Mr. Schluter, who presently owns 88.5%, for $7,000. Ann. May 21.

Hearing Cases

INITIAL DECISIONS

Hearing Examiner Charles J. Frederick issued initial decision looking toward granting applications of Binder-Carter-Durham Inc., to increase power of WAMM Flint, Mich., from 500 w to 1 kw, continuing operation on 1420 kc, DA-D; Kalamazoo Bcstg. Co. for new am station to operate on 1420 kc, 1 kw, DA-D, in Kalamazoo, Mich.; Northern Indiana Bcstrs. Inc., to increase daytime power of WIMS Michigan City, Ind., from 1 kw to 5 kw and change from DA-N to DA-2, continuing operation on 1420 kc with 500 w-N, and Dowagiac Bcstg Co. for new station to operate on 1440 kc, 500 w, D, in Dowagiac, Mich. and denying application of The Circle Corp. to change facilities of WKLZ Kalamazoo, Mich., from 1470 kc, 500 w, D, to 1440 kc, 5 kw, DA-D. Ann. May 26.

Hearing Examiner J. D. Bond issued initial decision looking toward denying applications of Capitol Bcstg. Co. and W. A. Pomeroy for new am stations to operate on 730 kc, DA-D—Capitol with 500 w in East Lansing, and Pomeroy with 250 w in Tawas City-East Tawas, both Mich. Ann. May 25.

Hearing Examiner Thomas H. Donahue issued initial decision looking toward granting application of KGB Inc., to change trans. location and increase daytime power of KGB San Diego, Calif., from 1 kw to 5 kw, continuing operation on 1360 kc with 1 kw, N, and denying for default applications for new am stations by M.V.W. Radio Corp. (1360 kc, 5 kw, DA, D), San Fernando, Robert S. Marshall (1360 kc, 500 w, DA, D), Newhall, and Wilson Bcstg. Co. (1370 kc, 1 kw, DA-2, U), Oxnard. Ann May 25.

STAFF INSTRUCTIONS

Commission on May 21 directed preparation of document looking toward granting application of Hardin County Bcstg. Co. for new am station to operate on 1300 kc, 500 w, D, in Silsbee, Tex. Initial decision of Aug. 22, 1958 looked toward this action.

OTHER ACTIONS

By order, Commission (1) denied petition by Tucumcari Television Inc., to dismiss its application for new tv translator station on ch. 70 in San Jon, N.M., and (2) rescheduled May 22 oral argument in proceeding from 3:45 p.m. to 10 a.m. Ann. May 21.

Commission extended time from June 22 to Aug. 3 to file comments, and to Sept. 15 for replies, in proceeding concerning proposed changes in tv broadcast rules with respect to option time and right to reject network programs. CBS and NBC had requested longer extensions of time to file. Ann. May 21.

TELEVISION

Help Wanted

Production-Programming, Others

TELEVISION

Major 4A agency on East coast—not New York—needs a good television writer. The man we want is seasoned, but not inflexible. He has imagination, plus the discipline to use it well. He knows enough about production to write commercials that come off. He works well under pressure and can do a good job of editing his own copy. He can handle the daily stuff in the middle of a campaign as well as the keynote material. If you fit this description tell us about yourself in a letter to Box 157M, BROADCASTING. Include your experience, salary requirements, general background. Our employees know of this ad. We have multiple employee benefits, good working conditions.

FOR SALE—Equipment

Complete 25 KW VHF Television Transmitter. Air Cooled. Channels 2 through 6. Excellent Condition. Priced very low for quick sale. Send for complete description.

Continued From Page 90

(WLAU), Laurel, Miss., dismissed its petition to enlarge issues directed against application of Voice of New South Inc. (WNSL), Laurel, which had been designated for comparative hearing with Southland, but amended and removed from hearing May 14. Action May 20.

Granted petition by Lycoming Bcstg. Co. (WLYC), Williamsport, Pa., for extension of time to May 25 to reply to opposition of Broadcast Bureau to WLYC's motion to reopen record in proceeding on am application of Williamsport Radio Bcstg. Assoc. Inc. (WARC), Milton, Pa. Action May 20.

Granted petition by Peoples Bcstg. Corp. (WGAR), Cleveland, Ohio, for extension of time to file its reply to response to Peoples' petition for enlargement of issues filed by Inter-Cities Bcstg. Co. in proceeding on latter's application for am facilities in Livonia, Mich.; extended time to same date reply must be filed to response to be submitted by Broadcast Bureau on May 19. Action May 20.

By Hearing Examiner Basil P. Cooper

Granted motion by Armin H. Wittenberg Jr., for extension of time from May 26 to June 26 for filing proposed findings of fact and conclusions of law, and to July 13 for reply findings in proceeding on his application and that of Pasadena Presbyterian Church for fm facilities in Los Angeles, and Pasadena, Calif. Action May 19.

By Hearing Examiner Thomas H. Donahue

Issued memorandum formalizing oral rulings made on May 14 which granted motion by Upland Bcstg. Co., Upland, Calif., for additional time to file oppositions to petition by Southland Communications Co., Anaheim, Calif., for leave to amend its am application and for other relief, and denied Southland's petition for leave to amend and for additional time for submission of hearing exhibits on engineering issues in proceeding on its am application, et al. Action May 19.

By Hearing Examiner Charles J. Frederick

Granted petition by WMGM Broadcasting Corp., for leave to amend its application for fm facilities in New York, N.Y., to show change in officers and directors of the parent corporation, and second petition to change name to Loew's Theatres Broadcasting Corp.; closed record. Action May 21.

By Hearing Examiner Millard F. French

Denied petition by Florida Gulfcoast Bcstrs. Inc., for reconsideration of Examiner's ruling insofar as it requests that Tampa Telecasters Inc. be directed to supply certain requested information, and to add Evansville issue; denied Tampa Telecasters' motion for reconsideration of Examiner's ruling rejecting Tampa Telecasters' exhibit no. 19; granted that portion of Florida Gulfcoast's petition for reconsideration of Examiner's ruling requesting rejection of certain exhibits of Tampa Telecasters, insofar as said exhibits are based on use of leased equipment to implement its proposal, on ground that leasing agreement constitutes variance from its application; granted Bay Area Telecasting Corp. motion to exclude certain exhibits of Tampa Telecasters on ground of variance, and excluded Tampa Telecasters' exhibits 7, 11, 13, 14, 15, and 20; on own motion, scheduled further hearing for 2 p.m., May 26, instead of 9 a.m., in Largo, Fla., tv ch. 10 proceeding. Actions May 19 and 20.

By Hearing Examiner Isadore A. Honig

Granted petition by Radio KYNO, Voice of Fresno (KYNO), Fresno, Calif., for extension of time from May 22 to May 29 to file proposed findings and from June 9 to June 16 for filing replies in proceeding on its am application. Action May 21.

On own motion, and with the agreement of all counsel present at prehearing conference in proceeding on am applications of Richard L. DeHart, Mountlake Terrace, Wash., et al., scheduled further prehearing conference for 2 p.m., June 11. Action May 22.

By Hearing Examiner Annie Neal Huntting

On own motion, continued prehearing conference from June 8 to June 19 in proceeding on am applications of William Parmer Fuller III, Salt Lake City, Utah, et al. Action May 22.

By Hearing Examiner H. Gifford Irion

Continued from June 1 to July 24 date for conference of engineers in proceeding on applications of Radio St. Croix Inc., New Richmond, Wis., et al. Action May 18.

Granted petition by Guy E. McGaughey Jr., Jacksonville, Ill., for leave to amend his am application to change from unlimited time to daytime only operation; removed from hearing status and returned to processing line. (Was designated for hearing with Radio St. Croix Inc., New Richmond, Wis., et al.) Action May 21.

YOUR PERSONAL "FLYING CARPET" Step into it, press a button, and off you go to market, to a friend's home, or to your job. Take off and land anywhere; no parking problems. Plug in to any electric outlet for recharging. They're working on it!

MORE POWER TO YOU!

America's independent light and power companies build for your new electric living

Tomorrow's higher standard of living will put electricity to work for you in ways still unheard of!

The time isn't too far off, the experts say, when you'll wash your dishes without soap or water—ultrasonic waves will do the job. Your beds will be made at the touch of a button. The kids' homework will be made interesting and even exciting when they are able to dial a library book, a lecture or a classroom demonstration right into your home—with sound. (Some of this is happening already.)

To enjoy all this, you'll want a lot more electric power, and the independent electric companies of America are already building new plants and facilities to provide it. Right now these companies are building at the rate of $5,000,000,000 a year, and planning to double the nation's supply of electricity in less than 10 years.

America has always had the best electric power service in the world. And the independent electric companies are resolved to keep it that way.

AMERICA'S INDEPENDENT ELECTRIC LIGHT AND POWER COMPANIES

Company names on request through this magazine

OUR RESPECTS TO . . .

Howard Aldred Jones

"I've lived most of my life in this gray tower, with this view of the lake shore," Howard Jones mused as he looked out of the window of his office in Chicago's Palmolive Bldg. Continuing, he said. "This new challenge is the big one. I believe in and it's the whole concept of the operation as Freeman Keyes has planned it."

Mr. Jones, as the newly-elected president of Keyes, Madden & Jones, his associates will tell you, would be the last person in the fast-growing agency to pontificate from an ivory tower—or even a gray one. To prospective jobseekers he sets forth three creative cornerstones: (1) the ability to write, (2) the skill to put selling ideas into activating words and (3) "the knowledge of humanness without which neither of the first two requirements has any useful meaning."

In more than a quarter-century of agency activity, Howard Jones seems to have fashioned a reputation for both humanness and creativity, twin qualities which serve him well in his role at K M & J. He joined the newly-formed agency in 1957 after 15 years' service at Grant Adv. and was elevated from executive vice president this past January. He succeeded Edward D. Madden, who resigned to become vice chairman of Geyer, Morey, Madden & Ballard.

Billing Rise Expected • This year K M & J confidently expects to increase its billing about 25% over the $18.3 million mark for 1958—thanks to the addition of several new accounts. Radio-tv will get about 45%.

Mr. Jones has believed strongly in sound broadcasting ever since he wrote a graduate thesis in college on radio's meaning to farm housewives. Included was one housewife's observation, "When I read stories or books, I read words, but when I hear radio, I see things happening"—which he uses even today to point up the aural medium's unique advantage. Similarly, he's convinced of tv's efficacy as a selling medium.

Witness some of K M & J's new account activity: (1) Revere Camera Co., which has expanded a test campaign from four to eight key markets (16 stations) because of sales results (CLOSED CIRCUIT, May 18); (2) H. H. Hixson, which stepped into the competitive Chicago coffee market with saturation spot radio-tv for Fireside Egg brand. Along with these, Keyes, Madden & Jones also inherited Joanna Western Mills and Dr. West's Instaclean denture cleaner—four new accounts worth approximately $2 million —earlier this year. Other accounts include Brown & Williamson, Florists Telegraph Delivery Service, Congoleum-Nairn, Pinex, National Presto Industries, Norge and York Corp.

Actually, Howard Aldred is an old copy and creative hand in agency radio-tv circles, dating back to the onetime bustling Blackett-Sample-Hummert operation in 1934-38 and other agencies before it. His early bent was toward dramatics and, later, advertising-merchandising-sales promotion.

Diversfied Experience • Born in Jamestown, N. Y. (Dec. 6, 1900) young Jones was reared in New Orleans; attended Rugby Military Academy, U. of Chicago (graduating with a PhB in 1922) and Carnegie Tech Dramatic School, and taught at Shady Side Academy, Pittsburgh. He joined Butler Bros. as copy editor of its mail order catalog service in 1923, U. S. Gypsum as chief sales correspondent and The House of Kuppenheimer, working up to advertising manager. He branched out with his own advertising - merchandising - sales promotion-public relations firm for public utilities 1926-30. He also served briefly with Insull Securities.

In 1930 Mr. Jones entered the agency field via Albert Frank Co. (now Albert Frank-Guenther Law), handling commercial business and Canadian Pacific railroad and steamship lines, moving with the account to Ruthrauff & Ryan in 1931. There he was assigned account man, copywriter and new business representative, making initial contact with the Dodge account.

"Life really began in 1934," Mr. Jones recalled, "at Blackett-Sample-Hummert" in Chicago, spawning ground for many a promising agency executive. He was appointed vice president and account executive of J. A. Folger coffee, servicing the account for 20 years. He also serviced Procter & Gamble, General Mills, Bauer & Black, Holland Furnace and other accounts, writing commercials and producing programs. (Among his accomplishments: "Seeing *Judy and Jane*, a radio soaper, through some 5,000 episodes!")

On to Madison Avenue • New York's Lord & Thomas beckoned in 1939 to Mr. Jones as vice president and account man on National Biscuit Co., American Tobacco (Roitan cigars) and Folger's coffee, while also handling copy chores. Transferred next to Chicago, Mr. Jones serviced Armour & Co. (Treet and Luxor products). Pabst Brewing Co. and Folger and shared management responsibilities as co-manager of the office.

When L & T closed its doors, Mr. Jones joined Will C. Grant's agency in the same Palmolive Bldg. in 1942. As executive vice president of Grant Adv., he was identified as creative chief, account supervisor and new business troubleshooter with several accounts. He also was associated with such radio properties as *Houseboat Hannah, Captain Midnight, Couple Next Door* and *Helpmate* and served as head of the agency's central creative group.

Pass the Ammunition • In the current Chicago coffee war sparked by Folger's heavy radio-tv bombardment of that market (BROADCASTING, May 11). Hixson's Fireside Egg campaign handled by Keyes, Madden & Jones is currently writing its own advertising success story.

Notwithstanding all the activity at K M & J (and the earlier departure of Edward Madden), Howard Jones conducts business (some 78 phone calls per day, plus contacts, travel) with the same warm smile—and shingle ("Why change our name when the team is winning?"). His allusion to sports is not perfunctory. A sportsman in his own right. Mr. Jones owns and breeds thoroughbred horses (now about 68), shoots golf (in the 80s) and plays squash. On a rainy offday, though, one is likely to find him in his Palmolive Bldg. "gray tower," adding to what is normally an 80-hour week.

Mr. Jones married the former Maud Eleanor Talcott. They have two children—Challis (Mrs. William B. Snyder), and Talcott, manager of K M & J's Hollywood office.

No ivory in the gray tower

Hobson's choice

LAST week, according to Ted Bates, the agency which places the business, 138 television stations were carrying commercials for Preparation H, a hemorrhoid remedy which the Television Code Review Board says is unacceptable as a tv advertising account.

At least 50 of those stations were also displaying the Seal of Good Practice.

These figures do not suggest that the code is growing in authority or influence. If 25% of all commercial tv stations, 50 of them alleged subscribers to the code, are broadcasting forbidden commercials, it should be clear that the code has reached a critical point in its seven-year history.

This, or some other crisis like it, was inevitable. The adoption of the code in March 1952 guaranteed that at some point there would be a serious dispute over a question of the code's application. If the code is to survive, this crisis must be resolved, although we doubt that the dispute that occasioned it will be settled.

Yank all the seals now in the possession of stations carrying Preparation H commercials and you will persuade none of them that the commercials are objectionable. For all we know, the code violators may be right. Who is to say, in a gray area like this, what is in good or poor taste? But the dispute over taste is no longer the central issue. The crisis of the code is.

If there is to be a code, it must stand for something, and the code review board must be willing to apply its authority to reinforce that stand. For three years, through three administrations, the code board has warned subscribers against carrying Preparation H. Last April 30, at the code board's request, the NAB Television Board withdrew the seal from eight subscribers who had defied the code board's warning. Some 50 others are still defying it. The longer they continue to defy it and are allowed to pretend to be code subscribers the weaker the code becomes.

While the code still has a spasm of life left in it, it should be given an invigorating shot. We can think of nothing that would be more invigorating than the wholesale removal of Seals of Good Practice from all stations which have not cancelled Preparation H.

Three years of warning culminated by the ouster of eight subscribers have established a position from which the code board cannot retreat. To oust eight last April 30 and not oust 60 others that were carrying the same commercials at the same time was a sign of irresoluteness, though we can understand how the board hoped by that example to persuade others to fall into line.

Now that the persuasion has largely failed, the code board has no choice but to cite the rest of its defiant subscribers for action by the NAB Television Board at its next meeting June 17.

Transcendental

BROADCASTERS are treating all too casually an event of great moment scheduled for next Monday and Tuesday. The future of television allocations may well be tied into the two-day panel on a full-scale spectrum study called by Chairman Oren E. Harris (D-Ark.) of the House Commerce Committee.

Sitting in on the panel will be recognized allocation experts of the various branches of the federal government, as well as of manufacturers, industrial users and others who are feeling the pinch of scarcity. Originally, the scheduled spokesman for television were to have been engineers representing the NAB and Assn. of Maximum Service Telecasters. At the eleventh hour, however, NAB President Harold Fellows was also listed. Be it said for MST, it tried to get permission to participate through the presence of a policy-level executive, but was turned down, presumably because, unlike the NAB, it speaks for a "special interest" group.

Mr. Harris set up this spectrum subcommittee (and got a $200,000 appropriation for it) to parry the administration effort to create a five-man board named by the president. Since preponderant government use of the scarce spectrum is a principal issue, such a board would actually be investigating itself. Mr. Harris' interest therefore must be presumed to be the interests of the public, and that means of the television broadcaster.

The panel sessions are to be exploratory. They are restricted to (1) problems of the spectrum and its utilization and (2) the most appropriate way to solve these problems.

It should be apparent that if the answers were found to these two questions the vexatious allocations issue would be solved. Consequently, the outcome of these panel sessions could shape the now beclouded future for television.

Lately, the military has become more cooperative in the approach to spectrum analysis. A spokesman last March said the military has no designs on the tv vhf band. And government experts for several months quietly have been negotiating with the FCC, through liaison Comr. Fred W. Ford, in the hope of arriving at a plan for exchange of frequencies that would provide new vhf channels for tv and alleviate the excruciating shortage created by the inability to use uhf advantageously.

We hope the results of these preliminary and other discussions will lead to the creation of a joint Congressional Committee on Spectrum Utilization and Allocation. Such a committee would bridge the policy gap between the executive branch and the legislative which functions through the FCC. The President allocates for government; the FCC for all others.

The spectrum is one of our great natural resources. With the advent of space exploration it becomes more than just global. Congress has established joint committees on space and atomic energy. Communications are the life-line of our world economy with all nations using one spectrum.

For these reasons, the Harris Panel next week as the first organized effort to tackle the spectrum problem is transcendentally important. Broadcasters should be represented by top policy spokesmen because if they are overshadowed, the ultimate injury might be irreparable.

Code problems • Two station entities quit NAB last week in disagreement with Television Code Review Board's actions against stations carrying commercials for Preparation H, hemorrhoid remedy. One was ch. 8 WMTW (TV) Poland Spring, Me. (story page 59); other was midwest multiple owner of two vhfs and two am stations. Radio stations in midwest group were charter members of original NAB and officials of company have been active in association affairs.

Tv code board meets today (June 8) in Washington for major policy determination on Preparation H procedure. Probability is that board will cite code subscribers still carrying Preparation H spots for revocation of code membership. Revocation will be up to NAB Tv Board which meets June 17 in Washington. Code subscriber list unofficially is placed at about 280, down from peak of about 310. Loss of another 25 code subscribers wouldn't surprise NAB headquarters—but loss of more members in NAB itself would be another matter.

Atlanta renewals pend • Atlanta radio station license renewals are principal topic to be discussed at special FCC meeting today (Monday), with possibility formal action may come at regular Wednesday meeting. Commission at this date seems almost evenly split between those who would like full-scale "area" hearing (appraising community as whole and all stations' program balance, overall) and those who feel matter should be handled on individual basis (renewing some licenses, setting others for hearing). Involved are seven Atlanta radio stations which have been operating without license renewals for more than year (CLOSED CIRCUIT, June 1).

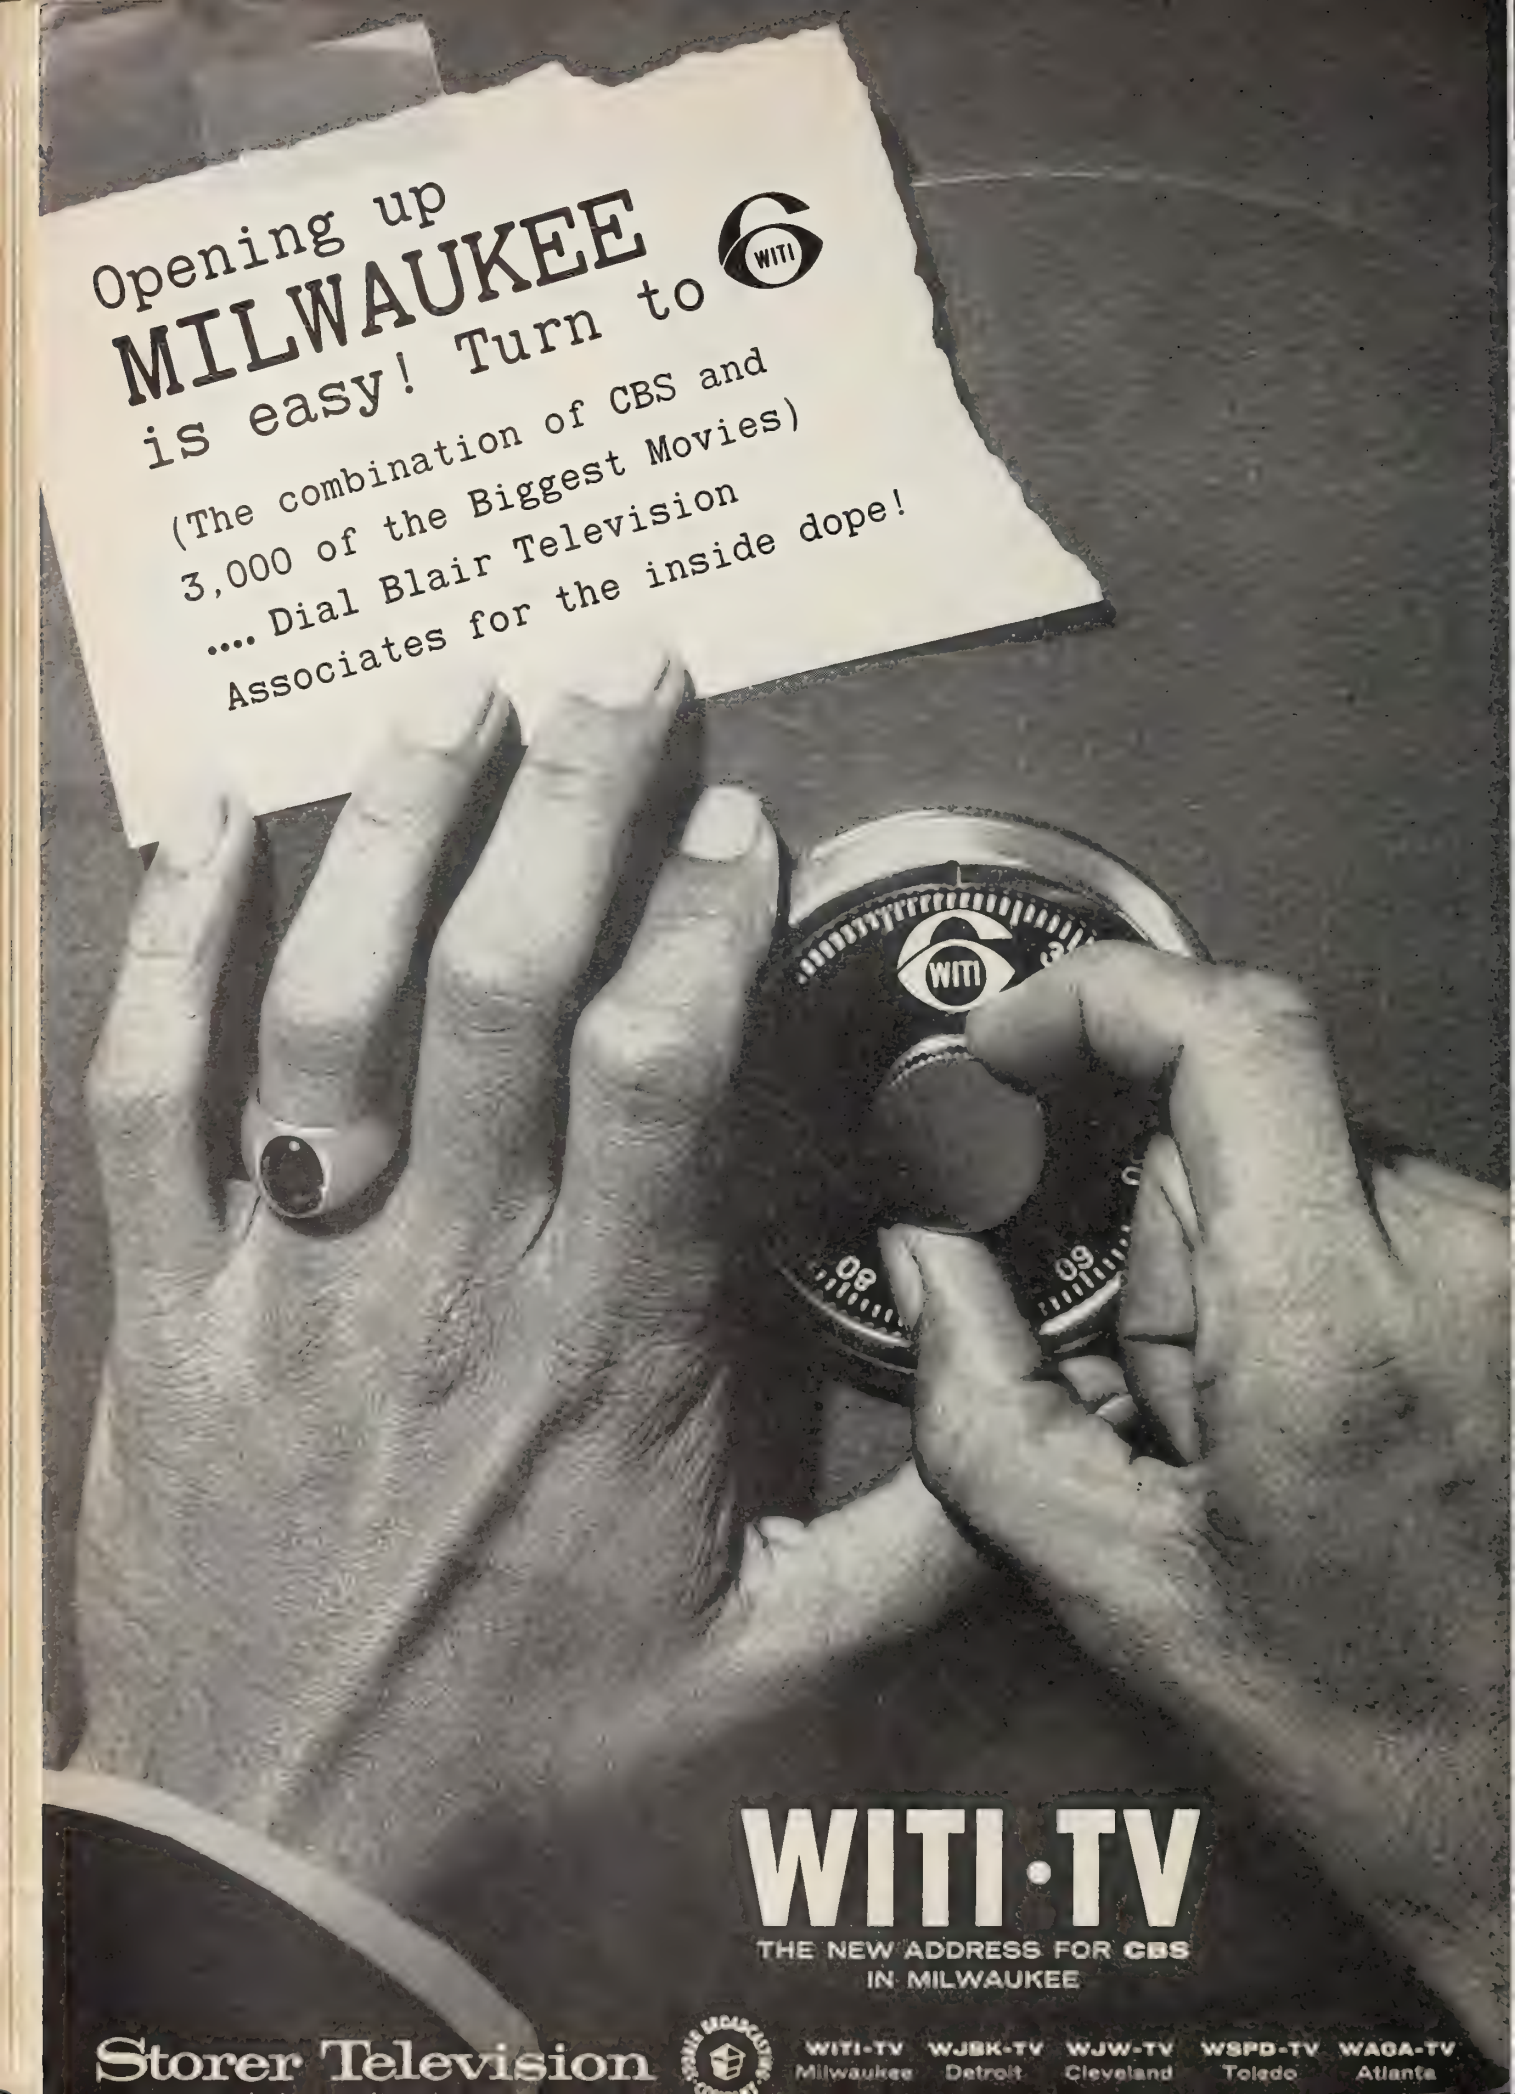
Brighter day • ABC-TV officials say they're pleased with advance renewals for daytime schedule, which for while during past season appeared bit rocky. General Foods, Lever Bros., Armour, Toni, Johnson & Johnson, Beech-Nut and Drackett have renewed and Block Drug is new advertiser for year's third quarter deemed critical period in daytime networking. Network also pinning hopes on two strips—*Bob Cummings Show* and *Restless Gun*—which will be scheduled next fall in daytime periods, claims increases in shares of audience during 1-4 p.m. period in past few months.

Another d.j. meet? • Although Todd Storz went on record during second annual disc jockey convention in Miami that Storz Stations would sponsor third convention next year if disc jockeys wanted it, he is reserving final decision until after huddle with record companies on how to control "entertainment" exuberance (story page 93). Meeting will be held with record officials in about a month. Like others at Miami Beach who were chagrined that competitive media caught radio personalities off-guard, Mr. Storz feels "we have to bend over backwards" in this profession "because a lot of attention is focused on us."

Bidding runs high • In rush to prepare for rash of specials as well as several high-budget regular series for next network season (see fall schedule, page 38, and MONDAY MEMO, page 23) is this behind-scenes development: there's intensive competitive bidding for name talent, story properties, producers, writers, etc. Bidding is said by some agency programmers to be more hectic than ever in tv's history. As one agency executive puts it about available talent: "Who's left who hasn't been at least approached for tv?"

July 15 is T-day • Put July 15 on calendar for significant announcement on tv allocations. That is date when FCC and OCDM conferees expect to be at point where they know where they are going on band swapping—to give more vhf to tv, relinquish uhf (and perhaps some vhf) to military. In fact, progress report may be publicly issued at that time. FCC Comr. Fred Ford, liaison with military and other government users, privately has reported to FCC that substantial progress is being made.

"The day we killed uhf" was comment of Comr. Robert E. Lee after FCC last Monday dropped new vhf station into Baton Rouge to replace existing uhf outlet there (story page 35). Comr. Lee, who has strongly advocated move of all tv to uhf, was joined by Comr. Robert T. Bartley in negative vote.



Chain reaction • What isn't readily apparent (except to lawyers and engineers intimately concerned) is that whenever FCC makes move in deintermixing area adding another vhf channel (as it did last week in Baton Rouge, for example), three, four and sometimes half dozen other cities are opened up for similar moves.

Prime example of this chain reaction is Fresno, Calif. When, as and if Commission makes decision in Fresno, this will also have impact on Bakersfield, Santa Barbara, San Luis Obispo, Sacramento, San Francisco and even Reno, Nev. In some crowded area, like New England, reshuffling circle is even more widening—for once a series of changes are made, new series of changes becomes apparent.

Wide, wide world • NBC appears unworried about fall, with its two top executives planning long trips this summer. President Robert Kintner is taking off on business-pleasure journey around the world in early July. Board Chairman Robert Sarnoff some time in August will leave on far eastern trek covering Hawaii, Japan and probably Hong Kong. Mr. Kintner is expected back before Mr. Sarnoff takes off.

Staff reappraisal • Resignation of economist Warren Baum, chief of FCC's Network Study Office Friday (he's joining World Bank staff on Europe and Africa), will give Commission opportunity to reappraise future of this organization. Office of Network Study was established in October 1957 following submission of Barrow report. Its function was to follow through on more than 30 recommendations made by Network Study Staff. Feeling in some FCC quarters is that with issuance of rule-making notices on option time, spot representation and current hearing on network program practices remainder of ONS work could easily be absorbed by regular Broadcast Bureau staff. This is based on view that Commission has agreed to maintain status quo on other recommendations, including changes in multiple ownership rule.

Waiting and watching • Don't count on Electronic Industries Assn. backing FCC's request for legislation requiring all tv receivers (moving in interstate commerce) to be all-band sets. At last month's Chicago EIA meeting, consumer products division voted to oppose FCC recommendation. It was decided to play it cool, however, and wait and see whether FCC's ideas are seriously taken up by anyone in Congress. FCC made these suggestions last April in report to Senate Commerce Committee; it also recommended that it be given authority to establish standards for tv receivers (BROADCASTING, April 27).

WEEK IN BRIEF

MR. POLK

Tv special: headaches, but big sales too • If anyone should know the ins and outs of the big special program, the difficulties in finding the time to slot it not to mention how to avoid product and program conflicts, it would be George Polk, vice president in charge of radio-tv programming and planning, BBDO, New York. Mr. Polk has been identified closely with specials handled by his agency in the past and next season the list is even longer. Why all the extra effort? Specials sell goods, Mr. Polk explains, writing in this week's MONDAY MEMO. Page **23.**

Action to add vhf stations • FCC tells staff to figure out how to add at least a third v to 21 biggest markets having fewer than three outlets. It also acts to put second v in Baton Rouge and Columbus, Ga. Page **35.**

Ready for tune-in • Tv network fall schedules are virtually complete. Few places for advertisers remain as sales keep up brisk pace. Rundown of program lineups, production costs, sponsors, producers, and unsold or unresolved periods provided for desk top use. Page **38.**

The movies and radio • United Artists is hep to radio, uses the medium frequently and with a grand design to attract the theatre audience. Page **42.**

Mx means mixed up • Fm broadcasters, holding two-day meeting, find their business beset with confusion and problems despite fm's all time high in circulation, service and popularity. Page **66.**

Equal time in perpetuity? • CBS asks FCC to prohibit a candidate who cross-files for nomination in primaries of both major parties from obtaining time, under Sec. 315, equal to that of each of his Democratic and Republican opponents. Page **78.**

The disc jockey convention was a ball • Sixty experts on 18 major panels for two full days blow a serious business-session note at the second annual disc jockey meet at Miami Beach. But sometimes it was hard to hear it in the "symphony" of sun, sand, and a 10-hour top-name talent show following the banquet May 30. Page **93.**

Admiral 'stays' with ship • Chicago electronics firm plans to re-enter color tv picture "all the way," starting shipments of 14 models in August. President Siragusa, who blamed networks a year ago for lack of public acceptance, acknowledges "color programs are increasing in number and popularity." Page **104.**

How do you put 'sell' in your tv commercial? • Some commercials are unusually effective while others even drive customers away. How do you tell them apart? Horace Schwerin, whose research firm has tested 10,000 commercials in the past 13 years, talked about both the good and bad elements of commercials for seven hours last week to 1,000 British advertising and tv representatives in London. Page **106.**

America's Leading Business Brokers expand to include Radio & Television Brokerage

"The only worthwhile transaction is one that protects the interests of both the buyer and the seller." This basic principle has been the credo of the David Jaret Corp. for over 36 years. Because of the strict adherence to this rule, the Jaret organization has gained a nationwide reputation that has enabled them to sell more businesses throughout the United States than any other brokerage firm.

Many influential and prominent business men, who are clients of the Jaret organization, are vitally interested in acquiring broadcasting properties to augment their well established and varied enterprises and to share in the financial opportunities afforded by this rapidly expanding medium.

In dealing through the David Jaret Corp., you can expect the maximum price possible for your property. Many of the Jaret organization clients are members of one or more stock exchanges, making possible unusual exchanges of stock between interested parties.

Whether you are a buyer or seller, it costs nothing to be informed.

LATE NEWSBREAKS APPEAR ON THIS PAGE AND NEXT • DETAILED COVERAGE OF THE WEEK BEGINS PAGE 35

National fm survey planned by Grey Adv.

National survey of fm broadcasting will be made soon by Grey Adv. Agency, New York, David Kimble, agency's senior account executive on NBC, told fm multiplexing seminar Friday (June 5), meeting at Old Point Comfort. Agency bills over $50 million in time and space, only $5,000 of which is now going into fm.

Mr. Kimble revealed survey project at advertising panel discussion (early story, page 66). He said 200-station sample of fm industry will receive questionnaires asking documented coverage date, advertising patterns, type of adve tisers, log information, audience composition research, frequency of listening, rate cards and similar material.

In discussing growing interest in specialized audiences and sectional buying Mr. Kimble said agency "will not buy an fm station for duplicated am audience." He described am as mass medium, adding, "we buy it by the numbers." He said Grey's philosophy is to reach given audience with as much impact of awareness and acceptance as possible. Agency's fm survey will be financed by General Electric, RCA Red Seal, Westinghouse Hi-Fi, Youngstown Kitchens and number of other clients.

Dan Hydrick, WGH-FM Newport News, Va., who presided at advertising panel and was seminar host, said many delegates proposed that fm multiplexing seminar be made annual event. Seminar programming included general fm station subjects as well as multiplexing topics.

Three accounts move

Rash of account switches erupted at week's end, paced by move of Best Foods' Nucoa margarine to Dancer-Fitzgerald-Sample, New York, from Guild, Bascom & Bonfigli, San Francisco. Nucoa, active in radio-tv spot, bills about $1.5 million. Chesebrough-Pond's Inc., New York, is announcing today (June 8) appointment of Norman, Craig & Kummel, New York, to handle Pond's Angel Touch and Pond's lipsticks. Both these products, previously at J. Walter Thompson Co., have had relatively little advertising support in recent years but it is believed budget will be raised to about $1 million. JWT will continue to handle other company products and has been assigned five new products, not identified, some of which are being test-marketed. Third account on move was Meade, Johnson & Co. (Pablum products), Evansville, Ind., which was acquired by Kenyon & Eckhardt, New York, from Keyes, Madden & Jones, Chicago.

Tv sweet tooth

Sharp expansion in its tv advertising budget to approximately $1 million is reported planned by New England Confectionery Co., Cambridge, Mass., which presently allocates about $400,000 to tv on behalf of Necco candies. Upgraded tv effort expected to put company's spot advertising in about 100 markets throughout country. Agency: C. J. La Roche & Co., New York.

All-channel tv set interest high at FCC

FCC's interest in all-channel tv receivers is being evidenced in 25-890 mc study underway during past few weeks. Commission counsel Arthur Gladstone has asked question twice, received one enthusiastic response and one cautious one.

Robert W. Galvin, Motorola president, replied he would "enthusiastically" support manufacture of 30-channel extended vhf-band receiver, stated he probably could market set for "essentially" same price as present 12-channel vhf-only set. Mr. Galvin declared himself in favor of 30-mc limit to permit simple tuner design.

FCC has plumped for 50-channel extended vhf television band, with frequencies to come from military. Subject is under discussion between FCC and Office of Civilian & Military Mobilization.

David W. Hull (Raytheon), president of Electronic Industries Assn., replied more charily. He said EIA would not comment because of possibilities of violating antitrust laws and also since association has not queried its receiver manufacturer members on subject.

Hearings resumed this week with witnesses continuing to present non-broadcast testimony. Broadcast representatives will not be called probably until end of next week.

Admiral sales push emphasizing color tv

Dealers were urged by Admiral Corp. executives Friday during national sales meeting in Chicago to "play an important role" in the "gradual but substantial" progression of color television. Ross D. Siragusa, company president, claimed that while monochrome tv will continue to dominate set sales, "color will add the deluxe touch" and holds great profit potential for dealers (early story page 104).

Ross D. Siragusa Jr., tv sales manager, claimed "consumer resistance" to color tv is "lowering" and that servicing difficulties have largely disappeared. He told dealers they can realize as much profit from lower priced color tv as higher-priced monochrome set sales. He also promised competitive pricing policy for Admiral with introduction of fall color campaign.

Alfred Medica, radio division manager, asserted dealers are missing a bet by not promoting radio receivers more heavily, citing resurgence of aural medium, while Carl Lantz, Admiral vice president-sales, said company will boost 1959-60 advertising budget 47%, mostly magazines (dealers will be supplied radio-tv commercials for local use). Admiral officials felt only a steel strike could hobble strong electronics sales activity in last six months of 1959.

NBC-TV renews Paar

Jack Paar, star of his own Monday-Friday 11:15 p.m.-1 a.m. show on NBC-TV, has signed long-term contract with NBC, Robert E. Kintner, network president, is announcing today (June 8). Starting July 6, effective date of new contract, Mr. Paar will be seen Monday-Thursday with special program or taped highlights of former Paar shows with guest m.c. slotted Fridays. He has been on late-night variety show for two years. Program now is carried by 135 stations.

Parkson L. A. office

Parkson Adv., New York, soon will establish Hollywood office, it was announced Friday by Ted Bergmann, Parkson president, who explains that more of agency's tv programs will be produced there next season. DON BLAUHUT, radio-tv director in New

CONTINUED *from page 9*

York office, will leave July 5 to be in charge of Parkson's West Coast tv production. Mr. Blauhut also retains present title.

ACLU's Sec. 315 view

Candidate's "use" of a radio-tv station's facilities should decide whether or not station's newscasts should be governed by Sec. 315 "equal time" provision of Federal Communications Act, American Civil Liberties Union declared today (June 8). Union made public letter to FCC Chairman John C. Doerfer asserting that "bona fide" newscasts should not be subject to equal time guarantees of Sec. 315 but "when any program, newscasts or otherwise, leans so heavily to one candidate as to constitute in fact a 'use' of the station, then Sec. 315 might legitimately be invoked by other candidates." Union's letter supplemented earlier ACLU communication to FCC on Lar Daly case, contending FCC was out of bounds in ruling Mr. Daly was entitled time to answer newscasts on Chicago stations.

Station sales

Following sales announced Friday, subject to usual FCC approval:

WDMJ-TV Marquette, Mich. • 52% sold by Frank J. Russell Jr. to Morgan Murphy interests for overall consideration involving more than $250,000. New licensee will be North Central Broadcasting Co., owned 52% by M&M Broadcasting Co. (WMAM and WMBV-TV Marinette, Wis.) and 48% retained by Lake Superior Broadcasting Co. present licensee. Among considerations: North Central assumes obligations totaling $102,000; M&M secures *Mining Journal* note amounting to $160,000. *Mining Journal* principally owned by Mr. Russell. Mr. Russell retains ownership of WDMJ Marquette. WDMJ-TV is CBS affiliate on ch. 6, began operating in 1956.

WNXT Portsmouth, Ohio • Sold by Marshall Rosene and associates to Leonard Feldman and A. R. Ellman for $185,000. Messrs. Feldman and Ellman own 50% of KRAM Las Vegas, Nev., and 50% of purchaser of KGMS Sacramento, Calif., now pending. WNXT is 5 kw day, 1 kw night on 1260 kc with ABC affiliation. Broker was Blackburn & Co.

WSTN St. Augustine, Fla. • Sold by Harry Powell and Lawrence Picus to Harry W. Critchlow, former owner of WBUT Butler, Pa., for $68,500. Messrs. Powell and Picus retain ownership of WOBS Jacksonville, Fla. WSTN is 250 w on 1240 kc with CBS affiliation. Transaction handled by Chapman & Co.

KBLO Hot Springs, Ark. • Sold by Richard Biddle and C. J. Dickson to Modern Broadcasting Corp. for $48,000. Modern Broadcasting is owned by Paul L. Myers Jr. and Stan Morris, both employes of WTVN (TV) Columbus, Ohio. Mr. Biddle retains his interest in WOWL-AM-TV Florence, Ala. KBLO is 1 kw day on 1470 kc with MBS affiliation. Broker was Chapman & Co.

KCLP Rayville, La. • Sold by Charles L. Planchard and H. Radcliff to Denver Brannen, for $33,250. Mr. Brannen owns KCIL Houma, La., and WDLP Panama City and WCOA Pensacola, Fla. KCLP is 250 w daytime on 990 kc. Broker: Chapman & Co.

KCSR Chadron, Neb. • Sold by William H. Finch to E. F. Huse Jr. and K. S. Huse for $40,000 plus $20,000 more for agreement not to compete for five years. Huses are principals in WJAG Norfolk, Neb., and *Norfolk News*. KCSR is on 1280 kc with 1 kw day.

KDWD (FM) San Diego, Calif. • Sold by Los Tres Diablos Broadcasters to E. Edward Jacobson, owner of storecasting company operating "Tune Time" background music service in Chicago and Los Angeles. Price: $16,000 cash. Wilt Gunzendorfer & Assoc. handled sale. KDWD broadcasts on 98.1 mc with 3.8 kw.

Two-station quiz

WCCO Minneapolis and KTHS Little Rock will join facilities to offer unique live program Thursday (June 11) featuring Democratic governors of two states answering questions of listeners. Minnesota Gov. Orville Freeman will be in WCCO studios while Arkansas Gov. Orval Faubus will answer questions from KTHS.

WKFM (FM) sues Pulse

Suit claiming discriminatory practices in conduct of radio surveys and $192,300 in damages filed Friday (June 5) against The Pulse Inc. in Chicago District Court by WKFM (FM) there. Complaint charges audience measurement firm intentionally omitted station's call from published report and thus tended to hamper WKFM's ability to compete for advertising.

• Business briefly

• Morton's Frozen Foods Inc., Rye, N.Y., concentrating on tv spot ID's this month is test marketing in several markets including Philadelphia and Washington. Ted Bates & Co., N.Y., is agency.

• Dromedary Co., Div. of National Biscuit Co., N.Y. (Dromedary mixes), entering various markets with daytime tv minutes starting today (June 8) and continuing through July 3. Agency: Ted Bates & Co., N.Y.

WEEK'S HEADLINERS

DICK SHEPARD, director of radio and television for Rumrill Co., Buffalo advertising agency, and in charge of broadcasting activities for Buffalo, Rochester and Utica, N.Y., offices, named general manager of WHAM Rochester, N.Y. He has headquartered in Buffalo since February 1958. Before joining Rumrill, he was with WBEN Buffalo sales department for six years. He entered radio in 1945 with WGR Buffalo. His appointment follows acquisition of WHAM by Genessee Broadcasting Co.

CHARLES C. (BUD) BARRY, president of NTA Television Network, resigns to join Young & Rubicam next month as vp in tv programming and talent, reporting to Peter G. Levathes, vp in charge of radio-tv department. Mr. Barry will have general supervision of programs and production as well as creative program development. Mr. Barry joined NTA Film Network last January after having served as vp in charge of tv at Lowe's (MGM-TV) since April 1956. TED COTT, vp in charge of NTA's stations, will assume all programming facets of NTA's network, it was reported, with plans progressing on NTA's new program tape service. ANTHONY V. B. GEOGHEGAN, senior vp and chairman of plans board at Y&R, appointed executive vp. Mr. Geoghegan has been with agency since 1924, one year after its founding.

For the Picture of Pictures . . .
TAPE IT RCA!

FOR THE

PICTURE OF PICTURES...

TAPE IT RCA!

The *picture's* the thing . . . You want your commercials to have the snap, sparkle and punch characteristic of superb pictures. By "taping it RCA" you get live picture quality. All the freshness, all the life-like detail comes back to you on RCA tape —thanks to advanced, built-in, quality-control features of the RCA TV Tape Recorder. Unlike older designs, this newest of TV Tape Recorders makes it easy to get and keep highest quality pictures. Your programs and commercials stand closest scrutiny because they are transcribed "live" from the very first breath. Compatible in every respect, the RCA TV Tape Recorder also has built-in features for superior color rendition that become an added bonus for monochrome. Ask your engineer to explain the picture-plus advantages of RCA's *electronic quadrature adjustment, sync regeneration, four-channel playback equalization,* and *built-in-test equipment,* or see your RCA Representative. For complete particulars, write to RCA, Dept. TR-2, Building 15-1, Camden, N.J. In Canada: RCA VICTOR Company Ltd., Montreal.

A CALENDAR OF MEETINGS AND EVENTS IN BROADCASTING AND RELATED FIELDS

(*Indicates first or revised listing)

JUNE

June 7-9—North Carolina Assn. of Broadcasters, Morehead Biltmore Hotel, Morehead City.

June 7-9—American Women in Radio & Television, board of directors meeting, Statler Hilton Hotel, Washington.

June 7-10—Advertising Federation of America, annual convention, Hotel Leamington, Minneapolis. An advertising "situation report" will feature Jean Wade Rindlaub, BBDO vice president; Fairfax M. Cone, chairman of Foote, Cone & Belding, and Sen. Hubert H. Humphrey (D-Minn.). Public service awards will be presented. Other speakers: David Susskind, executive vice president of Talent Assoc.; Mitch Miller, Columbia Records; James S. Fish, General Mills, presiding at the awards luncheon; John J. Ryan, AFA counsel.

June 8-9—Panel on spectrum allocations before Communications Subcommittee of House Commerce Committee.

June 9-July 1 — Communications Subcommittee of Senate Commerce Committee hearings on 13 pending bills amending Communications Act.

June 10—Second of two-meeting series, Special NAB Tv Public Information Committee, Washington.

June 10—Agency Broadcast Producers Workshop, Chicago Film Lab, Chicago, postponed from May 27. Speakers: Raymond Jones, AFTRA Chicago executive secretary, and Herbert Neuer, legal assistant.

June 11—NAB Freedom of Information Committee, Mayflower Hotel, Washington. Legislative developments relating to Sec. 315 of Communications Act (equal time) and secrecy in government will be considered. A Congressional leader is slated to be guest of committee.

June 12—Pennsylvania AP Broadcasters, Pittsburgh.

June 12-16—National Federation of Advertising Agencies, annual convention, Chatham Bars Inn, Chatham, Mass.

June 13—U. of Chicago Communications Dinner, Quadrangles Club, on campus. Louis G. Cowan, CBS-TV president, will speak on "Television and the Arts." Other speakers are Leonard Kent, Needham, Louis & Brorby, and Alec Sutherland, U. of Chicago educational broadcast chief.

June 13—UPI Broadcasters Assn. of Connecticut, Sun Valley Acres, Meriden.

June 13—UPI Broadcasters of Pennsylvania, Penn-Harris Hotel, Harrisburg. Gov. David L. Lawrence, principal speaker.

*June 13-14—National Federation of Advertising Agencies, Chatham Bars Inn., Chatham, Mass. Kenneth Goesbeck, agency management consultant, will discuss agency problems. NFAA has membership of 22 agencies. James W. Clark, of Gerth, Brown, Clark & Elkus, San Francisco, is president.

June 13-14—UPI Broadcasters Assn. of Texas, annual meeting, Hilton Hotel, San Antonio.

June 13-14—Louisiana-Mississippi AP Broadcasters Assn. Jacksonian Motel, Jackson, Miss.

June 14-17—National Industrial Advertisers Assn., national convention, Fairmont and Mark Hopkins Hotels, San Francisco.

June 15—NAB Tv Code Review Board, NAB hdqrs. Washington, changed from June 12.

June 15-16—Tv medical symposium, Naval Medical Center, Bethesda, Md., for armed forces and medical schools. On agenda: Color microscopy, medical and dental tv systems; tv cameras; tv distribution; projectors; lighting; recording; tv costs and planning.

June 15-19—NAB Combined Boards of Directors, NAB hdqrs., Washington. Committee meetings and indoctrination of new directors June 15-16; Tv Board June 17; Radio Board June 18; joint boards, June 19.

June 15-26—Summer workshop for communications librarians, Syracuse U. School of Journalism and School of Library Science, Syracuse, N.Y.

June 16, 23-24—FCC panel before House Legislative Oversight Subcommittee.

*June 17-19—American Marketing Assn., 42d national conference, Statler Hilton, Cleveland. Topics: Marketing in the 1960s, consumer and industrial; marketing research breakthroughs; public utility marketing; defense, chemical, agricultural marketing; federal statistics and the 1960 decennial census; teaching tools; marketing management tools; tv as a selective medium (Leon Arons, vice president, Television Bureau of Advertising); consumer behavior.

June 17-19—Virginia Assn. of Broadcasters, Tides Inn, Irvington.

June 17-20—National Assn. of Television-Radio Farm Directors, Hotel Statler, New York. Farm broadcasters will carry their "sell farm broadcasting" to Madison Avenue.

June 17-19—Eleventh annual meeting Catholic Broadcasters Assn., Pick Fort Shelby Hotel, Detroit. Significance of the encyclical "Miranda Prorsus" will be reviewed. Speakers include Most Rev. John King Mussio, bishop of Steubenville and Episcopal moderator of association; His Excellency the Most Rev. Bishop Fulton J. Sheen; Donald H. McGannon, president of Westinghouse Broadcasting Corp., discussing "Tv in the United States, Responsibilities and Opportunities"; Arthur Hull Hayes, CBS Radio president, speaking on "The Future of Radio in a World of Television"; Ed Sullivan, CBS-TV m.c.; Franklin Dunham, radio-tv chief, U. S. Office of Education, speaking on "The Social Impact of Television."

June 18—Senate Commerce Committee hearings begin on S 1828, which amends Sec. 315 (equal time provision) of the Communications Act.

June 18—Maryland-D.C. Broadcasters Assn., Stephen Decatur Hotel, Ocean City, Md.

June 18-20—Florida Assn. of Broadcasters convention, DuPont Plaza Hotel, Miami.

June 18-21—Pet Milk's second annual Grand Ole Opry talent contest finals, Dinkler Andrew Jackson Hotel, Nashville, Tenn. Participating in event, now building up at local station level, are WSM that city, Keystone Broadcasting System and its affiliates and Gardner Adv. Co., Pet Milk agency. Station managers may compete for

"JAXIE" Salutes

LUZIANNE TEA

The William B. Reilly & Co., Inc. has joined the Honor Roll of Advertisers who chose WFGA-TV to carry its sales messages to more than a quarter-million Florida-Georgia TV homes. Luzianne Tea is using a saturation spot schedule, and these spots—combined with WFGA-TV programming—will provide top selling power for the William B. Reilly & Co., Inc.

"Jaxie" is proud to have Luzianne Tea and the Walker, Saussy advertising agency on its growing list of advertisers.

MONDAY MEMO

from **GEORGE POLK,** *vice president in charge of radio-tv programming and planning, BBDO, New York*

Tv special: headaches, but big sales too

Almost everyone associates Pat Weaver with the spectacular and yet, while Pat was running NBC, all the networks combined programmed less than 50 specials a season. Next season, however, it is estimated that there will be about 200 specials on the networks. What has caused this tremendous increase in the use of specials? And what new problems have come about because of this increase?

In the first place, we must assume that they work. If renewal is an indication of success, our experience is that indeed they do work. The du Pont *Show of the Month* will begin its third season in September. Rexall has increased its number of specials from two to six a year. Philco has stepped up its use of specials. Westclox, starting with "Wonderful Town," and then "Meet Me In St. Louis," will sponsor half of seven 1½-hour shows next season. General Mills is entering the field for the first time. In addition, we have some very definite evidence of sales results which can be traced directly to specials.

Proving by Selling • Specials have proven their ability to sell all kinds of items ranging from low-cost watches and drug products to high-ticket automobiles. And they can sell ideas or corporate image as well. The users of specials include some of the biggest and most analytical buyers of tv, among them General Foods, General Mills, Revlon and P&G.

Specials are actually a most flexible use of television. You can select the mood of your show and, of course, the program itself, the time of year, the time of evening, the cost of the show and the number of shows you buy, whether it be only one or ten.

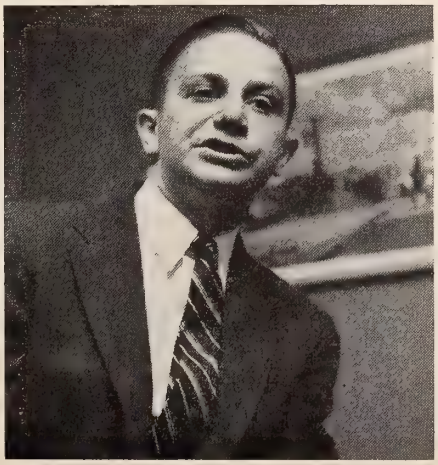
They are within reach of the smallest advertiser, who can be big when he is on tv by buying an important property in the primest of time. He can have real pride in his television effort. He can squeeze every penny out of his buy by promoting it to the consumer as well as the trade, to say nothing of the merchandising possibilities and hypo-ing effect it can have on his sales force. He can repeat this effort as many times as his budget will allow and use it in combination with other forms of tv or other media. And he can schedule it at his peak selling season, thus making his dollars work at maximum effectiveness.

Popularity Brings Problems • However, due to the increased interest in specials, they have become much more difficult to put on. A great number of the bigger-name performers have either been tied up exclusively with advertisers or are committed to shows which makes them unavailable for yours.

Likewise, good book properties are becoming more difficult to find, many having already been done on tv. Others are holding out for higher prices.

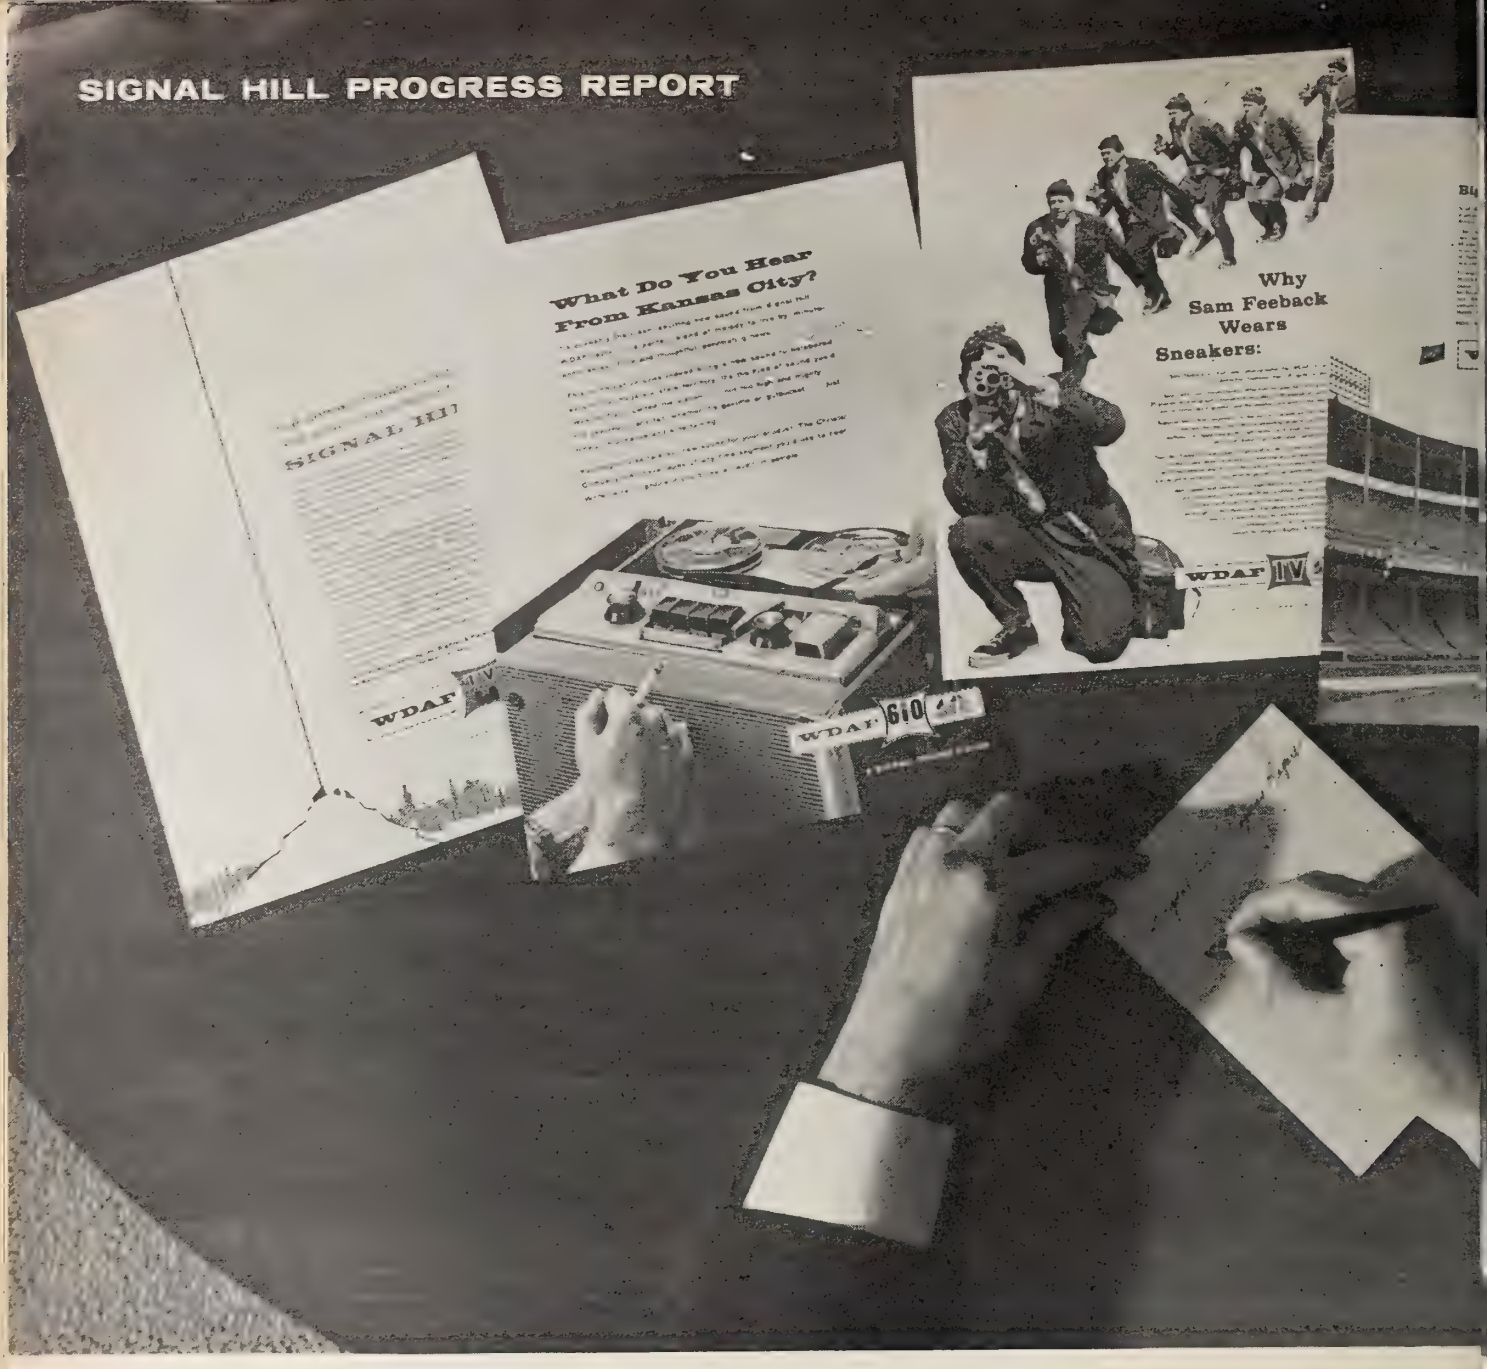
Not only does the number of specials make it more difficult to compete for attention program-wise, but, also, the difficulty in clearing time has become almost unbelievable. NBC and CBS are completely sold out on preemptable time. Even the two regular hour periods NBC has set aside for specials, 8:30 p.m. Friday and 8 p.m. Sunday, are almost all spoken for, and ABC is reluctant to preempt before the first of the year.

Besides the scarcity of time, there are many complications which make the selection of time for a special much more difficult than most realize. First, you want a period of high sets-in-use and against competition that is not unusually tough. Particularly, you don't want to be against another special. Then, you must make sure that enough stations can be cleared live, as very few buyers of specials will accept delays. Then if you have an adult dramatic program, you don't want an early time where the dial is controlled by kids, so that eliminates all the 7:30-9 p.m. periods, which narrows the field.



Self-Competition Hurdle • No advertiser wants to put a special against one of his own regularly scheduled programs or against any one of the parent company's programs which can be numerous in the case of the large buyers, particularly the automotive advertisers who are all over the networks and are big buyers of specials as well. Also, most advertisers have their individual preferences or taboos.

The network does not like preemptions of the same period (they are allowed two preemptions by contract) too close together, nor for that matter does the advertiser like being preempted, and understandably so. In the case of programs sponsored alternately by different advertisers, which has become the norm today, you must make sure to preempt each advertiser only once.



Where hour-and-a-half specials are to be cleared, regularly scheduled hour programming on the networks eliminates many periods. For example, Sunday night next season NBC will have three hour programs back to back, and 1½-hour preemptions between 7 and 10 p.m. can't be considered.

That 'Other Brand' • Of course, the network cannot preempt a period occupied by a competitor and in the case of hour-and-a-half preemptions (involving as many as three half-hour shows) this can be quite a problem, particularly with multi-brand advertisers who are generally protected on their entire line of products, whether they are all advertisers or not.

So you can see that where once all that was necessary was to select any one of many fine specials being offered and to approach the networks for time (all of which were clamoring for this exciting kind of programming), today it is quite different. And while specials have caused tremendous headaches for the networks, agencies, and advertisers, they are probably the best thing that ever happened to the viewer, to say nothing of the advertisers using them successfully.

George Polk b. New York City, attended Hotchkiss School and graduated from Pomfret School and Erskine College 1950. Joined BBDO in 1950 serving first in media research, then as timebuyer and subsequently becoming head timebuyer of the media dept. Moved to radio-tv dept. at the agency as liaison with media in 1954. He later was put in charge of radio-tv programming and planning, being elected a vice president in 1958. Mr. Polk generally is very much involved with tv specials at BBDO, an agency whose clients number among the top group of advertisers sponsoring specials on the networks next season.

If you're a regular customer at this stand, you've seen these monthly progress reports to the trade. They've kept you aware of some of the important changes taking place on the Kansas City communications scene.

The changes began a year ago when National Theatres assumed ownership of WDAF, Kansas City's first radio and television stations. Both were blessed with overwhelming power which assured penetration into every nook and cranny of the fat Heartland territory. We christened the property "Signal Hill", and tackled the job of building a sight and a sound to match that power.

That job affected every phase of our operation. It involved literally thousands of decisions and unshakable determination to deliver an

entirely new product to Kansas City audiences. The payoff for us has been the greatest advertising boom and steadiest audience climb in the stations' 37-year history.

It's been a big year for Heartland listeners and viewers, for our advertisers and for us. But if our first year on Signal Hill was big, wait till you see what follows.

WDAF SIGNAL HILL RADIO & TV

in Boxing...

it's Marquess of Queensberry

in TV and Radio ...

IT'S BROADCASTING YEARBOOK!

In the squared circles of prizefighting, the 8th Marquess of Queensberry gets credit for establishing authoritative standards upon which today's rules of boxing are based. More competitive than anything this 19th Century Englishman ever knew, however, is our business of broadcast advertising. To enter the ring of television or radio, you have to **know** what you're doing — or else. That's why so many busy people look to **BROADCASTING YEARBOOK** as the authoritative standard for latest facts about these twin media (and **keep** looking, all year 'round, whenever they need information). The 1959 **BROADCASTING YEARBOOK** soon goes to press, packing a power-punch of data between its covers that will serve the needs of over 16,000 subscribers in broadcast advertising. If **you** have some facts of your own for them, **your** message will enjoy a guaranteed gate of profitable attention month after month. There's still time before the first round bell: deadline for proofs, July 1; final deadline, July 15. **Call or wire collect to reserve space.**

'Make Believe Ballroom'

EDITOR:

. . . Martin Block was not the first disc jockey nor did he originate the title *Make Believe Ballroom* (EDITORIAL, May 25, page 116).

Both belong to Al Jarvis. I was manager of KFWB Hollywood in 1934 when Al Jarvis came to me with an idea for a show. It was called *Make Believe Ballroom.* It was then running on another Los Angeles station and Jarvis thought it would do better on KFWB. . .

After several months on the air we found our salesmen could not sell time on the show, believe it or not, and Jarvis asked me to find someone to put the show on and he would go out and sell it. My production manager, Jack Joy, hired Martin Block for the replacement. Later the two had a misunderstanding and Block left and took the idea and the title to New York.

Jarvis tried many times unsuccessfully to make Block relinquish the title but legally could not do so.

Keeping in touch

EDITOR:

. . . Both the American and European staff . . . read BROADCASTING avidly to

It's the care we give the "inner tube" that adds the extra hours

The long-life characteristic of the RCA-892-R is due in no small way to the constant attention we pay to the details of the "inner tube". Manufacturing techniques, for example, have kept pace with the experience we have gained in building broadcast power tubes for a generation. Design refinements have been evolved—through our continued effort to make a good tube even better.

Type 892-R is another typical example of RCA time-proved design that is paying dividends in lower tube cost per hour of operation—and uninterrupted program time for stations everywhere.

For long-term power delivery, always specify RCA Tubes. Your RCA Industrial Tube Distributor handles the entire RCA line.

- **A** All glass seals—microscopically inspected
- **B** Grid and Support Assembly "vacuum-fired" at more than 2000° F to assure maximum freedom from gas
- **C** Sag-proof Filament Supports—to prevent stress on filament strands and to improve life
- **D** Interlocked-Fin Radiator—for improved heat radiation
- **E** Filament material controlled for internal grain structure—assures superior strength
- **F** Entire Tube is "spot-knocked" at tens of thousands of volts to reduce internal leakage
- **G** Stress-free Glass Bulb—individually inspected with polariscope
- **H** Sandblasted Grid Arm—torsion-tested to insure high strength

Don't change fm

EDITOR:

My copy of BROADCASTING June 1 just arrived and I spotted the article on Rep. Oren Harris (D-Ark.) [spectrum and allocations study is scheduled this week]. It was factual and quite wonderful . . . excellent reporting . . .

Having just returned to Arkansas from KIDO Boise, and while not on the political scene, the people of Clark County and the town of Arkadelphia are certainly proud of Mr. Harris.

The spectrum study, I'm certain, will be conducted in a very fair manner and impartial viewpoint.

One hope is that the fm band remains right where it is now, without any change whatsoever, in order to give fm the opportunity it needs to become an even greater service.

Vol. 56 No. 23

FCC GIVES THE SIGN: V FOR TV

It acts to put second v's in Baton Rouge, Columbus, Ga.; It orders staff to plan third vhf's in 21 major markets

The FCC last week committed itself to take the low road in television—vhf.

In two significant actions it ordered additional vhf channels into what have been considered markets with a high degree of uhf saturation—Baton Rouge, La., and Columbus, Ga.

The Commission also ordered its staff to work up engineering and rulemaking orders to add at least one vhf channel to each of the 21 biggest markets now having fewer than three v's.

The order placing a second vhf in Baton Rouge was made public last week. The order adding a second v in Columbus is expected to be issued this week or next.

Tighter Fit • No announcement was made of the FCC instructions to the staff in the attempt to add vhf facilities to the 21 major markets. It was learned, however, that the Commission tentatively was thinking of reducing mileage separations between stations in the crowded eastern half of the U.S. in order to squeeze in extra v's.

The FCC was said to have told its staff it could contract mileage separations in the East by as much as 40 miles, but no more.

Present regulations require not less than 170 mile co-channel separations in what is called Zone I. The Commission said it would accept deviations from this minimum, but set a floor of 130 miles below which it would not go.

The FCC's corollary steps in its move to add vhf channels to intermixed markets took two turns:

• It ordered an extra channel into Baton Rouge, La. This came from Hattiesburg, Miss., and gives Baton Rouge two vhf channels.

• It added another vhf channel to Columbus, Ga., giving that city also two vhf outlets.

In both these moves no deviation from present separation requirements was necessary.

• To be issued concurrently with the Columbus, Ga., order will be a proposal to move ch. 8 from Selma, Ala., to Montgomery, Ala., giving Montgomery two v's.

The Commission's decision to move forward under its interim plan to add vhf channels to top tv markets in order to equalize competitive facilities so that there are at least three vhf outlets in such cities (BROADCASTING, April 27) came at a special meeting last Monday.

Not Unanimous • By a vote of 5-2 (with Comrs. Robert T. Bartley and Robert E. Lee dissenting, it is understood), the Commission told its staff to check out the top 75 markets and add additional vhf frequencies to those cities having fewer than three vhf assignments.

This culling resulted in a list of 21 cities. They are:

Birmingham, Ala.; Bakersfield and Fresno, Calif.; Jacksonville, Fla.; Louisville, Ky.; Baton Rouge and Shreveport, La.; Flint - Bay City - Saginaw, Grand Rapids-Kalamazoo and Jackson-Lansing - Battle Creek - Parma - Onondaga, Mich.; Binghamton, Rochester, Syracuse, N.Y.; Charlotte and Raleigh-Durham, N.C.; Dayton and Toledo, Ohio; Johnstown - Altoona, Pa.; Providence, R.I.; Wheeling (W.Va.) - Steubenville (Ohio); Knoxville, Tenn.

The Fresno and Bakerseld situations would not require any changes in the present mileage separations.

In Fresno there are a number of proposals to add vhf channels. Originally the FCC proposed to move ch. 12 (KFRE-TV) out of Fresno, to make it all uhf. Ch. 12 was to go to Santa Barbara. This has been contested. Meanwhile various proposals were made to add two or three vhf channels to make Fresno and Bakersfield all-vhf markets. One proposal is to add chs. 2, 4, 5 and 7 to Fresno and chs. 8 and 12 to Bakersfield. Before this can be done, however, arrangements must be made with Mexico. The Commission has undertaken to correlate this with Mexico.

An alternative proposal for Fresno is to retain ch. 12 there. This would permit the addition of only two vhf channels to Fresno and would permit the allocation of ch. 8 only to Bakersfield.

Baton Rouge Shuffle • In the Baton Rouge-Hattiesburg deintermixture, the Commission moved ch. 9 from Hattiesburg to Baton Rouge, giving that Louisiana city chs. 2, 9 and four uhf allocations. It left Hattiesburg with ch. 17. Comrs. Bartley and Lee dissented.

Hattiesburg's ch. 9 is being operated by WDAM-TV, controlled by WDSU Broadcasting Corp. (WDSU-AM-FM-TV New Orleans). WDSU also owns ch. 28 WAFB-TV Baton Rouge. When the move is consummated, WDSU said it would move WDAM-TV along with

The cities tagged for at least three v's

ch. 9 from Hattiesburg to Baton Rouge and relinquish its ch. 28 station there.

Because WIBR Baton Rouge objected to the assignment of the new Baton Rouge ch. 9 to WDAM-TV without a hearing (WIBR said that as soon as ch. 9 is allocated to Baton Rouge it would file an application for this frequency), the FCC authorized WDAM-TV to continue operating on ch. 9 in Hattiesburg until it was determined whether a hearing for ch. 9 in Baton Rouge would be required.

The Commission in its report on the Baton Rouge-Hattiesburg order, pointed out that Hattiesburg would not lose a vhf outlet. This is because, the FCC said, ch. 7 WTLM (TV) Laurel has pending an application to move its transmitter site to the present WDAM-TV Hattiesburg site. This would permit WTLM to serve both Laurel and Hattiesburg, it was noted. This would be true even at WTLM's present transmitter site, it said.

Possible Hyphen • The FCC also pointed out that there is a request to make Houma, La., a part of the Baton Rouge tv market by hyphenating the two cities into a Baton Rouge-Houma market. If this is done, the Commission noted, it would give this hyphenated market three vhf channels. It pointed out, however, that before this was done mileage separation problems between ch. 11 Houma and ch. 11 Meridian, Miss., and ch. 10 Lafayette, La., would have to be solved. The ch. 11 permit in Houma is held by St. Anthony Television Corp.

In its decisional paragraph in the Baton Rouge case, the FCC's viewpoint was expressed in these terms:

"After carefully considering all of the comments and reply comments in this proceeding, we are of the opinion that ch. 9 should be shifted from Hattiesburg to Baton Rouge, as petitioner requests. This move would result in the Baton Rouge area becoming a two-vhf station market, and would thus improve the opportunities for effective competition in the area. It is also noted that a vhf station operating at Baton Rouge on ch. 9 would provide service to more than 250,000 persons who do not receive service from the uhf station now operating there (WAFB-TV). Some 16,389 persons would receive their first Grade B service from such an operation, and 66,443 persons would receive their second Grade B service. It also appears that 56,193 persons would receive Grade A service for the first time, and that an additional population, lying immediately to the north of the Grade B contour of a Baton Rouge ch. 9 station operating as proposed, would receive their strongest service from such an operation. . . ."

WDSU filed the original request to make the changes in the Baton Rouge-Hattiesburg area.

Lee Dissent • Comr. Lee in his dissent in the Baton Rouge decision charged that the move was a "blow to uhf broadcasting and to the manufacture of uhf receiving sets." He called it "short-sighted."

After pointing out that uhf receiving set saturation is high in Baton Rouge, Mr. Lee suggested that a better solution would be to delete ch. 2 from Baton Rouge (or reserve it for educational usage). He concluded:

"Adding a second vhf channel with little prospect for adding a third—to say nothing of a fourth or fifth, which is entirely feasible in the uhf—denies the city and surrounding areas of television service for generations to come."

Comr. Bartley did not issue a written dissent. He has opposed interim moves because he fears they may prejudge a permanent solution.

Shift in Columbus • The Columbus, Ga., case will involve dropping in ch. 3 and moving ch. 9 from Dothan, Ala., to Columbus. Ch. 4 will be moved from Columbus to Dothan. Ch. 4 in Columbus is now held by WRBL-TV.

The allocations moves are all in line with the Commission's majority decision last April in which it told the Senate Commerce Committee that the ideal solution to the vhf-uhf problem is an extended vhf television service of 50 channels, including either the present 12 channels or beginning at ch. 7.

The FCC said then that as an interim measure it believed that an attempt to allocate at least three vhf channels in major markets should be made—even with mileage separations less than required in present rules.

The expansion of the present vhf television bands is now under discussion with the Office of Civilian & Defense Mobilization. The negotiations—which in essence would swap tv's uhf frequencies for some of the military's vhf frequencies— are at a point where a technical study group is at work.

New spectrum witness

One name has been added to the list of participants in the House Communications Subcommittee panel on the radio spectrum today and tomorrow (June 8, 9). Lester Lindow, executive director of the Assn. of Maximum Service Telecasters, will participate on behalf of AMST along with the previously announced Howard Head, according to Rep. Oren Harris (D-Ark.), chairman.

Other participants in the two-day panel, including FCC Chairman John Doerfer and Comr. Robert Bartley, were announced 10 days ago by Rep. Harris (BROADCASTING, June 1).

FALL TELEVISION LINEUP: PART II

Networks are on brink of complete sell-out for new season

With summer still two weeks away, the tv network fall lineups are virtually firm and indicate an upcoming season of high-budgeted live programs along with a full diet of filmed series.

As compiled only seven weeks ago, the regularly scheduled nighttime network programming on the networks came to an estimated record $5.5 million a week (BROADCASTING, April 20).

The selling season has lost its momentum, not for lack of advertiser demand, but rather because of a fast-fading availability of time slots and program or part-program buys.

Sellout Close • Depending on which way the scorecard on network sales is kept, any one of the three networks could be considered to be on the verge of sellout.

CBS-TV is the closest to SRO, according to information available, it has yet to resolve which of several advertisers will fall into two different hour-long shows, and one half-hour period which has been sold to Oldsmobile but for which the program is not yet set (*The Dennis O'Keefe Show* has been purchased by Oldsmobile but is not yet firm for CBS-TV).

NBC-TV has 1 and ½ hours to fill with programming and some pieces of other programs still to be settled. The three half-hours to be etched in are Monday at 7:30-8, Thursday at 7:30-8 and at 10:30-11, the latter to be occupied apparently by either *Masquerade Party* or *Dollar a Second.* Three new one-hour action shows — *Laramie, Bonanza* and *Riverboat*—are being offered to advertisers on a rotation basis with cross-plugging. They're designed for six one-half hours to be purchased by a total of six sponsors. But NBC-TV may drop this plan and sell the time conventionally if the rotation plan is not feasible.

Aside from the 1 and ½ hours not yet programmed and the three hours reserved for possible rotation, NBC-TV has 1 and ½ hours unresolved. These are one-half of *Deputy* (expected to be picked up by Liggett & Myers through McCann-Erickson) on Saturday, 9-9:30, of *Troubleshooters* on Friday, 8-8:30, and of *Love and Marriage* on Monday, 8-8:30. Also to be settled is *Five Fingers,* slated for Saturday, 9:30-10:30.

Some Gaps Showing • There are gaps still showing in ABC-TV's lineup which total up to 2 hours not yet firm in programming and another 3 and ⅓ to resolve with advertisers.

Roughly the unfilled 3 and ⅓ hours include a half of the hour-long *Alaskans* on Sunday, a sixth of *Bourbon Street Beat* and two-thirds of *Adventures in Paradise,* both one hour and on Monday, two-thirds of the hour-long *The Untouchables* on Thursday, a half each of the hour-long *Disney* and the half-hour *Black Saddle* on Friday, and a third of the half-hour *Leave It to Beaver* on Saturday. The 2 hours to be programmed: 10:30-11 on Tuesday and Thursday, and 7:30-8 on Wednesday and Thursday. Two programs mentioned for the 10:30-11 periods are *Tombstone Territory* and *Third Man.* In the Monday lineup, General Electric sponsorship of *Mike Kovac—Man With a Camera* through Grey still was considered tentative last week.

Among the high-budget programs set for the fall—not counting the blocks of specials slated for Friday and Sunday nights on NBC-TV and still others to be slotted in lineups of the other networks—are these:

Kraft's *Music Hall* which will be Perry Como's vehicle Wednesdays on NBC-TV; Plymouth's full sponsorship of the Monday *Steve Allen Show* on NBC-TV; Revlon's 15 CBS-TV shows on Thursdays; Ford Motor's new Tuesday series on NBC-TV; Chevrolet's Sunday Dinah Shore vehicle on NBC-TV; the *Playhouse 90* series on CBS-TV on Thursdays; and Colgate-Palmolive's full alternate hour of *Ed Sullivan* (CBS-TV) on Sundays and *Perry Mason* (CBS-TV) on Saturdays. This contract alone runs to $12 million in billings in one of tv's largest annual deals (see story below).

For complete network lineup for fall, see pages 40 and 41.

Colgate, CBS-TV in $12 million buy

Colgate-Palmolive Co. has plunked down an estimated $12 million in gross billing for the alternate hour full-sponsorship of two CBS-TV weekend nighttime programs starting in October.

As a result, C-P could lay claim last week to being "the first company to sponsor hour-long shows on a regular basis on both Saturday and Sunday, two of the peak viewing nights of the week."

The programs are *The Ed Sullivan Show* (Sunday, 8-9 p.m.) and *Perry Mason* (Saturday, 7:30-8:30 p.m.).

The contract, announced by C-P's Edward H. Little, board chairman and president, and Louis G. Cowan, CBS-TV president, also marks the return of the advertiser to the Sunday night time period it once occupied for several years on NBC-TV with the *Colgate Comedy Hour.*

Ted Bates & Co., New York, is Colgate's agency on both shows.

Alternate sponsor of *Ed Sullivan* on CBS-TV is Eastman Kodak (through J. Walter Thompson). On *Perry Mason* the alternate hour will be shared by several advertisers (see network schedule, page 41). C-P's *Sullivan* entry also marks Ford motor's exit. At least one of its many divisions had been historically a *Sullivan* sponsor.

American Dairy Assn. looking for tv show

What to sponsor on network tv this fall? That was an unanswered question after a recent Chicago meeting of the American Dairy Assn.'s advertising-merchandising committee.

The organization, which had placed an order for a second Lawrence Welk series this fall, found itself dangling without network tv exposure when plans for the series were dropped. ABC-TV will carry only one Welk program this fall—*Lawrence Welk's Dodge Dancing Party,* Sat. 9-10 p.m. (BROADCASTING, June 1).

Complicating American Dairy's problems are unusually early fall network buying commitments, the need to identify itself with a proper program format, and a reluctance to associate itself as co-sponsor with a client whose products it may regard as incompatible with its own.

The advertising committee delayed action on network availabilities for the present. While spokesmen indicated earlier that American Dairy might stay out of network tv for at least the first 13 weeks of 1959-60, committee members reportedly favored further program consideration in the next few weeks.

The Chicago salesman who calls on 3,000,000 different homes a week...

EXPENSE ACCOUNT: 28¢-PER-THOUSAND! Difficult for the ordinary drummer. *Easy* for WMAQ! Any advertiser who buys a full-rotation, morning-afternoon-night, schedule on WMAQ can expect to reach almost 1½ million different homes during an average day—34.6% of *all* Metropolitan Chicago radio homes. In an average week, his selling messages will be heard in more than 3 million different radio homes—70.6% of those in Greater Chicago. *All for as little as 28¢-per-thousand-homes!** ■ Don't knock yourself out beating down the doors in this station's market. WMAQ will be happy to open them for you!

A FURTHER LOOK AT FALL TV SCHEDULES

That wallet-warming sign, SRO, is about to be posted by tv networks on their 1959-60 nighttime schedules. The accompanying table (latest update of BROADCASTING's April 20 survey) shows programs, production costs, packagers and the few remaining availabilities. Periods unsold to date carry the notation "available." Programs listed as "unassigned" indicate sponsors have been signed, but specific shows or times have not yet been decided upon. Program times and sales information were supplied by the respective networks. Production costs, although not official, were estimated by BROADCASTING on the basis of the best information available from a number of sources. Program times are in terms of current New York time on date of broadcast. Agencies handling accounts are listed in parentheses ( ); production firms are in brackets [ ]; starting dates indicate commencement date of fall cycle for new series. Where no date is shown, starting date is currently undetermined.

SUNDAY

	ABC-TV	CBS-TV	NBC-TV
7:30	*Maverick* $95,000 Kaiser Drackett (Y&R) [Warner Bros.] Continuing 9/20	TBA Oldsmobile (Brother) [TBA]	*Riverboat* (7-8 p.m.) $80,000 Unassigned [Revue]

10:30		*Markham* $37,500 Schlitz (JWT) [Marada Prod. with Revue] Continuing 5/2	*It Could Be You* $30,000 Pharmaceuticals (Parkson) [Ralph Edwards Prod.]

UA WEDS FILMS WITH RADIO

Heavy spot schedules promote new releases

On radio stations in selected areas in the country this week, Frank Sinatra will be heard plugging "A Hole in the Head."

The radio commercials include some which open and close with star Sinatra singing a few bars from two hit tunes, "High Hopes" and "All My Tomorrows," featured in his new motion picture.

On June 25, William Holden, who stars with John Wayne in a Civil War themed motion picture, "The Horse Soldiers," will be at ringside and on network radio at the Floyd Patterson-Ingemar Johansson heavyweight title bout.

These incidents illustrate the extent of radio-orientation in United Artists Corp.'s advertising program for the multi-million-dollar motion pictures it releases.

Deep in Texas • In Texas this month (before the release date of June 18), still another UA picture, "Hound of the Baskervilles," will be the subject of a saturation radio campaign covering the entire state (the picture will be booked in 320 theatres in Texas). In this compaign, radio will be used at a 2 to 1 ratio over newspapers.

On the average, UA's advertising department in New York (which initiates and follows through on the massive advertising program) reports as many as five and as few as two or three feature films released each month for theatrical showing by United Artists. Each gets a full treatment of radio support.

Very little of the money is applied nationally—an exception being the heavy-weight bout coverage probably on ABC. Nearly all of the support is co-op money. UA in New York prepares the commercials and sends them to its field men (exploitation people, as they are called in the movie business) and the local theaters buy time on stations.

The timing is what's important. Generally, radio support starts a week before release date. Sometimes, as in the case of "Shake Hands with the Devil," a new motion picture about the Irish rebellion, a teaser campaign will run for three weeks in advance of the play-date.

Summer Is Best • For UA, radio is what comes naturally, particularly in the summer. At this time, radio is used heavier than in other periods of the year on the theory that the motion picture audience is more mobile in the summer and radio moves with it.

The UA advertising department must work well in advance. Already the unit in New York is busily preparing a campaign for a new picture, "Solomon & Sheba," which will not be released until late fall. The radio commercials are prepared in all lengths. For the larger cities, spots seldom are longer than a minute but in smaller markets they run up to 2½ minutes.

In search of the "right" radio audience for its promotions, UA will leave few angles unexplored. Tough talk, for example, is used in Frank Sinatra's talking commercials (lengths include 10, 20, 30, and 60 seconds)—he just let's er rip. For "The Horse Soldiers," UA is appealing to the boxing audience, to people who want action in their entertainment. (UA has paid $100,000 for a package that features network coverage of the heavyweight prizefight, a unique tieup that includes purchase of rights from TelePrompTer).

UA's Range • Bob Hopes' vehicle, "Alias Jesse James," a comedy take-off on westerns, was treated in a light vein. The recorded commercials for that picture included versions of the "Chipmunk Song," of western ballads, on commercials themselves ("a thinking man's western") and on "The Lone Ranger," among many. Some of the spots were spruced up with dialogue taken from the sound track.

The UA radio waves spread rapidly through regions of the country once they begin. "A Hole in the Head," for example, has been running teaser commercials which include a contest (run in conjunction with newspapers), with actual support spreading rapidly. The picture opens in Chicago and Los Angeles June 17, in Washington June 18, in Boston June 25 and by July will be in the New York area.

Television is used occasionally but not to the extent of radio. For tv, telops and "featurettes" are supplied. But the visual support is minor. For most of the recording, UA reports, Thaddeus Suski productions in New York is used.

UA's concept is simple: Don't stint on stars and names to promote the picture. And, if the voice is not recognized immediately on radio, that's no problem. All that's needed: "This is Frank Sinatra whose got a hole in the head. A hole in the head? Yes, a hole in the head" and on and on *ad infinitum.*

Ad volume 'drowns' average consumer

The tremendous growth and volume of advertising which is estimated as exposing the average American family to more than 1,500 advertising messages a day, present the major challenge to the advertising profession and to the people in advertising, Nelson Carter, president of Advertising Assn. of the West, said Tuesday in an address to a joint meeting of the Los Angeles and Hollywood ad clubs.

To keep from being overcome by this constant bombardment of advertising, the target—the consumer—has built a protective shell, Mr. Carter stated. To crack this shell calls for the utmost advertising skill and creative effort from every advertiser and agency man or woman, he said. Mr. Carter warned against the danger of becoming engulfed in gimmicks, in relying on them for their own sake and forgetting the sole purpose of every ad—to make a sale.

"There are four guide posts in the creation of advertising that adhere to that primary purpose," Mr. Carter said. "They are to make every advertisement clear, concise, consistent and compelling."

He illustrated his point with examples of ads in various media: tv, magazines, newspapers and outdoor, and for various products and services, including the public service campaign to prevent forest fires which his own agency, Foote, Cone & Belding, has produced for the Advertising Council for nearly 20 years.

ARBITRON'S DAILY CHOICES

Listed below are the highest-ranking television network shows for each day of the week as rated by the multi-city Arbitron instant ratings of American Research Bureau.

Date	Program and Time	Network	Rating
Wed., May 27	Bat Masterson (9:30 p.m.)	NBC-TV	20.9
Thur., May 28	Playhouse 90 (9:30 p.m.)	CBS-TV	20.1
Fri., May 29	77 Sunset Strip (9:30 p.m.)	ABC-TV	20.6
Sat., May 30	Gunsmoke (10 p.m.)	CBS-TV	23.3
Sun., May 31	What's My Line (10:30 p.m.)	CBS-TV	21.5
Mon., June 1	Summer On Ice (10 p.m.)	NBC-TV	28.9
Tue., June 2	Rifleman (9 p.m.)	ABC-TV	21.9
Wed., June 3	Wagon Train (7:30 p.m.)	NBC-TV	18.0

1959—100th Anniversary of the Oil Industry... 70th Anniversary of Standard Oil Company

whale oil lamps to space rockets

How the oil industry helped the United States to become the world's most productive nation!

1859 Colonel Drake discovers oil—and the decline of the great whaling industry is in sight as thousands of lamp users turn from whale oil to kerosene.

1889 The automobile is in its infancy—weak and unpromising. Standard Oil Company is born on June 18, 1889. The following year the company's first research laboratory is opened at Whiting, Indiana.

1903 Two bicycle mechanics named Wright fly an odd-looking machine at Kitty Hawk. Almost 33,000 autos are on the road, but the horse is still supreme. Standard Oil is building a new refinery at Sugar Creek, Missouri.

1911 Almost 640,000 motor vehicles are on the road. Dr. William M. Burton and Dr. Robert E. Humphreys, famous Standard Oil scientists, discover the secret of mass producing gasoline economically. The company becomes independent of all other Standard Oil companies.

1923 The automobile is here to stay. More than 15 million motor vehicles are on the highways. Standard is the first major oil company to sell gasoline containing tetraethyl lead, anti-knock agent.

1940 The greatest demand in history for aviation fuel is near. Standard Oil puts into operation the world's first catalytic reformer, which produces higher octane gasoline than was possible before.

1959 The Space Age is dawning. New fuels and lubricants for rockets and jets come from Standard Oil laboratories to help make space exploration possible and to strengthen America's defenses. Standard Oil marks its 70th anniversary.

Here are some important developments by Standard Oil, a leader and a pioneer in petroleum research.

- How to mass produce gasoline economically. This opened the way to modern automotive transportation.
- How to recover more oil from almost-dry wells. This added billions of barrels to America's oil reserves.
- How to eliminate gasoline gumming. This meant lower repair bills for car owners.
- How to dewax motor oils efficiently. This meant better car performance and fewer trips to the repairman.
- How to make clean burning solid fuels for rockets. This was a big step forward in America's missile program.

These, and many other Standard Oil developments, have played an important part in man's progress from the horse-and-buggy age to the Space Age.

. . . when you go to market

Introducing . . .

Larry Israel
Vice President and General Manager

"Let me tell you about TvAR . . .

"We had one basic thought in mind in organizing TvAR – to give you the most modern, most complete representative service ever offered to agencies and advertisers. We did this because we realize that your every spot buy is a *major marketing move.*"

This is TvAR

Television Advertising Representatives, Inc.
the exciting new TV rep firm!

research

Totally new from a rep firm – qualitative market and audience research that put you *inside* five major markets. TvAR plans *Brand Comparisons* covering numerous categories, to give you the exact status of leading brands in five major markets . . . TvAR *Audience Profiles,* to add new dimensions to the study of audience characteristics for each TV program in TvAR-repped markets.

These are two of many projects to be undertaken by Bob Hoffman, TvAR Director of Research and Marketing. And they are only the beginning. The objective: to sell not just numbers, but the facts behind the numbers . . . not just ratings, but unequaled knowledge of people's buying and listening habits . . . not just call letters, but stations whose community stature and believability is documented by audience opinion – and whose ability to market your product, whatever it is, is greater as a result.

marketing know-how

What stimulates buying in San Francisco? Or Boston? What are the special product and brand trends in Baltimore, or Cleveland? How big are sports in Pittsburgh? Put the question to your TvAR man – get the answer *fast.*

Every man has visited every TvAR-repped station, every market . . . knows it *personally.* He knows a lot more about them than just the numbers. He understands market peculiarities – seasonal variations, shopping patterns, living and TV-viewing habits. No one in the business is better informed.

And the learning never stops! Typical of frequent up-dating sessions is the one shown here, where Eastern Sales Manager Jack Mohler is reviewing TvAR-repped market data with members of New York Sales.

programming know-how

TvAR men play a dual role, unique in the rep business. They're market facts men . . . *and* they are fully knowledgeable in all aspects of programming.

They know the talent intimately, and every nuance of the personalities that keep the shows top-rated. They know the programmers and their product . . . the great film libraries, and how film is scheduled, edited and produced for maximum response. They know station management, and the activities that keep them respected in their communities.

They're kept informed on many aspects of local programs and personalities through *Videotape,* right in TvAR's New York offices. It's the first screening service of its kind ever utilized by a rep firm . . . a service open to all TvAR clients as well.

TvAR Videotape lets you see these great out-of-town personalities and programs right in New York. You can preview television advertising, including your own taped or filmed message, in its actual program context . . . pre-test your own copy line with the same selling personalities who will deliver it . . . know first-hand how your advertising is being handled from Boston to San Francisco.

TvAR ***gives you <u>more</u> when you go to market***

AM SPECTACULAR
Chesebrough buys CBS Radio special

Confidence in the radio medium as a sales vehicle will be demonstrated Sept. 20 when Chesebrough-Pond's Inc., New York, sponsors a one-hour CBS Radio network special as the main thrust of its fall advertising campaign to introduce new packaging of its beauty products. Taped in Paris, the program stars Maurice Chevalier, a personality who can be identified with the "glamour image" on which C-P is basing all of its late summer and fall advertising.

Fully aware of the unusual nature of a radio spectacular in an era of tv specials, C-P's show, which has been entitled *Holiday with Chevalier,* will occupy a peak radio listening period—5 to 6 p.m. on a Sunday. At this hour, according to Albert B. Richardson Jr., C-P's advertising director, the greatest number of car radios are turned on, as weekend travelers drive home.

Although the price of the show was not revealed, Mr. Richardson stated that "the much lower cost of a radio show and the fact that CBS Radio offered a package that tied in with our advertising plans" determined the choice of radio to give the big push to the campaign. The program's seven commercials, representing as many individual products in Pond's beauty line, will be backed up with supplemental advertising in magazines and on C-P's daytime tv shows, he said.

With Mr. Chevalier as host, *Holiday* will feature the top entertainers in France, it was reported. Those signed to participate include: Juliette Greco, Line Renaud, Jacqueline Francois, Sascha Distel and Les Compagnons de la Chanson. Michel Le Grand will conduct a 48-piece orchestra and a chorus.

The copy for Chesebrough-Pond's commercials and ads will emphasize the glamour aspects of women and places throughout the world. In-store displays will be centered on almost full-scale Paris kiosks which will be covered with pictures of the stars of the radio show and of the ads used in magazines. At the kiosks, consumers will be able to enter contests to be eligible for winning trips by jet planes to the glamour capitals of the world. Agency for the C-P push is J. Walter Thompson, New York.

Big blast from Sunray

DX Sunray Oil Co. (Boron gasoline) launches its biggest radio-tv ad campaign June 15-July 10 and Aug. 3-28. The oil company will place more than 11,000 spots on 69 stations in its marketing territory in these periods.

New commercials featuring a model ballistic missile with the theme: "missile power your car with DX Boron gasoline" are produced by Potts-Woodbury Inc., Kansas City, and Swift-Chaplin Productions, Hollywood, Calif.

Tv station quits NAB over Preparation H

WMTW(TV) Poland Spring, Me., last week resigned from the NAB in protest against the revocation of its television code membership for carrying commercials for Preparation H, a hemorrhoid remedy.

WMTW was one of eight stations whose television code memberships were revoked last April 30 by the NAB Television Board. That board acted on the recommendation of the Television Code Review Board which has banned the Preparation H commercials as objectionable (BROADCASTING, April 27, May 4, et seq.).

In a letter to the NAB, John W. (Duke) Guider, president and general manager of WMTW, said last week that the code board cited his station for revocation for only one reason: it was carrying one Preparation H commercial per week in a late Saturday night spot.

"There never has been, and there is not now, any suggestion that in any other respect have we ever conducted our station in anything but the highest ethical manner," Mr. Guider wrote the NAB.

What Board Said • At the time of the television board's revocation action, the board announced the withdrawals of the code's seal of good practice "in response to charges brought by the NAB Television Code Review Board for continued and willful violations of provisions of the code relating to personal products advertising, triple spotting and advertising time standards."

Mr. Guider said that his station had never received any complaints from viewers about the Preparation H commercial.

"It appears to me that the code review board is 100% wrong in the position it has taken on Preparation H," he said. "Unless the advertising of this product has been found offensive by the viewers, as distinguished from the code review board, I do not believe the board is right."

Mr. Guider notified the NAB he was cancelling his membership "effective immediately." Mr. Guider was a partner in the Washington law firm of Hogan & Hartson before assuming direction of WMTW.

BBDO SHUFFLE
Agency reorganizing radio-tv media dept.

BBDO is reorganizing its radio-tv media department in New York. The agency has not yet spelled out the changes but is expected to do so within another two weeks.

Basically the BBDO switch is to a group system of buying by accounts, with each group supervising the media buys for the accounts assigned to it. This is similar to the media organization in use by various other large agencies, notably J. Walter Thompson and Leo Burnett.

The contemplated change became known last week with the promotion of Gertrude Scanlan, veteran BBDO buyer, to a new post of media liaison between the New York headquarters and the agency's 15 regional offices. This promotion was not disclosed publicly.

BBDO did reveal however that it had added nine "experienced buyers" in the past two months to the media department headed by Vice President Fred Barrett. Most recent to join is Michael Donovan, formerly vice president and associate media director at Benton & Bowles. Before he worked with B&B, Mr. Donovan was broadcast media supervisor at McCann-Erickson.

New Faces • The other eight people: Robert Hamilton former media director at C. L. Miller and at Ellington & Co.; Bruce Doll previously with Erwin Wasey, Ruthrauff & Ryan; Stuart Edwards formerly with Lennen & Newell; Conrad Ennis who came from Doherty, Clifford, Steers & Shenfield; Sal Cusimano, formerly with G. M. Basford Co.; Cliff Wilmot, formerly with J. Walter Thompson; Sam Landers also from L & N and Ed Koehler from Buchanan & Co. and once associated with ABC and the former DuMont television network.

It is expected that BBDO will set up its account group with executive heads drawn both from the list of recent joiners and from its veteran buying staff.

A spokesman when questioned about the changes said "everybody will benefit."

P&G supplants GM as top advertiser

New sign of the tv times. Procter & Gamble, top tv spender in the land, is the U.S.' No. 1 advertiser. In second place is General Motors Corp. which for many years had the favored national spot.

The spotlight thrown on P&G's

emergence as the nation's top-spending advertiser by Television Bureau of advertising which last week trotted out these facts:

P&G spent $98,154,000 in seven major media in 1958. GM put in $91,755,000. P&G has 85% of its budget in television, spot and network, with all-time sales and profits in 1958. Total tv expenditures came to $84.4 million-plus (more than $50.6 million in network, more than $33.8 million in spot).

The bureau threw this item in too: P&G was cited as the country's best-managed company by the American Institute of Management in 1957.

What TvB did not say: General Motors traditionally has held down the No. 1 spot in the newspapers' hit parade of national advertisers.

Grant Adv. gets Dart auto account—if?

Grant Adv., Chicago, was reported last week to have acquired an estimated $5 million account for the Dart, a new automobile Chrysler Corp. plans to introduce in September.

The Dart, a compact, standard size auto, has been discussed at length in automotive trade circles, although executives of Chrysler last week refused to say it would produce such a car or confirm or deny that Grant had been named the advertising agency. The agency issued the following statement:

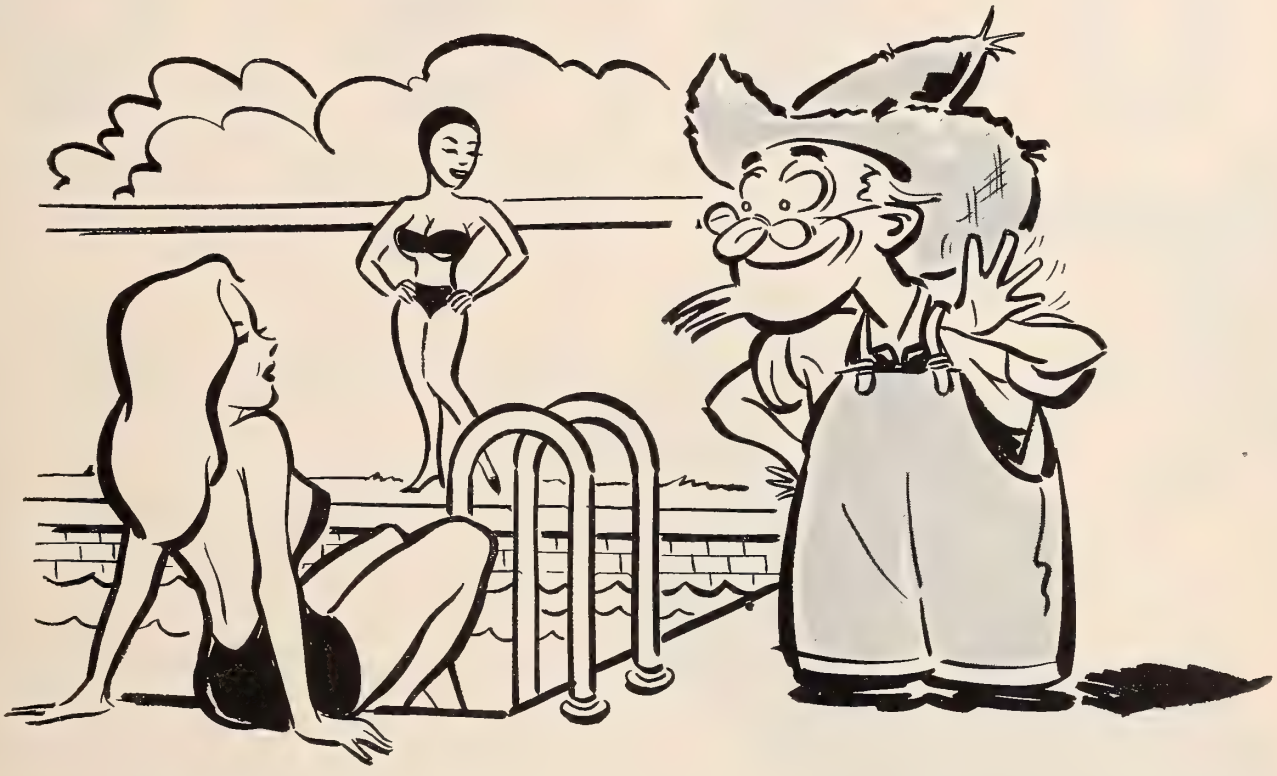
"Any information on the existence of the Dart and the advertising plans on the car, if it exists, have to come from the Chrysler Corp."

It was reported that several agencies had been asked to make presentations for the account. One strong factor in Grant's winning the account is that the agency already handles other Chrysler business—primarily the Dodge account estimated at $16 million.

Media plans could not be determined since no information on the account could be elicited from Grant Adv. Dodge is a heavy spender in television and it is assumed that air media will

TV COMMERCIAL PREVIEW

Inviting lips in color • When Revlon International, New York, required a commercial to be shown throughout the world (except in the U.S.) on behalf of its 13 new shades of lipstick, officials thought long and hard—and decided upon a one-minute color "spectacular" that cost $15,000 to produce.



The commercial was unveiled in Latin America last Wednesday (June 3) and by June 10, it will have made its debut in 62 countries. The commercial has been dubbed into 14 languages—Danish, Dutch, English, Finnish, Flemish, French, German, Italian, Spanish, Norwegian, Portuguese, Spanish and Thai. It will be shown in theatres in countries where there is no mass tv market.

The production, titled "Colors Unlimited," features dancer Cynthia Scott of television's *Your Hit Parade,* and 12 high fashion models, who are used to depict the 13 new shades of lipstick. The commercial includes an original musical score by Morris Mamorsky and choreography by Zachary Solov of the Metropolitan Opera.

"This is Color Unlimited by Revlon," a voice proclaims as the models demonstrate each lipstick shade. "A new name for the new look in lipstick. Snow-kissed pastels like 'Honey Vanilla.' Shocking violets like 'Violet Icing.' Tawny shades like 'Orange Float.' So remember . . . for the most exciting inviting lips in the world . . . Color Unlimited . . . by Revlon . . . for you."

The commercial was produced by Robert Lawrence Productions, New York, on direct order from Revlon International (no agency was involved). The director was Jerry Schnitzer of Lawrence Productions and the script was by Sandy Klein, a free-lance writer. Other Lawrence personnel involved in the production were Jean Steinberg, editor; Mel Bourne, art director; Doris Reichbart, production supervisor. Francois of Revlon served as beauty and color consultant.

Fargo is the SPENDINGEST city in the U.S.A.

And WDAY gets by far the biggest audience in this 54-county area!

The Consumer Markets pages of "Radio Rates" show that Fargo is the No. 1 city in the U.S.A., for Retail Sales Per Family!

Also — the Jan. 19-Feb. 13, 1959 Pulse Area Survey shows that WDAY is *by far* the top station among 37 that compete for audience in our 54-county area.

All this confirms the wisdom of you advertisers who have been choosing WDAY *since 1922!* There just ain't no station anywhere else in the U.S. that does so much — for so many — for so little! Ask PGW!

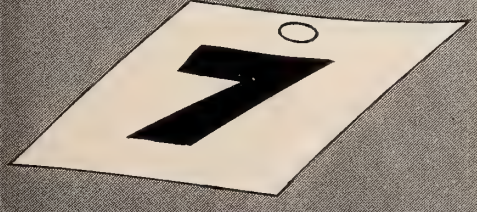
An astonishing statement by a HOT cat!



"I have just learned that in the first sixty days since they let this cat out of the bag – a cool million and a half is on the line – thanks to some mighty far-sighted gents at Westinghouse, Metropolitan, Triangle, Transcontinent and a number of stations coast-to-coast.

"While this is an unprecedented state of affairs for a cartoon series—I would like to point out that I was the HOTTEST of HOT CATS long before Liz played Maggie – so it is no surprise to me that everyone is doing catnips over the new films.

"Of course, they're great—the best ever created for TV, that's for sure! But don't take my word for it – I'm inclined to be modest. Get some audition prints from Trans-Lux.

"You'll buy. They all do!"

– Felix, The Cat

The Tremendous Commercial Appeal of FELIX – is shown in the "hot" list of clients and agencies who have seen the series and are waiting *now* to talk to your sales manager about spot time on Felix programs. *Send for your copy of the list today.*

receive a substantial portion of the Dart account.

Trade reports indicate that the Dart will be smaller than the Dodge but larger than Chrysler's new economy car, the Valiant. It will be sold by Dodge dealers.

McCann's Buick shift

New lineup in McCann-Erickson's Detroit account group handling Buick Div. of General Motors Corp. divides print and broadcast. R. Thomas Brogan, who joined the agency in 1954 and at one time was on Chrysler in New York when that account was at M-E, and who has been handling both print and broadcast on Buick in Detroit, will now handle print only. Charles P. Flynn, tv and radio account executive, assigned from New York to the Detroit office. Myron C. McDonald is the McCann-Erickson vice president and Buick account service group head in Detroit.

NBC-TV rotating buys

To give evening advertisers greater reach and audience stability next season, NBC-TV last week announced a new sponsorship pattern involving three programs: *Riverboat* (Sun. 7-8 p.m.), *Laramie* (Tues. 7:30-8:30 p.m.) and *Bonanza* (Sat. 7:30-8:30 p.m.). All may be bought on a rotation basis in which the advertiser's half-hour moves from program to program over the weeks. The minimum purchase is six half-hours, all to be scheduled in the last four months of 1959. (Also see fall network story, page 38.)

According to the network, the pattern has the merit of diversification safety—and a better chance to be with a big rating winner—and also gets the advertiser into more homes sooner. Normal half-hour time and program costs are applicable, less any discounts earned by the advertiser, it was reported.

• Business briefly

Time Sales

• American Tobacco Co., N.Y., has bought Ziv Television's new half-hour adventure series *Lock-up*, in 60 markets on an alternate week basis. Agency is BBDO, N.Y. Ziv Tv reports that the series now has been sold in a total of 112 markets.

• Bell System, N.Y., will sponsor 12 musical specials during 1959-60 season over NBC-TV, starting Oct. 9, with 11 programs scheduled on alternate Fridays (8:30-9:30 p.m.) and the other tentatively scheduled for Easter Sunday evening. Agency: N.W. Ayer & Son, Philadelphia.

• The Rexall Drug Co., L.A., on Aug. 16 will sponsor the summer's only reported network tv special, a dramatization of the O. Henry short story classic "The Ransom of Red Chief." NBC-TV will present the Rexall tv special from 10 to 11 p.m. EDT, the network reported last week. William Bendix has been cast for one of the three principal roles in the hilarious account of the kidnapping of a red-haired 10-year-old boy who dubs himself "Red Chief." The show is a Talent Associates production, with David Susskind as executive producer. BBDO is Rexall's agency.

• Pharmaceuticals Inc., N.Y., has signed for full sponsorship of *It Could Be You* (NBC-TV Sat., 10:30-11 p.m.), starting in September; alternate-week sponsorship *Groucho Marx—You Bet Your Life* (NBC-TV Thurs., 10-10:30 p.m.), starting in the fall, and has renewed *The Arthur Murray Party* for the summer, starting June 29 (NBC-TV Mon., 10-10:30 p.m.). Agency: Parkson Adv., N.Y.

• CBS Radio reported the following new business last week, totaling $1.5 million: Chevrolet Div. of General Motors, Detroit, renewed 12 five-minute newscasts each weekend, with CBS newsman Robert Trout, for 52 weeks effective June 27. Campbell-Ewald, Detroit, is agency. Ex-Lax Inc., through Warwick & Legler, N.Y., purchases 11 weekly units of daytime dramatic series for 47 weeks, beginning June 15. Tetley Tea Co. bought five 5-minute units per week for 52 weeks, starting May 18, via Ogilvy, Benson & Mather, N.Y. Oldsmobile Div. of General Motors, Lansing, ordered the Monday-Friday *Douglas Edwards Business News* for 13 weeks starting June 1, through D.P. Brother & Co., Detroit. Hastings Mfg., for Casite, bought five program segments each week for 13 weeks starting June 14, through Keeling & Co., Indianapolis. Hudson Vitamin Products Corp. contracted for two program segments during the week of June 4 through Pace Adv. Agency Inc., N.Y.

• The Toni Co., Chicago, and Philip Morris, N.Y., will co-sponsor next season's *Loretta Young Show* on NBC-TV (Sun. 10-10:30 p.m.). The signings were announced by Walter D. Scott, executive vice president of NBC-TV. Agency for Toni is North Adv. Inc., Chicago, and Leo Burnett Co., N.Y., for Philip Morris' Marlboro cigarettes.

• D.B. Lewis Food Co., L.A. (Pet Food), has signed to sponsor *Dan Smoot Reports* over 38 of Mutual's 40 Pacific Div. radio stations, starting June 21 (Sun., 6:45-7 p.m.). Agency: Rockett-Lauritzen Adv., L.A.

• A.S.R. Products Corp., (razor blades, other cutlery, etc.), N.Y., will sponsor NBC-TV hour-long, prime evening time program about St. Lawrence Seaway (Fri., June 26, 8-9 p.m.). Agency: Kenyon & Eckhardt, N.Y.

• NBC-TV has confirmed sponsorship for next season of eight Art Carney specials by General Motors' AC Spark Plug and United Motors Service Divs. Four are to be hour-long variety shows appearing the first Friday in October, December, March and May at 8:30-9:30 p.m. The others are 90-minute dramatic presentations, one at an undetermined date in November, the rest 8:30-10 p.m. on the first Friday in January, February and April. Agencies are D. P. Brother for AC Spark Plug and Campbell-Ewald for United Motors, both Detroit.

• The Kellogg Co., Battle Creek, Mich., will sponsor *Dennis the Menace* (CBS-TV Fri. 8:30-9 p.m.). Based on the Hank Ketcham cartoon character, the new comedy series has its debut Oct. 2. Agency: Leo Burnett, Chicago.

• The American Tobacco Co., N.Y., through BBDO will sponsor a new CBS-TV science fiction series, *Space* (Wed. 8:30-9 p.m.) beginning Sept. 2. It stars William Lundigan as an Air Force spaceship pilot. The series is produced for Ziv Television Programs by Lewis Rachmil, a longtime student of rocketry and space technology.

• Kleen King Home Products Co., through Charles A. Mottl Inc., Beverly Hills, Calif., has started a six-station spot radio drive in Southern California for its metal cleaners, using KCBQ San Diego, KPRO Riverside, KRNO San Bernardino, KGIL San Fernando, KPOL Los Angeles and KFOX Long Beach.

• AMF Pinspotters Inc., division of American Machine & Foundry Co., N.Y., on June 28 is sponsoring a live, hour-long musical special on ABC-TV featuring Dick Clark. Known as "The Record Years", the show (9:30-10:30 p.m.) will have guest stars with golden records (million or more sold) to their credit over the past decade. AMF is supplementing this summer bowling promotion with six one-minute participations on Dick Clark's daily *American Bandstand* over ABC-TV beginning June 30. Agency: Cunningham & Walsh.

• The Kellogg Co., Battle Creek, Mich., will be an alternate-week sponsor of *The Deputy* (NBC-TV Sat. 9-9:30 p.m.). The new western, starring Henry Fonda, has its start next fall. It was created by Roland Kibbee and Norman Lear. Michael Kraike will produce the series, with filming done by Revue Productions, Hollywood. Kellogg Agency: Leo Burnett, Chicago.

For outstanding television journalism:

Atlanta's WSB-TV Scores Clean Sweep in AP News Awards

General news, editorials and news features were the categories in which WSB-TV received top ratings in the Georgia Associated Press broadcasters competition. Five WSB-TV news staffers were given individual recognition. This was a clean-sweep of all awards made in the television journalism field.

The excellence of WSB-TV's local news service contributes greatly to this station's dominant position with Georgia viewers. Certainly your advertising in Atlanta belongs on WSB-TV.

WSB-TV

FM MEETING: CIRCLE OF CONFUSION

Fm broadcasters tell each other troubles at 2-day session

Fm broadcasting, mid - 1959 model, is all mixed up.

The problems of this broadcast band and its related musical services are involved in court delays, federal bureaucracy, legal sparring, engineering hassles, stereo, overlapping taxes, agency indifference, shortage of sponsors and internal feuding.

A review of this confusion marked a two-day fm multiplexing seminar held Thursday-Friday (June 4-5) under the auspices of WGH-FM Newport News, Va. Meetings were held at the Hotel Chamberlin, Old Point Comfort, Va.

With all its troubles, fm's circulation, service and popularity are at an all time peak.

Fm's basic money problems were ascribed by several speakers to the fact that agencies either don't understand or completely misunderstand fm's coverage, quality and circulation. These benefits are not appreciated despite what was called an unprecedented demand for new fm station permits in the last year. (See timebuying story this page).

The Virginia meeting drew an attendance of more than 125 broadcasters. It had been billed in advance as a joint multiplex seminar and meeting of the new National Assn. of FM Broadcasters, formed last March prior to the NAB convention at Chicago.

This advance billing was mixed up, too, according to Larry Gordon, WBUF (FM) Buffalo, president of NAFMB. The name was recently approved by the membership of the association, replacing the tentative name FM Assn. of Broadcasters which in turn was successor to FM Development Assn. The last-named was formed several years ago to fight an increase in fees demanded by ASCAP.

Mr. Gordon said he was appearing on his own behalf and that no NAFMB meeting had been formally scheduled by the association. He offered to consult with any seminar delegates interested in discussing fm problems of NAFMB's activities.

Those engaged in fm broadcasting and multiplex services disagree on which service is the dog and which is the tail. They are divided into four groups—those who mainly want to sell sideband music and utility services; those who simplex and want no part of multiplexing; those who just want to operate fm broadcasting stations, and/or those who sell transmitting and receiving apparatus.

The discussions of multiplexing's problems moved Mr. Gordon to observe, "Remember, you must have an fm broadcasting service first. The special services such as background music and storecasting are secondary though important and often profitable. This meeting is half engineers and manufacturers. We want emphasis on fm."

Confusion reached a peak when a "beware" notice was circulated around the meeting. It charged that big equipment and set manufacturers may destroy multiplexed station services by setting standards for stereo (see below). The point made was that multiplexed stereo would lead to wide sale of multiplex adapters to the public, making it easy to pirate background music services. The adapters would be added to normal fm receivers.

Seymour Krieger, Washington attorney, reviewed the tax situation, explaining that an unfortunate inquiry by a station had led Internal Revenue Service to apply an 8% wire service tax to radio music transmission services. The IRS instructed collectors to collect the tax, holding that a tax on wire services applied to radio transmissions of background music because there were some wires in the radio equipment and transmitter connections.

This tax has been appealed by WGH-FM. The government has threatened to levy the tax directly on music subscribers, Mr. Krieger said, adding, "I don't know of a better way to destroy business than for the government to visit each one of your customers to collect a tax."

But there's another tax lurking in the background, he added, a 10% wire mileage tax passed in 1958. If the 8% case is won, you may have to pay the 10% tax instead, he said.

Finally, he noted, the city of Norfolk and State of Virginia are each contemplating the revenue potential of taxes on background music services.

Sigmund Timberg, Washington attorney, charted the history of the campaign to get lower ASCAP rates. Originally ASCAP asked for a big boost in background music rates, he said, calling it "a complicated pay formula that would take several Philadelphia lawyers a generation to apply." He said a final agreement is near, with a new and much lower rate scale based on $20 annual minimum for entertainment places and $26 for bars, restaurants and other places, with alternate percentage bases.

Broadcast Music Inc. fees, with a $5 annual minimum, are no problem, he said, and SESAC is not important to background music "because it is mostly foreign selections and gospel music."

Douglas Anello, NAB chief attorney, cited multiplexing history, starting with the 1955 order requiring eventual shift of all background radio service from simplex to multiplex. He said FCC has granted Electronic Industries Assn. a six-month extension to file comments on stereo standards pending a depth study of stereo engineering systems and equipment.

At present 140 stations are multiplexing background music with 15 still using simplex. FCC has asked the U.S. Supreme Court to review an appellate court ruling that held simplex transmissions of fm music are broadcast rather than private communication services.

Mr. Gordon said NAFMB wants everyone interested in fm to join NAFMB.

"Unless we have oragnized action fm can go down the hatch," he said, recalling the ASCAP negotiations. He said NAFMB should include broadcasters, background music interests, storecasters, manufacturers, publishers—"Everyone interested in fm."

The "beware" notice was circulated by Gardiner Greene, of Browning Labs., multiplex equipment manufacturer. He charged that large set and hi-fi components manufacturers would have the entire multiplex spectrum, or part of it, become a broadcast service instead of non-broadcast." If this happens," he said, "multiplex may fall into the hands of sponsors (national advertisers), and you know what help they have been to fm during the last many years."

Fm void created by agencies and stations

The fm broadcast medium has one main trouble—hardly anyone is trying to sell it.

This conclusion was drawn from a national survey among members of Affiliated Advertising Agencies Network. It was conducted by Ed Acree, partner in Cargill, Wilson & Acree,

. . . and when he owns 200 "horses" will he still buy your gasoline? Chances are "yes," if you are a WKY-TV advertiser. Today's—and tomorrow's customers are sold on WKY-TV. In fact, 70% of Oklahoma's gasoline sales are made in the WKY-TV coverage area.

Network tv billing in 9.2% climb

The continuing climb of network tv gross billing brought in 9.2% more in time charges in April over the mark reached for the month a year ago.

The networks grossed more than $52 million last April compared to over $47.6 million in April 1958. For the January-April period the total billing came to $208.5 million-plus, or 9% above the same months of last year.

Each of the networks scored gains for both the April and January-April periods; CBS-TV and NBC-TV both chalking up increases at about the same rates in April and for the four months. ABC-TV strode ahead with a 16.6% pickup in April and 18.7% in the four-month period.

The compilation by Leading National Advertisers and Broadcast Advertisers reports was reported today (June 8) by Television Bureau of Advertising.

The full report:

Network TV Gross Time Billings

	April			January-April		
	1958	1959	% Change	1958	1959	% Change
ABC	$ 8,739,456	$10,193,663	16.6	$35,752,460	$42,430,232	18.7
CBS	20,628,511	22,093,785	7.1	83,344,337	88,255,638	5.9
NBC	18,283,379	19,753,172	8.0	72,287,402	77,835,168	7.7

April	10,193,663	22,093,785	19,753,172	52,040,620

Gross Time Costs Only

Richmond, Va. The results were reviewed at the FM Multiplexing Seminar held June 4-5 at Old Point Comfort, Va. (see main story this page).

"We operate in an fm void," Mr. Acree said Friday at a panel session. The survey revealed that only nine of the 35 agencies returning questionnaires were using fm for clients; 26 aren't using fm.

Asked what would make fm more valuable to their clients, seven agencies said more sets were needed in their markets; 12 needed more station promotion and more program information. One objected to the practice of charging listeners for station program logs; six thought programs needed improvement; ten desired audience studies.

"Some agencies reported they had never been contacted by fm stations," Mr. Acree said. "I have been at Cargill, Wilson & Acree four years and have been approached only once; one fm station for one client. We need a steady flow of information of the type other media provide.

High Potential • "Fm has a terrific potential for a quality audience. It should provide availabilities, success stories and sets-in-use information similar to the Pulse survey in San Diego. Fm should sell test schedules, with mail-in and similar devices to show audience response."

The survey covered large and small cities in all parts of the country. Cargill, Wilson & Acree places business nationally, principally in the Northeast and Southeast.

Many agencies don't understand fm broadcasting, Esther Rauch, midwest sales development director of John Blair & Co., agreed, quoting from an agency's presentation to a client that defined fm as "classical music without commercials."

Miss Rauch told fm broadcasters they must create an fm demand by the public. "We have a media child 19 years old that hasn't learned how to walk" she said. Emphasizing the quality of fm transmission, she said, "sound is worth a thousand pictures."

The Blair firm has 15 radio stations broadcasting am-fm stereo, she said, adding, "stereo will bring radio back to the living room." She added, "Radio lost more listeners to hi-fi than to television."

Nafi buys KPTV (TV) in $3.75 million deal

Sale of KPTV (TV) Portland, Ore., by George Haggarty to Nafi Corp. for $3,750,000 was announced last week jointly by Mr. Haggarty and Kenyon Brown, broadcast industry executive, who handled the negotiations for Nafi. Transfer is subject to FCC approval.

It also was announced that Mr. Brown has been appointed head of the newly-formed broadcast division of Nafi. Mr. Brown continues as president of KCOP (TV) Los Angeles, which he owns jointly with Bing Crosby, George L. Coleman and Joseph A. Thomas.

Nafi (pronounced naf-fee) Corp., whose principal offices are in Oakland, Calif., was formerly National Automotive Fibers Inc., the name adopted in 1928 when the company's only business was the manufacture of automotive interior trims. Today, Nafi also produces foam rubber and wool and synthetic carpeting and is embarking on a program of diversification.

The company's annual report for 1958 shows that Nafi suffered a net loss of $382,951, compared to a profit of $1,018,052 in 1957. Gross revenues fell from $47,375,065 in 1957 to $21,-555,243 in 1958 as a rseult of the sharp drop in automotive production and sales last year.

The Nafi balance sheet as of Dec. 31, 1958 shows total assets of $25,931,642, including nearly $6 million in cash and negotiable securities plus another $5 million set aside for "the acquisition of other companies and diversification."

The Nafi annual report shows 108,105 shares of stock in the company treasury valued at $23,481,231, a book value per share considerably in excess of the market quotation of 17¼ closing price on the New York Exchange last Tuesday (June 2).

Board chairman of Nafi is Paul V. Shields, head of the Wall St. firm of Shields & Co. and, incidentally, Gary Cooper's father-in-law. John G. Bannister is the firm's president and KCOP principal Coleman is a director.

Mr. Haggarty bought what was then ch. 27 KPTV from Storer Broadcasting Co. in 1957, paying $1.89 million. He also, in the same year, bought ch. 12 KLOR-TV Portland from Henry A. White and associates for $1.8 million, changing KPTV to the vhf channel and dropping KLOR-TV.

ABC plans $65 million facilities expansion

ABC will spend $65 million "in the next few years" in expanded facilities in New York and Hollywood as well as in other cities in which the network owns and operates stations.

So said Leonard H. Goldenson, AB-PT president, last Thursday in dedicating the new $4 million facilities of WXYZ-AM-FM-TV in Detroit.

Mr. Goldenson told BROADCASTING that the additional funds will be spent, probably in the next five years, in expanding existing headquarters in New York where adjacent property has been purchased. Two new color tv studios will be included for live production. In Los Angeles, about $1 million similarly will be spent in expanding considerably the network's present lot—the old Vitagraph movie lot.

IN INLAND CALIFORNIA (AND WESTERN NEVADA)

BEELINE®

RADIO

delivers more for the money

McClatchy's Reno station, KOH, covers one of the nation's most diversified recreational areas. Superb hunting and fishing begin practically at the city limits. Water sports? Lake Tahoe is just one of the nearby lakes. Winter sports? The 1960 Winter Olympic site, Squaw Valley, is just one of the excellent areas nearby. All these attract and hold people with a surprisingly large amount of money to spend. And you can sell them on Beeline radio.

Purchased as a group, Beeline stations give you more radio homes at a lower cost per thousand than any combination of competitive stations . . . lower by far. (SR&D and Nielsen)

Fishing is good in the Truckee River, downtown Reno.

PAUL H. RAYMER CO., NATIONAL REPRESENTATIVE

3 STATIONS IN BAG; 9 TO GO

Crowell-Collier plans full am-tv quota; believes broadcasting 'healthy' business

Crowell-Collier Publishing Co., which last week acquired its third radio station, WISK Minneapolis-St. Paul, for $750,000, subject to FCC approval (see story, page 76), plans to expand in the broadcast field until it has its full quota of seven am and five vhf television stations, Wilton D. Cole, C-C board chairman, said Wednesday (June 3).

Speaking at a news conference in Hollywood, Mr. Cole reported that KFWB Los Angeles, which the publishing firm bought in 1956 for $2.2 million, grossed $1.7 million last year and is expected to gross more than $2 million in 1959. He did not reveal the station's net profit at the insistence of Robert M. Purcell, director of the broadcast division of Crowell-Collier, who counselled that "as long as there are union problems, profit figures should be consolidated." Mr. Cole said he feels the company's stockholders are entitled to get full information about each division of the business, but he bowed to Mr. Purcell's desire. (The C-C annual report for 1958 was also in accord with Mr. Purcell, showing a consolidated net income of $4,320,729 for the year, but not giving a detailed breakdown of that amount by divisions of the company.)

At the first of the year, Mr. Cole said, Crowell-Collier had a tax loss carry-forward of $10 million. Most of all of this sum will go for the purchase of broadcast properties, he stated.

There are three principal reasons for the publishing firm's planned expansion of its broadcast operations, Mr. Cole said. "We have the primary requirement for expansion in any field, a highly competent management team under Mr. Purcell," he said, noting that KFWB has moved from fourth to first place in share of audience among the more than 20 radio stations serving the Los Angeles area (34% according to Hooper) and estimated that this means KFWB has a larger audience than any other station in the country.

Broadcasting Monopoly? • Second reason for broadcast expansion is that broadcasting stations in a particular market have a virtual monopoly, with no more stations permitted to come into the market because of a lack of frequencies, so that the supply of broadcasting time in the market is fixed. But, with a growing population and an expanding economy, the demand for time by advertisers is bound to grow, the combination of a fixed supply and a growing demand will inevitably result in increased prices for time, he stated.

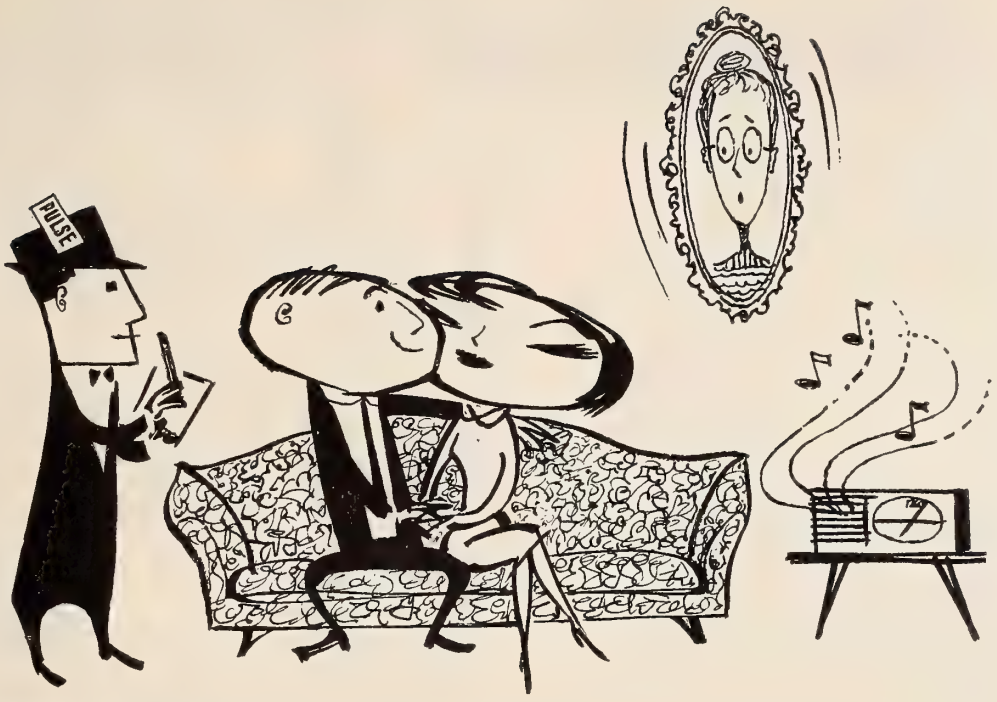
Third, Mr. Cole said, station operating costs are for the most part constant. After a station recovers its fixed operating costs, increased sales bring increased operating profits. "Thus," he concluded, "with competent management and in an industry of growing demand and fixed supply, and with increasing sales, after fixed costs, funneling directly into operating profits, this industry, in our opinion, is a healthy one to be in."

MESSRS. KLEIN, COLE, PURCELL

Crowell-Collier head arrives in San Francisco prior to WISK purchase

With its policy of maintaining top management and top personnel at its stations, Crowell-Collier is interested only in stations in major markets, Mr. Cole said. The company has no negotiations for any tv property as yet, he reported, but he predicted that it will be in television by the time it has its full quota of seven am stations. He passed a question about fm on to Mr. Purcell, who said that C-C might get into this field of broadcasting if it develops a favorable economic atmosphere.

Contemporary Listening • The "contemporary programming" policy inaugurated at KFWB will be instituted at the other C-C stations, Mr. Cole said. It goes into effect today (June 8) at KEWB San Francisco, which also assumes these call letters today and drops the KLX call by which it was formerly known. "Contemporary programming" was defined as "local programming," in tune with the public taste and serving the public interest of the community served by the station. None of the three C-C stations is a network affiliate, Mr. Purcell said, commenting that future acquisitions will probably also be non-affiliated, unless some network adopts a program policy in line with that of Crowell-Collier.



The "WB" call change was made to San Francisco principally because KFWB has found the "B" so effective for use in station on-the-air promotion and to enable KEWB to make use of the same jingles that have worked so well for the Los Angeles station, Mr. Purcell said. He noted that "W" is the only three-syllable letter in the alphabet. Whether the letters, which once stood for Warner Brothers, original owner of the station, will also be used in Minneapolis-St. Paul has not been decided, he said.

On Tuesday, Mr. Cole addressed a news breakfast in San Francisco and at noon was guest of honor at a luncheon for civic and business leaders hosted by William Knowland, former U.S. senator from California and owner of KLX until its sale to Crowell-Collier earlier this year.

McGannon says WBC network label wrong

Donald McGannon, Westinghouse Broadcasting Co. president, last week took issue with a remark by Matthew J. Culligan, NBC executive vice president in charge of radio, that Westinghouse was now a network.

Mr. Culligan had said, in a speech to the second annual disc jockey convention, that Westinghouse in effect "is

Q: Which of the following words describes each of these radio stations: Modern? Old-fashioned?

A: Four out of five Washington, D. C. area residents polled by PULSE found WWDC modern—a greater percentage than any other radio station. Less than one in twenty figured us for fuddy-duddies. And just as significantly, we received fewest "don't know" votes. Proof that Washington *does* know a "live wire" when it hears one. Let us cut *you* in on the current!

	WWDC	Sta. A	Sta. B	Sta. C	Sta. D	Sta. E	Sta. F	Sta. G
Modern	79.3	77.0	31.8	37.1	24.8	30.8	59.6	72.7
Old-fashioned	4.6	1.7	5.1	10.0	6.6	2.8	8.7	5.8
Don't Know	16.1	21.3	63.1	52.9	68.6	66.4	31.7	21.5

WWDC

REPRESENTED NATIONALLY BY JOHN BLAIR & CO.

WCKY IS CINCINNATI'S
NUMBER 1 NEWS STATION

WCKY

IS CINCINNATI'S No. 1 NEWS STATION

Here's proof, straight from the Jan.-Feb. '59 Nielsen, that WCKY has the largest news audience in Cincinnati:

Station	Rating
WCKY	11.15 avg for 70 newscasts per wk
Sta A — Ind	5.9 avg for 60 newscasts per wk
Sta B — Net	9.8 avg for 70 newscasts per wk
Sta C — Net	9.3 avg for 50 newscasts per wk
Sta D — Ind	5.0 avg for 80 newscasts per wk

(5 day cumulative rating Metro Area)

The reasons for WCKY's News Leadership:

1. Large news staff of veteran experienced reporters and newscasters.
2. Scoops — WCKY consistently scoops the town on most local news stories.
3. On-The-Spot-Reports — WCKY's mobile unit is on the scene reporting big local stories when they happen or moments after they happen.
4. News tapes—the people who make the news tell the news to WCKY's audience via news tapes. WCKY has them on the air first.
5. Background—WCKY's newsmen present the reasons behind the news so that WCKY listeners receive a more complete understanding of the news.

REMEMBER — WCKY News is No. 1 in Cincinnati and has earned its reputation for prestige, because Cincinnatians know they get the news first, fast and accurately on WCKY. Smart advertisers know they get the prestige of WCKY's news plus a large responsive audience when they sponsor news on WCKY.

Ask Tom Welstead to tell you about WCKY news operation — in New York at ELdorado 5-1127; ask AM Radio Sales in Chicago and on the West Coast.

Cincinnati, Ohio

a small radio network and its stations are really affiliates of this small network" (BROADCASTING, June 1).

In a letter to Mr. Culligan made public last week, Mr. McGannon asserted that all Westinghouse stations enjoy programming autonomy. The company's headquarters operations in news and special programs are designed to supplement the programming of individual stations.

"Obviously," said Mr. McGannon, "the WBC radio stations are independent."

Harvard management development seminar

Sixty broadcasters at the ownership-management level will go to school for two weeks starting July 5-17, enrolling as students in the first broadcast management development seminar at the Harvard Graduate School of Business Administration. All industry categories will be represented, covering four market sizes.

The course was developed under direction of Charles H. Tower, NAB economics-broadcast personnel manager. Students will live on the campus, paying $525 for tuition, room, board and teaching materials. The case system of teaching will be used, with no final examinations, grading or flunking.

Dr. Sterling Livingston, senior professor of the school and president of Harbridge House Inc., Boston, is academic director. William P. Gormbley, assistant dean and director of advanced management promotion, is administrative director. On the teaching staff will be Prof. C. Roland and Prof. Alva F. Kindall, of the school.

Frank Stanton, CBS president, and John Kenneth Galbraith, author and Harvard economics professor, will lead lecture-discussion periods.

Those enrolled in the course:

Bernard C. Barth, WNDU-AM-TV South Bend, Ind.; Charles A. Batson, WIS-TV Columbia, S.C.; John S. Booth, WCHA Chambersburg, Pa.; L. H. Christian, WRFC Athens, Ga.; Joseph K. Close, WKNE Keene, N.H.; Charles H. Crutchfield, Jefferson Standard Broadcasting Co., Charlotte, N.C.; Eugene B. Dodson, WTVT (TV) Tampa, Fla.; William A. Ekberg, KFYR-AM-TV Bismarck, N.D.; Robert W. Ferguson, WTRF-TV Wheeling, W. Va.; Keith S. Field, WARA Attleboro, Mass.; Fred Fletcher, WRAL-AM-TV Raleigh, N.C.; Joseph L. Floyd, Midcontinent Broadcasting Co., Sioux Falls, S.D.; Frank Fogarty, WOW-AM-TV Omaha, Neb.; Thomas B. Friedman, KNEZ Lompoc, Calif.

Creighton Gatchell, WGAN-AM-TV Portland, Me.; William E. Goetze, KFSD-AM-TV San Diego, Calif.; Julius M. Gordon, KPAC-TV Port Arthur, Tex.; Thomas Y. Gorman, WEEL Boston, Mass.; John P. Hart, WBIR-AM-TV Knoxville, Tenn.; Myron Jones, WJET Erie, Pa.; Robert E. Kelly, KCRA-TV Sacramento, Calif.; H. Peter Lasker, Crosley Broadcasting Corp., Cincinnati; John J. Laux, The Friendly Group, Steubenville, Ohio; Carl E. Lee, WKZO-AM-TV Kalamazoo, Mich.; Merrill Lindsay, WSOY Decatur, Ill.; William L. Lipman, WLIP Kenosha, Wis.

Douglas L. Manship, WBRZ-TV Baton Rouge, La.; Robert J. McIntosh, WWJ Detroit; Chester S. Miller, WVPO Stroudsburg, Pa.; David C. Moore, Transcontinent Television Corp., New York; Stanley G. Mouse, WHIO Dayton, Ohio; William J. Moyer, KARD-TV Wichita, Kan.; Thomas S. Murphy, Capital Cities Television Corp., Albany, N.Y.; James A. Noe Jr., WNOE New Orleans; Burns Nugent, KWMT Fort Dodge, Iowa; Thomas R. Nunan Jr., Steinman Radio Stas., Lancaster, Pa.; Ralph O'Connor, WISC-TV Madison, Wis.; Carter M. Parham, WDEF-AM-TV Chattanooga, Tenn.; Donald L. Perris, WEWS Cleveland; Gene Posner, WMIL Milwaukee; Frank Ragsdale, WTVM-TV Columbus, Ga.; A. Louis Read, WDSU-AM-TV New Orleans; William H. Hartley L. Samuels, KODY North Platte, Neb.; Ben B. Sanders, KICD Spencer, Iowa; Willard Schroeder, WOOD-AM-TV Grand Rapids, Mich.; Myron F. Shapiro, WFAA-TV Dallas; Joseph S. Sinclair, WJAR-AM-TV, Providence, R.I.; Robert H. Smith, WCYB-AM-TV Bristol, Va.; William B. Smullin, KIEM-AM-TV Eureka, Calif.; Donald Sullivan, WNAX, KVTV (TV) Sioux City, Iowa; Hulbert Taft Jr., Radio Cincinnati Inc., Cincinnati; Robert H. Temple, KREM-AM-TV Spokane, Wash.; George R. Torge, WBEN-TV Buffalo.

G. Pearson Ward, KTTS-TV Springfield, Mo.; Wilson C. Wearn, WMRC Greenville, S.C.; Gene Wilkey, KMOX-TV St. Louis; Louis Wolfson II, WLOS-AM-TV Asheville, N.C.; Charles C. Woodard Jr., Westinghouse Broadcasting Co., New York.

Lynch letter returned

WMCA New York, which offered a $5,000 reward for information leading to the arrest and conviction of the abductors and murderers of Mack Charles Parker from the Poplarville, Miss., jail (AT DEADLINE, May 4) has received an anonymous letter from Mississippi which accused specific persons of participation in the lynching. The writer said he would not accept a reward. WMCA turned the letter over to the Federal Bureau of Investigation, but when the FBI withdrew from the case, the station requested the letter be returned to the station with only relevant information sent to Mississippi authorities. WMCA feared reprisal against the sender if the letter itself were sent to that state. FBI Director J. Edgar Hoover wired WMCA that the FBI would comply with the request. Until the anonymous letter was received, WMCA had aired hourly announcements to urge listeners to boost its reward fund. WOV New York joined the campaign and approximately $400 was solicited. Two Mississippi newspapers accepted paid advertising of WMCA's reward offer.

Speakers for RTNDA

FCC Chairman John C. Doerfer and Rep. John E. Moss (D-Calif.) have been set as key speakers at the opening sessions of the Radio Television News Directors Assn.'s annual convention in New Orleans next fall.

Sheldon Peterson, news director of WTCN-AM-TV Minneapolis-St. Paul and RTNDA vice president-programs, announced the initial speaking commit-

ments for the convention, at the St. Charles Hotel, Oct. 14-17.

Chairman Doerfer will address the opening banquet session Oct. 14, discussing "The FCC and Broadcast News." Rep. Moss, chairman of the House Government Information Subcommittee, will argue "The Case Against Secrecy in Government" as it affects freedom of information. His appearance has been set for the Oct. 15 agenda.

Broadcast moves trial

A two-minute WSFC Somerset, Ky., interview with an accused murderer has resulted in a change of venue for his trial.

Commonwealth Attorney Russell Jones contends that the station's broadcast of the accused's statement prevents an impartial hearing. Mr. Jones said: "WSFC's local news broadcasts have a very wide audience in this county and, from my investigation, it's my opinion that at least 90% of all persons eligible for jury service have heard . . . this interview."

RAB PLANS RADIO SALES PUSH

Seven projects on agenda to aid stations

Radio sales in the fall of 1959 can emerge as "the biggest in radio's history" if the industry exploits the medium properly, particularly at the national level, Kevin B. Sweeney, president of the Radio Advertising Bureau, told a semi-annual meeting of the RAB Plans Committee.

The prediction followed discussion by the committee of seven research, promotion and sales projects that are on the RAB operational agenda for the next six months. These include:

• Listening habit studies which will describe the habits of various categories of people, including housewives, working wives, teen-agers, working men, white collar employes and others. Data to be included in this research, it was said, will permit, for the first time, the calculation of radio's cumulative audience among various categories in given time periods or in a combination of time periods.

• Print media studies, which will analyze the weaknesses of the various kinds of print media, including an examination of the readership of newspaper ads and the extent to which people pay attention to circulars and "throw-aways."

• An effort to quadruple the output of tapes containing commercials representative of all kinds of local, regional and national advertisers. These will be used by the RAB force as well as member stations in making presentations.

• A drive by the bureau to expand the number of dollars going into co-op radio. RAB has placed on full-time assignment two members of the national sales department, who will try to persuade advertisers to include radio in company co-op plans. The bureau also will update, expand and put into printed form a new version of its Co-Op Book, which currently contains the co-op

Tornado warner becomes twister victim

The May 29 tornado that clipped 420 feet from the 750-foot tower of KAYS Hays, Kan., ironically silenced a station that had just completed an elaborate weather warning system designed to lessen damage to the area from such outbursts of nature.

In fact, at the time the tornado struck (7:05 p.m.) the station's weather staff was keeping tabs on six confirmed tornadoes in the area, airing alert announcements and reporting to the U.S. Weather Bureau on winds of more than 100 mph outside the studio. The 420-foot portion of the tower was thrown 600 feet away and KAYS-TV went off for nearly 47 hours.

Despite the Memorial Day holiday weekend and bad flying weather, standby equipment and technical help was procured from Boston, Newark and Wichita so that KAYS-TV resumed operation with reduced power late Sunday afternoon (May 31). A station spokesman reported that a spot check indicated the station's signal was still reaching all parts of its normal coverage area.

MORNING AFTER AT KAYS-TV'S TRANSMITTER
A pared tower (upper left) and steel fragments everywhere

Located in the tornado "freeway" of Northwest Kansas, where an inordinate number of such storms originate, KAYS-TV for some time now has been perfecting its warning center. This includes a weather advisory structure for official information from the U.S. Weather Bureau in Goodland and Dodge City, Kans., from the state police and state highway departments, and from county and city police (in a 20-county area). In addition, unofficial sources have been established with 18 firms that use radio communications systems and a selected lists of approximately 30 ham radio operators.

At the station, KAYS-TV has set up specific visual slides to be used, according to the gravity of the weather announcements. During the time KAYS-TV was off the air, KAYS continued its usual weather service without interruption.

One other station had a close call with a tornado. WNAX Yankton, S.D., was hit at its transmitter site. Lines to its downtown studio were knocked out. However, service was carried on from the transmitter with less than a minute of lost air time.

WFLA-TV dominates an area of almost incredible growth! In the big eight years, 1950-1958, population in this 26-county sales area has zoomed upward 61%! Retail Sales are up 131% and Food Sales an amazing 146%!

You can cash in on this exciting profit opportunity by spotting your product on WFLA-TV—*your best buy in the Land of Profitunity!*

Write us or call your nearest Blair-TV man for more facts.

schedules of more than 500 national advertisers.

• A new basic presentation for retailers, which is being prepared to spotlight radio's strong points but nevertheless point out the strength and the weaknesses of other media.

• Local advertiser clinics designed to advise these clients on ways to increase the effectiveness of radio advertising.

Mr. Sweeney presided over the meeting of the plans committee. Those in attendance included John Box, the Balaban Stations, St. Louis; F. H. Brinkley, WENE Endicott, N.Y.; Dee Coe, WWCA Gary, Ind.; Robert E. Eastman, Robert E. Eastman & Co., New York; Bert Ferguson, WDIA Memphis; Benedict Gimbel Jr., WIP Philadelphia; Tom Harrell, WSTP Salisbury, N.C.; Robert B. Jones, Jr., WFBR Baltimore; Russell Woodward, Peters, Griffin, Woodward, New York, and Frank Gaither, WSB Atlanta. RAB officials there were Vice Presidents Miles David and Warren Boorom.

Changing hands

ANNOUNCED • *The following sales of station interests were announced last week, subject to FCC approval:*

• KPTV(TV) Portland, Ore.: Sold by George Haggarty to Nafi Corp. for $3¾ million. KPTV(TV) is on ch. 12 and is affiliated with NBC-TV. See separate story p. 68.

• WISK Minneapolis, Minn.: Sold to Crowell-Collier by the Tedesco Brothers for $750,000 ($500,000 cash). Book publishing Crowell-Collier also owns KFWB Los Angeles and KEWB Oakland, both California. Robert Purcell, president and general manager of KFWB Broadcasting Corp. has sold his interest in KEVE Minneapolis (see below). WISK is on 1590 kc with 5 kw, day, and is affiliated with MBS.

• KROY Sacramento, Calif.: Sold by Robert W. Dumm, veteran West Coast broadcaster and former manager of KXOA Sacramento, to John T. Carey Inc. former part owner and sales manager of WIND Chicago, for $420,000 in cash. The sale was handled by Lincoln Dellar & Co. in association with R. C. Crisler & Co. KROY is on 1240 kc with 250 w and is affiliated with CBS.

• WELY Ely, Minn.: Sold to V. T. Hallett and associates by Charles B. Persons for $37,500 plus $137,500 for the Ely Tv Cable Co. community antenna tv system. Mr. Hallett is sales manager of KTRI Sioux City, Iowa. The sale was handled by Blackburn & Co. WELY is on 1450 kc with 250 w.

• KALE Richland, Wash.: Sold to Harold Deutsch, account executive at WINS New York, and L. G. (Sparky) Dix, general manager of KALE, who will continue in that capacity, by KALE Inc. (J. Elroy McCaw, Bob McCaw and Tom Olson) for $150,000. KALE is on 960 kc with 1 kw.

• WLEU Erie, Pa.: Sold to Thomas Bromley and others by L.E.U. Broadcasting Co. (J. Patt Wardlaw, pres.) for $145,500. Mr. Bromley is the managing partner of WESB Bradford, Pa. The sale was handled by Jack Stoll. WLEU is on 1450 kc with 250 w.

• KEVE Minneapolis, Minn.: 50% sold by Robert Purcell, president and general manager of KFWB Los Angeles, to already 50% owner James McKenna, D.C. attorney, for in excess of $100,000. Sale had to be made as part of Crowell-Collier (KFWB) purchase of WISK Minneapolis (see above). KEVE is on 1440 kc with 5kw, day.

• KBBB Borger, Tex.: Sold to radio-tv personality Robert M. (Pappy) Watson and his wife Dixie Dice Watson by R.L. McAlister for $70,000. The sale was handled by Hamilton-Landis & Assoc. KBBB is on 1600 kc with 500 w day.

• KTFS Texarkana, Tex.: Sold to Aircrest Radio Stations Inc. (William McDaniel and Mel Lewis, 50% each) by Robert Bieloh for $67,500. The sale was handled by Blackburn & Co. KTFS is on 1400 kc with 250 w.

• KSFA Nacogdoches, Tex.: Sold to Texas Broadcasting Co. (B.M. Raborn, president) by Nacogdoches Broadcasting Co. (W.C. Fouts, president) for $45,000. The sale was handled by Patt McDonald. KSFA is on 860 kc with 1 kw, day.

APPROVED • *The following transfers of station interests were approved by the FCC last week (for other Commission activities see* FOR THE RECORD, *page 111).*

• KABQ Albuquerque, N.M.: Sold to Sandia Broadcasting Corp. (Oscar I. Dodek, president) by Duke City Broadcasting Corp. (Edward M. Sleighel) for $275,000 and real estate agreements as well as a consultancy deal with Mr. Sleighel for six years for $50,000 gross. KABQ is on 1350 kc with 5 kw, day, 500 w, night, directional night.

• WKAB Mobile, Ala.: Sold to Radio Mobile Inc. (John C. Smith, president) by Pursley Broadcasting Service Inc. for $250,000 plus agreement that the assignor will not engage in the radio business for five years within 25 miles. WKAB is on 840 kc with 1 kw, day.

CALIFORNIA — **$150,000**

Full time operation in extremely attractive market. Best climate, high income level, diversified economy. Earning good cash flow and growing steadily. Ideal for owner-operator. 29% down, balance over 7 years.

SOUTH — **$135,000**

Profitable fulltimer in a progressive Southern market. Excellent real estate. 29% down.

NORTHWEST — **$125,000**

Profitable kilowatt daytimer on excellent frequency in extremely prosperous and desirable market. Manager will stay. 29% down and balance over 7 years.

PENNSYLVANIA — **$100,000**

Daytimer in single station industrial market. A good owner operator can easily pay this out and can earn a profit. 29% down and up to eight years for payout.

WHEN DOES EQUAL TIME END?

CBS seeks FCC ruling on cross-filing

If a political candidate cross-files for nomination in the primaries of both political parties, may he use his dual status to obtain equal time, under Sec. 315 of the Communications Act, to that given his opponents seeking separate Democratic and GOP nominations?

CBS last week asked the FCC to issue a ruling to make it "abundantly clear that Sec. 315 was not designed as a gimmick" to enable a cross-filing candidate to obtain, *ad infinitum*, rights to air time.

CBS made that point in answering a request for an FCC ruling, made by Lar Daly, perennial also-ran candidate for various offices ranging up to the Presidency. CBS said Mayor Richard Daley of Chicago, a candidate for renomination in the Democratic primary last Feb. 24, was given a half-hour on CBS' WBBM-TV Chicago to make his annual report to the people of Chicago. Lar Daly, a candidate for nomination on the Democratic ticket, was given equal time to that given Mayor Daley; whereupon, since Lar Daly was also a candidate for nomination on the GOP ticket, Timothy P. Sheehan (who won the GOP nomination in the Feb. 24 GOP primary), asked for and was given time equal to that given his opponent, Lar Daly.

Lar Daly then requested WBBM-TV to give him equal time to that given Mr. Sheehan and asked for an FCC ruling to this effect.

CBS held last week that under such a ruling, if Mr. Daly were given another half-hour, Mayor Daley could then demand time equal to that given Mr. Daly, Mr. Daly could demand time equal to that given Mayor Daley, and so on, *ad infinitum*.

CBS said this would be a "mockery" of Sec. 315 and that WBBM-TV's action (giving all three a half-hour each) is all the act requires. The interpretation asked by Mr. Daly, CBS said, would increase the uncertainties as to Sec. 315's reach, unduly enlarge the hazards broadcasters face in offering time to candidates for nomination and thus discourage broadcasters from making appropriate use of their facilities. It would lead to such absurd results that broadcasters would find it impossible to afford time when cross-filings are likely, or even possible, CBS said.

Equal time hearings moved to June 18

Senate hearings on four bills which would amend the political equal time provisions of the Communications Act, originally scheduled to begin Friday (June 12), have been rescheduled for June 18, Sen. John Pastore (D-R.I.), chairman of the Communications Subcommittee of the Senate Commerce Committee, announced last week.

The hearings were moved back one week at the request of the FCC to give it more time to reconsider its February ruling that perennial candidate Lar Daly is entitled to equal time as a result of his opponents for mayor of Chicago having appeared on regularly-scheduled newscasts (BROADCASTING, June 1).

Witnesses on the opening day will be the FCC, Justice Dept. and CBS Inc. President Frank Stanton. The hearings are scheduled tentatively to continue through June 19-25. Additional witnesses expected to testify include Donald McGannon, president of Westinghouse Broadcasting Co.; Harold Fellows, president of NAB; Rep. Glenn Cunningham (R-Neb.), author of an equal time bill in the House; Mr. Daly; Ralph Renick, WTVJ (TV) Miami, president of the Radio-TV News Directors Assn., and James A. Byron, WBAP-AM-TV Ft. Worth, president of Sigma Delta Chi.

The hearing begins 10 a.m. in Room 5110, New Senate Office Bldg.

Justice on Sec. 315: Rogers gives reasons

Attorney General William P. Rogers has justified the Justice Dept.'s intervention in the FCC Lar Daly case—and politely expressed the hope that Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee, didn't intend to imply that he or his committee were in favor of the FCC's Sec. 315 decision in the matter.

The Attorney General's letter, released May 30, was in response to a May 25 inquiry from Mr. Harris asking the basis on which the Justice Dept. felt it should recommend that the FCC reverse itself.

The Commission earlier this year, by a 4-3 vote, maintained that Chicago Mayorality candidate independent Lar Daly must be granted equal time on the air because his Democratic and Republican opponents had been shown in tv newsreels in that city. This decision was appealed by CBS and others. It was termed "ridiculous" by President Eisenhower, who asked the Attorney General to study the matter.

Mr. Rogers, repeating the essence

FCC, Congress, and the 600-yard dash

The next time Congress censures the FCC for its large backlog of unprocessed applications, the Commission needs only to point to June 1959 and Congress itself as principal deterrents.

Between today (Monday) and the first week of July, members of the Commission are scheduled to appear before the two congressional Commerce Committees on over 15 work days. On several of the dates, the FCC is scheduled to be in both places at the same time, which leaves Chairman John Doerfer with somewhat of a dilemma.

Also to be considered is that for each hour the Commission spends on the witness stand, several hours of preparation by the staff are required. The June schedule of communications hearings reads like this:

June 8-9: Before the House Commerce Subcommittee's spectrum panel (Comrs. Doerfer and Robert Bartley are scheduled).

June 9: Before the Communications Subcommittee of the Senate Commerce Committee.

June 11: Back to the Senate again before the same subcommittee.

June 16, 23, 24: On the House side again, this time at the beck of the Legislative Oversight Subcommittee (Comrs. Doerfer, Rosel Hyde and several division heads).

June 18-24: Back to the Senate for equal time hearings.

June 30 and into July: In the Senate Office Bldg. again for CATV and vhf booster hearings.

Date undetermined: An "informal" session with members of the Senate Commerce Committee.

Adding to the difficulties on the dual appearance dates are the long 600 yards which separate the Senate and House Office Buildings. Messrs. Doerfer and colleagues, at latest report, had not placed an order for powered roller skates.

this is

strength

THE TAFT STATIONS . . . have their greatest strength in listener and viewer confidence. It is this confidence in Taft Radio and Television Stations—and in Taft-advertised products by the consumer—that is resulting in an ever increasing volume of sales for advertisers using the facilities of The Taft Stations.

If you are interested in having your advertising dollars earn more . . . now is the time to invest them in growing Taft Stations.

of the Justice Dept.'s brief to the FCC (filed May 7), termed the decision a "threat to news coverage of political events by television and radio." He justified the Justice Dept.'s intervention before the FCC by citing legal precedents and decisions permitting this move.

Rep. Harris made a similar inquiry on the subject of the Justice Dept. intervention to FCC Chairman John C. Doerfer. Mr. Doerfer's reply was understood to be in preparation at week's end.

Prosecution maintains barrage in Mack trial

Government attorneys continued their case last week against former FCC Comr. Richard A. Mack and his friend, Miami attorney Thurman A. Whiteside. It was the ninth week of the criminal conspiracy trial in which the two are charged with conspiring to obtain the FCC's 1957 grant of ch. 10 in Miami for Public Service Tv Inc., a subsidiary of National Airlines.

A. Harry Becker, attorney for North Dade Video Inc., one of three losing applicants for ch. 10, testified that Mr. Mack told him before the award that his vote was committed to PST.

Milton Singman, agent-accountant with the FBI, presented charts showing financial transactions between Mr. Whiteside and Mr. Mack while the latter was a member of the FCC.

Government prosecutor J. Frank Cunningham said Thursday (June 4) he intends to call a "few more" witnesses before resting the government's case against the pair.

Federal District Judge Burnita S. Matthews overruled defense objections against entering testimony into the court record which had been made by Mr. Mack before the House Legislative Oversight Subcommittee in 1958. Mr. Mack had testified he had two talks with Mr. Whiteside in August 1955—a month before he became an FCC member—and in early 1956 in which Mr. Whiteside recommended PST for the ch. 10 award. Mr. Mack had also testified that Mr. Whiteside emphasized he had not been retained by PST, that he had not asked Mr. Mack for a pledge of his vote and that he (Mr. Mack) had made no commitments in the case. This testimony was re-enacted by government prosecutors.

Defense counsel Nicholas J. Chase (Mack) and Arthur J. Hilland (Whiteside) also protested against evidence on a $5,000 payment made to Stembler-Shelden Insurance Agency, Miami firm controlled by Mr. Whiteside, by Parker & Co., a New York firm which handles National Airlines insurance. But Judge Matthews ruled in favor of entering this transaction. Evidence indicated Stembler-Shelden 10 days later drew a check for $2,250 to Andar Inc., in which Mr. Mack owned all the stock. Defense counsel held this payment represented Mr. Mack's share of commissions from Stembler-Shelden for business with Pan American Construction Co. and was not connected with the Miami ch. 10 case.

The government holds Mr. Whiteside arranged financial payments to Mr. Mack in return for his vote in the ch. 10 case. The defense holds the financial relationship between the two defendants existed a long time prior to Mr. Mack's tenure on the FCC and was merely a continuation of the same relationship.

Senate okays Hyde in unanimous vote

By a unanimous voice vote the Senate last Thursday (June 4) confirmed the reappointment of government career official Rosel H. Hyde for a third straight seven-year term as an FCC commissioner.

Mr. Hyde's nomination was reported favorably last Tuesday by the Senate Commerce Committee following brief hearings 10 days ago (BROADCASTING, June 1).

The Idaho Republican, whose present term expires June 30, has been a member of the FCC since 1946. He entered government service in 1924 as a clerk in the Civil Service Commission. In 1928 he moved over to the Federal Radio Commission, first as a clerk, then as an attorney. When the FCC was created in 1934, Mr. Hyde remained as an attorney, became assistant general counsel, then general counsel. He was named a commissioner in 1946, and reappointed in 1953.

Mr. Hyde was chairman of the FCC from April 18, 1953 to Oct. 4, 1954.

FCC's COMR. HYDE
Begins third straight term

FCC visits oversight subcommittee June 16

The FCC will make its next appearance before the Legislative Oversight Subcommittee June 16 to discuss four designated problems of the Commission. Also participating will be several industry figures and practicing attorneys.

The five other major regulatory agencies also will appear individually before the subcommittee the same week with general round-up discussions involving all six agencies to be held June 23 and 24. Appearing for the FCC will be Chairman John Doerfer, Comr. Rosel Hyde, Chief Counsel John FitzGerald, Chief Engineer Ed Allen, and Chief Hearing Examiner James Cunningham.

At the request of the subcommittee, the FCC has recommended that the following persons be invited to participate in the panels: William Koplovitz, Percy Russell, Ralph Walker, Leonard Marks, Jeremiah Courtney and Charles Rhyne, all Washington attorneys; John Patt, president of WJR Detroit; James Kennedy, executive vice president and general counsel of American Cable & Radio; William Wendt, general counsel, and William Seward, both Western Union; Vincent Wasilewski, NAB; Ward Quaal, vice president and general manager of WGN-AM-TV Chicago; and E. B. Crosland.

Hugh Hall, Duke U. political science professor, joined the subcommittee staff last week as the 15th man of a planned 16-member staff. Richard Goodwin, aide to U.S. Supreme Court Justice Felix Frankfurter, will move to the subcommittee July 1.

Other professional members of the Oversight Subcommittee staff are Chief Counsel Robert Lishman, Oliver Eastland, Jules Eanet, Stewart Ross, Mary Ramsey and Herman Beasley, all holdovers from 1958; minority counsel John Marshall Stark, Beverly M. Coleman and Charles Howze.

Johnson to speak for Repeater Assn.

Vhf tv booster operators and allied tv broadcasters from seven western states have named Edwin C. Johnson, past governor of Colorado and former chairman of the Senate Commerce Committee, to head their delegation which will testify before a subcommittee of that Senate group starting June 30 on a number of bills on vhf boosters, community antenna tv systems and related matters.

The National Tv Repeater Assn., meeting in Denver May 29, elected Jess Slusser, former chief engineer of KOA-TV Denver, as president. Jim Beamer, secretary of the Tri-State Tv Repeater Assn. (Montana, Wyoming, Idaho), was elected secretary-treasurer of the national group (BROADCASTING, May 25).

Colorado Gov. Steve McNichols told the booster-broadcaster group they had won battles but not the war when the FCC in April rescinded its order which outlawed vhf boosters and later asked Congress for legislation to authorize regulation of boosters, but the governor expressed the opinion the legislation is not really necessary for the FCC to set up vhf booster regulations.

Mr. Johnson said he does not believe the FCC is opposed to vhf boosters (the FCC had recanted its anti-booster order after heavy criticism from Capitol Hill); that "our real opposition is the well-financed CATV organization, fighting us for selfish reasons."

Rex Howell, KREX-TV Grand Junction and satellite KREY-TV Montrose, both Colorado, emphasized the common interest between broadcasters and booster operators. The Senate Commerce Committee's Communications Subcommittee, under Sen. John O. Pastore (D-R.I.), has scheduled hearings beginning June 30 on various vhf booster-CATV bills.

Subcommittee to hear FCC requested bills

The FCC is the only scheduled witness at a hearing tomorrow (Tuesday) by the Communications Subcommittee of the Senate Commerce Committee on five bills amending the Communications Act. All five measures were introduced by Sen. Warren Magnuson (D-Wash.), chairman of the full committee, at the request of the Commission.

On Thursday (June 11), the subcommittee will conduct hearings on three additional bills, two of which also

were recommended by the FCC and introduced by Sen. Magnuson. Tuesday's session will consider the following bills:

S 1734—would prohibit any person from directly or indirectly making any presentation outside the record to any commissioner or member of FCC staff after case has been set for hearing (current rules limit such presentations by participants in case before hearing examiner only).

S 1735—Would prohibit commissioners from accepting honorariums.

S 1736—Would eliminate the requirement of an oath for certain applications and filings with the Commission.

S 1738—Would redefine duties and functions of the FCC review staff.

S 1740—Would give Commission authority to regulate charges of common carriers for microwave and other point-to-point services, plus the use of wires in chain broadcasting (present authority now covers use of wires only).

Bills to be taken up Thursday:

S 1733—Would eliminate requirement that FCC must send prehearing notice before application is designated for hearing.

S 1737—Would authorize Commission to impose fines for violations of rules in common carrier safety and special service fields.

S 1898 (recommended by the Federal Communications Bar Assn.)—Would amend protest provision of Communications Act to eliminate present procedures that result when grant is made without hearing.

The subcommittee, headed by Sen. John Pastore (D-R.I.), will hold additional hearings beginning June 30 on four bills having to do with CATV and vhf boosters.

Etv subsidy dead for this session

The Communications Subcommittee of the House Commerce Committee last week effectively killed, for the present session of Congress, any chance for passage of several measures allocating $1 million to each state for educational tv.

Action on S 12, already passed by the Senate, and seven similar House bills was deferred until the committee could conduct its own etv field study sometime this fall. Some of the eight subcommittee members were in favor of reporting an etv bill to the full committee but no record vote was taken and the tabling action came on a voice vote.

Rep. Oren Harris (D-Ark.), chairman, said the subcommittee felt that it needs more information on the feasibility of providing federal funds for etv. He said the field study, with congressmen visiting various operating etv stations, would not be conducted until after schools are back in session this fall.

ANTI-TRUST SUIT
Poller dealt setback in case against CBS

CBS Inc. and other defendants won a round last week in a $4.35 million anti-trust suit against them by Lou Poller, permittee of WCAN-TV Milwaukee on ch. 25, when a federal judge ruled favorably on a motion by the defendants for summary judgment, holding Mr. Poller has not made a case that warrants hearing before a jury.

Judge Alexander Holtzoff of the Federal District Court in Washington issued the ruling Wednesday (June 3). Mr. Poller's attorneys said the judge's ruling for CBS will be taken to the U.S. Court of Appeals for the District of Columbia.

Mr. Poller filed the $4.35 million triple damage suit (based on claimed damages of $1.45 million) in September 1956, charging CBS drove him out of business when it bought WOKY (TV) Milwaukee (ch. 19) in 1954, changed its call letters to WXIX (TV) and moved CBS-TV programs to ch. 19. WCAN-TV has left the air but Mr. Poller retains his permit for ch. 25.

He charged that CBS dissuaded Storer Broadcasting Co. from negotiating for a $2 million purchase of WCAN-TV, that CBS assured Mr. Poller WCAN-TV would continue as the CBS Milwaukee outlet, that WCAN-TV on the basis of this assurance contracted to lease new quarters for $500,000 and bought new equipment, that CBS secured an option to buy WOKY and that as a result of CBS's $350,000 purchase of the ch. 19 station, WCAN-TV had to close down.

The Descendants • Mr. Poller's suit was brought against CBS Inc., Bartell Broadcasters Inc. (former owner of the ch. 19 station), CBS-TV, J.L. Van Volkenburg (then president of CBS-TV), H.V. Akerberg (then CBS-TV station relations vice prseident) and Thad Holt, former owner of WAPI, WAFM and WAFM-TV Birmingham, Ala., and now board chairman of WATV Birmingham. Mr. Holt had been charged with acting as a "front" for the CBS purchase of the ch. 19 station.

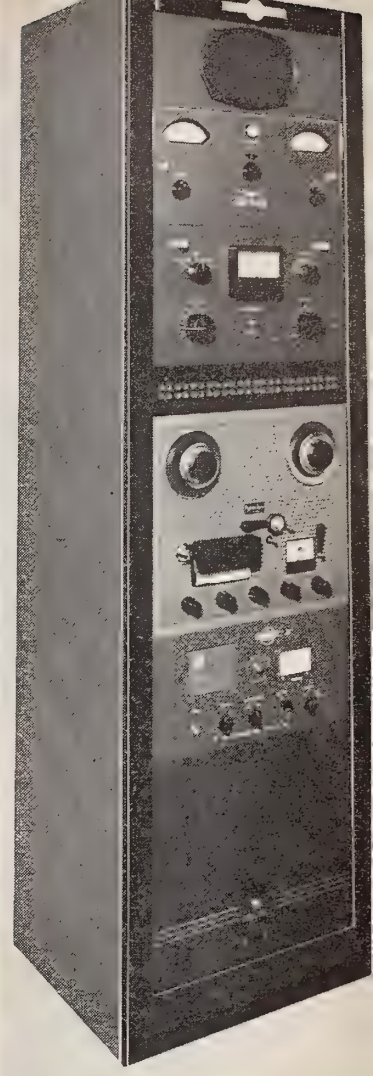
Mr. Poller arrived at the $1.45 million damage figure by placing a value of $2 million on WCAN-TV and subtracting $500,000 paid to him by CBS for his equipment and studio-transmitter quarters leases. Mr. Poller had in turn received the WOKY equipment, which he valued at $50,000, also subtracted from the damage figure.

When he filed his suit in 1956, Mr. Poller told BROADCASTING that the full impact of the Milwaukee transactions, made in 1954, did not "hit" him until almost a year afterward, and that preliminary work with attorneys took several more months.

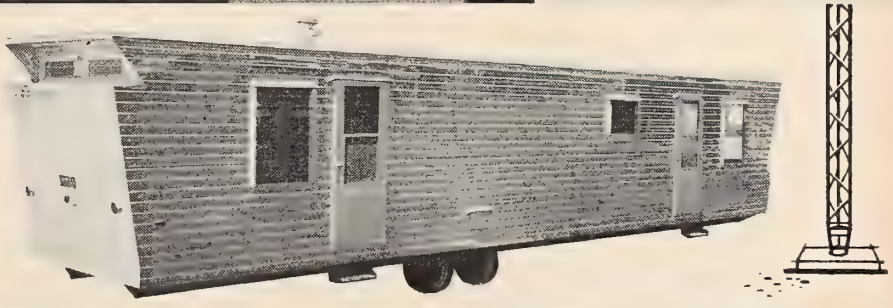
CBS and the other defendants moved for summary judgment in September 1957.

CBS closed down WXIX (TV) last March 31, moving its affiliation to WITI-TV Milwaukee, ch. 6 outlet which had been bought some time before by Storer Broadcasting Co. CBS afterward sold the ch. 19 outlet, which has a modified permit for ch. 18, to a firm headed by Gene Posner, also president of WMIL Milwaukee, for $50,000. WXIX is expected to return to the air shortly under its new ownership (CLOSED CIRCUIT, June 1).

KAKJ (TV) revoked



In a rare move, the FCC last week revoked the construction permit of ch. 4 KAKJ (TV) Reno, Nev.



The construction permit for the Reno facility was granted to Nevada Telecasting Corp. in the spring of 1955 but construction has never been completed. The application for the channel showed Robert Fish as the sole owner of Nevada Telecasting although he actually advanced no money at the time for the proposed station and went to Canada prior to the grant. In an initial decision early last year recommending revocation of the KAKJ (TV) permit (BROADCASTING, March 17), FCC Hearing Examiner Herbert Sharfman concluded that "misrepresentation and false statements to the Commission about the ownership, financing and proposed construction" of the station had been made.

Senate okays Kintner

Earl W. Kintner was confirmed by the Senate last Thursday as a member of the Federal Trade Commission, replacing resigned Chairman John W. Gwynne. Mr. Kintner had been general counsel of the FTC. His appointment was favorably reported last Tuesday by the Senate Commerce Committee following brief hearings 10 days ago (BROADCASTING, June 1).

GET ON THE AIR FAST WITH A

COLLINS BROADCAST TRAILER

Once you have your CP, Collins' new Broadcast Trailer puts you on the air with a fully equipped radio station in minimum time. Collins' Broadcast Trailer saves you delay, earns revenue sooner — you start broadcasting and billing instead of waiting for construction. Save on initial installation, have a mobile studio when you move to permanent buildings.

This compact 8 x 40 foot radio station is factory wired and tested — reduces your installation time and cost. It sets up immediately on your site, has a studio, control room, transmitter room, manager's office and rest room facilities. Each station comes complete with Collins equipment, including microphones, control desk and studio console, monitors, two 16 inch turntables, 250, 500 watt or 1 kw transmitter, heating and air conditioning.

Eliminate building delays, get on the air *fast* and economically with a Collins Broadcast Trailer.

For delivery information, price and technical specifications, write your nearest Collins Broadcast representative or Collins Radio Company, Broadcast Sales Division, Cedar Rapids, Iowa.

Dec. launching target for voice satellites

The first of perhaps a dozen experimental communications satellites will be launched in December, it was announced last week by the National Aeronautics & Space Agency.

And, Leonard Jaffe, NASA communications expert, said that the communications satellite—a 100-ft. aluminized balloon—would be used to reflect radio signals between a west coast government installation and a "private" installation on the East Coast. The non-government east coast facility is Bell Telephone Labs.

Mr. Jaffe made his observations at a panel on space communications at the Washington convention of the Armed Forces Communications & Electronics Assn.

In answer to a question regarding cost, Mr. Jaffe foresaw in 1970 a space system handling 21 million telephone calls. If each call were three minutes long, he pointed out, and the present overseas $12 rate for three minutes were applied, the system would earn $252 million for the year—enough he said to justify it.

He also stated that 30 satellites would provide global coverage.

The NASA passive reflectors would be put into orbit after ejection from a rocket, about 1,000 miles above the earth. This would mean, it was pointed out, that a single balloon would be "visible" over the U.S. only some 10-20 minutes a day when its orbit is correct for coast to coast relaying.

Later, it was stated, it is planned to put a passive reflector into orbit at the 22,000 mile point. At this height, the satellite orbits around the earth at the same speed that the earth turns—once every 24 hours. This gives it a "stationary" position over a single point on earth.

Once the balloon is in orbit, it was emphasized, anyone can use its surface as a radio reflector.

WKIS restates its stand on Orlando ch. 9

WKIS Orlando, Fla., last week reiterated its position that the Orlando ch. 9 case should be determined by the U.S. Court of Appeals in Washington—not remanded by that court to the FCC for rehearing.

WKIS asked the full nine-member court to hear arguments, instead of the three members, Judges Charles Fahy, George T. Washington and John A. Danaher. This three-judge panel had remanded the case to the FCC to hold hearings on allegations that WLOF Orlando, which was awarded ch. 9 in 1957, had engaged in *ex parte* activities during adjudication.

The appeals court originally had upheld the grant in May 1958. WKIS appealed to the U.S. Supreme Court, which remanded the case to the appeals court to look into the *ex parte* allegations. (The FCC also asked for return of the case for the same reasons.)

WKIS had countered the FCC request to the court by asking that the court take jurisdiction away from the FCC and refer the case to a "special master" answerable only to the court. Noting this request was turned down by the court, WKIS last week said in its petition for rehearing *en banc* that the Administrative Procedures Act requires the appeals court itself, in remanding a case, to find whether the FCC grant was improper, not let the FCC make such a determination. The Supreme Court itself is not required to make a determination of whether the grant is proper since the law governs only the procedure in setting aside decisions of a government agency, WKIS said.

WKIS charged the appeals court has "taken the line of least resistance and merely remanded the case for the Commission to determine the propriety of its own decision," adding that this procedure is "manifestly inappropriate under the act"; that the fact it has been followed in other cases does not make it proper.

In earlier action, WKIS had indicated it felt the FCC was likely to be prejudiced in favor of its original award of ch. 9 to WLOF. WKIS also charged the FCC refused to give it an opportunity to take part in a preliminary inquiry as to whether a full-scale investigation and rehearing should be held.

Philco asks action on WRCV-AM-TV case

Philco Corp. last week called on the FCC to expedite a court-mandated hearing on Philco's protest of license renewals for RCA-NBC's WRCV-AM-TV Philadelphia. Philco noted its original protest was filed in August 1957, the FCC denied it, the U.S. Court of Appeals reversed the FCC, the U.S. Supreme Court denied *certiorari* and the appeals court issued its mandate for hearing last Feb. 2.

Philco, which had charged RCA and NBC with a course toward monopoly, added that since the protest was filed (1) RCA has been indicted, convicted and fined for violating the criminal provisions of the antitrust laws (2) RCA has recently paid the plaintiff in a private antitrust action against RCA a "very substantial sum" of money; (3) a consent decree has

been entered in a civil suit brought by the government against RCA, directed against patent abuses in the communications field, and (4) RCA has been named as a co-conspirator (but not a defendant) in a government suit charging restraint of trade in radio and tv sets between the U.S. and Canada.

• Government notes

• Hearing on the Beaumont, Tex., ch. 6 case—in and out of courts and FCC hearing rooms for the last five years—is scheduled to begin Thursday (June 11), following denial by the U.S. Court of Appeals, Washington, of a request for *mandamus* by the Enterprise Co. (KRIC Beaumont). KRIC had asked the court to order the FCC to make a finding on the present record of the disputed $55,000 payment by KFDM Beaumont to withdrawing applicant KTRM Beaumont (BROADCASTING, May 25). The ch. 6 grant was made to KFDM in 1954, but KRIC has fought the decision in the FCC and in the courts. The latest round is the result of a remand by the Court of Appeals ordering the FCC to make a finding on the payment to KTRM (BROADCASTING, Feb. 2). The money was loaned to KFDM by W. P. Hobby (*Houston Post*-KPRC-AM-FM-TV Houston) who holds an option to buy 32.5% of KFDM-TV if the grant is made final.

• Suit for $1 million in damages was filed last week by Miami restaurateur Wolfie Cohen against newspaper-radio columnist Drew Pearson, NBC, WCKR Miami and the Federal Savings & Loan Assn. of Miami Beach. Mr. Cohen charged that Mr. Pearson libeled him in a broadcast May 31 by identifying him erroneously as an attorney for alleged underworld figures and the Teamsters Union. The savings & loan bank sponsored the Pearson program on the local station.

• M&M Specialties Inc., New York, which distributes a paint-sprayed sheet of plastic that gives color effects to black and white tv when attached over the screen of a tv set, has signed a consent order with the Federal Trade Commission in which it agrees to stop claiming the product will produce "real-life" color tv. The FTC held the plastic sheet does not give the same visual effect as color tv because objects on the screen are a different color from those on color tv. The agreement does not constitute an admission by M&M that it has violated the law.

• The FCC last week dismissed the application of Western Nebraska Televison Inc., for a new tv outlet on ch. 13 in Alliance, Neb. Western Nebraska had petitioned for the dismissal.

Another thriller-diller from WJRT—

"Did I goof, Chief?"

"Afraid so, Ponsonby. Next time someone wants the most efficient way to reach Lansing, Flint, Bay City and Saginaw, send 'em via WJRT."

Whooosh! On the wings of a Grade "A" or better signal, WJRT messages are beamed to four big metropolitan areas: Flint, Lansing, Saginaw and Bay City. It's the most efficient way there is to reach this rich mid-Michigan market and its nearly half a million TV households. Here, in a single-station buy, is the heart of Michigan's *other* big market. And here is your chance to buy it all in one swoop. But hurry; we're selling the spots off it.

PARAMOUNT PLANS WIRED PAY TV

Balaban sees start next year, says he'll announce details soon

Paramount Pictures Corp. expects to have a wired pay tv system in operation next year.

The prediction was made last week by Paramount President Barney Balaban at an annual stockholders meeting in New York. International Telemeter Co. (a metered cash box toll tv system) is a Paramount division.

Mr. Balaban told stockholders that announcements on the wired system would be made "at appropriate times," adding that they would be forthcoming in "a matter of weeks, I think."

He explained to newsmen after the meeting that Telemeter would be in about 6,000 homes but refused to specify in which areas of the U. S.

Pay Tv Inevitable • Said Mr. Balaban: "I hardly need to reemphasize my oft repeated conviction that some form of pay television is inevitable. The opposition can delay it only temporarily. It cannot be stopped. We plan to move ahead in an orderly fashion establishing pay tv on a sound basis."

Mr. Balaban also got off a few words about Paramount's disposition of its post-1948 feature library. In any such consideration, he warned, "there is the ever alluring potential of pay television" and in the next two years "we should know a great deal more about pay television."

At that time, he said, Paramount would have a "much better basis upon which to evaluate" the post-1948 library.

Mr. Balaban said he thought the supply of pre-1948 film on tv will last for another two or three years "or possibly longer" and thus it's "premature" for Paramount to seriously consider disposing of the post-1948 product to tv at this time. He also qualified the rate of feature film consumption on tv by noting that in a few multiple-station markets "the play-off is necessarily much faster."

Return on Library • And, he observed, as the supply of pre-1948 product diminishes, the higher the value of the post-1948 library. Paramount, which was the last of the majors to dispose of its pre-1948 inventory, already has realized a return. MCA, which is distributing the Paramount pre-1948 library to tv, has grossed some $50 million in sales from which Paramount by May 25 had been able to cover the $35 million guaranteed and payable by MCA over a period of years beginning in 1960. It was hinted also that MCA will reach the $75 million payable over several years in "phase two" of the initial Paramount-MCA agreement.

A stockholder question during the meeting as to the current value of the post-1948 library drew a blank from Mr. Balaban, who indicated there was no known method for determining it.

Just a few weeks before the stockholders meeting, Mr. Balaban in Paramount's annual report (BROADCASTING, May 4) had indicated that the more commercial tv draws fire from its critics, the easier the Path would become toward public acceptance of pay television.

Telemeter officials questioned after the meeting acknowledged that the firm had access to program sources but would not identify them. Headquarters of Telemeter will be moved from Los Angeles to New York within two months.

Durgin outlines NBC-TV color plans

Coincident with Admiral Corp.'s announcement that it's headed for color tv production (see page 104), NBC-TV gave renewed evidence of its determination to give the viewer color programs to watch. Don Durgin, vice president for network sales, told the RCA distributors convention in Chicago Friday (June 5) that the network's 1959-60 season would continue its policy of offering "seven-days-a-week programming of unprecedented depth and diversity."

In the fourth quarter of 1959, for example, Mr. Durgin said NBC-TV will have 250 hours of color programming — a 30% increase over 1958's fourth quarter. And the network will expand facilities, too: It's converting its eighth and ninth color studios in Burbank, Calif., at a cost of $1 million (giving the network four color studios there, five in New York), and building a second color mobile unit for $300,000 to handle an expanded sports schedule.

Pointing to the growth in NBC-TV color programming since 1954, Mr. Durgin noted there were 68 hours of color that year, 668 in 1958. He didn't add up his 1959-60 projection except to say "1959 is going to be even better."

Barter comes out of hiding at SG

Barter, which is a practice that many tv film companies and agencies would not discuss openly in the past, apparently is gaining acceptance and going above board. Screen Gems Inc., New York, one of the leading tv film producers - distributors, last week announced the formation of a subsidiary, Telescreen Advertising Inc., New York, which will acquire time from stations by the exchange of various tv film properties out of the Screen Gems catalogue.

Though SG's announcement did not use the term "barter," this is precisely the type of operations that Telescreen Advertising will handle. Though many companies operated with barter in the past, few made public announcements. A noteworthy exception: Matty Fox's various distribution companies.

Directing the activities of Telescreen Advertising will be Charles Weigert and Sidney Barbet, both of whom have had experience in trading film for time. Since Sept. 1957, they have been the heads of Regal Adv., New York, an organization set up to handle barter transactions largely for Exquisite Form Brassieres Inc., New York. Previously, Mr. Weigert had been associated with Paul Venze Assoc., Baltimore, house agency for Charles Antell & Co., and Mr. Barbet with Antell. At that time, both were active in arranging barter agreements for Antell.

Screen Gems did not announce the specific properties that will be made available to stations on an exchange basis. It is expected to consist mainly of re-run product, both half-hour series and feature films. These properties will no longer be for sale on a straight cash basis, according to SG President Ralph M. Cohn, but will be available only for a line of credit, exchangeable for spot time. These time periods subsequently will be made available to advertisers by SG's subsidiary.

ESSO RESEARCH works wonders with oil

Now tires of Butyl "hush" your ride

Screech-free, quiet as a kitten on the sharpest turn. That's the new Butyl tire. Developed by Esso Research, this miracle rubber outperforms other tire materials. Tires of Butyl stop faster on wet roads than others do on dry. They age better – won't crack – absorb thumps and bumps, cushioning the road as nothing else will. Available now, they're another example of how **ESSO RESEARCH** *works wonders with oil.*

Esso

Record plug films establish new fees

Tele-Records Services, Hollywood, has completed negotiations with Screen Actors Guild and American Federation of Musicians for payment of fees covering 16mm film clips in which popular recording stars are shown singing their latest releases (lip-sync to original record) (BROADCASTING, Feb. 16). TRS is paid by the record firms, distributes the clips to tv stations at no charge.

Arrangement with SAG calls for a single payment of $130 to each artist, who probably works from two to four hours in making the film, TRS President Alan Lane said Tuesday (June 1). Musicians, who do not perform any extra service for the films but whose original performance is re-recorded on the films, will receive the following fees: leader, $20; contractor, $20; arranger, $25; orchestrator, $20; coypist, $10, and sideman, $10. These fees represent approximately 20% of the base rate for a recording session.

The AFM agreement was announced jointly by Mr. Lane and Herman Tranchitella, president, AFM Local 47 (Hollywood), in a statement that estimated that over $50,000 will be paid to musicians during the first year of Tele-Records operations and substantially larger sums in subsequent years.

TRS offers its films to tv stations without charge, chiefly for use on afternoon disc jockey programs which a check shows are telecast by some 250 tv stations, Mr. Lane said. The service is offered to the producers of phonograph records as a promotional service for their new discs at a flat price of $1,200 for 100 stations, $1,800 for 200 stations, TRS to make the films and the prints and handle the distribution. The record companies also pay the fees to the singers and musicians. The tv stations receive the films without cost, but in exchange for the service they agree not to use them before the release date set by the record company, not to use them after the cut-off date, to return them to TRS and to provide proof of performance on request.

New news service opens in Washington

Deadline Washington Inc. has been formed as successor to Laurence News Service with Joseph Phipps as president of the new organization. Laurence provided approximately 30 stations clients with direct news reports from Washington, D.C.

An announcement stated that Mr. Phipps has resigned as news and editorial director of WWDC Washington to assume the new duties. WWDC won a 1959 National Headliners Club award for its editorials. Jock Laurence, head of Laurence News Service, will remain with the new organization.

COLORCASTING

Here are the next 10 days of network color shows (all times are EDT):

On NBC-TV

June 8-12, 15-17 (2:30-3 p.m.) **Haggis Baggis**, participating sponsors.

June 8-12, 15-17 (4-4:30 p.m.) **Truth or Consequences**, participating sponsors.

June 8, 15 (10-10:30 p.m.) **Arthur Murray Party**, P. Lorillard through Lennen & Newell and Pharmaceuticals Inc. through Parkson Adv.

June 9, 16 (8:30-9 p.m.) **Jimmie Rodgers**, Liggett & Myers through McCann-Erickson.

June 10, 17 (8:30-9 p.m.) **Price Is Right**, Speidel through Norman, Craig & Kummel and Lever through J. Walter Thompson.

June 10, 17 (9-9:30 p.m.) **Kraft Music Hall Presents Dave King**, Kraft through J. Walter Thompson.

June 11 (9:30-10 p.m.) **Ford Show**, Ford through J. Walter Thompson.

June 11 (10:30-11 p.m.) **Masquerade Party**, P. Lorillard through Lennen & Newell.

June 12 (7:30-8 p.m.) **Northwest Passage**, sustaining.

June 12 (8-9 p.m.) **Ellery Queen**, Gulf Oil through Young & Rubicam and Burgermeister Brewing Corp. through BBDO.

June 13 (10-10:30 a.m.) **Howdy Doody**, Continental Baking through Ted Bates.

June 13 (10:30-11 a.m.) **Ruff & Reddy**, Bordens through Benton & Bowles and Mars through Knox-Reeves.

June 13 (8-9 p.m.) **Perry Presents Tony Bennett & Teresa Brewer**, RCA Whirlpool through Kenyon & Eckhardt and American Dairy through Campbell-Mithun.

June 14 (7-7:30 p.m.) **Midwestern Hayride**, Local, co-operative sponsorship.

June 14 (9-10 p.m.) **Chevy Show**, Chevrolet through Campbell-Ewald.

WTMJ wins AP award

First place in the Associated Press Radio & Tv Assn.'s 1958 awards for cooperation in news exchange was won by WTMJ Milwaukee, it was announced Thursday (May 28) by Daniel W. Kops, president of APRTA. Second and third place awards went to KAKC Tulsa, Okla., and KVOE Emporia, Kan., respectively.

WTMJ was cited for both quality and quantity (380) of news reports it filed last year, while KAKC took second for supplying the most stories (453). KVOE won for its coverage of the El Dorado, Kan., tornado, which AP said gave it a 44-minute beat over other services.

CBS gets Sid Caesar

Veteran tv entertainer Sid Caesar has been signed to a long-term exclusive contract with CBS-TV, it was announced Friday (June 5) by Louis G. Cowan, president of CBS-TV. Mr. Caesar has not previously appeared on that network.

Under terms of the contract Mr. Caesar will star in a series of one-hour comedy specials, the first to be on the Oct. 21 *U.S. Steel Hour*. The Caesar specials will be produced by his own company, Shellrick Corp., with Hal Janis as executive producer. Mr. Caesar reported that Audrey Meadows has been signed as a regular performer in the series.

It's back to 'School'

Ding Dong School with Dr. Frances Horwich as teacher will return to the air in September in some 75 markets as a result of a contract signed last week between the production firm of H. G. Saperstein & Assoc., Hollywood, and Paramount Television Productions-KTLA(TV) Los Angeles. The contract, which calls for 130 half-hour programs for nationwide fall release, comprises the largest single video tape deal ever signed, according to Independent Television Corp., New York, distributor of the series (CLOSED CIRCUIT, May 18).

Ding Dong production is slated to start this month at Paramount studios in Hollywood. The award-winning series originally started locally in Chicago in 1952. ITC reports the new contract involves the largest amount of tape in footage to be used, the largest number of productions involved in a single contract and the most time on the air when the series is launched in September. KTLA will present the series Monday through Friday for a 52-week period starting in September, according to ITC.

• Program notes

• Elliot-Unger-Elliot, commercial production division of Screen Gems Inc., New York, announces the installation of a second Ampex Videotape unit. With the addition also of new 35 mm kinescope recording equipment, EUE reports that commercials produced on tape can be recorded on kine in order to supply film prints as well as tape of the same commercial.

• In its first tv sports syndication venture, United Press International will distribute taped telecasts of Notre Dame's 10 football games this fall. The package will be produced by Newspix Inc., subsidiary of Bert L. Coleman Assoc., New York. Sports Network Inc., New York, will provide transmission and network facilities for the telecasts which are to be carried over a minimum of 115 stations.

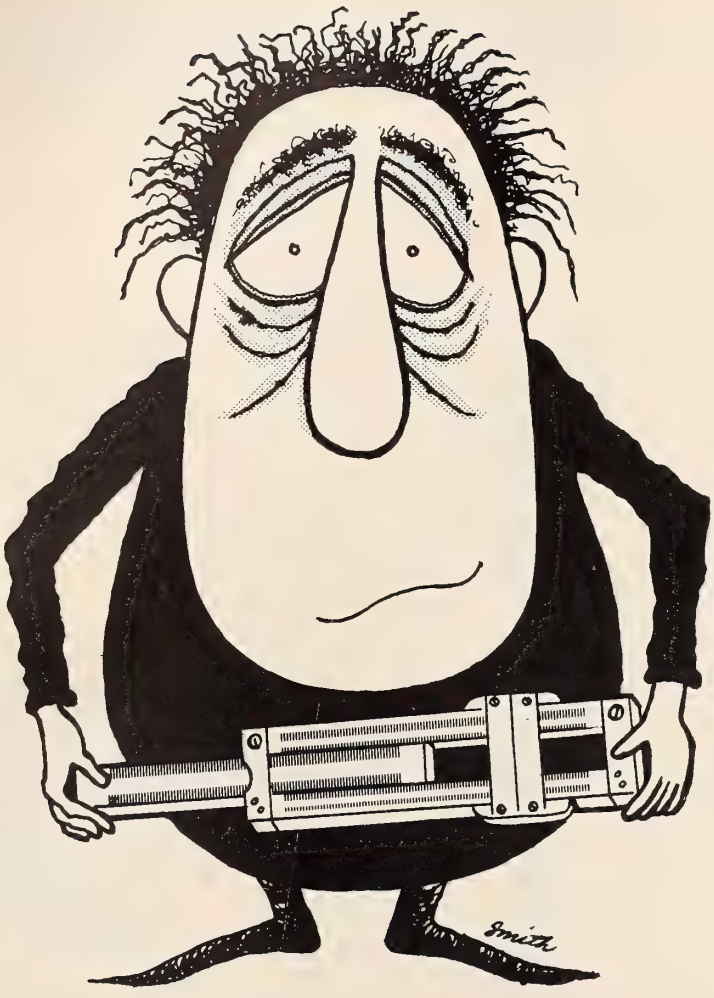
• Veronica Lake will narrate *News in Fashion*, film series coming from Monarch Productions Corp., New York, in the fall. In what is said to be the actress' first major tv project, plans call for filming just before air date of each installment in order to keep up with new fashion developments.

• *Felix the Cat* will be on view at the

American National Exhibit in Moscow starting July 25. The episodes to be telecast continuously over RCA-NBC facilities at the exhibition are part of a new *Felix* series being produced by Trans-Lux Television Corp., New York.

• ABC Films Inc., New York, will distribute *Congressional Investigator,* to be produced by Howard-Wolper Productions Inc., Hollywood. The 39 half hours are to be based on material from a number of congressional investigations, which are under research by associate producer Harvey Bernhard. This is the first joint venture of Sandy Howard and Dave Wolper, longtime tv producers and packagers.

• California National Productions, New York, reports the following new sales of its *Danger Is My Business* tv series in color and in black and white: WSB-TV Atlanta, WTVU (TV) San Francisco and to the Kroger Co., via Campbell-Mithun for KSD-TV St. Louis, all in color. Others are WTOC-TV Savannah, Ga.; KTVE (TV) El Dorado, Ark.; WLBZ-TV Bangor, Me.; KRBC-TV Abilene, Tex.; KFBB-TV Great Falls, Mont.; WGR-TV Buffalo, N.Y.; KEYT (TV) Santa Barbara, Calif., and WHYN-TV Springfield, Mass.



• Jay Emmett Assoc. New York, has been signed by General Artists Corp. there as exclusive merchandising representative for *The Many Loves of Dobie Gillis,* which debuts on CBS-TV in September.

• Trans-Lux Television Corp., New York, announces the release for syndication of *Animal Parade,* 26 quarter-hour wild life films. Trans-Lux's *Encyclopaedia Britannica* library of short subject films is now in some 60 markets, latest buyer being WNEW-TV New York. Renewing *Britannica* is WKBT-TV La Crosse, Wis.

• MCA-TV, New York, reports sale of the Paramount pre-1948 features to KTVH (TV) Hutchinson, Kan.; WAPI-TV Birmingham, Ala., and WTPA-TV Harrisburg, Pa., bringing total number of markets covered to 54.

• Banner Films, New York, has obtained distribution rights from radio & tv packagers there for *Cartoon Classics* and *Jungle. Classics* consists of 208 five-and-one-quarter-minute animated cliff hanger episodes, 104 of which are going into distribution for the first time. *Jungle,* which has had prior circulation, is composed of 52 15-minute episodes.

• *The Attacked Talk Back,* a series of half-hour tapes, is available from Charles Garland, 1706 Commonwealth Ave., Alexandria, Va. Telephone: Temple 6-4652.

anyone for statistics?

Let's face it—we're in a business where statistics flow like . . . er, water.

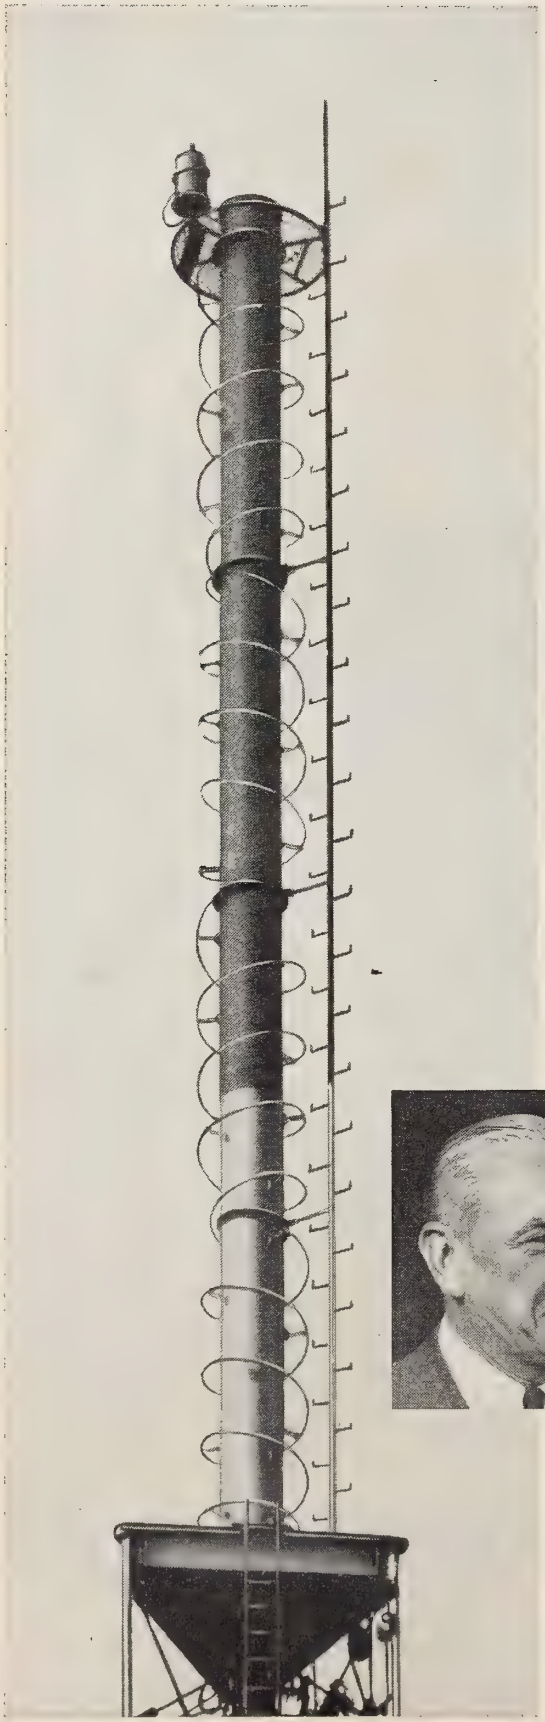
Since this is the case, here are a few for your consideration:

In the morning, WBT's audience lead over its nearest competitor is 92%.*

In the afternoon, WBT's audience lead over its nearest competitor is 69%.*

At night, WBT's audience lead over its nearest competitor is 123%.*

Three mighty good reasons for placing your next schedule on WBT—the station that creates the nation's 24th largest radio market. Call CBS Radio Spot Sales for availabilities.



*Pulse 25 county area March 1959

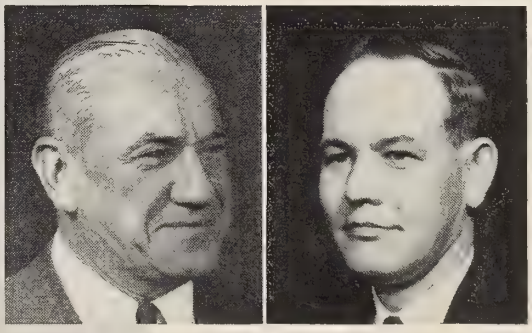
STATIONS PRAISE GENERAL

"Saved cost"...

WIIC, Ch. 11, Pittsburgh
"Our transmitter dumps 100 KW into the antenna . . . this input power is no problem for our VHF helical and our signal blankets the Tri-State Area right up to the base of our tower."

Robert Mortensen,
General Manager



WQED, Ch. 13, Pittsburgh
"Simple power division of our sectionalized VHF helical antenna puts our signal in close to our downtown antenna site too . . . a G-E UHF helical antenna for our second educational channel (WQEX) rides piggyback atop the VHF helical — saved cost of another tower."

Edward Horstman,
Director of Engineering

WTEN, Ch. 10, Albany, N. Y.
"Charlie Heisler, our chief engineer, and I are delighted with the performance of the VHF helical. We went on air Dec. 1, 1957, and the only complaint I have heard to date is from the poor fellow who has to climb 1400 feet to change the beacon light."

Tom Murphy,
General Manager

WAST, Ch. 13, Albany, N. Y.
"Extensive field strength tests (and our mail) show that we're putting a good signal where we want it, and that we're meeting FCC requirements to a tee."

W. G. Riple, General Manager
Elmer Snow, Chief Engineer

WJMR-TV, New Orleans, La.
"We've been simulcasting on experimental station KK2XFW, Ch. 12, since September, 1957. Our VHF helical has performed perfectly, both directionally and non-directionally. We've had no pattern variations caused by weather, and no maintenance problems."

George Mayorall,
General Manager & Chief Engineer

ELECTRIC VHF HELICAL ANTENNA

"Delighted"... "Good signal"... "No problems"

STRONGER, SIMPLER, GIVES BETTER RECEPTION IN DIFFICULT AREAS

90% Fewer Components, Easier to Maintain The helical antenna is simpler in design than any other type. Gain for gain, it has 90 percent fewer junctions, feed points and other connections. Transmission lines are *inside* the mast, completely protected from weather and shielded from the RF field. The helical antenna withstands winds up to 112 miles per hour, while its superior rigidity prevents pattern fluctuations. The radiating helix doubles as its own de-icer.

Greater gain, custom coverage General Electric helicals are available with power gains of up to 25. Horizontal field patterns can be directionalized by means of simple tuning stubs on the helix. Power division and phasing between sections provide desired null fill-in. Antenna experts at Electronics Park will work with your consultant for the best coverage patterns.

The helical antenna has been proved in use by TV stations in every section of the country. For further information, contact your nearest G-E Broadcast Equipment representative, or write Broadcasting Equipment, General Electric Company, Electronics Park, Syracuse, N. Y. In Canada: Canadian General Electric Co., Ltd., Broadcast Equipment Sales, 830 Lansdowne Ave., Toronto, Ontario. Outside the U. S. A. and Canada: International General Electric Co., Inc., 150 E. 42nd St., New York, N. Y.

NEW—VHF LOW-CHANNEL WRAP AROUND HELICAL
All the advantages of standard helicals but utilizes tower structure as mast. Stations now using include WKTV, Ch. 2, Utica, N. Y., and KVIE, Ch. 6, Sacramento.

Outstanding Advantages of the G-E VHF Helical

- Fewer feed points and feed lines greatly reduce air leak and coupling problems.
- Another antenna can be "piggy-backed" on the helical, permitting two or more stations to use the same tower.
- Feed lines inside mast protected from weather and shielded from RF field.
- Helical can be readily sectionalized for emergency operation.
- Choice of self-diplexing dual-line feed or diplexed single-line feed.
- Has no separate heating elements for de-icing; using helix as own de-icer takes less power.
- No feed lines smaller than 3⅛" diameter — rugged, durable with high load capacity.
- Structurally rigid; resists shifting of feed lines, eliminates pattern fluctuations in winds.

GENERAL ELECTRIC

Last-minute check between Executive V. P. Bretherton (left) and Chief Engineer Holmes (standing on elevator landing) before a technician starts his ride up the tower.

"This Dresser-Ideco tower elevator helps WTOL-TV assure advertisers of uninterrupted service"

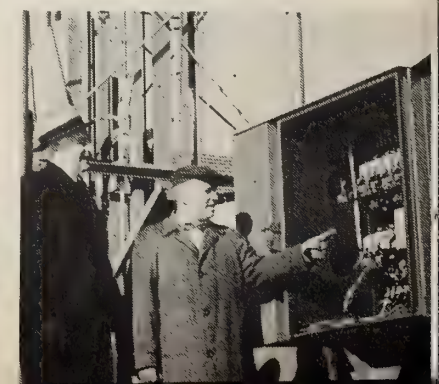
reports Thomas S. Bretherton, WTOL-TV General Manager and Executive Vice-President

"We wanted this Dresser-Ideco tower elevator for the same reason we insisted on top quality equipment at the transmitter," says Tom Bretherton of Toledo's WTOL-TV. "It's the best way to assure our advertisers uninterrupted service."

Chief Engineer Hal Holmes adds, "The elevator makes routine maintenance easier and faster. It simplifies repair work and speeds it up. A technician would need at least 1½ hours to climb our 1046′ tower. The elevator gets him up to the antenna in a matter of minutes — fresh, ready for work. It saves time and labor, makes it much safer for technicians to keep the tower and its equipment in top condition."

The electronically-controlled elevator is Dresser-Ideco's latest significant advancement in television transmitting towers. Bretherton emphasizes, "The elevator was one of the features which impressed us when we discussed the tower with Dresser-Ideco. It's certainly an important and useful accessory for any tall tower."

Completely safe, Dresser-Ideco elevators are easy to operate and maintain. Just one switch moves the car up and down, stops it anywhere on the tower. The system is fully protected by automatic safety devices. And Dresser-Ideco's radio control system eliminates tower wiring circuits, simplifies installation and maintenance.



When you start planning a new tall tower, plan the tower **and** its elevator with Dresser-Ideco. And send now for Elevator Bulletin T-2.

Patents are pending on the Dresser-Ideco tower elevator.

Dresser-Ideco Company
Division of Dresser Industries, Inc.

TOWER DIVISION, DEPT. T-92
875 MICHIGAN AVE., COLUMBUS 8, OHIO

Branch: 8909 So. Vermont Ave., Los Angeles 44, California

Chief Engineer Holmes explains tower switch box to the boss. Frazier Reams (left), President, Community Broadcasting Co., says, "When we received the go-ahead to put WTOL-TV on the air, we chose Dresser-Ideco to build TNT . . . Toledo's New Tower. We are most happy with that decision. For one thing, there's no need to worry about our men climbing 1046′ hand over hand. They'll take the elevator . . . Toledo's most spectacular ride, and one of the safest."

COMPELLING DISTRACTION for d.j.s was Americana pool and terrace, of which tiny part is shown above. Carlton Records kept bar open at poolside.

FUN IN THE MIAMI SUN

D.j.s live it up but do some business too

Some 3,000 disc jockeys, station executives, record company salesmen and talent sunned, swam, swizzle-sticked and business-sessioned their way through the Second Annual Radio Programming Seminar and Pop Music Disc Jockey Convention at the Americana Hotel in Miami Beach May 29-31. They learned just how much they are under the public microscope—especially when reporters and photograpers also were on hand from print media which have been losing ad dollars to radio-tv (see page 96).

Sixty experts on 18 major panels, discussing topics of concern to radio during two full days of business sessions (for details, see BROADCASTING, June 1), constituted a serious balance to the convention. But by first impressions the panels were obscured by the natural lures of the environment, aided by record companies' hospitality suites which seldom closed.

A collective tab of more than $600,000 was estimated to have been spent for the weekend by delegates, stations and record companies. The Storz Stations, once again the convention host, expects a $55,000 bill. The record firms spent an estimated $200,000, covering in part such big events as the poolside cocktail parties by Mercury Records and Liberty Records, breakfasts by United Artists Records and Altantic Records, lunches by RCA Victor and Columbia, a stereo recording party by Capitol, a banquet by Dot and an all-night breakfast-dance by Roulette. One record firm (not a major label) flew a reported 80 disc jockeys to Havana for a day, helping to lessen attendance at some of the business sessions.

If there is a third annual disc jockey meeting next year—and if Todd Storz has anything to do with it—"it will be a very austere meeting, held in some relatively small midwestern city which is easily reached." Not that there wouldn't be "a reasonable amount of fun," he added, "but the emphasis would be on the business meetings."

IN MEETING ROOMS clusters of serious delegates like these attended 18 panel sessions at which 60 speakers appeared in jammed two-day agenda.

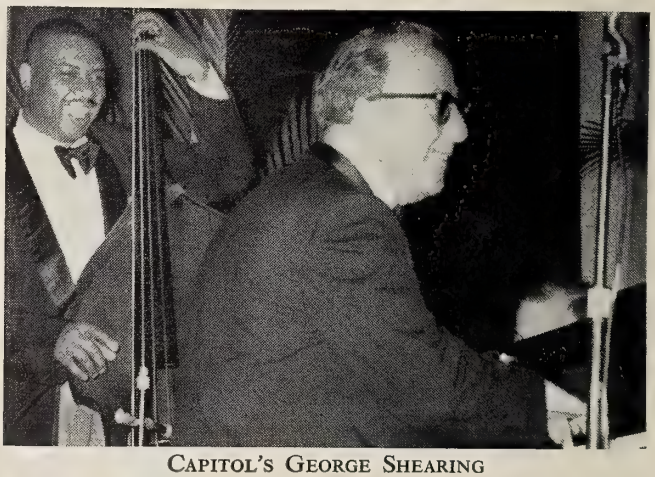
WHAT MAKES RECORDS SPIN



Disc jockeys at the Miami convention saw in the flesh a vast collection of the stars whose hit records they had been playing. It was the biggest, longest, gaudiest show ever staged at a broadcasting meeting. It began at 7:30 Saturday night, ended at 6:30 Sunday morning. Guests were fed a banquet, a barbeque and breakfast, washed down by bourbon and scotch. At 1:30 a.m. floor space was cleared, and the 26-piece Count Basie band played for dancing, with occasional breaks for more name acts. Several stars never did get on; time ran out on them. At the banquet Martin Block, WABC New York, 25 years a d.j., presented the first annual Martin Block award to Dick Martin, WWL New Orleans. Mitch Miller (lower right) was not on Saturday show; he led "sing-along" at poolside party for d.j.s Friday night.

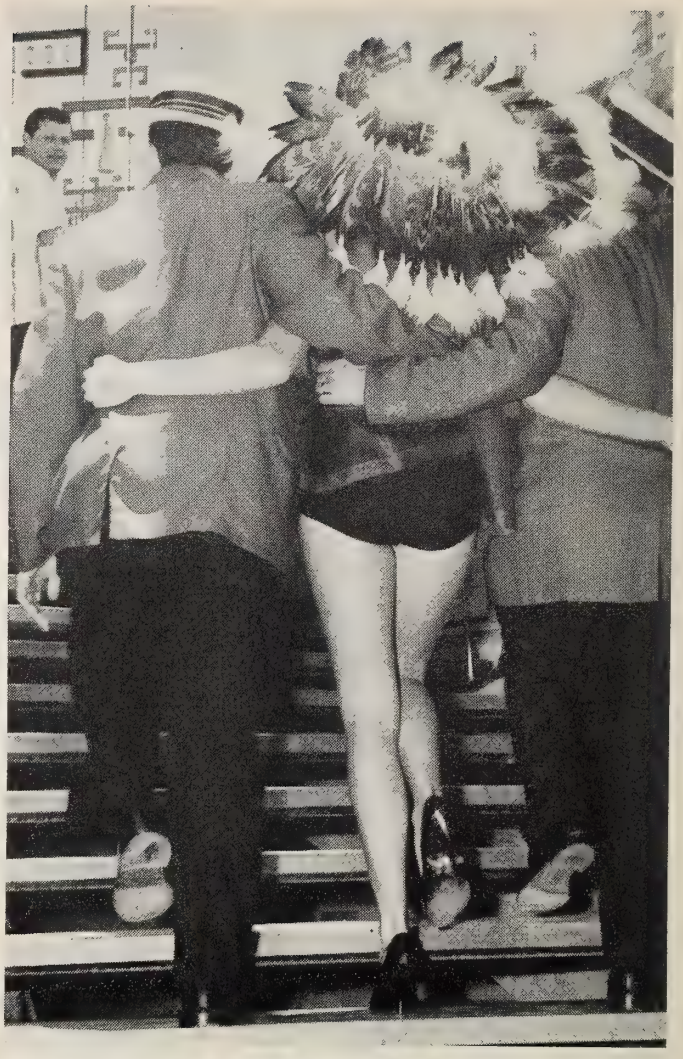
ROULETTE'S COUNT BASIE

MERCURY'S PATTI PAGE

FAVORED DELEGATES, like Martin Block, pioneer d.j., were flown from airport to hotel by helicopter.

A MOVE TO ORGANIZE



Renewed attempts were made during the convention to organize a national disc jockey association. At the close of the first day's business sessions, more than 10 hours after delegates first had been seated for a breakfast meeting, open discussion found the few surviving disc jockeys were somewhat skeptical. They recalled past failures in that direction. Record representatives at the session offered co-operation in the form of loans, gifts or assessments, but wanted the d.j.'s to act on their own. Some of the jockeys favoring eventual organization in some cases felt the time still premature. Strong proponent of organization was Bill Gavin, San Francisco, an independent radio programming consultant serving such clients as McCann-Erickson and Lucky Lager.

The shuddering thud of negative publicity was heard early Sunday morning when an edition of the the *Miami Daily News* arrived at the all-night dance. There were cries for an emergency meeting that same morning to organize in defense of attacks on the public image of the disc jockey. The emergency meeting later was called off.

National publicity of the same tenor as the local story was carried in the June 8 edition of *Time* under the headline, "Disc jockeys, the big payola." *Time* said: "If the pampered jades of Asia had turned up in Miami Beach last week they might have melted with envy. One of the most pampered trades in the U.S.—the disc jockeys—had come to town . . . and Big Daddy, in the shape of the U.S. record companies, was there to take care of them. . . . Squads of local beach girls in Bikinis were relieved by company-strength detachments flown in from New York . . . the lordly jocks drifted from back-slapper to back-slapper, soaked up booze. . . . and everywhere a d.j. went, record company promoters kept telling him: 'Without you we're dead, boy'."

Record interests pushing for a one-minute record, which could bring the nickel slot back to the jukebox, found their cause was not well received at the convention. At a panel session on the one-minute record, disc jockeys in the room by a hand vote showed 10-to-1 that they opposed the idea on grounds it would promote more commercialism and provide no entertainment. Panelists were Sol Taishoff, editor and publisher of BROADCASTING, who opposed the plan, and Norman Orleck of *Cash Box*, who favored it.

As the last strains of music wafted down lanai suite hallways and weary delegates packed to catch Sunday planes and trains, Bill Stewart too made news. As the Storz Stations national program director, he had spent six months fulltime as convention planner and coordinator. Then the word leaked out: he had resigned.

WDAE TAMPA d.j.s Pat Chamburs and Bob Hoffer went strolling with feathered model.

COORDINATOR of convention was Bill Stewart (right), national program director of Storz Stations, which sponsored meeting. He spent months on arrangements.

STARS WELCOMED interviews. Here Patti Page talks to Bob (Coffeehead) Larsen, WRIT Milwaukee, Don Keyes, McLendon Stations, Dallas, and Gene Edwards, WROW Albany.

Advertisers

• REYNOLDS GIRDLER, pr and advertising director, Sinclair Oil Corp., N.Y., elected vp.

• THEODORE BRAUDE, formerly advertising and sales promotion manager of Hazel Bishop Co., N.Y., to advertising manager of Lanolin Plus (cosmetics), Chicago.

• JACK D. BEHR, news editor of Spotlight News, commercial tv newsreel company, appointed director of advertising and public relations, technical products division, Packard Bell Electronics Corp., L.A. He succeeds DAVID M. KNOX, promoted to director of public relations for corporation.

• WOLF MAGNUS, formerly marketing analyst of McCann-Erickson, appointed senior merchandising analyst in marketing research department of Tatham-Laird, Chicago.

• EDMUND (RODDY) ROGERS, radio-tv program supervision head, N. W. Ayer & Son, N.Y., named head of agency's Hollywood office.

• HARRY SOGHIGIAN, formerly southern sales manager of *Tv Digest* magazine, to Promotion Assoc., Washington advertising-pr firm, as executive vp in charge of sales.

• RODERICK A. MAYS, Mays & Co., L.A., re-elected president of Western States Adv. Assn. Other officers elected: JACK JOHNSTONE, Guerin, Johnson, Jeffries, L.A., first vp; STAN BROWN, General Adv., Hollywood, second vp; CARL FALKENHAINER, Carl Falkenhainer Adv., L.A., secretary-treasurer. New members of board of directors are: WILLIAM J. BOYLHART, Boylhart, Lovett & Dean, L.A.; STAN BROWN, General Adv., DON JENNER, Don Jenner Adv., L.A.

• CHARLES D. BELL, formerly advertising manager, Pepperell Mfg. Co., Boston, to Badger and Browning & Parcher, that city, in executive staff capacity.

• KEITH SHAFFER, formerly network buyer with Fletcher D. Richards, N.Y., named media buyer in Chicago office of Young & Rubicam. BETTE MYERS, formerly with Tatham-Laird, Chicago, to assistant media buyer with Y&R's office, that city.

• CAYE CHRISTIAN, formerly advertising director of Neiman-Marcus, Dallas and Houston stores, named copy director of Lavenson Bureau of Advertising, Phila.

• JACK NELSON, formerly public relations director of Grant Adv., Miami, named creative director of Arthur R. Mogge, Miami-based agency.

• ROBERT H. SCHAFHAUSEN, formerly advertising manager of U.S. sales division of Max Factor & Co., N.Y., to BBDO, L.A., as account supervisor for Rexall division of Rexall Drug & Chemical Co. account.

• ED JOHNSON named account supervisor of Los Angeles and San Francisco offices of Barnes Chase.

• JOHN R. BURKE, formerly with Marsteller, Rickard, Gebhardt & Reed, joins Ketchum, MacLeod & Grove, both Pittsburgh, as account executive.

• RAY A. HERMAN, formerly with Dancer-Fitzgerald-Sample, to Street & Finney, both New York, as account executive.

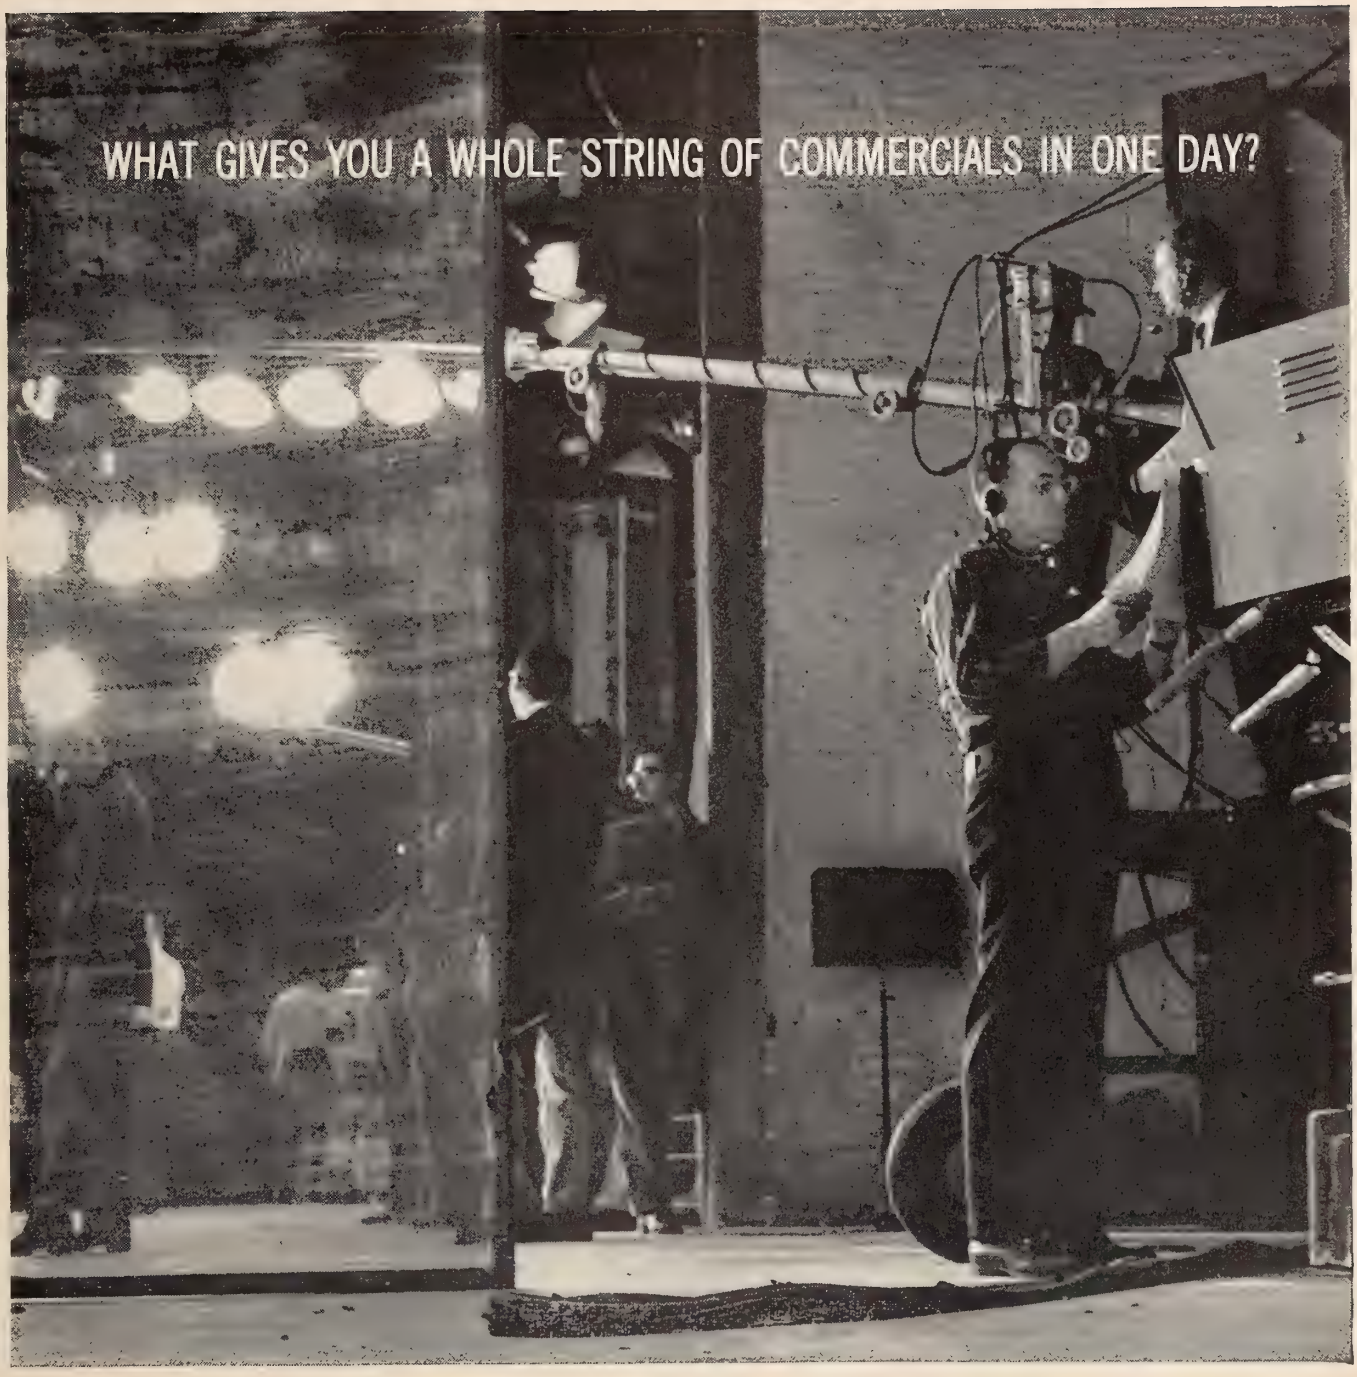
• MICHAEL DONOVAN, formerly vp and associate media director of Benton & Bowles, N.Y., to media department, BBDO, that city.

• TOM WOOD, formerly senior copywriter, BBDO, Chicago, to creative staff of Charles W. Hoyt Co., N.Y.

• JOHN MCNAMARA, formerly copywriter with McCann-Erickson, Detroit, to copywriting staff of Fuller & Smith & Ross, N.Y.

Networks

• THOMAS H. RYAN, general executive in CBS-TV program department since January, has resigned to become vp of Hubbell Robinson Productions Inc., Hollywood. Formation of that firm was announced week ago by Mr. Robinson, former programming executive vp of CBS-TV (BROADCASTING, June 1). At CBS-TV Mr. Ryan had been closely associated with both Mr. Robinson and HARRY G. OMMERLE, who resigned as network program vp last week.



MR. MAGUIRE

• PAUL A. MAGUIRE, formerly account executive, NBC Spot Sales, appointed manager newly-established Philadelphia office of NBC Radio Network Sales.

• WILLIAM S. PALEY, CBS board chairman, was recuperating last week after operation at New York Hospital for elevated diaphragm. Hospital issued bulletin which said "his condition is good—no tumor of any kind was present—no biopsy was necessary."

• SHERMAN C. HILDRETH, director of station operations facilities, NBC,

VIDEO TAPE MADE ONLY BY 3M

Rehearsal's over. The talent's ready.

The one-minute commercial goes on tape.

Then—in instants—the commercial's on the monitor, ready for approval. No time lost for processing. And no money wasted on expensive editing. Should a re-take be needed, another taping's done in just one minute.

Best of all, the taped commercial has "live" quality . . . you get a wider, truer contrast range and signal detail than has been possible by photographic recording . . . involving tolerances of three ten-thousandths of an inch.

Amazing video tape is made *only* by 3M . . . a product of the 3M Research that pioneered magnetic tape. You can rely on erasable, re-usable "SCOTCH" BRAND Video Tape.

• HAL WEATHERLY, sales coordinator of instrumentation, Midwestern Instruments (electronic recording instruments, audio tape instruments), Tulsa, Okla., named director of advertising.

• NORMAN GLADNEY, formerly head of own New York marketing firm, appointed general sales manager, Golden Shield Corp., Great Neck, N.Y., national distributors of "Golden Shield by Sylvania" (transistor, table and clock radios).

• B.T. SETCHELL, president of Setchell-Carlson, St. Paul, Minn., makers of tv-electronic equipment, adds post of general sales manager. W. C. McKNIGHT, advertising manager, named assistant sales manager of S-C.

• MARTIN SHERIDAN, information and publications director of New England Council past 18 months, rejoins Admiral Corp., Chicago, as public relations director in which capacity he served from 1951 to 1957.

• MARION E. PETTEGREW, Sylvania Electric Products, N.Y., elected chairman of Consumer Products Div. of Electronic Industries Assn. Other chairmen and directors of EIA divisions: (Military Products)—S. R. CURTIS, Stromberg-Carlson, Rochester, N.Y., re-elected chairman; J.B. ELLIOTT, Tele-Dynamics, Phila., and DR. WILLIAM F. BALLHAUS, Nortronics Div. of Northrop Corp., Beverly Hills, Calif., new directors; (Parts)—W. S. PARSONS, Cantralab Div. of Globe-Union, Milwaukee, re-elected chairman, and J. D. HUGHES, Littlefuse Inc., Des Plaines, Ill., director; (Tube and Semi-conductor Div.)—WILLIAM J. PELTZ, Lansdale Tube Co. (Philco), Philadelphia, chairman; (Industrial Electronics Div.)—BEN ADLER, Adler Electronics Inc., New Rochelle, N.Y., re-elected chairman; DR. A. B. CREDLE, International Business Machines Corp., N.Y.; J. G. FLYNN JR., Collins Radio Co., Cedar Rapids, Iowa, and CARL A. FRISCHE, Sperry-Rand Corp., N.Y., all new directors.

• WILLIAM M. WEBSTER, manager of advanced development, RCA Semiconductor & Materials Div., Somerville, N.J., appointed administrative engineer on staff of vp, RCA Labs, headquartering at David Sarnoff Research Center in Princeton, N.J.

Allied Fields

• WARREN E. ABRAMS, formerly account executive of N. W. Ayer & Son, appointed manager of general advertising of *Louisville* (Ky.) *Courier-Journal & Times* (WHAS-AM-TV).

• JOSEPH W. KUTCHIN, account executive of Harshe-Rotman, Chicago-based pr firm, promoted to account group supervisor. MRS. SUE LEVEN SAGER, formerly head of her own PR firm, to H-R as account executive.

• SEYMOUR D. HESSE, formerly vp, Schenley Industries, N.Y., resigns effective July 1, to go into business as marketing and advertising consultant. He will continue to serve Schenley in consultative capacity.

• MRS. LENORE G. EHRIG, attorney associated with Harry J. Daly communications law firm, elected president of Women's Bar Assn. of District of Columbia.

• WILLIAM C. GORDON JR. resigns (effective July 1) as executive director of American Marketing Assoc., N.Y., to open own market and management counseling service in Chicago.

• BERNARD G. BRENNAN, director of Research, Heintz & Co., L.A., elected president of Southern California Chapter of American Marketing Assn. Other new officers are JAMES H. LEWIS, Los Angeles Chamber of Commerce, first vp; JAMES A. WILLIAMS, Purex Corp., second vp; JANE BARKER, Los Angeles Research Assoc., secretary of Chapter affairs; ROBERT L. BIGGS, Gould Gleiss & Benn, secretary of national affairs.

• CLIFFORD GORSUCH, Region III director of National Assn. of Broadcast Employes & Technicians, temporarily appointed director of network affairs, replacing G. TYLER BYRNE, unassigned to any other NABET position.

• BUD FARIS, Hollywood columnist for *Television Radio Daily,* has resigned to join Media Communications, Hollywood merchandising, tv packaging and public relations firm, as vp.

• ROBERT M. LIGHT, managing director, Southern California Broadcasters Assn., ED LEAVITT of Wright-O Inc. and HARRY WHITE, Western Airlines, elected to three-year terms as directors of Hollywood Ad Club. They will be installed at final meeting of 1958-59 season, June 15, along with officers for coming year, to be elected by board.

International

MR. CRAN

• W. C. THORNTON CRAN named president of CFRB Toronto, Ont., succeeding J. ELLSWORTH ROGERS, retired, who remains director and consultant of both Standard Radio Ltd. and Rogers Broadcasting Co., Toronto, which owns CFRB.

• T. RALPH HART, formerly vp of Spitzer & Mills Ltd., Toronto advertising agency, to vp in charge of broadcasting of McConnell, Eastman & Co., Toronto. AUSTIN G. MORAN to vp and director of radio-television commercial production of same agency.

• PAT MCGHEE, sales manager of CKCK-TV Regina, Sask., to sales manager CFRN Edmonton, Alta. TOM SHANDRO to promotion manager of CFRN.

• GERRY FERRIER, program director of CHWO Oakville, Ont., to CHUM Toronto, Ont.

ADMIRAL UNZIPS COLOR TV PLANS

Siragusa radiant in pep talk to sales meeting as he unfolds firm's plans to make color sets; RCA welcomes new push for polychrome tv

A break-through in color television set manufacture was hailed last week when Admiral Corp. announced plans for a major marketing campaign this fall in support of a complete new line of color tv receivers.

Admiral would thus join RCA in the forefront of color set producers. Other radio-tv manufacturers indicated no present plans to burst into color.

The Admiral plans were made known at a 25th anniversary national sales meeting in Chicago on June 1. Ross D. Siragusa, president, said the company's new "aluminized, 110-degree tube" represented the first big change in six years. He said it provides a picture almost 10% larger than the usual 21-inch picture tube.

"Color programs," Mr. Siragusa said, "are increasing in number and popularity. The new color sets are easy to operate and are virtually as trouble-free as black-and-white receivers."

Mr. Siragusa's announcement said Admiral was moving into color tv "all the way," and was doing so once again "side by side with RCA."

RCA has been the only major producer of color tv sets and NBC, a division of RCA, has been the principal producer of color shows. Mr. Siragusa estimated that half a million color sets are now in use.

Welcome Aboard • Admiral's decision was welcomed by RCA. Charles M. Odorizzi, group executive vice president, issued this statement: "RCA welcomes the entry into the color television field of another major manufacturer like Admiral. This move is bound to be beneficial to the entire television industry. It is the latest in a series of developments that point to sharply rising interest in color tv."

Schwerin Research Corp., however, said in one of its monthly bulletins that a study showed that viewer anticipation of color was falling off. "The high levels of anticipation which marked the first stages of color television have subsided," the bulletin said, "and without a prod from advertisers and networks could settle into a serious slump."

The report continued:

"Two-fifths of the viewers questioned had never even seen color television, and only 2% claimed to own sets.

". . . It appears, then, that there has not been a great deal of exposure to color television. And what there has been does not seem to have produced an especially enthusiastic response . . ."

The June 1 "Value Line Investment Survey" published by Arnold Bernhard & Co., investment advisors, took a more optimistic approach. It said: "There are some indications that the long-awaited break-through to a mass market for color tv is in the offing. . . . If upwards of 300,000 sets could be sold this year (almost twice as in 1958), production might well reach half a million and a real mass market could be achieved in 1961."

A Flip-Flop • Admiral's decision was a turnabout, in a way.

Last year at this time Mr. Siragusa blamed the three tv networks for the lack of public acceptance of color television. He scored ABC-TV and CBS-TV primarily—and NBC-TV to a lesser degree—for network attitudes he described as "selfish," "public-be-damned," "money-hungry" and "profit-hungry." Mr. Siragusa promised Admiral's re-entry into new model production by June 1959 (BROADCASTING, June 9, 1958).

ADMIRAL'S SIRAGUSA
"Side by side with RCA"

Admiral's color line will include table, console and lowboy models in a variety of finishes, incorporating the RCA 21-inch picture tube. Admiral will offer an unconditional one-year warranty on all parts, including the tube, with suggested prices still to be set. Nor was there any indication last week how many units would be delivered to distributors, though more than 4,000 dealers are expected to have the sets on display by early fall.

Mr. Siragusa pointed out that "in the early days of black and white television, we visualized the tremendous possibilities of that medium and worked with RCA, contracting for a large percentage of its picture tube output. Now I am happy to announce that once again side by side with RCA, Admiral has moved into color tv all the way."

Color-consciousness • The reason for a major marketing effort, he continued, is to help make the American consumer more conscious of color tv's technical perfection. About 500,000 color units already are in use and the figure will increase steadily in the months ahead, he added. The stepup in color sales started last December, Mr. Siragusa noted, and has shown continued strength since then.

"This means that more and more persons are being exposed to color. This increased exposure, combined with easy-to-operate, decorator-styled sets and additional color programming, will help to make the public more aware of color tv than heretofore," Mr. Siragusa explained.

Previously (in June 1958), Mr. Siragusa had complained that manufacturers had spent "huge sums" on sets and made "serious marketing efforts" to push tint tv but that the networks lagged in programming.

Advertising-marketing-merchandising strategy was discussed last week at a meeting with Admiral's agency, Henri, Hurst & McDonald, Chicago. True to its advertising tradition, the electronics manufacturer will pour most of its advertising moneys into print media, primarily magazines, although some dol-

Lookin' & Listenin' • Panama Records' hostess Kay Moran catches a tune from Storz Stations' WQAM Miami with the developmental model radio eyeglasses which were put on display by their designer, Semiconductor Components Div. of Texas Instruments Inc., Dallas, during the second annual disc jockey convention in Miami Beach (see story, page 93). Tiny plastic earplug is nearly invisible in Miss Moran's ear. Radio eyeglasses have volume control and pre-set tuning, play 100 hours on single battery in right temple piece. Texas Instruments made six pair especially for Storz Stations to be used as gifts and to show miniaturization progress. The division normally designs circuits only for such devices.

lars may be siphoned off later to broadcast media.

Reaction by other electronics manufacturers to Admiral's re-entry into color was not immediate last week.

Motorola's executives reportedly held a closed meeting Wednesday to discuss the color tv situation and its overall 1960 product line, to be unveiled to retailers in July. Zenith had no official comment on the action, but its position—that color television is not yet ready or feasible—was represented as practically unchanged. Zenith has been working on a color prototype for several months and has promised it will get into commercial production as market demand dictates.

The position was reiterated by L. C. Truesdell, vice president for marketing, at Zenith's international distributors' convention in Chicago.

A Motorola spokesman told BROADCASTING his company still feels there has been no "major breakthrough" yet on color tv and that its emergence as a full-fledged medium will be a "gradual evolutionary process."

Among reasons he cited the possible desirability of a one-gun tube, simplified circuitry and other refinements, plus a price reduction from the present $495 to a maximum $300 or $350. Meanwhile, Motorola is continuing to produce a token quantity of tint models as demand dictates.

The last official statement by a Zenith official on prospects was that delivered by Hugh Robertson, its president, in the company's annual report to stockholders March 6. Along with toll tv, he observed that "improved and increased programming would also be a stimulant to the future public acceptance of color television if it is combined with a more realistic pricing approach which would make the public understand that color will have to be a deluxe supplemental service for many years in the future rather than an immediate replacement for monochrome television."

Progress on the single-tube color set —still a gleam in the eyes of electronic engineers working on a prototype that can be mass produced at a cost close to the monochrome price—was reported by Paramount Pictures President Barney Balaban at last week's stockholders meeting (also see story, page 86).

Paramount's chromatic labs is developer of the Lawrence tube with work proceeding on a prototype receiver by Allen B. DuMont Labs.

Mr. Balaban said Paramount had been "pressing" the experts to solve existing problems at mass production costs of not more than 25% greater than black and white, and that they were "near" the goal. For enthusiastic acceptance, he said, color tv must have brightness qualities (use under all viewing conditions), reliability (so wife and child could tune the set at all times) and color purity (accurate, "brilliant" reproduction of the original scene).

Ampex sales up 45%

Sales of Ampex Corp. for the fiscal year ended April 30, 1959, totaled $43,691,000, up 45% from the $30 million reported for the previous year, George I. Long Jr., Ampex president, said last week in his annual report. The audit for fiscal 1958 won't be completed for several weeks, he said, but preliminary figures indicate the net after taxes will exceed a previous estimate of $2.5 million. Net for fiscal 1957 was $1,540,000. The outlook for fiscal 1959 is excellent, Mr. Long said.

TV 'SELL' CLINIC OVER THERE

Researcher Schwerin conducts conference in London on improving tv commercials

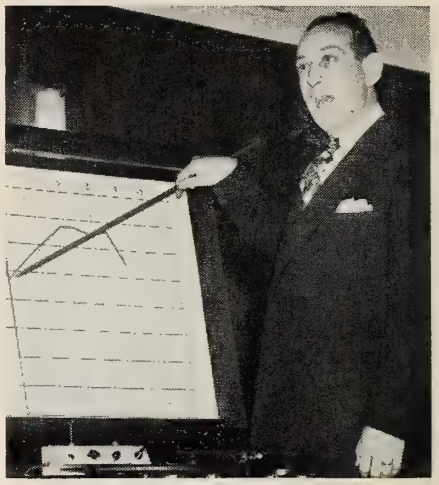
What makes a tv commercial effective? Why does one commercial not well remembered actually sell more goods than another commercial which had high recall?

These were typical questions explored last Wednesday (June 3) by Horace Schwerin, president of Schwerin Research Corp., during a seven-hour presentation before 1,000 British television and advertising representatives in London. They were guests of Associated Television Ltd., a major program contractor in England, which sponsored the all-day conference conducted by Mr. Schwerin on the subject of "Increasing the Selling Power of Tv Commercials."

Mr. Schwerin's observations were based on his firm's 13 years of experience in the U.S., Canada and England testing more than 10,000 tv commercials with consumer panels of more than 1.5 million people. The Schwerin measure of effectiveness, he explained, is whether the commercial's "vital promise" of consumer benefits is communicated to the viewer and he is persuaded to shift his allegiance from one competitive brand to another after seeing the commercial.

Noting that three-fourths of all British tv commercials today—an increase of 200% over two years ago—are 15 seconds long, Mr. Schwerin said "the advertiser who announces his wares in 15 seconds must carve cameos, he cannot make even one mistake." He warned that these spots had become "too prevalent, too dangerous and may become too expensive because they are ineffective."

Not Needed • Research has found that some commercials should never have been put on the air, he said. They actually lost sales for the advertiser. He cited a case where "Brand A" sought to discredit "Brand B" by reciting Brand B's claims and charging that they were false. Brand A not only failed to win new customers but disenchanted 10% of the audience who originally preferred Brand A.



In another commercial, for a shaver, the copy line involved a nagging wife. Apparently she was so real and so disliked that 12% of the men who had preferred that brand of shaver changed their minds after seeing the spot.

Mr. Schwerin also warned advertisers against centering the vital promise "around your own ego instead of the viewer's interests." He discussed two forms of this, wish-fulfillment and narcissism, both of which make ineffective commercials.

Wish-fulfillment "often involves an egocentric inflation of the 'bandwagon' approach," he said. Statements such as "more people drink it," "largest selling brand" or "three out of four people use it" are impotent, he said. A variation of the theme was a grocery product commercial showing a line of shoppers' carts in a supermarket. "Improbably, every basket was loaded to the gunwales with the advertised brand," he recalled.

World Eater • In another, a food product spot showed an animated globe eating the brand happily. "The thought that the whole world loved his brand was undoubtedly gratifying to the sponsor," he said, "but its influence on the viewer was negligible."

Ineffective narcissistic commercials he cited included one of a beverage bottle admiring itself in front of a mirror, a cereal commercial in which a girl package admired a boy package who sang about himself and a beverage spot with a chorus of bottles singing their gratitude because they contained such fine ingredients.

RESEARCHER SCHWERIN
Studies why tv spots click

Mr. Schwerin recited five elements necessary to enhance the effectiveness of the non-integrated commercial: (1) It must present one unified impression with all necessary elements. Incongruous elements will not combine; the number of ideas does not determine a commercial's success. (2) It must be either dominantly logical or "emotive." It is extremely difficult and dangerous to mix the "mood" commercial with the factual approach.

Flattery Pays • (3) It must involve the viewers favorably. "Choose the characters and the settings which will be most flattering to the audience you wish to impress." (4) The commercial must be consumer-oriented, not product-oriented. The "vital promise" is best communicated in terms of benefits the viewer will derive. (5) It must employ the video actively. "Ideally, the pictorial elements of your commercal will convey the story and establish the vital promise even if the audio is not heard."

The announcer or "presenter" used in the commercial, whether an entertainment star or a regular announcer, must have a personality compatible with the product and he must be believable in his recommendation of it, Mr. Schwerin said. Sometimes the unknown announcer is more effective, he said, because those well known may already have image associations with other products.

He cited the case where the commercial with a little girl using a ready-mix cake mix was more effective than a spot showing a chef doing the same thing. In another, an office worker talk-

ing about "clean shaves" impressed more viewers with his endorsement of a razor than did a steel worker. An athlete wasn't convincing until scenes showing him performing were included.

Forward Backward • Other commercial forms discussed by Mr. Schwerin included romantic involvement ("women won't buy the image of a woman acting too forward"); before-and-after situations (most effective is simple sequence of unhappy before followed by happy after scene; taste (taste can be demonstrated but not merely by claiming it; best ways are showing foods in enticing settings or in combinations with other foods); animation (slightly less effective than the average non-cartoon commercial, but often necessary; should always mix in some live, even if only of product itself), and humor ("don't get carried away"). In a spot where a character was doing complicated tricks, he came to grief near the end right in front of a poster advertising a brand. Viewer reaction: negative.

Tomorrow's successful advertiser Mr. Schwerin told his London audience, "must assume television is an important medium. He must realize that it requires special knowledge to make it pay off.

"One of your own advertising authorities, Brian MacCabe, said that too many British manufacturers still continue to satisfy themselves that they have a good product and 'the public damn well ought to like it.' No, an advertiser must develop his effective commercial or campaign and continue to test its effectiveness. Television is too important and too costly to be ignored or misused."

Canadians plan pay-tv test in August

Latest Canadian development in pay-tv is expected to see a test of the medium in August in a Toronto suburb. E.E. Fitzgibbons, executive director of CKCO-TV Kitchener, Ont., and an executive of Famous Players Canadian Corp., announced at Toronto that an experiment in pay-tv will take place this autumn in an unnamed Toronto suburb. Toronto was chosen as the starting city for the test as viewers have access to three Buffalo, N.Y., stations, one Toronto and one Hamilton, Ont., station. If pay-tv succeeds in such a highly competitive area, Mr. Fitzgibbons explained, it would certainly succeed in a one-channel Canadian city. The pay-tv equipment will utilize one channel position on a subscriber's set and viewers can see the show several times in an evening if they desire, but they will have to pay again if they switch to another dial setting.

International meet at So. California U.

Broadcasters from 17 countries will meet June 27-Oct. 24 at the U. of Southern California, Los Angeles, in a seminar sponsored by the U.S. Dept. of State. The seminar is designed to develop an understanding of American broadcasting and way of life.

The visitors will study and travel under individualized plans coordinated by Dr. Robert E. Summers, associate professor of the school's Dept. of Communications. The broadcasters are from Argentina, Brazil, Burma, Ceylon, Colombia, Ethiopia, Finland, India, Iran, Malaya, Mexico, Morocco, Nepal, Nigeria, Pakistan, Rhodesia and Taiwan.

• Abroad in brief

• Radiotelevisione Italiana (RAI), Italian government-controlled broadcasting organization, announces a 7% dividend for 1958. Registered radio-tv receivers in Italy increased 455,578 last year. The figure was 447,093 in 1957.

There were 7,130,000 licensed radio-tv sets in the country on Jan. 1 (1,096,185 licenses are for tv sets). RAI estimates there will be 8 million radios and 2 million registered tv sets in Italy by 1963.

• Philips, Dutch electronic manufacturer, has signed a 10-year agreement with Indian government-owned Bharat Electronic Co., Bangalore, India, to help develop the country's tv tube production. The Indian company is expected to be producing 1,800,000 tubes annually in 1961.

• West German electronic manufacturers are the largest suppliers of components to East Bloc countries, official Bonn data shows. The country exported about $240 million worth of electronic equipment to Mainland China last year.

• Switzerland had 62,075 registered television receivers on May 1.

• Austria has 70,000 licensed tv sets plus about 15,000 unlicensed sets.

• CKKW Kitchener, Ont., new 1 kw station on 1320 kc, will start operations on Aug. 1. Alan Hodge is manager of the station, owned by Twin City Broadcasting Co. Ltd., at 251 King St. West, Kitchener, Ont. Station will be represented by All-Canada Radio & Television Lt., Toronto.

• CKCO-TV Kitchener, Ont., is the second independent Canadian station to buy a video tape recorder at a cost of about $70,000.

ONE OF AMERICA'S FOREMOST BOAT DEALERS

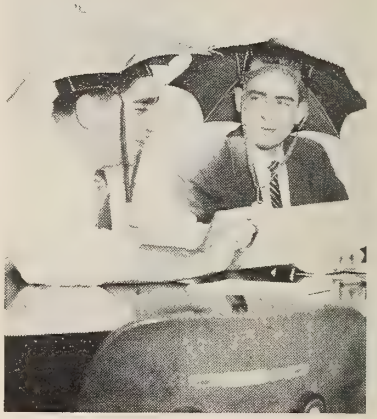
WXYZ giving away stock—in 7 years

Every one of the 1,700 guests at the dedication ceremonies of WXYZ-AM-FM-TV Detroit's new Broadcast House held last Thursday received a souvenir with more than sentimental value. (Also see story, page 68).

Imbedded in a plastallion desk piece clear plastic paper weight is a card with a combination number which could bring the owner one hundred shares of American Broadcasting-Paramount Theatres stock (AB-PT operates WXYZ).

The stock was locked in a strong box which can only be opened by a combination picked from a list of 1,700 before the numbers were registered in the names of WXYZ guests last week. On May 1, 1966, a local bank will open two sealed envelopes.

One will contain the combination to the strong box in which the stock has been placed, and the other will contain a master list of WXYZ guests and the combination numbers assigned them. A registered letter will be sent to the winner who must appear in person at the bank on June 4, 1966 (seven years to the day from the opening of Broadcast House) to claim the stock.



At that time and place the winner must open the strong box himself from the combination number he was assigned. It'll be worth his while to be there for AB-PT stock right now is 26½, and the stock market tends to rise.

Making No. 18 pay off

To mark its 18th anniversary, WWNY Watertown, N.Y., sold packages of 18 spots to local merchants in the downtown area. Announcements promoted individual stores with a tag line urging listeners to shop in downtown Watertown on WWNY's birthday. On that day (April 29), most merchants used special sale prices with the 18 unit price tied in as much as possible (a local cab company featured 18-cent cab rides to shop downtown).

Among other promotions on its birthday, WWNY gave away 18 silver dollars every 18 minutes in different merchants' stores; devoted each hour of its 18-hour schedule to the music of a particular year between 1941 and 1949; cleared its schedule of all commercial commitments except for newscasts; set up a special temporary studio on the marquee of the Hotel Woodruff (its studio location) where it also made the 18 silver dollar giveaways every 18 minutes to people in the town square.

The payoff: downtown merchants reported their biggest sale day in a long time after buying over 700 commercials for the WWNY birthday event. The sponsors also bought 50 newspaper ads and 50 tv spots to promote the day.

Despite Georgia's sunshine • Agencies in New York and Chicago last week were visited by representatives of WMAZ Macon, Ga., and Avery-Knodel whose mission was to explain the station's "umbrella" coverage. So, it was natural for the guests to arrive in this headgear as well as to present like reminders to the agency men. Here's Don DeCarlo (left) and Phil Morrow, timebuyers at Needham, Louis & Brorby, Chicago, during a session with Smokey Simmons, national sales manager of WMAZ, and Roger O'Sullivan, of Avery-Knodel.

Showing TvAR's salesmen

Brief biographies of the salesmen for the new representation firm for Westinghouse Broadcasting Co.'s tv stations, Television Advertising Representatives Inc., New York, are featured in a 10-day contest that started last Monday

EMPLOYERS REINSURANCE CORPORATION

21 W. Tenth, Kansas City, Mo.

New York, 107 William St. Chicago, 175 W. Jackson San Francisco, 100 Bush St.

(June 1) for New York agency timebuyers. In addition to familiarizing timebuyers with the firm's personnel, the contest offers a 17-inch Westinghouse portable tv set to each of the 10 winners. Every weekday morning on the same page of the *New York Herald Tribune,* TvAR runs a picture, biography and a jingle about one of the salesmen. Timebuyers have been invited to enter their names to the company and each day one of them is called to answer a question regarding one fact mentioned in that day's ad. If answered correctly, a tv set is won.

WBC stations to be represented by the firm (starting July 1) are: WBZ-TV Boston, WJZ-TV Baltimore, KDKA-TV Pittsburgh, KYW-TV Cleveland and KPIX (TV) San Francisco.

WJZM scholarship

WJZM Clarksville, Tenn., has awarded its fourth annual $1,400 scholarship for a boy to attend the U. of Tennessee for a scholastic year.

To select each years' winner the station first sends the area's high school principals a list of conditions a boy has to pass to be eligible. These include the candidate's school marks and an opinion of his character. The financial resources of each candidate also are taken into consideration. Final choice of a WJZM scholarship winner is by a committee of four local businessmen who interview the boys.

The $1,400 pays all expenses including about $18 a month spending money. The businessmen help the winner obtain summer employment and the university helps him get a job during school. Money from this employment is banked to help him pay for subsequent years' schooling.

KFAB in-store plugs

KFAB Omaha is giving its advertisers bonus announcements in a chain of 16 supermarkets. Advertisers that spend $138 a week on KFAB receive two announcements a day in each Hinky-Dinky store via a Muzak service the station operates in the supermarkets. Advertisers spending $228 or $300 a week receive 192 or 576 in-store plugs, respectively. The announcements are pitched 6 decibels above the stores' noise levels.

King-size contest by CFCF

A royal welcome was given the entry of King Size Coke into the Montreal, Que., area by CFCF-AM-FM which conducted a two-week long "King Size Contest." Listeners were invited to send in king size objects "of little or no personal, sentimental or monetary value" and promised a king size prize for every entry. The prize: a 24-bottle case of King Size Coke.

Among the 110 objects received were a king size toothbrush, a check for $1 million (signed by John Beresford Tipton, tv's *Millionaire*) and several *empty* bottles of King Size Coke.

Farming out city kids

Calvin Pigg, farm editor of WBAP-AM-FM-TV Ft. Worth, Tex., is sponsoring a plan to get city kids out to the farm for their vacations. Mr. Pigg has asked farm families who want to take city youngsters as well as city families with children with a yen for the country to write him. He is acting as a clearing house to bring the two groups together to work out dates, payments, etc.

KYW teaching safety

KYW-TV Cleveland sent a camera crew to the Indianapolis 500 auto race to get material for its summer safety campaign. The staffers filmed interviews with former winners of the race and drivers in this year's event. They gave tips on how to avoid traffic accidents.

KYW-AM-TV's "Summer's Fun With Safety" campaign was kicked-off with a luncheon attended by 20 mayors and other civic leaders from surrounding counties. KYW-TV taped the main speakers and performers at the luncheon and telecast it in prime time the following day. In cooperation with the Cleveland Safety Council the stations have an extensive summer-long program of spots and shows on safety education.

Hawaii salutes Flint

An "Hawaiian June Jubilee" in Flint, Mich., conceived, planned and produced by WBBC there, has resulted in a salute to Flint by Hawaii, to be broadcast from the beach at Waikiki this Saturday (June 13) over the Mutual Broadcasting System.

Pinpointed for praise will be two shopping centers, the North and South Flint Plazas, locales of the "Jubilees." The Plazas are decorated with tropical settings and Hawaiian musicians and dancers perform daily. General Manager Joseph R. Fife of WBBC estimates that more than a million people will visit the Plazas during the "Jubilee."

Fitting contest for WAPI

WAPI Birmingham, Ala., celebrated its recent increase to 50 kw by holding a "50,000 Watt Key Contest." A brand-new Chevrolet was wrapped in chains and padlocked. The station informed its listeners, via 30 daily spots, that up to 50,000 keys would be mailed out to anyone writing in, the person with the fitting key driving home the car.

A total of 16,000 keys were mailed out prior to May 24 when the unlocking began at 1 p.m. Some 24 hours later people were still trying keys and it was not until key number 18,751 (many people tried twice) that the tum-

Sign-off of the times • The above relaxed lass (Diane Haggin by name) is not modeling lingerie, mattresses or the latest French movie but purring "Goodnight" to the listeners of XETV (TV) Tijuana-San Diego. Miss Haggin is the Sign-Off Girl for the station, whose vice president and general manager, Julian Kaufman, decided a something different was needed in that department.

As the camera closes in (fogging over slightly), Miss Haggin yawns, "Oh, what a night . . . on channel six. Those darling megacycles—all 82 to 86 of them. And now . . . it's full power . . . all 100,000 watts. And to think, it's all made possible by those dear men at the Department of Telecommunications in Mexico City. It's really been *wonderful.* And just imagine, tomorrow I can spend another glorious day with channel six."

There is a sequel to the goodnight theme as Miss Haggin stretches and yawns before the director *slowly* dissolves to slides.

XETV is ch. 6, 82-86 mc, 100 kw. Miss Haggin is 36″-26″-35″.

blers were turned and a happy WAPI listener went home with a car.

The station broadcast live from the scene from noon to midnight on May 24 with all station personalities on hand to assist and entertain in the promotion.

Pitch with Schlitz

The familiar "move up to quality, move up to Schlitz" radio jingles are taking on a new guise and a new function this summer as a result of a tie-in between the Joseph Schlitz Brewing Co. through J. Walter Thompson Co., and Capitol Records. Henceforth, the musical spots will promote new albums of the performer as well as Schlitz beer.

First performer to get in on the arrangement is Mavis Rivers, whose voice will be heard 20 to 30 times a week over some 900 radio stations giving this message: "Hi! This is Mavis Rivers. I want you to be sure to hear my latest Capitol album 'Take a Number.' But first, here's a song you'll enjoy." Then comes the Schlitz jingle.

• Drumbeats

• When the World Champion New York Yankees raised eyes in the base ball world by sliding into the American League cellar, WCCC Hartford, Conn., raised the question to its listeners, "What's the matter with the Yankees?" A "Yankee" silver dollar was paid for explanations read on the air. WCCC reported an overwhelming amount of mail until the Yankees returned to the normalcy of winning ways.

• WRCV Philadelphia personalities Joe Grady and Ed Hurst garnered a 2,000 membership for their two-week "Take a Bath Club," part of the station's participation in the Philadelphia "Clean Up, Fix Up, Paint Up Month." For each listener's postcard attesting that he or she had taken a bath during the week, the WRCV pair sent a membership card and a cake of soap. RCA transistor radios were also awarded, based on a drawing of membership cards from WRCV's "bath tub."

• WOWO Fort Wayne, Ind., has "adopted" a service radio station for U.S. naval personnel in Turkey. Last year, at the request of the servicemen, WOWO had provided jingles for use with weather and time announcements over there. More recently, a report that the overseas station lacked recent record releases, prompted the Fort Wayne station to take steps to assure such a supply.

• As part of its merchandising WPEN Philadelphia offers to sponsors (who qualify) a seal with the legend "Radio Advertised and Quality Approved by WPEN."

• WNBF-AM-TV Binghamton, N.Y., reported that more than 10,000 visitors toured the new radio and television facilities in the Sheraton Inn during the open house that followed dedication ceremonies May 22.

• WTAR-TV Norfolk, Va., invited agencymen in the area to attend a briefing session on the uses of the latest A. C. Nielsen Co. county-by-county tv homes tabulation (BROADCASTING, May 18) when the service was introduced there. Dave Traylor of Nielsen addressed the group, explaining the background and applications of the rating company's figures.

• To vary the pattern of its regular *Record Hop*, which features teenagers at a studio dance, KNTV (TV) San Jose, Calif., arranged a special father-daughter night with 50 dads turning out with their offspring for a combined rock-and-roll and old time music session. Success of the event has prompted host Frank Darien to schedule a mother-son sequel on June 16.

• The 96 high school students who earned an A average in English, American Government, Mathematics and Advanced Science received WQAM Miami's first annual "Gold Key" awards last week. In addition, names of the students were announced on the air every hour in a special salute. Along with the engraved gold key, recipients received an album for autographs and pictures with the particular student's name embossed on the cover.

• Since the last week of May was National Transportation Week, WAVY

The ginchiest, dad • Musically-inclined members of the Advertising Club of Des Moines staged this impromptu jazz session for the club's recent annual elections (BROADCASTING, June 1). Billed as "The Beatniks With Music For Swinging Cats", they are (l to r): Ed LaGrave Jr., Truppe, LaGrave & Reynolds Adv. Agency, on tenor sax; James Ansorge, Pioneer Hi-Breed Seed Corn Co., piano; Charles Wheeler, J. M. Hickerson Adv. Agency, bass; KIOA General Manager James Dowell, clarinet; Ted Sloma, Polk County Tuberculosis & Health Assn., trumpet; Russ Truppe, Truppe, LaGrave & Reynolds, drums, and Ralph Zarnow, Zarnow Entertainment Service, trumpet.

BROADCAST ENGINEERING, P.O. Box 93, Kansas City 41, Mo.

Norfolk-Portsmouth, Va., originated its daily live *Digest* each afternoon of that week from the inside of a Trailways bus.

• To kickoff its coverage of 30 Little League baseball games, KXGI Fort Madison, Iowa, presented beeper phone interviews with National League President Warren Giles, Cub star Ernie Banks, Chicago White Sox executive Bill Veeck and other baseball names.

• KXOK St. Louis has inaugurated *Business Profiles*, 8-9 a.m. and 7-8 p.m., Monday through Friday, based on material compiled by the local chamber of commerce. Each profile contains a brief resume of a particular company's operations, products, founding date and information on its personnel.

• As part of its promotion "Summertime is Family Fun Time With WJZ-TV," the Baltimore station is conducting a "Win a Dodge for Dad" contest. Participants must state in 25 words why they'd like their father to have the 1959 Dodge first prize for the summer. Winner will be announced on WJZ at 11:50 p.m., June 21, the precise minute summer starts.

Manie Sacks' fund

The memorial show to NBC-TV talent-programming executive Manie Sacks, *Some of Manie's Friends* (NBC-TV, March 3) (BROADCASTING, Jan. 26), raised $150,000 in proceeds and contributions. The Emanuel Sacks Foundation has given the money to the Albert Einstein Medical Center, Philadelphia. Mr. Sacks died Feb. 9, 1858.

• Rochester Mayor Peter Barry has proclaimed the week of June 8 as "WROC-TV Ch. 5 10th Anniversary Week." And, in addition to its plans for many promotional and programming activities, the Rochester station has set its annual staff picnic for the exact anniversary date, June 11.

• KOLN-TV Lincoln, Neb., has been awarded an expense-paid trip for two to Rio de Janeiro and $500 for getting the best return on a Butter-Nut flower seed offer. The campaign, also carried by 64 other stations, was handled on KOLN-TV by weatherman Bob Taylor.

• WSJM St. Joseph-Benton Harbor, Mich., gave the local "Miss Blossom Time 1959" a one-year scholarship at Western Michigan U. The winner was chosen over 28 competitors at Southwestern Michigan's Blossom Festival.

of license from **WHBY Inc.** to present owners: **Norbertine Fathers.** No consideration involved. Ann. May 29.

Hearing Cases

FINAL DECISIONS

By decision, Commission revoked cp of Nevada Telecasting Corp for KAKJ (TV) (ch. 4), Reno, Nev. Chairman Doerfer abstained from voting. (Initial decision of March 10, 1958 looked toward this action.) Ann. June 3.

By memorandum opinion and order, Commission, on petition by Western Nebraska Televison Inc., dismissed latter's application for new tv station to operate on ch. 13 in Alliance, Neb., and terminated proceedings. Comr. Cross not participating. Ann. June 3.

INITIAL DECISIONS

Hearing Examiner Isadore A. Honig issued initial decision looking toward granting application of Southland Bcstg. Co., to change frequency of WLAU Laurel, Miss., from 1600 kc to 1430 kc, continuing operation with 5 kw, D. Ann. June 2.

Hearing Examiner Herbert Sharfman issued initial decision looking toward denying application of Jane A. Roberts for license to cover cp for new am station (KCFI) to operate on 1250 kc, 500 w, DA, D, in Cedar Falls, Iowa. Ann. May 28.

Hearing Examiner Thomas H. Donahue issued initial decision looking toward granting application of Lakeside Bcstrs for new am station to operate on 1270 kc, 1 kw, D, in Sparks, Nev. Ann. May 28.

Hearing Examiner Annie Neal Huntting issued initial decision looking toward granting application of Young People's Church of Air Inc., for new class B station to operate on 104.5 mc in Philadelphia, Pa., and denying similar application of WJMJ Bcstg. Corp. Ann. May 27.

STAFF INSTRUCTIONS

Commission on June 3 directed preparation of document looking toward denying petition by Joseph M. Ripley Inc., for reconsideration of April 8 memorandum opinion and order which, on motion by Dan Richardson, struck exceptions of Ripley to Aug. 19, 1958 initial decision looking toward granting Richardson application for new am station to operate on 550 kc, 1 kw, D, in Orange Park, Fla., and denying Ripley application for same facilities in Jacksonville.

Commission on June 3 directed preparation of document looking toward denying application of Tucumcari Television Inc., for new tv translator station on ch. 70 in San Jon, N.M., to translate programs of station KFDA-TV (ch. 10), Amarillo, Tex. (April 22 order denying Tucumcari application was, on May 6, set aside, and oral argument was held in proceeding.)

Commission on June 3 directed preparation of document looking toward affirming June 4, 1958 grant of application of South Bay Bcstg. Co. for new class A fm station to operate on 93.5 mc in Redondo Beach, Calif., and denying protests by Coast Radio Bcstg. Corp. (KPOL-FM) and CBS Radio (KNX-FM), Los Angeles. (Jan. 8 initial decision looked toward this action.)

OTHER ACTIONS

By order on petition by Walter L. Follmer, Commission severed from present consolidated hearing on more than 20 am applications in applications of Follmer for new station to operate on 1560 kc, 1 kw, DA-1, U, n Hamilton, Ohio, Interstate Bcstg. Inc. (WQXR) New York City, to change from DA-1 to DA-2, continuing operation on 1560 kc, 50 kw, U, and Booth Bcstg. Co. (WTOD), Toedo, Ohio, to increase power from 1 kw to 5 kw, using DA, continuing operation on 1560 kc, 50 D; placed these three applications in separate consolidated hearing on issues specified as to them; also severed parties respondent Coshocton Bcstg. Co. (WTNS), Coshocton, Ohio, Washita Valley Bcstg. Co. (KWCO), Chickasha, Okla., and E. Weaks McKinney-Smith (WDXR), Paducah, Ky., and made them parties to proceeding on severed applications. Ann. May 28.

By memorandum opinion and order, Commission granted petition by Fairview Bcstrs., Rensselaer, N.Y., to extent of adding certain issues in proceeding on its application and that of Sanford L. Hirschberg and Gerald R. McGuire, Cohoes- Watervelıet, N.Y., for new am stations to operate on 1300 kc. Ann. June 3.

By memorandum opinion and order, Commission denied petition by Greenwich Bcstg. Corp. for leave to amend its application for new am station to operate on 1490 kc, unl., in Greenwich, Conn., to specify power of 100 watts instead of 250 watts, and to reopen record to include this change of power. Comr. Lee dissented; Comrs. Ford and Cross not partcipating. (December 19, 1957 initial decision looked toward denying application.) Ann. June 3.

By memorandum opinion and order, Commission (1) set aside April 8 grant of application of John E. Riesen, executor, to move trans. site of station KXII (TV) ch. 12, Ardmore, Okla., reduce, vis ERP from 19.6 dbk, increase ant. height from 850 to 900 ft., and make equipment changes, and dismissed application pursuant to Sec. 1.312(a) of rules since new application was filed May 18 requesting that trans. location be changed to site previously authorized; (2) denied request by Texoma Land Television Inc., for extension of time to effectuate assignment of cp form estate of John F. Easley, deceased, to Texoma, which was granted April 8; and (3) declared moot that portion of protest and petition for reconsideration filed by Texas State Network Inc. (KFJZ-TV, ch. 11), Fort Worth Texas, with respect to Commission's April 8 action granting assignment of cp for station KXII, and dismissed protest otherwise. Ann. June 3.

By memorandum opinion and order, Commission (1) granted assignment of cp of WAUB, Auburn, N.Y., from Herbert P. Michels to Atom Bcstg. Corp. (J.R. Poppele, president, has minor interest in WNEW-AM-FM-TV New York City, WTTG-TV, Washington, D.C., and WHK-AM-FM Cleveland, Ohio) Michels is assignee's vice president with 25% interest; consideration $5,400 for out-of-pocket expenses; without prejudice to such action as Commission may deem warranted as result of final determination in hearing proposed in Aug. 5, 1958 memorandum opinion and order involving WAUB and renewal of licenses of stations WMBO-AM-FM Auburn; and (2) denied petitions by WMBO Inc., and Auburn Publishing Co. (WMBO-AM-FM), Auburn, to reconsider April 10 grant of WAUB application for additional time to construct station, and to designate that application and instant assignment application for hearing. Ann. June 3.

By memorandum opinion and order in proceeding on competing applications of Fisher Bcstg. Co. and Tribune Publishing Co. for new tv stations to operate on ch. 2 in Portland, Ore., Commission (1) denied petition by Fisher for leave to amend its application to change trans. site to location nearer Portland and change financial data; (2) denied as moot request by Oregon Television Inc. (KPTV (TV) ch. 12), Portland, to remove Fisher application from hearing status; and (3) denied as moot motion by Fisher to strike opposition of KPTV. Ann. June 3.

By separate memorandum opinion and order in above proceeding, Commission (1) denied petition by Tribune Publishing Co. for leave to amend its application to change trans site to location nearer Portland and change financial data and (2) denied as moot request by KPTV to remove Tribune application from hearing status. Ann. June 3.

By memorandum opinion and order, Commission denied petition by Standard Bcstg. Corp. for investigation to determine whether Clifford C. Harris knew or had reason to know, pior to 1940, that he was not citizen of United States. Standard and Harris are competitive applicants for new am stations to operate on 1440 kc, D, with 500 w and 1 kw, respectively, in Owego, N.Y. Ann. June 3.

By order, Commission denied petition by Herman E. Sayger, d/b Sayger Bcstg. Co., insofar as it requests consolidation of his application for new am station to operate on 1250 kc, 500 w-N, 1 kw-LS, DA-2, in Tiffin, Ohio, and six other applications, for hearing in proceeding on application of Malrite Bcstg. Co., for new am station to operate on 1600 kc, 500 w, D, in Tiffin. Ann. May 27.

By letter, Commission denied request of Sunbury Bcstg. Corp., for waiver of Sec. 1.351 of rules to permit processing of its application for change in facilities of WKOK Sunbury, Pa., from 1240 kc, 250 w, U, to 1070 kc, 1 kw-N, 10 kw-LS, DA-2, and advised that application will be held without action pending conclusion of proceedings in Docket 8333 (daytime skywave interference). Ann. May 27.

By order, Commission granted request by Electronic Industries Association and extended time from June 10 to Dec. 11 to file comments to March 12 further notice of inquiry which enlarged scope of proceeding looking into possible wider uses for fm Subsidiary Communications Authorizations to include specific data on subject of Stereophonic broadcasting by fm stations. Comr. Bartley dissented. Ann. June 3.

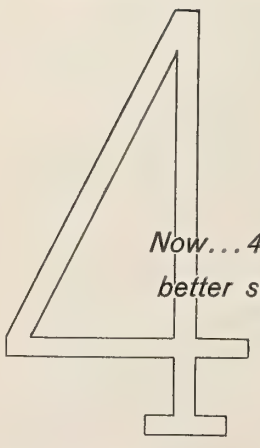
Commission scheduled following tv proceedings for oral argument on July 10: Television Bcstrs. Inc., KPBX Bcstg. Co., and Brown Telecasters Inc., Beaumont, Tex., ch. 12; and Sarkes Tarzian Inc., and George A. Brown Jr., Bowling Green, Ky., ch. 13. Ann June 3.

Commission scheduled following proceedings for oral argument on June 15: am applications of Jefferson Radio Co., Irondale, Ala., and Bessemer Bcstg. Co. Inc. (WBCO), Bessemer, Ala.; and Palm Springs Translator Station, Inc., Palm Springs, Calif.

David M. Segal, Boulder, Colo.; Denver Bcstg. Co., Denver, Colo.; Satellite Center Radio Co., Arvada, Colo.—Designated for consolidated hearing applications for new am stations to operate on 1550 kc, D—Segal with 1 kw, and Denver and Satellite with 10 kw; made KLOV Loveland, Colo., party to proceeding. Ann. June 3.

Madison County Bstcrs.; Tri-Cities Bcstg. Co.; East Side Bcstg. Co., Granite City, Ill.—Designated for consolidated hearing applications for new am stations to operate on 920 kc, 500 w, DA-D.

WTXL West Springfield, Mass.—Designated for hearing application to increase daytime power from 250 w to 1 kw, DA-D, continuing operation on 1490 kc with 250 w-N in consolidation with application of Tobacco Valley Bcstg. Co. for new am station to operate on 1480 kc, 500 w, DA-D, in Windsor, Conn. New order supersedes Dec. 3, 1958 hearing order with respect to issues only; made WKVT Brattleboro, Vt., and WNLC New London, Conn., parties to proceeding. Ann. May 27.



Audiocasting of Texas Inc., Waco, Texas; Horace K. Jackson Sr., Gatesville, Texas—Designated for consolidated hearing applications for new am stations to operate on 1580 kc—Audiocasting with 500 w-N, 1 kw-LS, DA-2, and Jackson with 250 w, D; made KBUS Mexia, and KHBR Hillsboro, both Texas, parties to proceeding; denied KHBR request for additional time to answer Commission's March 10 letter. Ann. May 27.

Routine Roundup

By order, Commission postponed for another year—to June 1, 1960—effective date of rules requiring tv stations to have type-ap-

proved frequency and modulation monitors at station whenever trans. is in operation, and amended Sec. 3.690(a) and 3.691(a) of rules to reflect new date. In view of continued development of more stable frequency control circuits in am, fm and tv transmitters, Commission is considering a review of its requirements regarding continuously operating frequency monitors to ascertain whether such apparatus is still needed or is adequate to ensure that operating frequencies of broadcast stations are maintained within prescribed frequency tolerances. If it appears that rules relating to such monitors should be amended, rulemaking proceeding will be initiated. Ann. May 27.

By letter, Commission denied petition by RKO Teleradio Pictures Inc., for waiver of Sec. 3.30 of rules insofar as it requires majority of programs of am station WGMS to be originated in Bethesda, Md., which city it is primarily licensed to serve. Commission is of opinion that reasons advanced are insufficient to constitute valid basis for waiver of rules, and observed that any economic hardship resulting from existing method of operation could be overcome by RKO requesting that location of its station WGMS-FM be changed from Washington, D.C., to Bethesda, Md. Chairman Doerfer and Commissioners Hyde and Craven dissented. Ann. June 3.

By report and order, Commission denied conflicting proposals by Joint Council on Educational Television to change classification of ch. 12 in Wilmington, Del., from commercial to educational, and by Neptune Bcstg. Corp. (WHTO-TV, ch. 46), Atlantic City, N.J., to delete ch. 12 from Wilmington and to assign it to either Atlantic City or to Atlantic City-Wilmington, and terminated rulemaking proceeding. Any timely filed application proposing noncommercial educational operation on ch. 12 in Wilmington would, of course, be entitled to comparative consideration with pending commercial applications. Ann. May 27.

By report and order, Commission finalized rulemaking and shifted tv ch. 9 from Hattiesburg, Miss., to Baton Rouge, La., effective July 6. Baton Rouge will then have chs. 2, 9, 18, 28, *34 and 40; Hattiesburg, 17. Lion Television Corp. will be permitted to continue optration of WDAM-TV on ch. 9 in Hattisburg until such time as station operation on ch. 9 in Baton Rouge is ready to commence. Comrs. Bartley and Lee dissented. Ann. June 2.

By report and order, Commission finalized rulemaking and assigned tv ch. *14 to Mount Pleasant, Mich., for educational use there, and substituted ch. 27 for ch. 21 in West Branch, Mich. Central Michigan College, Mount Pleasant, had petitioned for such change. Ann. May 27.

By memorandum opinion and order Commission denied petition by Pendleton Bcstg. Co. (am station KUMA), Pendleton, Ore., for rulemaking to assign ch. 5 to that city, which now has uhf ch. 28 allocated to it. Ann. May 27.

By memorandum opinion and order, Commission denied petition by WATR Inc. (WATR-TV, ch. 53), Waterbury, Conn., for rulemaking to shift ch. 18 from Hartford to Waterbury and permit WATR-TV to change channels accordingly. Capitol Bcstg. Inc., presently operates WHCT (TV) on ch. 18 in Hartford. Ann. May 27.

By memorandum opinion and order, Commission denied petition for reconsideration and request for oral argument by Gregg Television Inc., Longview, Tex., directed to June 4, 1958 report and order which rejected proposals to shift educational reservation to Denton, Tex., from ch. *2 to uhf frequency in order to make ch. 2 available for commercial use in Longview, Denton, Brownwood or Cooper, Tex. Ann. May 27.

By report and order, Commission finalized rulemaking and amended tv table of assignments by assigning ch. *10-minus to Appleton, Minn., for educational use. The Joint Council on Educational Television had petitioned for assignment in connection with planned regional educational tv network interconnecting educational tv stations in Iowa, Minnesota, Nebraska, and North and South Dakota. Ann. May 27.

By report and order, Commission finalized rulemaking and amended tv table of assignments by deleting ch. 61 from Moses Lake, Wash., and substituting ch. 33 there, deleting ch. 67 from Wenatchee, Wash., and adding ch. 27 instead, and deleting ch. 33 from Kellogg, Idaho, and replacing it with ch. 36. Ann. May 27.

By report and order, Commission finalized rulemaking and amended tv table of assignments in Hawaii by substituting ch. 7 for ch. 8 at Wailuku, deleting ch. *7 (educational) from Honolulu and reserving ch. 11 (now commercial) for educational use in that city, and deleting ch. 7 from Hilo. Hawaiian Bcstg. System Ltd. (KGMB-TV ch. 9, Honolulu; KMAU-TV, ch. 3, Wailuku, and KHBC-TV, ch. 9, Hilo) had petitioned for changes for technical reasons. Ann. May 27.

BROADCAST ACTIONS

By Broadcast Bureau

Actions of May 29

KGEE Bakersfield, Calif.—Granted assignment of license to **Marterto Productions Inc.**, and **Seer Inc.**, joint ventures, d/b **KGEE Bcstrs.**

KJOE Shreveport, La. — Granted relinquishment of negative control by **Joe C. Monroe** through transfer of stock to **Joyce Lane C. Monroe.**

By Hearing Examiner Elizabeth C. Smith

Scheduled prehearing conference for June 10 in proceeding on applications of Top Broadcasters Inc., and Natalia Bcstg. Co., for am facilities in San Antonio and Natalia, both Texas. Action May 29.

Scheduled prehearing conference for June 18 in proceeding on applications of Goleta Bcstg. Associates and Bert Williamson and Lester W. Spillane, co-partnership, for am facilities in Goleta and Santa Barbara, both California. Action May 29.

Granted petition by Bamray Bcstg. Co., for leave to amend its application for am facilities in San Antonio, Tex., to change name of applicant, change from corporation to partnership, changes in cost of equipment which result from changes in engineering proposal, and new engineering report; removed application from hearing and returned to processing line. Action May 21.

By Hearing Examiner Horace Stern

Granted motions by Allen B. DuMont Labs. Inc., and Globe Newspaper Company, subject to minor exceptions, to correct transcript in Boston, Mass., tv ch. 5 remand proceeding. Action May 25.

PETITIONS FOR RULEMAKING FILED

Austin Radio Co., Austin, Tex. (5-8-59)— Requests allocation of ch. 22 to Austin, Tex. Ann. May 22.

KCCC-TV Sacramento, Calif. (5-8-59)— Requests amendment of rules by lowering the minimum co-channel assignments and station mileage separations in Zone 11 from 190 miles to from 100 to 125 miles. Also requests the assignment of ch. 8 to Sacramento, Calif., in lieu of ch. 40 presently assigned. Ann. May 22.

KFYR Bismarck, N.D. (5-13-59)— Requests amendment of rules so as to increase power of Class III standard broadcasting stations to maximum of 25 kw power. Ann. May 22.

National Assn. of Broadcasters, Washington, D.C. (5-20-59)—Requests amendment of rules so that so-called "teaser announcements" be given separate consideration apart from advertising announcements wherein product or service is actually offered; or, in alternative, that Commission issue administrative interpretation of Sec. 3.119 (e) consonant with suggested proposal. Ann. May 22.

License Renewals

Following stations were granted renewal of license: KCUE Red Wing; KSUM Fairmount; KAGE Winona; all Minnesota. KDTA Delta; KXXI Golden; KLMO Longmount; KLAK Lakewood; KYSN Colorado Springs; KVRH Salida; all Colorado. KBRX O'Neill; KCSR Chadron; KJSK Columbus; KOWH Omaha; KSTF (TV) Scottsbluff; all Nebraska. KAYS Hayes; KJRG Newton; KLWN Lawrence; KMAN, KSAC Manhattan; KMDO Fort Smith; KRSL Russell; all Kansas. WIL St. Louis; KBHM Branson; KWOC Poplar Bluff; all Missouri. KOMA, KYFM (FM), Oklahoma City; KTUL-TV, KVOO-TV Tulsa; WNAD Norman; KLTR Blackwell; all Oklahoma. KLEE Ottumwa; KJAN Atlantic, both Iowa. WDXB Chattanooga, Tenn.; KABR Aberdeen, S. D.; WDDT Greenville, Miss.; and WTVH(TV) Peoria, Ill.

BUSINESS OPPORTUNITY

WHAT ARE YOU GONNA DO WITH ALL THAT LOOT?

If you've got DUE BILLS for transportation, services or merchandise; that you've had to take in payment for your services, DON'T WASTE THEM. DON'T GIVE THEM AWAY. WE WILL BUY DUE BILLS FOR IMMEDIATE CASH OR WE WILL TRADE YOUR DUE BILLS FOR SPECIFIC NEEDS OF YOUR CHOICE.

HOLLYWOOD 28, CALIFORNIA

ABOUT $24.00 A DAY PLUS BENEFITS!

Does $24 a day plus benefits sound good to you? No wonder! It's a lot more than most people get.

Well, $24 a day is *average* pay for steelworkers. That makes American steelworkers just about the best paid industrial workers anywhere in the world.

But $24 is only part of it.

In addition to their wages they get a package of benefits costing the steel companies another $4.78 a day on the average. They get:

...up to 3½ weeks vacation pay.

...seven paid holidays.

...pensions after retirement.

...pay during jury service.

...supplemental unemployment benefits where state laws permit.

...life insurance.

...sick and accident benefits for 26 weeks.

...surgical insurance and 120-day hospitalization.

The companies pay full costs of all benefits except the last three, in which employees share the cost.

A top union official who addressed the 1958 Convention of the Steelworkers' Union said this:

"Now, listen to me. Hear me now! This (rise in minimum pay since 1953) represents an increase of close to 48 percent. In the same period the cost of living has risen by a little more than 8 percent."

"And we got 48!"

No question, wages and benefits in steel have been rising sharply. In fact, in virtually every industry they have risen much faster than the nation's productive efficiency has risen. That's one reason for the inflation which cuts the buying power of your dollar.

This message is being brought to you by

REPUBLIC STEEL

because

INFLATION ROBS US ALL

American management continuously exercises ingenuity in developing longer lasting products, which eventually save the public money. Republic Steel, for instance, now coats steel pipe and tubing with plastic to resist corrosion better. Trade name of this exciting new product is Republic X-TRU-COAT. If you are associated with school, hospital, or other institutional or commercial building, you should be interested in Republic's Vision-Vent® Wall Panels made by the Truscon Division. Other building products with interesting economy stories are: Truscon Color-Finished Windows; Truscon Steel Joists; Truscon Steel Doors assembled with frames.

OUR RESPECTS TO . . .

William Dorsey Pabst

When KTVU (TV) San Francisco-Oakland began regular program service on March 3, 1958, a local newspaper described the station's executive vice president and general manager as ". . . a grey-haired grandfather giving birth to a television station . . ."

Reading the phrase, William Dorsey Pabst thought that if the writer had had all the facts, he might also have called it the longest pregnancy in tv history. It had lasted 17 years and three weeks, dating from the day that his daughter Joyce (the mother of his grandchildren) had run her tricycle over his first application for San Francisco ch. 2 while he was assembling the papers on the floor of his home on the San Francisco peninsula.

That was in 1941 and Mr. Pabst, then general manager of KFRC San Francisco, filed the application on behalf of the Don Lee Broadcasting System, West Coast regional radio network which owned KFRC. After the Don Lee application was withdrawn, early in 1954, he and his partner, Ward D. Ingrim, then manager of the Don Lee network, put in their own application. After three years and a hard-fought competitive hearing, the FCC awarded the ch. 2 grant to their company, San Francisco-Oakland Television Inc. Bill Pabst then resigned the KFRC general managership to put his full efforts to the birth of KTVU.

A Tough Fight • Critics said that an independent station in the San Francisco Bay Area would have a tough time competing with the three firmly-entrenched tv network stations, particularly after nine years of their exclusivity in the market.

"We didn't pay attention to their warnings of black times," Mr. Pabst recalls. "Instead, we put as much effort into the launching of ch. 2 as if it were the only station in California. We programmed what the audience wanted to see and scheduled programs at the times that were most convenient for the desired audiences."

Supplying what the audience wanted to see led KTVU into extensive sportscasting. The Bay Area audience is perhaps one of the most enthusiastic groups of sports fans in the national and network-bound stations could offer them little in the way of local and regional sports coverage. By offering such events as the NCAA regional basketball playoffs and finals (within its first month of operation), the California-Stanford "Big Game," roller derby, horse racing, boat races, professional as well as collegiate football, basketball, bowling and collegiate spring sports, KTVU won an immediate and loyal audience.

The station has kept sports fans loyal by such service as the longest remote in San Francisco sports history. This was last March, when KTVU followed California's basketball team to Louisville for the NCAA finals. The live telecasts of the team's two victorious games hit a top rating of 30. Folger's Coffee, one of the sponsors of the full basketball season, picked up the tab.

And Movies Too • Bill Pabst is known for his shrewd techniques in buying theatrical motion pictures and tv film series to help win more viewers for KTVU's live programming, in addition to sports, is chiefly news and the *Sherwood As Is* series, starring one of San Francisco's well known local tv personalities. It has just expanded from once-a-week to a full Monday-Friday schedule.

BAY AREA'S BILL PABST
Ch. 2 makes its mark

Businesswise, KTVU now is operating in the black, a tribute to Mr. Pabst's managerial acumen. The station has 120 advertisers, including most of the original 45 who started with the station 15 months ago. For June, virtually all evening time had been sold before the end of May and daytime sales were almost as good. The fall sports package of California and Stanford football games is fully sold four months before the first kickoff. Prudential Insurance, First Western Bank and Bardahl share the sponsorship.

On the theory that it's good business to spend money to make money, General Manager Pabst last summer moved KTVU into a new million-dollar plant in Oakland's Jack London Square. He began local color programming this spring and has just added a second tv tape unit.

Bill Pabst was born in Los Angeles Feb. 13, 1906, the son of Frederick Pabst, pioneering Cadillac advertising manager. "But," he quickly states, "at an early age I discovered the best things in life are not always located in Southern California." The Pabst family moved to the Bay Area and while the elder Pabst set up shop in San Francisco for Cadillac distributor Don Lee, his son enrolled at Hitchcock Military Academy at San Rafael. By graduation time, he was in charge of the student body as senior cadet-major.

'Caddies' to Radio • Following further education at Stanford and the U. of Mexico at Mexico City, he returned to San Francisco in 1928 and joined his father in the automobile business. The close association between Don Lee's automotive and broadcasting interests exposed Bill Pabst to radio and started a romance that in 1931 lured him away from Cadillacs and into radio as program coordinator for KFRC. By 1934, his grasp of programming had developed to the point that he was appointed program director of the station, in charge of both local programming and network originations.

In 1940, Bill Pabst was promoted to the post of general manager of KFRC. But almost before he'd settled comfortably into his new office he was making a more radical change, from a radio station manager to a lieutenant in the U.S. Navy, stationed at the Naval Air Station at Corpus Christi, Tex.

When the war ended, he returned to San Francisco and KFRC. But he soon found himself engaged in a new kind of war, when television invaded the Bay Area and began making inroads on radio's audience ratings and advertising revenues. For some years he fought a defensive action with more or less success, but the interest in tv that had lain dormant since 1941 came back with renewed vigor and when the chance came to change over he seized it with no hesitation.

Managing a tv station is a full time job, as Mr. Pabst would be the last to deny. Yet he somehow finds time for other business interests (he recently became a board member of Bonanza Air Lines) and for industry affairs (in March he was elected president of California Broadcasters Assn.) as well as for an occasional swim or a round of golf, his two chief hobbies.

Mr. Pabst married the former Marjorie Allen, whom he met on campus at Stanford. They have two grown children: Frederick and Joyce Pabst Wilson.

Now or never

AT the time this was written only three witnesses representing broadcasting had applied to testify before the Senate Commerce Committee's forthcoming hearings on repair of the political broadcasting law.

They were Frank Stanton, CBS president, Don McGannon, president of Westinghouse Broadcasting, and Harold E. Fellows, NAB president. No matter how persuasive those three may be, their testimony will not be enough to convince politicians they ought to give up their hold on political broadcasting.

At the very least spokesmen for other networks should appear, and in addition a regional representation of broadcasters who can relate their personal experiences with the idiocies of Sec. 315.

The hearings begin June 18, only 10 days from now. As we commented two weeks ago ["Repeal Sec. 315 Now Or Repent Later," EDITORIAL, May 25] there has never been a better chance for broadcasters to obtain relief from a law that prevents intelligent dissemination of campaign news. If they muff this one, they'll have to live with Sec. 315 a long time.

The Scotchman calls the cops

IF we hadn't heard it, we would have branded as just another tall Texas tale the report that Gordon McLendon, station multiple-owner, is advocating legislation to limit the number of stations in a given market.

But Mr. McLendon did say it to a big audience at the Storz Stations' disc jockey convention 10 days ago.

Mr. McLendon over the years has been one of broadcasting's rugged individualists. He has been an outstanding, even truculent opponent of the *status quo*. He has barged into market after market with promotional razzle-dazzle that has set them on their ears. He has bowled over sedate competitors who previously had ruled the roost.

Could it be that Mr. McLendon no longer can brook the competition of newcomers? If we're to have free enterprise—the freedom that Mr. McLendon so ebulliently espouses—there must be free competition. (This, however, is not to condone the wholesale licensing of stations without regard to good engineering standards.)

As long as there are assignments that fit under the engineering criteria there will be qualified applicants. They are risking their wherewithal. Existing stations cannot be guaranteed freedom from new competition. The alternative is to give stations protection under the public utility concept by limiting competition. But the government then demands the right to limit profits, which means rate regulation, and to control the quality of the product. In short, radio's freedom would go out the window.

We doubt whether Mr. McLendon will get much support for his project. We even doubt whether he believes in it himself, even though we heard him say it.

Labored legislation

FOR once we find ourselves in agreement with those labor leaders who officially have announced their opposition to the Kennedy-Ervin Bill which has passed the Senate and soon will be considered by the House. But we oppose it for different reasons.

Any labor legislation which does not ban secondary boycotts or coercive picketing, and which does not permit the courts to enjoin strikes in violation of "no strike" clauses should arouse the opposition of all fair-minded men. The Kennedy-Ervin bill is silent on these vital points. President Eisenhower has denounced it.

We wonder whether the opposition expressed by labor leaders is really sincere. It could be a diversionary tactic, designed to spike the guns of management forces.

Threaded throughout the Kennedy-Ervin Bill are provisions which, the experts tell us, foster compulsory unionism and in effect deny the rights of citizens to freedom of choice. They tell us, moreover, that it is one-sided legislation all down the line.

Broadcasters who have any feelings on the matter (and we can't imagine one who doesn't) should make their views known to their House members before the Kennedy-Ervin bill hits the floor.

Endville

IN Miami May 29-31 the phonograph record companies demonstrated, in a way disturbing to anyone who admires the full purpose and importance of radio, how great an influence they now exert over a considerable part of all U.S. radio programming.

Through no fault of the sponsoring Storz Stations, the record companies took over the Second Annual Radio Programming Seminar and Disc Jockey Convention. Their hospitality, abetted by sun, beach and pool, overwhelmed the serious parts of the program. Only the most dedicated delegates, an astonishing number considering the distractions, attended the business sessions.

The problem was one of excess. To the credit of the record companies it must be said that they produced the biggest show ever attracted to any broadcasting convention. It was a show in good taste and of extraordinary talent, and for people in programming it had professional value as well as private enjoyment. But the record companies also conducted a calculated campaign to lure d.j.s away from the panel sessions and into their suites for personal aggrandizement. And they used enticing bait indeed.

The events in Miami were a manifestation of the intense competition that now exists in the phonograph record field. There are hundreds of labels, and to a frightening degree they live or die by the spins they get on radio. With access to the air so vital to their future, the companies have a natural desire to cultivate disc jockeys any way they can. It was that desire which got out of control in Miami.

If there is to be another national seminar on radio programming—and there are good arguments that there should be—it must be conducted with a minimum of conflict between the main tent and the sideshows. And it must also be arranged to emphasize that there is more to radio programming than records.

COMING AT YOU—**THE CALIFORNIANS,** FIRST-RUN-OFF-THE-NETWORK!

VICTORY PROGRAM SALES presents the first major Western series available to all markets for this Fall—THE CALIFORNIANS. First-run-off-the-network, where it ran for two years, THE CALIFORNIANS is pure Western action. It's the slam-bang saga of Vigilante-Gold Rush days, and the trigger-witted gambler who brought law and order to San Francisco.

Here are 69 high-budget, top-quality adventures with powerful daytime and early evening audience appeal. THE CALIFORNIANS' network sponsorship history—Singer Sewing Machines, Lipton Tea, Colgate-Palmolive—has already marked it as a real "lady killer." And because of its late-evening slot on the network, the series will hit like a buffalo stampede with the important youth audience, which has never seen it.

No one has to tell *you* of the growing Western popularity among nighttime network viewers. As a result, the source of fresh, first-run-off-the-network *comedy* material for local daytime stripping has virtually disappeared. And now the networks are turning to first-run material for their own daytime strip reruns, limiting the supply even further. Where do you go from here? Western, young man!

Serve THE CALIFORNIANS at lunchtime, next to afternoon feature films, as a pre-evening lineup audience builder. Run it weekly, across-the-board, or stripped with CNP's other Western variations: FRONTIER; HOPALONG CASSIDY; STEVE DONOVAN, WESTERN MARSHAL; BOOTS AND SADDLES—THE STORY OF THE FIFTH CAVALRY, and UNION PACIFIC. Go CALIFORNIANS anywhere from high noon to sunset, and whip the *daylights* out of your competition!

CLOSED CIRCUIT®

Fight against Sec. 315 • Watch for build-up this week of massive broadcaster support for repeal of Sec. 315, political broadcasting law. Keynote for repeal will be sounded June 18, at opening day of Senate Commerce Committee hearings, by Frank Stanton, CBS president. At least 20 other broadcasters, scattered throughout nation, late last week were planning to support that position in personal testimony some time during hearings. These are in addition to broadcasting leaders like Robert Sarnoff, of NBC, and Donald McGannon, of Westinghouse, who earlier had been scheduled as witnesses (story page 65).

Build-up was proceeding despite attempts by some elements in broadcasting to scuttle campaign for repeal of Sec. 315. At NAB Freedom of Information Committee meeting June 11 some members frankly stated they liked Sec. 315 in present form because it relieved them of strain of making editorial judgments. Others with special interests, notably John Daly, ABC news vice president and commentator, argued for acceptance of minor revision of law to exclude news broadcasts from equal time provisions. Committee adopted compromise resolution retreating from previously adopted NAB stand for repeal (story page 46). Final NAB policy will be threshed out at NAB board meetings this week in Washington. Harold Fellows, NAB president, will present that policy to Senate committee next week.

Same tape for all • Every radio station must meet over-all programming balance test no matter how many other stations in same community may be providing how large a variety of services. This is deduced from FCC's action last week ordering its staff to develop case-by-case report on seven Atlanta radio stations which have been operating for more than year without license renewals. FCC voted 4-2 on this course after considering suggestion for general hearing in Atlanta which would have appraised community needs as a whole and total program balance of all stations (CLOSED CIRCUITS, June 8, 1). Comrs. Bartley, Lee and Ford favored general hearing, but Comr. Ford missed meeting last week.

Help wanted • CBS Television Network is still looking for high-level public relations expert to direct its own public relations effort. Appointment expected shortly by Tv Network President Louis G. Cowan. CBS offered to contribute its "image" study to all-tv information project proposed by Petersmeyer Committee (BROADCASTING, May 4) and which now is in hands of five-man McCollough Committee for implementation. Latter committee will submit its findings to NAB Board at meeting here June 17.

So many minutes • Thinking at one major advertising agency as expressed by associate media director: Tv spot advertisers may now have to face "practical facts" that pell-mell trend toward use of one-minute announcements could squeeze some spot users out of network program adjacencies. He foresees some "cross currents" with advertisers reversing spot activity away from 60s and back to more extensive use of IDs or 20s in attempt to obtain desirable positions.

Tax troubles • Internal Revenue regional ruling on amortization of feature films used on tv (BROADCASTING exclusive, May 18; EDITORIAL, May 25) has goaded motion picture producers, along with tv interests, into all-front action. Alliance of Motion Picture Producers, Hollywood, already has scheduled subject for special consideration on premise that ruling could break producers. Motion Picture Assn. (Eric Johnston, president) has put its tax attorneys to work. Ruling, given in case involving Pacific Northwest station, specifies that film costs must be amortized over life of contract and frequency of showings rather that ascribing 60% to first run of each film.

Because IRS San Francisco ruling collides head-on with antitrust decision that movie films must be leased individually (film-by-film rather than as package) both motion picture and tv users are hopeful that IRS will reconsider regional action. Eventually there may be test case.

Petry string • Edward Petry & Co., shortly will take over exclusive national representation of WROC-TV Rochester, WGR-AM-TV Buffalo and WSVA-AM-TV Harrisonburg, Va., stations in Transcontinent group which recently merged with Wrather-Petry owned Marietta station group.

Threat or promise • Sports-minded Gillette, anxious to line up station clearances for next fall's Friday night *Cavalcade of Sports* on NBC-TV, would like to make package of its major sports offerings. Station orders for such stellar offerings as July 7 all-star baseball game and end-of-season World Series are going only to stations which clear Friday night series. Some stations are murmuring "strong-arm tactics"; Gillette, NBC-TV see it as tempting deal.

Cleanliness is next to . . . • NAB wants to be above reproach this week in case it decides to pull any more code seals from subscriber stations carrying Preparation H business. Internal housecleaning said to involve one television board member who dropped controversial hemorrhoid remedy account fortnight ago and member of code board who had considered product acceptable prior to membership on self-disciplinary body.

Three-minute pitch • Manufacturer of big-ticket hard goods item, eyeing radio as sales medium, is feeling out sentiment for acceptance of three-minute spots. His idea is to create "radio gatefolds," adapting magazine technique of extra length ads to aural medium.

Clear channel job • Choice of Washington-headquartered executive director of Clear Channel Broadcasting Service expected at meeting of CCBS executive committee to be called within fortnight by Chairman E. W. Craig, WSM Nashville. Committee will meet in Nashville and will consider six applicants. New director will succeed Hollis Seavey who resigned in April to acquire ownership of WCUM Cumberland, Md. Besides Mr. Craig, other members of executive committee are Ward L. Quaal, WGN Chicago; James D. Shouse, WLW Cincinnati; Harold Hough, WBAP Fort Worth, and Victor Sholis, WHAS Louisville.

Big daddy • First breakthrough is reported in NBC-TV's unsold three hour-long programs which have been slotted at 7:30 in fall schedule's Tuesday *(Laramie)* and Saturday *(Bonanza)* slots and at 7 on Sunday *(Riverboat)*. Advertiser is RCA, which has purchased six full *Bonanza* shows during first 13-week run of program. These three programs are those being offered by NBC-TV on rotating sponsorship (BROADCASTING, June 8), basis on which RCA did not buy.

WEEK IN BRIEF

MR. BASTABLE

Let's cut tv production costs • The cost of commercials has risen to the point where something needs to be done about it, according to William Bastable, audio-visual services manager for major radio-tv advertiser, Swift & Co., Chicago. And in this week's MONDAY MEMO he discusses some of the things that can be considered to help prune excessive expenses. Page **19.**

Television climb in '59 • Though no runaway, the tv revenue team of spot, network and local is dashing toward a record year. Spot is lengths ahead. Additional take of $138 million in national advertising is estimated. Page **27.**

Spot tv quarterly report • For January-March this year an estimated billing of $156.4 millions. TvB finds quarter to be at least 25.7% ahead of last year's period. With network billing added, total for first quarter comes to $312.8 millions. Page **27.**

AFA shapes its image • Threaded throughout sessions of Advertising Federation of America's convention in Minneapolis last week were suggestions for sowing a more favorable public acceptance of advertising's role in the nation's economy. New AFA headquarters in Washington may prove biggest step. Page **32.**

Public relations problems • NAB directors, meeting this week, to consider major project designed to develop public appreciation of tv. Reorganization of headquarters public relations staff also to be discussed, along with effect of tv code developments on association and its self-disciplinary operation. Page **46.**

Atop the FCC • Super commission is urged on Congress by heavyweight trio of FCC Chairman Doerfer, EIA President D. R. Hull and Federal Aviation Agency Administrator E. R. Quesada. Recommendations made at two-day House hearings on what's wrong with radio spectrum and how to right it. Broadcasters call for Congressional study of who uses what and where—especially in government. Page **60.**

Political pleas • Broadcasters begin drive for relief from Sec. 315 before Senate subcommittee Thursday, with hearings to run at least five days. Witness list topped by FCC, Justice Dept., network executives and broadcasters. Page **65.**

Commission probe • Administrative process problems of FCC will be discussed tomorrow (Tuesday) before House Legislative Oversight Subcommittee by 13-man panel, including FCC Chairman John C. Doerfer, attorneys and broadcasters. Page **71.**

NARBA ratification urged • Comr. Rosel Hyde calls on broadcasters to back Senate ratification of long-pending North American Regional Broadcast Agreement and U.S.-Mexico treaty on am broadcasting. Foresees dire effects if ratification delayed any longer. Page **72.**

Free access issue grows in tax study

West Virginia broadcasters and newspapers have protested action of governor's special Tax Study Commission in voting to exclude media from early tax study meetings. Decision to exclude news media was reached at June 9 commission organization session.

Fifteen-man commission includes C. Leslie Golliday, WEPM Martinsburg, W. Va., president of West Virginia Broadcasters Assn. which has been active in fight to gain equal access with press in coverage of public proceedings. It was Mr. Golliday who introduced motion at commission meeting calling for closed sessions in early stages of two-year study. Motion was adopted by voice vote, with 13 members voting.

Apprised that matter had been discussed at June 11 Washington meeting of NAB Freedom of Information Committee, (story page 46), Mr. Golliday said, "I consider it reasonable that commission members be given a chance to become familiar with the tax structure of West Virginia and other states at closed meetings. Later the commission may decide to hold hearings. If hearings are held I will be most happy to present a motion that they be open to broadcasters and other media."

Mr. Golliday said he was ardent believer in freedom of speech and equal broadcast access to public events. But in this case, he said, committee proceedings have not reached stage where coverage is feasible. Committee's next meeting will be held June 29. Its members are appointive, he added, and are not state employes. They cannot reach binding decisions but will merely make a study and report to legislature.

Charleston Gazette commented commission's closed-door policy "violates spirit and letter of democratic concepts."

Access in Baltimore

After long fight for access, Baltimore tv stations were permitted to cover Friday (June 12) windup of investigation into activities of Baltimore police commissioner. Stations had been denied right to cover earlier hearings when evidence was presented. E.K. Jett, general manager of WMAR-TV Baltimore, said this was first time Maryland outlets had been permitted to cover judicial-type proceedings and termed it step forward in industry fight for equal access.

Hearings were held in Maryland capital of Annapolis with Gov. J. Millard Tawes presiding. WMAR-TV filmed proceedings and repeated one hour broadcast same afternoon while WJZ-TV taped session and aired two hour program later in day. Live coverage was not permitted. In pleading for admission, Mr. Jett pointed out hearing room, 30 miles from Baltimore, would seat only 200 and Baltimore citizens had right to see and hear proceedings.

Rexall, Hallmark, GM arranging tv specials

Advertisers lining up properties for next season's specials are getting programming in hand. Rexall Drug reportedly has signed for two musicals, "Strawberry Blonde" and "Peg o' My Heart" and plans to select four to be aired out of these five dramatic shows: "Silver Whistle," "Jenny Kissed Me," "Merton of the Movies," "The Devil and Daniel Webster" and "Buried Alive."

General Motors plans Art Carney Show consisting of three one-act plays to be scheduled in January or February. Both Rexall and GM's specials will be on NBC-TV, Rexall on Sunday, 8-9 p.m., GM on Friday, starting at 8:30 p.m.

NBC-TV announced Friday (June 12) that Hallmark Cards Inc. has signed Maurice Evans to star in Shakespeare's "The Tempest" as one of six 90-minute color productions in *Hallmark Hall of Fame* series for next season. "The Tempest" will be taped in color this summer to release Mr. Evans for other commitments, and will be aired next spring.

Big bite, small bits

Armour & Co., Chicago, it was learned Friday (June 12), has wrapped up purchase for fall on ABC-TV representing estimated $7-7.5 million in gross billing. Nighttime portion of deal includes alternate-week one-third portion of four programs, *Alaskans, Adventures in Paradise, Cheyenne* and *The Untouchables*. Advertiser also has 13-week contract in daytime programming.

Foote, Cone & Belding, N. Y., handled purchase for Armour.

New agency merger

As of Friday (June 12) word was: new agency, Cohen, Dowd & Aleshire, New York, with about $14 million in total billing. Disclosure came about with Lord Calvert placing its over $1 million account with CD&A after having been serviced by Ogilvy, Benson & Mather. CD&A is made up of Cohen & Aleshire merging with Dowd, Redfield & Johnstone. Harry B. Cohen, chairman of C&A, continues in that post with new agency; John C. Dowd, formerly president of Dowd, Redfield & Johnstone, becomes vice chairman, while Edward Aleshire, president of C&A, retains same post in new agency, as does Francis X. Brady as executive vice president.

Networks quiz topic

FCC, scheduled to appear tomorrow (Tuesday) before House Oversight Subcommittee (earlier story, page 71) on Commission problems, also will be questioned about direct regulation of tv networks, author of proposal said Friday (June 12). Rep. John Bennett (R-Mich.), ranking minority member of subcommittee, said he would ask question on his bill (HR 5042) "if the opportunity arises." At time bill was introduced (BROADCASTING, March 2), congressman said he would quiz commissioners on subject at first opportunity, even though hearing was not on that specific legislation.

WLAC sale bid

Sale of working control (24%) of Life & Casualty Insurance of Tennessee (parent company of WLAC Inc., licensee of WLAC Nashville) by 26 stockholders to Murchison Bros. (Clint W. Murchison Jr. and John D. Murchison, sons of Texas oilman and financier Clint W. Murchison) for $40 million (BROADCASTING, Sept. 1, 1958) was filed at FCC Friday. Selling group was headed by Paul Mountcastle and First American National Bank of Nashville, trustees under will of Elizabeth Young.

Murchison Bros. controls Lamar Life Insurance Co., licensee of WJDX-AM-FM Jackson, Miss. Life & Casualty Insurance also owns 50% of WLAC-TV Nashville and application for transfer of negative control of tv outlet will be filed later.

WLAC Inc. total assets are $1,370,-

CONTINUES *on page 10*

AT DEADLINE

CONTINUED *from page 9*

954, with liabilities of $1,068,788 of which $1 million is long term debt. Other owners of WLAC-TV are T. B. Baker Jr. and A. G. Beaman, each 25%.

WLAC is on 1510 kc with 50 kw night directional and is CBS affiliate.

Mr. Mountcastle, chairman of WLAC-TV licensee, is president and owns 37.4% of WATE-AM-TV Knoxville.

Skyline to Hollingbery

Appointment of George Hollingbery Co. as national representative for Skyline Network effective July 1 announced Friday. Skyline stations: KID-TV Idaho Falls and KLIX-TV Twin Falls, both Ida.; KOOK-TV Billings, KXLF-TV Butte, KFBB-TV Great Falls and KXLJ-TV Helena, all Mont.

New Filmways firm

Formation of Filmways Television Productions, Hollywood, program production subsidiary of Filmways Inc., New York tv commercial producer, announced Friday. President of new firm is to be Al Simon, production head of McCadden Productions, Hollywood.

Schlank forms UTD

Mel Schlank, formerly vice president of NTA Program Sales, has organized Universal Television Distributors, distributor of tv and radio programs with offices at 41 E. 42d St., New York (Murray Hill 7-3180). Mr. Schlank previously was vice president in charge of sales with Gross-Krasne-Silverman.

New Schubert office

Bernard L. Schubert Inc., New York, reported planning to open new Hollywood office to serve as headquarters for its West Coast productions as well as main office of its western sales division. Address: 724 N. La Cienega Blvd.

120 days of darkness

KULR (TV) Kalispell, Mont., asked FCC Friday for permission to go off air for 120 days, blaming competition from local community tv system fed via microwave. Station, formerly KGEZ-TV, went dark last year for seven months for same reason, but resumed ch. 9 broadcasting in fall.

Flying buyers

BBDO Chicago will take one of its clients on six-day flying field trip through Midwest this week inspecting facilities of some 25 tv stations. Client, W. A. Sheaffer Pen Co., will be sizing up markets for spot tv buys. Sheaffer has not been in tv for past year with last participation being in network specials. Contingent will include Russell Tolg, chief of BBDO radio-tv production, and G. P. Karle Jr., Sheaffer advertising manager.

• Business briefly

• Daitch-Shopwell (Daitch Crystal Dairies Inc.), N. Y., has set July start for 13-week saturation spot radio campaign in New York, Westchester and Long Island areas to introduce new Daitch ice cream. Product marks first use of radio for Daitch products. Agency: Co-Ordinated Marketing Agency Inc., N. Y.

• Mutual of Omaha will transfer its sponsorship of weekly panel show, *Keep Talking,* from CBS-TV (Wed. 8-8:30 p.m.) to ABC-TV (Tues. 10:30-11 p.m.), starting Sept. 29. Wolf Enterprises production retains Carl Reiner as m.c., with comedians Joey Bishop, Danny Dayton, Paul Winchell, Morey Amsterdam and comedienne Peggy Cass. Bozell & Jacobs, Omaha, is agency.

• General Mills Inc., Minneapolis (Cheerios), is launching spot tv campaign in selected markets throughout country, using children's programs, starting immediately and continuing through Sept. 1. Agency: Dancer-Fitzgerald-Sample, N.Y.

• Procter & Gamble Co. (Pin-It home permanent), Cincinnati, is reported to be preparing long-term spot tv campaign latter part of June in undetermined number of markets. Agency: Grey Adv., N.Y.

• Church & Dwight (Arm & Hammer baking soda), N.Y., is understood to be launching spot campaign on Mutual starting June 26 and ending in mid-September using news programs. Agency: J. Walter Thompson Co., N.Y.

• Two advertisers were announced Friday (June 12) by NBC-TV for sponsorship of two Milton Berle specials on next season's *Sunday Showcase* (8-9 p.m.). Dates have not been decided. Joint sponsors for first Berle show will be Benrus Watch Co., N.Y., through Grey Adv., and Zerex anti-freeze (du Pont) via BBDO. Zerex also will split time for second special with another sponsor, as yet unnamed.

• White King Soap, L.A., now readying third quarter campaign for soap and detergent products, plans extensive radio spot drive throughout entire West plus spot tv in selected markets. Agency: Erwin, Wasey-Ruthrauff & Ryan, L.A.

• James O. Welch Co., Cambridge, Mass., (candies), which has put close to 100% of its ad money into spot tv for past three years, currently mapping new campaign to start after Labor Day in as yet undetermined number of markets. Schedule, to be ready by mid-July, reportedly again will lean heavily to tv. Agency: James Thomas Chirurg Co., Boston.

• Lever Bros. Co., N.Y., to enter spot tv next week in undetermined number of markets for its new bar soap, Praise. Substantial number of day and nighttime minutes are planned over period of several months. Agency: Kenyon & Eckhardt, N.Y.

• Rayco Mfg. Co., Paterson, N. J., which has relied heavily in past on "hard sell" radio-tv spot commercials, is trying new gambit: semi-institutional "soft-sell" approach in sponsorship of news program over WRCA-TV New York, with possibility that this pattern may be extended as supplement to spot campaigns in other parts of country. Agency: Mogul, Lewin, Williams & Saylor, N. Y.

• General Mills Inc. (hot and ready-to-eat cereals), Minneapolis, has bought half-sponsorship of NBC-TV's coverage of U.S.-Russian track meet in Philadelphia July 18-19 with presentation on July 19 (4:30-6 p.m.) and including taped sequences of races July 18. Agency: Knox Reeves Adv., Minneapolis.

• Oscar Mayer & Co. (meat products), Madison, Wis., with estimated $1.5 million in billings, will sever account with Wherry, Baker & Tilden, effective in September or October, it was revealed Friday. Company spends about half its budget in broadcast media, emphasizing animation in commercials. Interested agencies currently preparing presentations, with decision expected next fortnight.

• Purex Corp., South Gate, Calif., will sponsor series of *I Love Lucy* re-runs on CBS-TV during summer in nighttime period (Fri., 8:30-9 p.m. starting July 3 with Purex sponsorship beginning July 24). Agency: Edward H. Weiss.

AND SOME even play a good game of golf.

WCKY

IS CINCINNATI'S No. 1 NEWS STATION

Here's proof, straight from the Jan.-Feb. '59 Nielsen, that WCKY has the largest news audience in Cincinnati:

Station	Rating
WCKY	11.15 avg for 70 newscasts per wk
Sta A — Ind	5.9 avg for 60 newscasts per wk
Sta B — Net	9.8 avg for 70 newscasts per wk
Sta C — Net	9.3 avg for 50 newscasts per wk
Sta D — Ind	5.0 avg for 80 newscasts per wk

(5 day cumulative rating Metro Area)

The reasons for WCKY's News Leadership:

1. Large news staff of veteran experienced reporters and newscasters.
2. Scoops — WCKY consistently scoops the town on most local news stories.
3. On-The-Spot-Reports — WCKY's mobile unit is on the scene reporting big local stories when they happen or moments after they happen.
4. News tapes—the people who make the news tell the news to WCKY's audience via news tapes. WCKY has them on the air first.
5. Background—WCKY's newsmen present the reasons behind the news so that WCKY listeners receive a more complete understanding of the news.

REMEMBER — WCKY News is No. 1 in Cincinnati and has earned its reputation for prestige, because Cincinnatians know they get the news first, fast and accurately on WCKY. Smart advertisers know they get the prestige of WCKY's news plus a large responsive audience when they sponsor news on WCKY.

Ask Tom Welstead to tell you about WCKY news operation — in New York at ELdorado 5-1127; ask AM Radio Sales in Chicago and on the West Coast.

WCKY
50,000 WATTS OF SELLING POWER
Cincinnati, Ohio

Lodge, Pebble Beach, Calif.

June 29-July 1—Military electronics convention sponsored by **Professional Group on Military Electronics of Institute of Radio Engineers,** Sheraton Park Hotel, Washington. Space propulsion, space electronics, radar, missile guidance, computers and related topics will be discussed.

JULY

July 5-11—Advertising Federation of America management seminar in advertising and marketing, Harvard Business School, Cambridge, Mass. Emerson Foote, McCann-Erickson senior vice president, is in charge.

*July 5-17—NAB Management Development Seminar, Harvard Graduate School of Business Adm., Cambridge, Mass. MONDAY MEMO

from **WILLIAM BASTABLE,** *audio-visual services manager, Swift & Co., Chicago*

Let's cut tv production costs

The cost of television commercials has risen to a point where something needs to be done. It is time to take a hard look at some simple facts helpful in reducing costs, without detracting from commercial effectiveness.

Within the general areas of planning, pricing and producing are opportunities for economies. In the planning area "lack of time" is a real detriment to good commercial creation and production. Seldom is sufficient time allowed to make productive commercials and still meet air dates. Lack of time is one of the biggest money wasters, because rushing causes excessive charges and inferior results. Mediocre commercials dissipate sizeable investments in programming and air time.

Producing commercials in groups, rather than individually, is another way to effect economies. This is a practice receiving too little attention from both clients and agencies. Any producer in the business will give a more favorable, per commercial price, on a series of commercials as compared with pricing commercials individually.

How Much? • Frequently the question is asked "How much should a commercial cost?"

A good yardstick is the number of expected air exposures. A commercial supporting a short-lived promotion normally does not justify the expenditure that a commercial having much longer use and more exposures can warrant. Deciding on a sensible cost per exposure can automatically establish the maximum expenditure that should be made for any given commercial.

Number of exposures also can be a deciding factor on the caliber of acting talent used . . . and the *way* they are used. Frequent exposure on a network can be expensive when high-priced talent is used "on camera." Reuse payments to talent can be a sizeable cost factor, sometimes far exceeding production costs. It's a good idea to face up to such re-occurring talent charges during early planning and take advantage of discounts available by making pre-commitments.

Pricing video commercials varies greatly but the price usually is based on a storyboard, a script, or both.

A storyboard is supposed to show how the commercial will look when finished . . . but seldom does to anyone but those experienced in film-making. Storyboard sketches establish the production specifications for a commercial . . . the same as blueprints do for a new house. Once approved and the cost agreed upon, any changes or deviations cost extra.

Ask for Bids • Competitive bidding is a good commercial pricing practice. It is surprising the range of prices quoted on the same storyboard by three or four equally capable producers. The difference between the high and the low bidder can be money in the bank for the client. But business should not be given to the low bidder unless there is a definite assurance his quality will be equal to the others.

Once the producer has been selected, make him stick to his price. He has reviewed the storyboard and knows what is required. He should deliver an acceptable commercial for the price he quoted. The producer's quoted price covers his costs . . . plus allowances for contingencies, plus overhead and profit. Should the commercial call for animals or children with their unpredictable performance, or for outside photography with possible inclement weather . . . or for possible overtime the allowance for contingencies would be increased. This contingency fund is a reserve, actually *owned by the client.* This is something many people do not realize and more direct reference will be made to it later.

William Bastable has headed up audio-visual services for Swift & Co. since 1945 and is member of the audio-visual committee of Assn. of National Advertisers. Earlier he directed film department of International Harvester. ANA tackled the cost problem in April during a two-day workshop at Rye, N.Y. Mr. & Mrs. Bastable are avid golfers, live in Beverly Hills, Chicago suburb.

To the producers' price some agencies add another contingency fund, plus an additional amount to cover color corrected packages, artwork and other things the agency feels they should apply. Then the agency adds its commission.

No More Extras • A concept becoming more popular is to consider the producer's price a firm quotation and expect the commercial to be delivered for that amount. It should be unnecessary for the agency to add any costs except their commission. If the agency wants to supply artwork and other materials, let the producers pay for it.

The producer has provided in his contingency fund a cushion for unexpected eventualities. This fund is a reserve belonging to the client. But how is the client to know if the contingency fund is used?

This brings us to the area of production in which a client coordinator, with film experience, can play an important part in effecting economies.

When a producer sensibly provides an extra large contingency fund, because animals are to be photographed, he normally would expect to photograph the scenes several times to get the desired action. But suppose he gets the action just right the first time. Shouldn't the client get a refund? When a producer has one day of outside photography, he budgets for extra days because of the uncertainty of weather. If the weather is perfect the first day, shouldn't the client get a refund? It's his money but in either case he'll never know whether it was spent unless someone present is primarily interested in saving his money.

A film-experienced company representative would certainly have that interest.

Economies Start Early • Suppose a company representative is not present during production and the product or package doesn't look right when the finished commercial is reviewed. The producer can't be blamed. Neither can the agency. They both acted in good faith. But the client will be forced to pay extra to have the work redone.

Economies are made before or during production. Making changes and corrections after the commercial is finished is costly.

RCA Power Tube features keep "VHF" hour meters clicking

Take the RCA-6166, for instance. "Tailored" specifically to supply the aural and visual power-amplifier requirements of medium- and high-power VHF transmitters, this RCA Power Tetrode type has been running up remarkable life-performance records.

What's back of long-term RCA power-tube reliability? First, RCA tube engineers work hand in hand with transmitter designers and station engineers—to take measure of RCA tube performance "in the circuit". Second, RCA tube engineers never "let go" in their effort to evolve superior manufacturing techniques and design improvements to make good tubes even better.

For lower tube cost per hour of transmitter operation, always specify RCA. Your RCA Electron Tube Distributor provides "on the spot" delivery.

RADIO CORPORATION OF AMERICA

Electron Tube Division **Harrison, N. J.**

YOU MAY NOT BELONG TO THIS

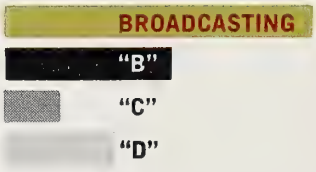
(but you **CAN** use the guest entrance!)

THIS IS A TOUGH CLUB TO JOIN. Its membership is relatively limited. In all of the advertising business, only a few executives qualify. Because – to belong to the "Million Dollar Club" – you must have a decisive role in allocating $1,000,000-or-more annually for television and/or radio advertising. Most of its members (naturally enough) are with the top 50 agencies. To you and your business, they're some of the most important people in America. And if they don't **know about you,** then – to re-coin a golden phrase – you're stone-dead in your marketplace.

They're approachable, though. You can not only get to them with your story – but even visit the "Million Dollar Club" by the guest entrance! It's easy. We have some brand-new, good-as-gold facts – fresh from the mint of a conclusive reader study – that **prove** it!

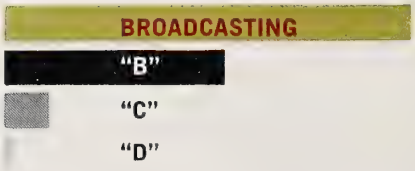
American Research Bureau, Inc., sent out 992 questionnaires to all kinds of people at leading agencies who buy (or OK the buy of) TV and radio facilities throughout America. Replies came from 460 – a notably high return. **And here's what counts:** some 81% of these respondents (337) turned out to be "Million Dollar Club" members . . . busy, full-of-bounce people who answered ARB's questions enthusiastically.

What they told ARB about their business publication reading habits and preferences is more than significant. In fact it's wellnigh an injunction for you to pick BROADCASTING if you want to navigate through their radar-screens and come out profitably on-target!



GOLD-PLATED QUESTIONS . . . AND SOLID GOLD ANSWERS –

Here's how BROADCASTING came out, decisively high up on the top of the heap, in the estimation of "Million Dollar Club" members replying to ARB's questionnaire. ("B", "C" and "D" are cognomens for three **other** publications purporting to cover TV and radio business.)



"Which publication do you PREFER for broadcast media news and information?"

"Which publication EXCELS in news editorial coverage?"

"As an advertising medium, which of these publications should a station use TO BEST REACH YOU?"

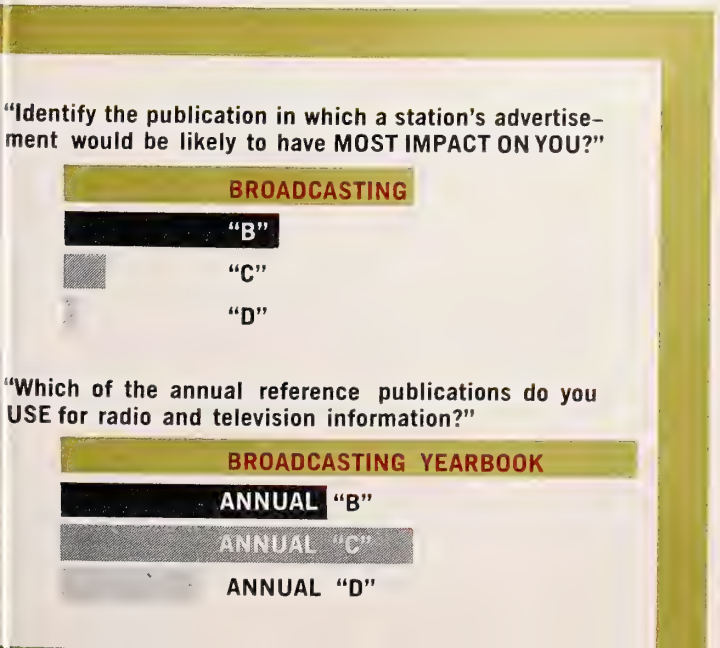
"MILLION DOLLAR CLUB"...

MONEY (LET'S FACE IT) TALKS...

Money speaks forcefully, declaims emphatically. It's been doing this – advertising-wise – for nearly three decades in BROADCASTING, **the** top reporter of TV-radio business news. And the "Million Dollar Club" 's preference for BROADCASTING becomes more dramatic when you ponder these 24-carat percentages.

BROADCASTING, **as a source of news,** is preferred by 61% **MORE** of the "Million Dollar Club" than Publication "B"; 42% **MORE** than Publication "D". (What happened to "C"? Well, BROADCASTING had **35 times** as many "preferred" mentions as, alas, that unhappy competitor. Or, to be ruthless, 38% over both "C" **and** "D" combined!)

BROADCASTING is acclaimed **most excellent in news content** by 89% **MORE** of these topflight TV-radio investors than is Publication "B". And 41% **MORE** than "B", "C" **and** "D" combined (which is quite a trick).



BROADCASTING is named the **best advertising medium** for reaching them by 87% **MORE** of the "Million Dollar Club" than is Publication "B". Or 53% **MORE** than "B", "C" **and** "D" rolled into one!

BROADCASTING is adjudged **THE** medium where station advertising is most likely to **exert the most impact** upon them by 65% **MORE** "Million Dollar Club" executives than is Publication "B". **OR** 36% more than "B", "C" **and** "D" combined!

Furthermore –

BROADCASTING YEARBOOK is used by 106% **MORE** "Million Dollar Club" members than is the annual of Publication "B", 64% **MORE** than that of Publication "C", and 339% **MORE** than that of Publication "D". (You'd recognize them all if we named names – and we **will** if you care to ask.)

BROADCASTING – as surely as tomorrow's golden sunrise – is **SO** far ahead of all the others...and in so many ways... that you might say it's in a class by itself. And why not? **IT IS!**

A GOLDEN OPPORTUNITY...

One million dollars can buy a lot of broadcast advertising. That those who spend this much (and usually multi-millions more) should prefer BROADCASTING isn't surprising. For years, BROADCASTING has been the unchallenged leader in its field. There's a sound reason.

The men and women who route so many millions to productive broadcast advertising **must** have the most accurate, complete facts. These (as they know) come best from reading BROADCASTING.

Another fact cinches BROADCASTING's supremacy – **PAID circulation,** verified by the Audit Bureau of Circulations (of which BROADCASTING is the sole member in its field). ABC's latest statement gives BROADCASTING over 21,000 **PAID** copies. **This is more than the total, combined paid circulation of "B", "C" AND "D"!** Note that word **"PAID".** It doesn't include copies they give away – unsolicited and for free.

BROADCASTING counts, in its **PAID** distribution, 5,785 subscriptions going to advertisers and advertising agency readers... specifically, 2,511 in the field of TV-radio advertisers; 3,274 at agencies throughout the country (as confirmed by our latest ABC audit). A major share of these **PAID** subscriptions are among the top 100 advertisers and top 50 TV-radio agencies.

Why do we stress **"PAID"?** Because it's the key word to **your** advertising results when you use BROADCASTING. People **pay** for what they want... for things they can't get free. Unlike its contemporary TV-radio journals, BROADCASTING deals only in **PAID** circulation – and believes that **PAID** circulation is the true index of any publication's worth.

USE THE GUEST ENTRANCE

You can test this for yourself. BROADCASTING is the preferred information medium of the "Million Dollar Club". Its decision-making members **need** it – and they **prove** their need by **paying** to receive BROADCASTING every week.

You need them to get your share of the advertising budgets they control. Which, obviously, means that you **need** BROADCASTING – **THE** Businessweekly of Television and Radio. It's your guest entrance to the important "Million Dollar Club".

BOOM YEAR FOR TV IN THE MAKING

• Best guesses: 17% rise in spot, 9% in network, 10% in local

• For all, it looks like $170 million gross gain over 1958

Television business is at an all-time peak. At the half-way mark, 1959 promises to become the most prosperous year in tv revenue yet recorded. Specifically, estimates indicate a $138 million additional take from national spot and network advertisers (at gross rates) this year compared to last.

Spot television is leading the boom. At the present rate, spot for the year should be up at least 17%, perhaps more. The first quarter already is off to a spectacular 25.7% increase (see story below).

Network business is much better now than it was last year at this time. Nighttime schedules for the fall are virtually firm with time periods near the sold-out point. The estimated rise here for the year is 9%.

Local business—which in television represents the smallest piece of the revenue pie—also is expected to be up. The estimate in this area is a rise of 10%.

Chips on Spot • Advertising agencies handling the bigger clients in television report their spot billing will show a large increase this year. One agency—J. Walter Thompson—reports its spot tv activity at nearly double the volume at this time last year, feels this pace will be maintained through the year.

Station representatives echo these sentiments. The larger representatives in the tv field report current increases in business should continue to the end of 1959 and into 1960.

Television Bureau of Advertising last week reported a 25.7% increase in spot in the first quarter alone. Accord-to TvB President Norman E. (Pete) Cash, estimates for the year indicate an overall 17% boost. Spot's gross billing last year totaled $511.7 million (TvB's estimates based on reporting stations).

For network, Mr. Cash estimates billing will be up 9%. The network gross last year totaled some $566 million. Though nearly sold out for the fall, the networks' soft spots remaining include certain hour-long periods—most of these at the 7:30 openings of nighttime schedules (BROADCASTING, June 8). It is in this area of a few hour shows that are still unsettled where the networks are making a strong effort to close sales.

The estimated increases amount to $86.9 million in spot and $51 million in network, a total of $137.9 million.

Local business at gross rates ran in the neighborhood of $338 million in 1958. The 10% estimated increase would bring the total up another $33.8 million.

For the first four months of this year, network gross billing was running 9% ahead of last year (BROADCASTING, June 8). Leaving room for a so-so summer but an anticipated higher-than-9% level of billing next fall, the TvB average estimate may be conservative.

Agency Viewpoint • The consensus of the larger television agencies is a year of a billing climb. Ted Bates, once a 4-1 but now 50-50 in spot network billing, says it "will be a good year in television, spot will be up." BBDO pre-

CONTINUED on page 30

SPOT TV HAS RECORD 1ST QUARTER

Over $156 million spent; Procter & Gamble again leads pack

A look at first quarter billing indicates national tv billing is off to a record start this year.

Television Bureau of Advertising last week reported spot tv for the first quarter at $156,419,000, compilations made by the bureau and N.C. Rorabaugh Co. Combined with an estimated $156,480,-418 network tv billing for the quarter (BROADCASTING, June 1), the total comes to $312,899,418 in gross time purchases.

Spot expenditures are by national and regional advertisers and reflect reports from 341 tv stations. In the first quarter of 1958, 333 stations reported $119,-062,000 gross billing. An analysis by TvB that compares 308 stations reporting in both the 1958 and 1959 first quarters finds an increase of 25.7% in spot tv expenditures.

Among the findings reported by the bureau as well as those put together by BROADCASTING on the basis of the spot tv and network reports:

• Major type of spot activity was in announcements, representing $120,-440,000 billing or 77% of the quarter's spot total. IDs represented $16,307,000 or 10.4% and programs $19,672,000 or 12.6%. In periods of the day: nighttime totaled $80,747,000 or 51.6%, daytime rolled up $58,288,000 or 37.3% and late night, $17,384,000 or 11.1%.

Biggest Spot • Procter & Gamble was top spot tv advertiser for the third quarter piling up more than $10.6 million. Added to its network gross for the quarter, the total for P & G came to the $23.6 million level. Also on the combined spot-network basis: Lever Bros. with some $12.5 millions, and Colgate-Palmolive with $10.4 millions.

• Present among the top 100 spot spenders in any quarter were these first timers: Bissell Carpet Sweeper, Cannon Mills, Hertz-U-Drive Co., Pam Enterprises, Pan-American World Airways, Pepperidge Farms and Vic Tanney's Gym.

• Products classifications showing substantial increases in the first quarter this year over last year's period: dental products, 39%; drug products, 42%; food and grocery products, 40%; household furnishings, 103%; pet prod-

ucts, 65%; sport goods, bicycles and toys, 125% and transportation-travel, 78%.

• Among those top 100 spot advertisers materially increasing expenditures in the Jan.-March period this year compared to last: Adell Chemical (Lestoil) about $2 million more; American Home Products more than $700,000 above; B.T. Babbitt $1 million more (from $2,500 to $1.24 million); Bristol-Myers more than $500,000.

Up $3 Million • P & G itself increased by nearly $3 million, Texize Chemicals went up more than $1.5 million, Welch Grape shot up $500,000, Vick Chemical increased more than $800,000. Others included Duffy-Mott, Food Mfrs., Kellogg (from $263,000 to $1,364,900) and Minute Maid.

• Level for the new members to 100 spot tv advertisers list ranged in the $300-$400,000 bracket.

• Top category for spot tv in the first quarter was food and grocery products with more than $46.5 million. (Combined with the first quarter network billing, that category totaled over $77.5 million.)

• • • Boom year for tv in the making

CONTINUED from page 27

dicts greater tv spot billing by the agency. JWT sees spot tv "constantly increasing." Benton & Bowles believes tv in total will be "good," while Young & Rubicam's media outlook is for a "very good advertising year" in general and for tv in particular, with Y&R expecting its spot tv billing to be "up but not drastically."

Just how well these predictions from agency media executives jibe with actual decisions of the planning boards was not easily ascertained. Some of the agency officials acknowledged that several of their clients were at the planning stage for fall spot schedules now that the major network buys are firm. But there remains the translation into orders. (Availabilities for the fall will not be sought until late summer.)

Crowded Channels? • Some agency executives see certain dangers ahead. With stations flush with business success, there's the question of what was termed by one as business "cleanly handled." He wondered if the medium would not be abused with such practices as multiple spotting, juxtaposition of conflicting product commercials, etc.

Others noted a trend toward "longer copy" in tv spot, or continuation of the minute "fad," as a JWT media man described the trend.

But, a BBDO spokesman cautioned, the prime time adjacency rush has been "outdated" for the past eight months. The more desirable periods for advertisers now are the so-called fringe time of late night, early evening and daytime. Reason is that this time is subject to package plans and hence can be bought at less cost and besides, it's noted, advertisers "are learning they don't need the prime adjacencies to run a campaign."

A McCann-Erickson executive pointed out that spot will continue to draw its great strength from the national advertiser who needs it to supplement a network program or to fit a specific regional need.

TvB SRA, Reps • Mr. Cash notes that the fall should be a particularly good season for television because network commitments have been made and the go-ahead is now clear for spot planning. Station Representatives Assn.'s Larry Webb also took up this point of network schedules tucked away. He thought, too, that many advertisers not able to get into network will turn to spot and that regional advertisers would be hiking budgets during the fall season.

The station representatives on the whole are finding their tv business running ahead of last year. One representative firm, Blair-Tv, for example, sees each of the 1959 seasons well above last year.

There is the feeling among some representatives that some of the large agencies temporarily held back on some spot commitments because the money was needed for setting network fall schedules. But the agencies checked on this point produced no evidence to prove it, one media spokesman at an agency going so far as to say, "There's plenty of money."

Other representatives, such as The Katz Agency ("encouragingly ahead of last year"), Peters, Griffin, Woodward ("most active fall") and H-R Representatives ("substantially heavier buying fall season") among them, reported good buying weather ahead.

There is evidence that some advertisers like Procter & Gamble and P. Lorillard with network buys firm are making overtures for fall spot scheduling many months in advance and toy

makers already are asking for fall adjacencies to network shows.

Source of Money • With more money by the millions coming into television, the obvious question is "from where?" Agencies, representatives and trade associations provide the answers which follow in summary form:

The swelling volume is not being hypoed by any general hike in rates but there is a trend detected of a disappearance of the discount or package rate offered advertisers by some stations last year when uncertainty was fed by a recession-caused tightening of advertising budgets. The effect is to boost dollar volume.

Though some money is at the expense of other media, it is not appreciable. On the other hand, total budgets of many advertisers have increased but their use of media other than tv has not kept pace (BROADCASTING, June 1).

There are advertisers new to television to the extent that they had engaged in limited use of the medium but now are getting into it deeper. Examples are Warner Lambert's mushrooming spot for Fizzies, the liquid detergent field where Texize is boldly using the medium (BROADCASTING, June 1), Westclox's entry in network specials, Maypo's expected national distribution (and spot usage).

Sears, Roebuck's plans to build up its tv participation is an outstanding example of a blue chip advertiser emerging from the testing phase. American Motors which had no national money in tv to speak of last year is heavy in spot. Regional Chock Full o' Nuts (coffee distributed in selected markets in the Northeast) doubled its spot tv in a two-year period.

New Products • The field of new products traditionally holds promise for spot — the liquid detergents, again, paced at first by Lestoil and since picked up further in activity by Lever, Colgate and P & G entries. Atlantis Sales' French's Instant Potatoes is another new product example.

Aside from these there is an upping of budgets by such stalwarts as P&G, Colgate, Lever and the auto firms (with the new small car entries promising additional spot in the fall).

Equitable Assurance, never before in tv, is in network; Keepsake Diamonds is buying network; Pan-American Airways and Trans-World Airways are among the airlines taking off with more tv; associations are activating network sales (brewers, cigar industry and retail druggists among them).

Industrial firms have been increasing their use of tv. Aluminum Co. of America (ALCOA) has two network shows now, DuPont *(Show of the Month)* will have a new half-hour weekly network series on the air in the fall. The latter program series is an additional buy for DuPont via one of its divisions. Also American Machine & Foundry is sponsoring two specials next season.

Kraft Foods of National Dairy Products illustrates how some advertisers increase tv budgets. Kraft in the past season sponsored a half-hour show with sister division, Sealtest. Next fall, however, Kraft will sponsor a full hour of Perry Como and Sealtest will be full sponsor of *Bat Masterson.*

Not the least of the indicators of tv's upward push: The automotive industry where car sales are going up and additional Detroit dollars are expected to come starting in the fall. Chevrolet's big spending habits in network tv will be joined by Ford, and by Plymouth to an extent (Steve Allen on NBC-TV).

AFA TOLD: SEEK SELF-IMPROVEMENT

Speakers at advertiser group's convention ask for better public image; Fish discusses AFA's planned Washington office; Proud re-elected

The public's image of advertising was of utmost concern to speech-makers at the 55th annual convention of the Advertising Federation of America last week in Minneapolis (June 7-10).

Among those challenging the industry to improve itself was James S. Fish, vice president and director of advertising of General Mills Inc., who was elected chairman of the board of AFA on the last day of the convention. Mr. Fish listed "education, legislation and public service" as a three-way route to better acceptance of the industry.

Examples of AFA's progress in these three directions were highlighted by Mr. Fish. He told the nearly 800 convention delegates that "the AFA is about to set up an information center in Washington. . . . We are surveying college needs in advertising courses . . . and we will soon be involved in helping to improve high school understanding of the real role of advertising in our economy." In respect to the latter, Mr. Fish pointed to AFA's high school essay contest (worth $500 and a plaque), won this year by Judith Rose Armayor, a Miami Edison High School senior.

In the field of public service, the new AFA chairman called on AFA clubs to set up volunteer pools of experts within the industry to meet community requests for advertising and for support of local public service activities.

Problems of Success • Advertising's very success and size have caused some people to fear it, declared Fairfax M. Cone, chairman of the executive committee of Foote, Cone & Belding, Chicago, in his convention address. He cited examples of unimaginative, unpleasant, obtrusive, unrewarding advertising that aggravate critics to the point that they build up a case against all advertising. Mr. Cone expressed the hope advertising people can make "all advertising useful, helpful and welcome . . . always welcome."

Mrs. Jean Wade Rindlaub, vice pres-

Honor to Deac • The late Merlin H. (Deac) Aylesworth, pictured here as he appeared in the thirties, was named last week to the Advertising Hall of Fame, sponsored by the Advertising Federation of America. The first President of NBC, (1926-36), Mr. Aylesworth was the first executive officer of the then new radio medium. He instituted broadcast and advertising policies which continue to guide the industry today. Mr. Aylesworth's posthumous award was accepted by Walter Scott, NBC vice president. The pioneer broadcaster died in 1952. Also added to the honor list of advertising men was Kerwin H. Fulton, first president of the General Outdoor Advertising Co.

ident, BBDO, New York, told the assemblage that advertisers have to find their way back to main street if they are to be successful in the years ahead. Mrs. Rindlaub reported on opinions obtained from residents of Sauk Centre, Minn., the locale of Sinclair Lewis' *Main Street*.

She concluded that advertising needs an honest, simple, humble approach that creates the friendly feeling of "discussion over a back yard fence."

Speaking at AFA's public service awards luncheon, John C. Cornelius, president of the American Heritage Foundation and former executive vice president of BBDO, advised the group to improve the standards of advertising and to get involved in politics. "We image experts had better pay more attention to the image of the advertising business," Mr. Cornelius stated. His remarks were based on a survey of 100 of the nation's thought leaders for their comments on public service advertising. Only eight, he said, were aware of this type of work done by the industry.

Need For Efficiency • The key problem in the advertising industry, according to R.J. Keith, executive vice president of the Pillsbury Co., is to maintain an adequate rate of return in the face of increasing costs and expenditures. Mr. Keith cited three opportunities to increase advertising efficiency—research, creativity and media. The most complex challenge is presented by media, he said. Advertisers and media must work to keep media strong, virile and independent of economic pressure. Next, media must lick the production

BACKGROUND: The following programs, in alphabetical order, appear in this week's BROADCASTING tv ratings roundup. Information is in following order: program name, network, number of stations, sponsor, agency, day and time.

Adventure Time (ABC-120): various sponsors, Tues. and Thurs. 5:30-6 p.m.

American Bandstand (ABC-104): various sponsors, Mon.-Fri. 4-5:30 p.m.

At the Movies (NBC-171): Rexall (BBDO), Sun. May 3, 10-11 p.m.

Cavalcade of Sports (NBC-173): Gillette (Maxon), Fri. 10 p.m.-conclusion.

CBS News-Edwards (CBS-158): various sponsors, Mon-Fri. 7:15-7:30 p.m.

Perry Como (NBC-172): various sponsors, Sat. 8-9 p.m.

Concentration (NBC-152): various sponsors, Mon.-Fri. 11:30 a.m.-noon.

Emmy Awards (NBC-170): Benrus (Grey), Procter & Gamble (Grey), May 6th, 10-11:30 p.m.

Father Knows Best (CBS-154): Lever Bros. (JWT), Scott (JWT), Mon. 8:30-9 p.m.

Zane Grey Theatre (CBS-153): S. C. Johnson (B&B), General Mills (B&B), Thurs. 9-9:30 p.m.

Gunsmoke (CBS-146): Liggett & Myers (D-S-F), Remington Rand (Y&R), Sat. 10-10:30 p.m.

Guiding Light (CBS 129): Procter & Gamble (Compton). Mon.-Fri. 12:45-1 p.m.

Have Gun, Will Travel (CBS-170): Lever Bros. (JWT), Whitehall (Bates), Sat. 9:30-10 p.m.

Alfred Hitchcock (CBS-183): Bristol-Myers (Y&R), Sun. 9:30-10 p.m.

I've Got a Secret (CBS-173): R. J. Reynolds (Esty), Wed. 9:30-10 p.m.

Lucy-Desi Show (CBS-122): Westinghouse (M-E), Mon. 10-11 p.m.

Maverick (ABC-136): Kaiser, Drackett (both Y&R), Sun. 7:30-8:30 p.m.

Mickey Mouse (ABC-120): various sponsors, Mon., Wed. and Fri. 5:30-6 p.m.

NBC News (NBC-130): various sponsors, Mon.-Fri. 6:45-7 p.m.

Jack Paar (NBC-135): participating sponsors, Mon.-Fri. 11:15 p.m.-1 a.m.

Perry Mason (CBS-148): various sponsors, Sat. 7:30-8:30 p.m.

Peter Gunn (NBC-190): Bristol-Myers (DF&S), Mon. 9-9:30 p.m.

Playhouse 90 (CBS-158): various sponsors, Thurs. 9:30-11 p.m.

Price Is Right (NBC-156): various sponsors, Mon.-Fri. 11-11:30 a.m.

Rifleman (ABC-152): Miles Labs (Wade), Ralston Purina (Gardner), Procter & Gamble (B&B), Tues. 9-9:30 p.m.

Restless Gun (NBC-146): Procter & Gamble (Burnett), Sterling Drug (D-F-S), Mon. 8-8:30 p.m.

Search For Tomorrow (CBS-132): Procter & Gamble (Compton), Mon.-Fri. 12:30-12:45 p.m.

77 Sunset Strip (ABC-132): American Chicle, Whitehall, and Carter Products (all Bates), Harold Ritchie (K&E), Fri. 9:30-10:30 p.m.

WDBJ is one of the best buys in television . . . *anywhere!*

WDBJ-TV covers 53 counties . . . where there are over 400,000 television homes, $2 billion in retail sales. You can buy into this rich market economically and effectively, for WDBJ-TV furnishes highly rated shows at comparatively low cost to you.

For example, Anne Howard's PANORAMA, most popular women's show in the area, has an average daily rating of 14.7, and delivers viewers for only 82 cents per M on a 10 Plan; $1.05 on a 5 Plan.* Powerful sales-producing merchandising support provided, too!

It will pay you to take a closer look at PANORAMA and other "best buys" offered by WDBJ-TV.

United Press International news produces!

problems which result from attempting to meet today's business conditions with yesterday's production technology, Mr. Keith opined.

Rep. Bob Wilson (R-Calif.) urged advertisers to speak up against unfair attacks and unfair legislation. The congressman, who also is a partner in the San Diego agency of Champ, Wilson & Slocum, looked at the establishment of an AFA office in Washington as a step toward fulfilling a long time need for advertising to answer the challenges to its own operations. Right now, Rep. Wilson pointed out, Pennsylvania Ave. is a bothersome detour between Madison and Main.

John J. Ryan, New York state assemblyman and legal counsel for the AFA, in his address before the annual business session, described recent attacks on advertising made by various government levels. The advertising profession must voice opposition to dangerous legislative encroachments, he declared. "The most effective method of influencing legislation yet devised is still the simplest — direct communication between John Doe, citizen, and his elected representative," Mr. Ryan suggested.

On June 7 AFA's board of directors voted unanimously to establish not later than September a full-time staff and office in Washington, D.C., as a prelude to the move of general headquarters from New York to Washington on or prior to Sept. 1, 1960. A branch office in New York City would be maintained (see story, page 32).

Other convention developments included the founding of the American Academy of Advertising for the purpose of stimulating exchange of advertising information between educators and practitioners. H.W. Hepner, head of the Syracuse U. School of Business, was elected the academy's first dean.

Greetings From White House • President Eisenhower wired his personal congratulations to the winners of AFA's first public service awards which were presented in Minneapolis to Thomas D'Arcy Brophy, former chairman of the board of Kenyon & Eckhardt, New York, and Samuel C. Gale, former vice president and advertising director of General Mills Inc., Minneapolis. The President added his best wishes for a fine convention.

The AFA, which embraces 131 local clubs, including more than 50,000 members, cited 20 individual clubs for their outstanding achievement in various fields of public service. Advertising clubs winning dual awards were those from Pittsburgh, Oklahoma City, St. Louis and Milwaukee.

Election of officers • Officers to serve under AFA President C. James Proud, who was re-elected for the next year,

THE PELICAN AND THE LION

A MADISON AVENUE TALE...WITH A MORAL

Once upon a time, an adwriter when faced with the task of graphically illustrating the superiority of MGM's facilities for producing TV film commercials, thought he was mighty clever when he decided to draw a parallel between MGM-TV and a rare old bird called a pelican.

It would be visually compelling, he thought, and a line he remembered from Bartlett's Familiar Quotations: (A remarkable bird is the pelican, his mouth holds more than his bellican) seemed to be equally compelling. And so he wrote an ad that compared some producers of TV commercials with the pelican (lower case p) whose mouths were big, but whose facilities for delivering the goods were limited.

Now, little known to this copywriter, there was a very successful and reputable animated film producer named Pelican (capital P).

When they saw his ad they were shocked... and rightly so! For this copywriter had in all his innocence cast aspersion on their good name.

And so the adwriter was very sorry and MGM-TV was very sorry. They hadn't meant to deprecate either the creativity or the facilities of this reputable animation producer.

As it happens, MGM-TV is not in the animated commercial business and hadn't meant to take a swipe at any animated commercial producers.

THE MORAL OF THE TALE:

It's better to tell the world how good you are . . . positively, rather than by negative example (i.e., We think our commercial department is the very best) . . . because what starts out to be an innocent reference to a pelican, may well turn into an embarrassing bird.

MGM-TV

BILL GIBBS,
Director of Commercial
and Industrial Films

LOS ANGELES: Bob Fierman, TE 0-3311 • SAN FRANCISCO: PR 5-1613
NEW YORK: Jack Bower, Phil Frank, JU 2-2000 • CHICAGO: Bob McNear, FI 6-8477

were named at the convention. George W. Head, manager, advertising and sales promotion, National Cash Register Co., Dayton, Ohio, was re-elected vice president and chairman of the AFA Council on Advertising Clubs. Also re-elected was Philip E. Nutting, New England advertising manager, *Holiday* magazine, Boston, for a second term of one year on the council and as a vice president. Lee Fondren, station manager and director of sales, KLZ Denver, was elected to a vice president's post for the first time. Bonnie Dewes, vice president, D'Arcy Adv. Co., St. Louis, was re-elected a vice president and chairman of the Council on Women's Advertising Clubs.

Nine advertising executives were elected or re-elected to AFA's 58-member board of directors for two-year terms. Those named for the first time are: J. Davis Danforth, executive vice president, BBDO, New York; Albert N. Halverstadt, manager, production division, Procter & Gamble, Cincinnati; Burton E. Hotvedt, vice president, Klau-Van Pietersom-Dunlap Inc., Milwaukee; Bill McDade, partner, Judd Adv. Co., St. Louis; and Charles B. Ryan Jr., vice president, Firestone Rubber Co., Akron.

Directors re-elected: Leo Burnett, chairman, Leo Burnett Co., Chicago; John P. Cunningham, chairman, Cunningham & Walsh Inc., New York; Dr. Melvin S. Hattwick, director of advertising, Continental Oil Co., Houston; and Perry L. Shupert, vice president, sales and advertising, Miles Labs, Elkhart, Ind.

AFA PLANS POTOMAC CAMPSITE

Move from Gotham to come by September

The Advertising Federation of America in a move to establish closer contact with activities of the federal government, is moving its headquarters from New York to Washington.

AFA's board of directors voted unanimously to establish a Washington office and staff, not later than September 1959, and to move the Federation's general headquarters by September 1, 1960. A branch office will be kept open in New York.

Robert M. Feemster, AFA board chairman, in announcing AFA's decision, said the move was based on several reasons.

He said, in Washington AFA (a national organization) will be in closer touch with many business groups with whom it works closely. He mentioned the U.S. Chamber of Commerce and the Federal Trade Commission as examples. Also, he continued, Washington is a gathering point for national and international information, which AFA can pass on to its members.

The new AFA office was described as "an embassy in the nation's capital for all advertising, serving as a center for both information and communication with government and back to all segments of business concerned with advertising."

In recent years, the advertising business has been seriously concerned with an increasing number of governmental attempts, at both local and national levels, to impose restrictions on its operations (also see EDITORIAL, page 106).

RADIO PREVIEW:

Now 'hear' this • A media-mixup brings humor to the latest radio spot campaign for Plymouth automobiles. The announcer, evidently a fugitive from tv work, addresses the radio audience as if it were a tv audience. He is constantly chided by a voice which, to little avail, attempts to set him straight regarding the medium employed. Despite the whispered corrections, the announcer keeps lapsing back into the jargon of television announcing. Text of one of the two such scripts audible from mid-May through June in 35 markets at a frequency of 15 to 20 times per week:

ANNOUNCER: (very pontifical) Hello, friends of television land. . . .

WHISPERING VOICE: (breaks in) . . . This is radio.

ANNOUNCER: Uhh, uhh, I would like to show your viewers that although the prices of the three top selling low-priced cars are about the same, Plymouth has a big difference.

WHISPERING VOICE: You're on radio, not television.

ANNOUNCER: Yes, uhhh, the great radio . . . uhh, I mean the big difference shows in Plymouth styling. See this beautiful sportdeck. Only Plymouth, in its class, offers it.

WHISPERING VOICE: They can't see it; this is radio.

ANNOUNCER: Shhhh! And this style is just part of the big difference. Plymouth has the big difference in features too, such as these new option swivel seats and push-button drive and heat controllers; and Plymouth has the big difference in its torsion aire ride also. Just watch how easily Plymouth takes this road.

WHISPERING VOICE: They can't see it.

ANNOUNCER: They can't see how Plymouth does it so smoothly. Uhhh, the other lower priced cars can't see it, that is. But you will when you take a two-mile trial run at your Plymouth dealer. Do it today, won't you. . . . Let me see, where was I?

WHISPERING VOICE: You're on radio!

ANNOUNCER: Oh, yes, Plymouth has a fine radio—be sure and try it.

Creators of this organized misunderstanding: Pat Gallagher and Frank Hopkins, N.W. Ayer & Son, Detroit.

Grant to aim Dart at public for Dodge

The appointment of Grant Adv., Chicago, as agency for the new Dodge Dart line of automobiles (BROADCASTING, June 8) was confirmed last week. Though no details were available, it was reported that the Dart advertising budget would be added to the Dodge division line for a total of about $20 million.

M. C. Patterson, general manager of the Dodge car and truck division, said the Dart will be introduced as part of Dodge's 1960 passenger cars and will be sold through Dodge dealers. He added:

"Because all products will carry the Dodge name, dealers will be able to stage more unified advertising and promotion campaigns."

Estimates are that about $16 million had been earmarked to advertise the regular line of Dodge passenger cars during 1960-61 and about $4 million has been added because of the introduction of the Dodge Dart. But company spokesmen could not say at this time what proportion of the entire budget would be allocated to the Dart. The primary effort of the Dodge division is the hour-long *Lawrence Welk Show* on ABC-TV and part of the advertising thrust on the program will be on behalf of the Dodge Dart.

The Dart is a compact car with a wheel-base of 118 inches and will compete with other cars in the low-price field.

New research network

Reach, McClinton & Co., New York, has established a nationwide research network with headquarters in the agency's New York office. Six permanent branch offices in key cities will be maintained. The network will "enable us to conduct research projects in the speediest and most economical manner possible," Paul Keller, research director, says. The cities: Chicago, Boston, Los Angeles, Houston, Minneapolis and Jacksonville. Project director for the network is Barbara Marsak, according to the agency.

YOU CAN'T MAKE LOVE BY LONG DISTANCE

Proximity—that's what it takes to win a woman. And that's what it takes to win and hold an audience. This is the simple, logical reason why WJR has ended its network affiliation in favor of its own programming.

Our audience is our first concern. Serving the most people in the most acceptable way calls for programming that's tailor-made to suit the many varied tastes of our listeners. That's what we call complete-range programming . . . programming with something for everyone.

On WJR today there are an impressive number of new programs —new services—new voices. But actually, these new programs are simply an extension of our long-standing, well-accepted philosophy of something for everyone.

It adds up to this—we are providing the 17 million folks in WJR's area with a more interesting, exciting and varied program service than ever before.

In this way we not only serve our listeners but our sponsors better. With WJR's new complete-range programming, the advertiser gets an even larger, more responsive audience. See your advertising manager, agency or Henry I. Christal representative.

WJR's primary coverage area—over 17,000,000 people.

WPIX (TV) ad plan gives sponsor 'Impact'

A whole evening's worth of product protection instead of the standard 15 minutes, plus "de-commercialization" of station breaks, is the appeal WPIX (TV) New York is offering six advertisers under its new "Night of Impact" plan. It works like this:

The 7:30-11 p.m. period of Wednesday ("mystery night" under WPIX block-night programming) is sold to a restricted list of six products, all noncompeting. Each advertiser gets two half-sponsorships of programs plus one 60-second station break each week. Both program and break times rotate over a period of weeks. Also, the station has eliminated all 10- and 20-second spots as well as station promos during the breaks. The package sells at straight card rates.

Six products of three advetrisers are now in on the "night of impact" plan for the initial 13-week run: L&M cigarettes (Liggett & Myers through Dancer-Fitzgerald-Sample), Spic and Span (Procter & Gamble through Young & Rubicam), and four Bristol-Myers products: Ipana and Vitalis (Doherty, Clifford, Steers & Shenfield), Bufferin (Young & Rubicam) and Ban (BBDO).

• Business briefly

Time sales

• The Philip Morris Co., N.Y., for Marlboro cigarettes, will be an alternate-week sponsor of *Troubleshooters* (NBC-TV Fri. 8-8:30 p.m.). The new adventure series, starring Keenan Wynn and former Olympic star Bob Mathias, begins next fall. Agency: Leo Burnett, Chicago.

• The General Electric Co., N.Y., through Maxon Inc., has renewed *G-E College Bowl* (CBS-TV Sun. 5:30-6 p.m.) for next season. The weekly quiz, on which college students compete for scholarship funds for their respective institutions, had its debut last fall. It concludes the current season June 28, returning Oct. 4.

• ABC Radio announces renewal of the *Old Fashioned Revival Hour* (Sun. 4-4:30 p.m.) by the Gospel Broadcasting Assn., L.A., through R.H. Alber Co. there. In addition, the U.S. Pharmacal Co., Glenside, Pa., through Gresh & Kramer, Phila., will be a participating sponsor of the *Breakfast Club* (Mon.-Fri. 9-10 a.m.) effective July 1.

• The Texas Co., N.Y., Texaco petroleum products, has signed for full sponsorship of NBC-TV's *The Huntley-Brinkley Report* (Mon.-Fri., 6:45-7 p.m.), starting June 29. The order for the program, which will be retitled *Texaco Huntley-Brinkley Report,* is the biggest order for news ever placed by a single sponsor, the network announced. The news show will continue under the supervision of William R. McAndrew, vice president, NBC News, with Reuven Frank as producer and Eliot Frankel as associate producer. Cunningham & Walsh Inc., N.Y., is Texaco's agency.

• E. I. du Pont de Nemours Co., Wilmington, Del., in addition to its purchase of *The June Allyson Show,* which starts Sept. 21 on CBS-TV (Mon. 10:30-11 p.m.), has renewed its sponsorship of the *du Pont Show of the Month* for the 1959-60 season on the same network, starting Sept. 28. Du Pont's agency: BBDO.

• American Airlines, N.Y., has renewed sponsorship of its *Music 'Til Dawn* program over WCBS New York, WBBM Chicago, KNX Los Angeles, KCBS San Francisco, WEEI Boston and WTOP Washington, effective immediately, on a six-day basis, starting at 11:30 p.m. and continuing through 5:30 a.m. or 6 a.m. weekdays and on Saturdays until 6:30 a.m. or 7 a.m. Agency: Young & Rubicam, N.Y.

• Colgate-Palmolive Co., N.Y., will sponsor a Friday night western anthology series titled *Colgate Western Theatre* starting July 3 and continuing through Sept. 4 on NBC-TV (9:30-10 p.m. EDT). Programs, previously presented on various other tv series, take the spot of *The Thin Man* which ends its current stand on June 26. Series was ordered through Ted Bates & Co., N.Y.

• ABC-TV reports group of renewals by sponsors of its daytime programming and the signing of a new advertiser, Block Drug Co., Jersey City, through Sullivan, Stauffer, Colwell & Bayles, N.Y. (CLOSED CIRCUIT, June 8). Advertisers who renewed include Johnson & Johnson, Drackett Co., Beech-Nut Life Savers and General Food Corp., all through Young & Rubicam, N.Y.; Armour & Co. and Lever Bros., both

Open for business • Henderson Adv. Inc. formally opened its $200,000 Greenville, S.C., building in June 4-5 ceremonies. Civic-state officials, business leaders and clients attended the proceedings, a half-hour of which was telecast live by WFBC-TV Greenville and later by WSPA-TV there and WLOS Asheville, N.C.

Features of the two-story building include exterior walls of veil block, a tv theatre in the Radio-Tv Dept. (that incorporates the latest video-sound equipment) and a test kitchen.

THERE'S A NEW TOP TWO IN TELEVISION!

It's not just a trend any longer.

Now the margin is clean-cut, decisive, even overwhelming. ABC-TV and the other top network, between them, own the No. 1 ratings in 36 out of 42 evening half hours (17 for ABC, 19 for the other top net). The third network is first in only 6 half hours.

The same Top Two dominate the evening share of audience averages. They're both comfortably above 30—ABC with 31.4, the other top net with 32.9. The third network's average is 26.8.

On one score, ABC stands all alone. It has the highest average share of audience four out of seven nights a week—more than the other two networks combined!

A *new* Top Two, did we say? Actually, it's been that way for some time now. It's just that now it looks so permanent.

Go right to the TOP—go...

ABC TELEVISION

NOW!

REDUCED RASTER FEATURE on CONRAC UTILITY MONITORS!

Improved versions of the Conrac "CF", "CK" and "CL" series utility monitors now being delivered include an important improvement—raster size reduction. This feature, previously available only on the most expensive monitors, permits operation at reduced picture size—showing all four corners—by simply changing two connections.

Of particular interest to present users of Conrac Monitors is the fact that this new feature can be easily incorporated in any 70° Conrac Monitor manufactured since 1951. This includes all CB, CF, CK and CL models. Modification kit with complete instructions is available at nominal cost. Write for complete information.

Conrac manufactures a complete line of monochrome monitors from 8 to 27 inches, the CH21B Color Monitor and an Audio-Video Receiver.

through Foote, Cone & Belding, N.Y.; and Toni Co., Chicago, through North Adv., Chicago.

• Hamady Bros. Food Markets and Yankee Stores, both Flint, Mich., have bought all the hourly newscasts of WTAC Flint for 52 weeks. Of the total 6,552 newscasts, Hamady sponsors 84 a week and Yankee 42 a week.

• Buick Motor Div. of General Motors Corp., Flint, Mich., will sponsor four 90-minute dramatic programs based on the writings of Ernest Hemingway on CBS-TV during the 1959-60 season, it was announced Monday (June 8) by William Hylan, CBS-TV vice president of sales administration. The only program date named is Thursday, Nov. 19 in the 9:30-11 p.m. time period. None of the Hemingway properties has been selected, the network reported. Buick's agency: McCann-Erickson Inc., New York.

Agency appointments

• General Mills (Betty Crocker dessert mix products) and International Latex Corp. figure in new agency appointments. General Mills named BBDO to handle six new dessert mixes with a billing of some $3 million a year. Other Betty Crocker products are handled by BBDO which now ups its General Mills account to the $10 million level. Tv advertising is part of the media plan. Latex has designated Reach, McClinton, N.Y., to handle a new Playtex product soon to be announced (agency already has Playtex bras, baby pants, Drypers and household gloves and Isodine products). Ted Bates now receives Playtex girdles (spot tv advertiser) from Reach starting Sept. 1.

• The New Bedford, Wodds Hole, Martha's Vineyard & Nantucket Steamship Authority names Allenger Adv., Brookline, Mass.

• Fairmont Foods Co., Omaha, names Allen & Reynolds there.

• John B. Canepa Co. (Red Cross macaroni, spaghetti products), Chicago, appoints Lilienfeld & Co., same city, to handle its account effective immediately. Company has been using radio and television.

• Reach, McClinton & Pershall, Chicago, resigns Candy-Gram Inc. (candy by wire) account, same city, because of product conflict involving another client. Over half a dozen agencies, including The Buchen Co., Chicago, are under consideration. The company, founded earlier this year, has confined advertising mostly to print.

• Also in Advertising

• Welch, Collins & Mirabile Inc. and

James B. Rogers Assoc., both Baltimore agencies, announce their association as Rogers & Collins Inc. New agency will occupy present Rogers offices at 2317 Maryland Ave., Baltimore 18.

• The first annual $1,000 Broadcasting Executives Club of New England scholarship has been awarded. The winner will major in broadcasting at Boston U.'s School of Public Relations & Communications.

• Promotion Assoc., advertising-pr firm, formerly located in dual offices at 120 N. Pitt St., Alexandria, Va., and 734 15th St., N.W., Washington, D.C., has moved to new and enlarged offices in the Headquarters Bldg., 2000 P St., Washington. Telephone: Adams 2-0100.

• Griswold-Eshleman Co., Cleveland, is moving from 1400 Terminal Tower to 55 Public Square Bldg.

• A bill to prohibit subliminal advertising by radio or television in California has been sent to an interim committee of the State Assembly, effectively killing it until the next legislative session two years hence. Same fate was met by two measures on pay television, one to bar making a charge for any tv program in one part of the state if it is shown free in another, the second measure to require pay tv companies to secure state certificates before beginning operations. These bills were opposed by the Screen Actors Guild and the Hollywood AFL Film Council, who view pay tv as an additional source of employment for performers as well as by firms interested in entering the business of subscription television.

• At least half a dozen agencies were in process of preparing presentations last week for Oscar Mayer & Co. (meat products) account, being cut adrift from Wherry, Baker & Tilden (soon to become Baker, Tilden, Bolgard & Barger). No immediate decision is expected. Account billed about $1.5 million with a substantial share in broadcast media.

• Col. Ted Deglin of Ted Deglin & Assoc. Inc., commanding officer of a newly formed Army Reserve public information unit, has announced that openings are available to reserve officers with civilian background in advertising, copywriting, newswriting, public relations, radio and television. The unit, which meets 24 nights a year, advises and executes special projects for the Dept. of the Army and the First United States Army. Resumes of civilian and Army experience should be sent to Col. John J. Kelly, chief information section, Headquarters First U.S. Army, Governors Island, N.Y.

NAB BOARDS TO TACKLE PROBLEMS

Tv Code's Preparation H hassle and tv's pr high on agenda

NAB's three-ply boards of directors, meeting in Washington this week, face the trickiest public relations tangle in years.

Three problems will confront the Tv, Radio and Joint Boards at their Mayflower Hotel sessions:

• Launching of the biggest public relations project in broadcasting history —a campaign to improve the public's appreciation of television.

• Reorganization of the public relations operation at NAB's Washington headquarters. This is entirely separate from the tv campaign but the two had a common origin—the NAB Chicago convention in March.

• Review of the whole Tv Code structure as the separate Tv Code Review Board's attempts to enforce a ban against commercials for Preparation H are being met with some resistance.

The annual June directors' schedule opens today (June 15) with a meeting of the Code board, headed by its new chairman, Donald H. McGannon, Westinghouse Broadcasting Co., who assumed office during the spring.

While the code unit operates with secrecy, it's understood a group of tv stations received formal notice they would lose the code seal unless they drop Preparation H before the top-drawer NAB Tv Board meets Wednesday (June 17). Those desiring a hearing are entitled to appear at the Wednesday meeting. This procedure was followed last April 30 when the Tv Board lifted the seal from "several stations" (reportedly eight) after more than a dozen had been given final warning.

A Dilemma • Today's Code Board meeting may assume make-or-break proportions. As many as 75 tv station subscribers to the code have been known to carry Preparation H.

The problem boils down to this dilemma—should the code board bump every station that carried Preparation H; or should it say the product isn't sufficiently objectionable to justify potential industry mutiny and therefore the crackdown should be abandoned?

If the code board votes to get tough, and the Tv Board carries out the recommendation, another problem is faced —possible withdrawals by irked stations from association membership. One station, WMTW (TV) Poland Spring, Me., announced it had quit NAB over the Code Board's Preparation H action and a midwest multiple owner (2 vhf tv's, 2 am) dropped out for the same reason (CLOSED CIRCUIT, June 8).

Information Program • The Tv Board will find less feuding when it takes up the Tv Information Campaign. A special five-man board committee, headed by Clair R. McCollough, Steinman stations, will hold a dinner meeting tomorrow (June 16). It will review a detailed report on plans for a national public relations campaign that may run close to $700,000 a year. This is roughly seven times the total budget of the NAB headquarters public relations operation, including publications, industry services and publicity material.

The five-man committee will submit its findings to the TV board Wednesday with recommendations for action. On the committee with Chairman McCollough are C. Howard Lane, KOIN-TV Portland, Ore.; Dwight W. Martin, WAFB-TV Baton Rouge, La.; G. Richard Shafto, WIS-TV Columbia, S.C., and Willard E. Walbridge, KTRK-TV Houston.

High feeling that something drastic had to be done to cope with misunderstanding of tv's programming and service and to promote appreciation of the medium in a period of intense competition with printed media was heard at the NAB March convention. The result was formation of a working committee headed by C. Wrede Petersmeyer, Corinthian Stations, to get a public relations program on the drafting board. At an April 30 meeting the Tv Board voted unanimously "to carry on a vastly increased industry-wide public information campaign" (BROADCASTING, May 4).

Dissatisfaction • Tied into the thinking of some directors who sponsored the public relations campaign was dissatisfaction with the way this job was being handled at NAB headquarters. This was followed in mid-April by the resignation of Donald N. Martin as public relations assistant to President Harold E. Fellows, effective June 19, when the Joint Board wind up this week's proceedings. Mr. Martin has announced formation of a public relations firm.

At the time Mr. Martin resigned, President Fellows made an oblique reference to the limited scope of the headquarters public relations functioning. He said Mr. Martin's office had "a comparatively modest appropriation" and operated "within the framework of NAB policy as established by the Board of Directors." He credited Mr. Martin with

Dedication platform • On the speakers' dais at the dedication ceremonies of WXYZ-AM-FM-TV Detroit's new $4 million facilities (BROADCASTING, June 8) (l to r): the Very Rev. Celestine J. Steiner, president of the U. of Detroit; Donald L. Swanson, mayor of Southfield, Mich.; Louis C. Miriani, mayor of Detroit; Leonard H. Goldenson, president of American Broadcasting-Paramount Theatres Inc.; James G. Riddell, ABC vice president-Western Div., and G. Mennen Williams, governor of Michigan.

important achievements in industry promotion, including speakers guides as well as radio and tv jingles and slogans.

The Joint Boards face the public relations reorganization Friday. They are expected to discuss the matter of a successor to Mr. Martin and must decide if the entire association public relations effort is to be given the financial support needed for a major expansion.

Many other topics are on the board agendas, including such legislative proposals as amendment of Sec. 315 (equal time), the spectrum, federal regulation of broadcasting, educational tv and amendment of the labor law.

Efficiency Report • A report will be heard on a $15,000 investigation of NAB's efficiency and its utilization of a $1 million budget. The consulting firm of Stewart, Dougall & Associates has been contacting broadcasters around the country.

Plans for the NAB autumn regional meetings and the annual convention to be held April 3-7, 1960 in Chicago will be considered. The General Fund Finance Committee and Tv Finance Committee meet tomorrow. Respective chairmen are Merrill Lindsay, WSOY Decatur, Ill., and Mr. Lane.

Reports will be received from a number of NAB standing committees. A special committee studying the renewal of President Fellows' contract is expected to report. His contract expires in June 1960.

NAB unit backs bills to amend Sec. 315

NAB wants the chaotic language of Sec. 315 cleaned up before the next political campaign.

The association's Freedom of Information Committee voted Thursday (June 11) to support Congressional bills designed to amend the Communications Act so freak parties and splinter candidates can't jam the airwaves or prevent legitimate political broadcast coverage (see story page 46).

Two witnesses will represent NAB at hearings to be held by a communications subcommittee headed by Sen. John O. Pastore (D-R.I.). They are President Harold E. Fellows and Robert D. Swezey, WDSU-AM-TV New Orleans, chairman of NAB's freedom of information group. Mr. Fellows will appear June 23 but a final date has not been set for Mr. Swezey.

The NAB committee adopted a resolution citing the need for exploration of the overall problem of political broadcasting in view of legislation that would (1) revise the law and (2) abolish the political clause altogether.

In its resolution the committee said there is immediate need to solve the problems involved in news broadcasts of political campaigns.

The committee approved appointment of a subcommittee to work on drafting of an addition to the NAB manual, "Broadcasting the News." This would cover operating procedures and techniques for coverage of courts and other public proceedings. It approved addition of a member representing Radio-Tv Correspondents Assn.

Chairman Swezey reported on joint negotiations with American Bar Assn. for amendment of Canon 35, ABA's ban on court broadcasts (BROADCASTING, May 25). Howard H. Bell, NAB assistant to the president, charted work of state broadcaster associations in the information field.

Attending the meeting were Chairman Swezey; Campbell Arnoux, WTAR-AM-TV Norfolk, Va.; John Daly, ABC; Richard O. Dunning, KHQ Spokane, Wash.; John S. Hayes, WTOP-AM-TV Washington; Joseph Herold, KBTV (TV) Denver; Robert F. Hurleigh, MBS; Theodore A. Koop, CBS and Radio Television News Directors Assn.; Daniel W. Kops, WAVZ New Haven, Conn.; Julian Goodman, NBC; Robert L. Pratt, KGGF Coffeyville, Kan.; D.L. Provost, Hearst Radio, and Lawrence H. Rogers II, WSAZ-AM-TV Huntington, W.Va.

AFTRA, L.A. outlets sign 2-year contract

Standing: Jack Roth, KONO San Antonio; John Englebrecht, WIKY Evansville, Ind.; Dale Mahurin, KVLC Little Rock, Ark.; Roy Albertson, WBNY Buffalo; James Gatens, KJOE Shreveport, La.; Allan Waters, CHUM Toronto; Bill Simpson, KOL Seattle, Wash., AIMS chairman; Bill Wheatley, WKY Oklahoma City; Bill Hughes, CKNW New Westminster, B.C., Canada; Archie Taft, KOL Seattle; John Moler, WKY Oklahoma City; Art Smith, WKY; Frank Griffith, CKNW New Westminster; Milt Hall, KWBB Wichita, Kan.; Gene Posner, WMIL Milwaukee; Charles Denny, WBNY Buffalo, and Knox La Rue, KSTN Stockton, Calif.

NEW 5000-WATT AM TRANSMITTER

Type BTA-5R/5R1

INTRODUCES ADVANCED SILICON HIGH VOLTAGE RECTIFIERS

The compact BTA-5R/5R1 is available with a choice of tube rectifiers or new long-life silicon rectifiers. Only two tuning controls make this transmitter ideal for reliable remote control operation. Instantaneous Conelrad frequency switching is also available. Vertical chassis construction provides easy front and rear access to all components.

Silicon rectifiers, tested in a pre-production model of the BTA-5R1, were subjected to aging, estimated to be equivalent to 20 years, while the remaining portions of the transmitter also met severe tests. All of them proved the ability of these transmitters to perform over long periods under adverse conditions. The reliable silicon type of rectifier is ideal in remote control applications. The transmitter will operate within ambient temperatures from —4 to +113 degrees F. and to 7500 feet above sea level.

A unique exciter features plug-in crystal oscillators (this is the exciter proved in the BTA-500R/1R). Three switchable crystal positions are provided for: (1) an operating crystal, (2) a spare on the main channel, and (3) provisions for optional instantaneous Conelrad switching. High-fidelity performance is assured with the new 3X3000 F1 modulator tubes that *do not draw grid current* to modulate the two long-life 5762 PA tubes. Overall AF response is ±1.5 db from 30 to 10,000 cycles.

For further information about these and other transmitters, call the nearest RCA Broadcast representative. Or write to RCA, Dept. UC-22, Building 15-1, Camden, N. J. In Canada: RCA VICTOR Company Limited, Montreal.

OUTSTANDING FEATURES

- Built-in provision for remote control
- Unique exciter with plug-in oscillator
- Instantaneous Conelrad frequency switching (optional)
- Silicon rectifiers (optional)
- Only two tuning controls
- High fidelity performance

RCA Tmk(s) ®

RADIO CORPORATION of AMERICA

BROADCAST AND TELEVISION EQUIPMENT

CAMDEN, NEW JERSEY

ond under a new two-year contract negotiated between the stations and the Los Angeles chapter of AFTRA. The pact, succeeding the one that expired April 30, also increases the severance pay for announcers, which is now set at one week for each year's employment, up to a maximum of six weeks.

The agreement has been accepted by all but three stations, KIEV Glendale and KMPC and KFWB, both Los Angeles, according to Claude L. McCue, executive secretary of the union, who said that the only serious difference is with KFWB. This is the only one of the non-network stations which employs newscasters who both write their newscasts and broadcast them. AFTRA is attempting to get for these employes a scale appreciably higher than that for regular announcers, the same as it has at network stations.

Second dozen times are hardest—KPOL

KPOL Los Angeles has banned all dramatized commercials, effective today (June 1). Bob Scott, program director, attributed the ban to complaints from listeners, reporting that KPOL, which specializes in show tunes and other familiar music that is neither symphonic nor jazzy, never got complaints about singing commercials the way it has over the dramatized spots. He expressed the opinion that this may be because most dramatized commercials wrap their sales talk in a joke which can easily become tiresome after one has heard it a dozen times or more. Agencies informed of the prohibition have been uniformly cooperative, he said, and have all agreed to prepare special copy for use on KPOL.

Also effective today, KPOL is refusing to accept transcribed announcements on its news programs, requiring that all commercials broadcast in connection with the news be delivered live by a station announcer. A third KPOL innovation which starts today is a new set of musical station promotion spots, composed by Irv Orton. These present the station's slogans, such as "The difference is the music," in appropriate musical form, "Celestial rather than frantic," according to Mr. Scott.

Cash from listeners supports fm station

"Free from the tyranny of commercials" but receptive to cash donations from listeners, a new non-commercial fm outlet is about to go on the air in Los Angeles.

Pacifica Foundation, operator of KPFA (FM) Berkeley, Calif., non-commercial station supported by contributions from listeners, is in the process of constructing a similar station, KPFK (FM) in Los Angeles. Target date for the beginning of program service is June 28. KPFK will broadcast from a transmitter on Mt. Wilson with 75 kw on 90.7 mc.

Charter subscribers are now being solicited to support KPFK. The basic "voluntary subscription" is $12 a year for which the subscribers receive the "KPFK Folio," a bi-weekly program guide. A total of 3,000 charter subscribers is needed in order to complete construction, of which more than 1,000 have already subscribed, according to Terrell T. Drinkwater, station manager, whose broadcasting background includes work on the Pomona College station and with CBS-TV during the 1956 political conventions. Since then he has been doing graduate work at the U. of California at Berkeley.

Mr. Drinkwater, who at 23 is one of the youngest station managers in California, said that, "free from the tyranny of commercials, KPFK has a real chance to put something of substance over the air. KPFK is programming for a great diversity of publics rather than the general public. Thus, KPFK will be a supplement to existing commercial radio and television stations."

KPFK is located at 5636 Melrose Ave., Los Angeles 38. Phone: Hollywood 7-7183.

E. Wilson Lyon, president of Pomona College; Eason Monroe, executive secretary of American Civil Liberties Union for Southern California; Catherine Cory, former executive secretary of Friends Committee on Legislation and V.K. Osborne, investment counselor, were elected to the board of Pacifica at a director's meeting in Berkeley.

83% see tv daily

Fewer than two people in ten over four years of age in the U.S. fail to watch tv in the course of an average day (6 a.m.-midnight). This is the finding of an audience study conducted for the Television Bureau of Advertising by A. C. Nielsen Co. and the Pulse Inc. The analysis, full results of which are to be released in mid-July, indicates that 128.6 million people (82.7%) are in the daily tv audience.

Other findings: Peak viewing period is 8-8:30 p.m. when 49.8% of the people in the U.S. over four (about 77.4 million) are watching on an average day; two-thirds (66.9%) are among the viewers sometime between 7:30-10:30 p.m.; the 6-7:30 p.m. audience is 60.7% adult, though 82.1% of children age four to eleven watch tv during that period.

RADIO TOURIST
WIP Atlantic City bit receives local boost

WIP Philadelphia's plan to originate all but two of its programs from the summer resort, Atlantic City, during the last two weeks of July received the support last week of the Atlantic City Chamber of Commerce and the Atlantic City Motel Assn.

The Philadelphia station's plan to combine a special business-getting promotion with a continuous two-week report to Philadelphians on their favorite playground city appeared to have hurdled one obstacle—opposition from WLDB Atlantic City. WIP has asked the FCC to waive its rule which requires a majority of a station's programs to be originated from its "main studio."

WIP told the FCC it wants to "send WIP to Atlantic City as a tourist and vacationer to report on the city to the many people in our Philadelphia service area." The Atlantic City remote programming would involve the move of all WIP's on-the-air operating personnel—some 35 of a total of 80 employes—to the resort city from July 18 to 31, with their families.

The station noted that although there are "commercial aspects" to its plan, WIP would not expect to solicit advertising to the detriment of Atlantic City radio outlets, since the 45,200 families in Atlantic City are only a small part of WIP's 1,507,600-family service area and this would not be feasible to reach Atlantic City consumers. On the other hand, hotels and other resort facilities in Atlantic City which do not attempt to reach local residents probably would be interested in advertising the WIP's Philadelphia area audience, the station said.

The WIP announcement had evoked objections from Leroy and Dorothy Bremmer, owner-operators of 250-w WLDB in Atlantic City. They immediately fired off a complaint to the FCC charging that the powerful (5 kw on 610 kc) Philadelphia station was invading their hometown and would cause WLDB "unwanted loss of needed revenues, embarrassment, loss of prestige" and would impair WLDB's ability to serve the community. The station's owners also contacted civic and business leaders, other radio stations and the New Jersey Broadcasters Assn.

Withdrawal • But the Bremmers sub-

YOU MAY NEVER BE KING FOR 72 YEARS*—

BUT... WKZO Radio Makes You Feel Like A Ruler In Kalamazoo-Battle Creek And Greater Western Michigan!

7-COUNTY PULSE REPORT

KALAMAZOO-BATTLE CREEK AREA — MARCH 1958

Avery-Knodel, Inc., Exclusive National Representatives

sequently withdrew their protest. They said: "We don't oppose WIP coming to Atlantic City in view of the fact that it is only for two weeks and all the promotion and publicity will be good for Atlantic City."

Quintessence • The gist of the WIP idea is this:

Every regular, local WIP program for the entire two-week period, with the exception of the Phillies ball games and the Monmouth Race Track broadcasts, will originate from Atlantic City on a 24-hours-a-day basis. Also to be programmed daily will be special features based on the resort's varied attractions. MBS programs will continue to be aired.

WRCV - AM - TV, NBC-owned stations in Philadelphia, last week announced that they would originate seven radio and two tv shows weekly throughout the summer from Atlantic City's famed Steel Pier. This will include more than 22 hours, the stations said.

D.j.s Joe Grady and Ed Hurst will host their weekend Bandwagon, two-hour record hop and dance party, on Saturdays and Sundays, 1-3 p.m., effective June 20, on WRCV-TV.

Record impresario Pat Landon will originate his Monday-through-Saturday *Pat Landon Show* at 10 p.m.-1 a.m. from a specially built glass "cell" on the Boardwalk at the pier entrance, effective June 29. Name stars in music and show business will appear on the two shows.

Changing hands

ANNOUNCED • *The following sale of station interest was announced last week, subject to FCC approval:*

• KXO El Centro, Calif.: Sold by Valradio Inc., group headed by Riley R. Gibson, who is also president of Cal-Val Radio, owner of KXOA-AM-FM Sacramento, Calif., for $240,000 to Feldman Enterprises, whose president, Leonard Feldman, is a Nash-Rambler dealer in Chicago. Lincoln Dellar & Co. handled the sale. KXO is on 1230 kc with 250 w and is affiliated with MBS.

APPROVED • *The following transfers of station interests were approved by the FCC last week (for other Commission activities see* FOR THE RECORD, *page 93).*

• KGMS Sacramento, Calif.: Sold to KGMS Inc. (Anthony C. Morici, president, and others have interests in KIST Santa Barbara, Calif., and KRAM Las Vegas, Nev.) by Irving James Schwartz, William Stephen George and John Matranga for $500,000. KGMS is on 1380 kc with 1 kw, directional, and is affiliated with MBS.

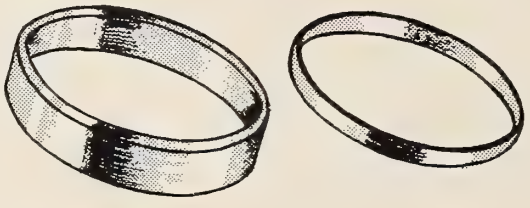
• KIVA (TV) Yuma, Ariz.: Sold to Electro Investors Inc. (Harry C. Butcher, chairman of board and 25% owner) by Harry C. Butcher for $241,000. KIVA (TV) is on ch. 11 and is primarily affiliated with NBC-TV.

• KDAN Eureka, Calif.: Sold to Radio KDAN Inc. (James F. Hadlock, president, and other stockholders have interests in KBUC Corona) by W.H. Hanson for $225,000. Comr. Robert Lee dissented on the over-commercialization issue. KDAN is on 790 kc with 5 kw, day.

• WDAT South Daytona, Fla.: Sold to Quality Broadcasters of Daytona Inc. (equally owned by John S. Mark, James S. Beattie and CBS newsman Walter Cronkite) by Harold E. and Helen W. King for $70,000. Mr. Mark owns 23% of WMT-AM-TV Cedar Rapids and KWMT Fort Dodge, both Iowa. Mr. Beattie owns WPTX Lexington Park, Md. WDAT is on 1590 kc with 1 kw, day.

Wis. medics, newsmen propose conduct code

A code of conduct is being drawn up by the State Medical Society of Wisconsin as a guide for improving working relationships between radio-tv newsmen and members of the medical profession.



The proposed code was explained to the United Press International Broadcasters of Wisconsin at its meeting in Milwaukee June 6. The organization also re-elected its present officers (see FATES & FORTUNES) and announced its new semi-annual awards.

Al Young, WEAU Eau Claire, was cited for the best job on a story involving a tornado disaster, while WHBL Sheboygan was honored for "consistently good" area coverage, including that of the Kohler Co. strike. UPI broadcasters also commended the wire service for its state legislative coverage.

Court sees Long film

A newsreel film showing the May 26 performance of Gov. Earl Long before a Louisiana legislative committee, taken by WBRZ (TV) Baton Rouge and telecast late at night, will be used as testimony in the scheduled federal court hearing of Gov. Long's sanity. Douglas L. Manship, WBRZ president-general manager, said the film was aired with a warning it was "not fit for children."

WESTERN ELECTRIC AND

UNIQUE MACHINE. This automatic assembler of transistors was once considered "practically impossible" because of fast-changing transistor designs, tininess of parts to be processed. The first of its kind, it is a bench-mark for industry.

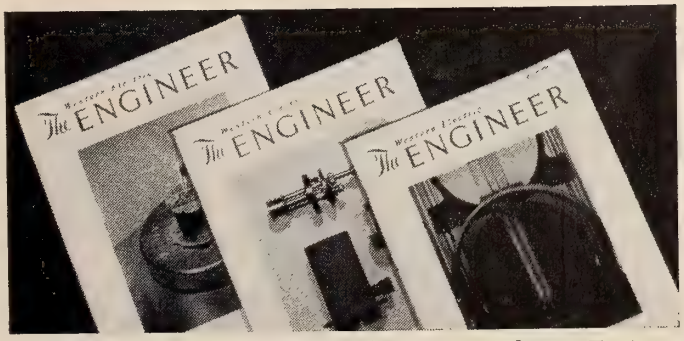
FIELD ENGINEERS follow Western Electric military products wherever they go. Their job: to supervise the installation of electronic equipment made by W.E. for national defense and to instruct military personnel in its operation and maintenance.

TO STIMULATE creative thinking and help keep W.E. engineers abreast of latest technical developments in their highly complex world, Western Electric sponsors a full-time, off-the-job Graduate Engineering Training program at special study centers.

ENGINEERING

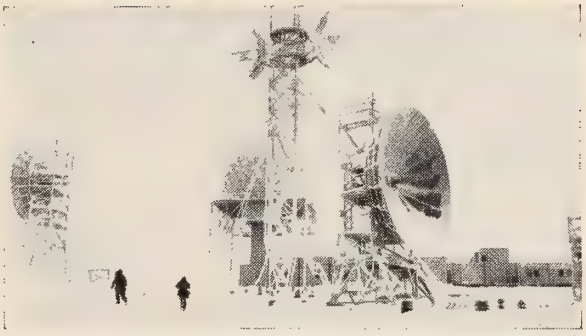
Producing hundreds of dependable telephone products at the lowest possible cost is a constant challenge to the ingenuity of engineers at Western Electric . . . manufacturing and supply unit of the Bell Telephone System.

At one Western Electric factory, a fully automated process turns out telephone wire. At another, high precision glass enclosed switches are assembled, adjusted and tested in one continuous operation. Both represent a better product at less cost, and contributions from several areas of W. E. engineering . . . mechanical, electrical, chemical, civil, many others.



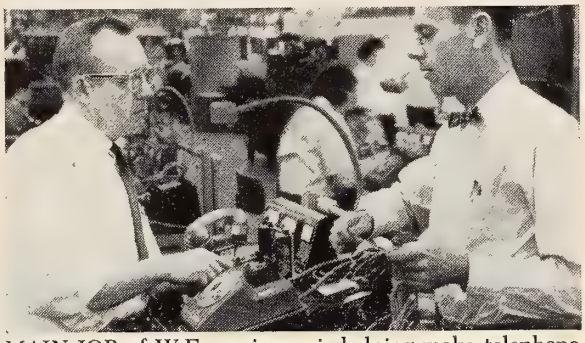
But the technical challenge goes beyond existing telephone products. When our Bell System teammate, the Bell Telephone Laboratories, creates a new product, its introduction into the telephone system depends on whether it can be manufactured by existing means. If not, the search begins to find a new method or new materials or perhaps new machinery to do the job. To intensify the search for advances in these areas Western has established a new engineering research center near Princeton, N.J.

The real hope for new developments, of course, rests with the individual engineers...with their highly personal creative attack on the unknown and the untried. It was to prepare and inspire them for such effort that Western Electric established its Graduate Engineering Training program...full-time and off-the-job at special study centers.

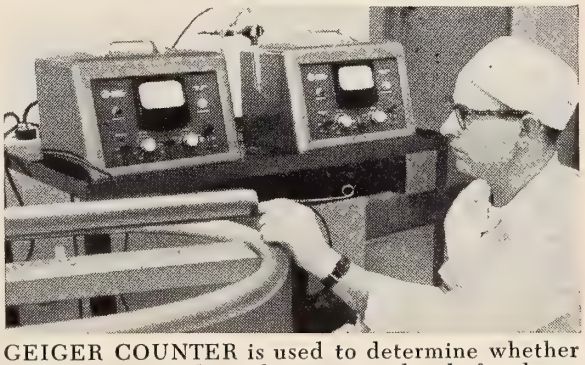


The efforts of our engineers have helped make possible good, dependable, continually improving Bell telephone service at a reasonable price.

Western Electric



MANUFACTURING AND SUPPLY UNIT OF THE BELL SYSTEM



VOICE OF THE ENGINEER. The Western Electric Engineer, a quarterly publication, reflects engineering thought and achievement at W.E. Besides wide circulation within the Bell System, it is read in many non-Bell education, engineering and business circles.

ENGINEERING CHALLENGE. The DEW Line of radar stations, spanning the Arctic circle, demanded all Western's engineering know-how. As prime contractor, W.E. pushed this job to completion in just 32 months.

MAIN JOB of W.E. engineers is helping make telephone products for the Bell System, like the inter-office telephone being tested above. They also work in other areas of our telephone job—distribution, installation, purchasing.

GEIGER COUNTER is used to determine whether radioisotope test solution has penetrated seal of undersea voice amplifier under pressure. These vital amplifiers are made by W.E. for use in trans-oceanic telephone cables.

BASIC STUDIES of new manufacturing materials, processes and mechanisms are now underway at our Engineering Research Center. This intense research will help us take advantage of rapidly unfolding scientific developments.

Wide public reaction to the telecast, pro and con, was aroused.

Sen. Russell Long (D-La.) told WBRZ the matter is being referred to the FCC. He said it was "extremely unfortunate" the film showing included profane language, adding, "It was inexcusable that certain tv stations played a film of that speech without deleting the offensive language."

WJBO Baton Rouge fed the May 26 proceedings over a statewide radio network plus an apology the next day, the latter purchased by Gov. Long. The apology was similar in tone to the original diatribe.

Lee interests buy 8 Anaconda papers

A giant copper firm has sold its string of eight Montana newspapers to Lee Newspapers, a midwestern newspaper group with broadcasting interests. The purchase price, for the eight daily papers of Anaconda Copper Co., subsidiary of Fairmont Corp., was an estimated four to $10 million.

Fairmont Corp. recently sold its 27% interest in KFBB-AM-TV Great Falls, Mont., to majority owner J. P. Wilkins and E. F. Galt for $113,000. Lee Radio Inc. is the licensee of KGLO-AM-FM-TV Mason City, Iowa, and is affiliated with the ownership of WTAD Quincy, Ill. Lee P. Loomis, president, also publishes *Mason City Globe-Gazette*.

Other Lee newspapers are *Hannibal* (Mo.) *Courier-Post* (KHQA - TV); *La Crosse* (Wis.) *Tribune* (WKBT [TV]); *Davenport* (Iowa) *Tribune & Times, Ottumwa* (Iowa) *Courier, Muscatine* (Iowa) *Journal, Madison* (Wis.) *State Journal* (WIBA and WMTV [TV]), *Kewanee* (Ill.) *Star-Courier* and *Lincoln* (Neb.) *Star* (KFAB Omaha, Neb.). Fairmont Corp. papers are *Missoula Missoulian* and *Sentinel, Butte Post* and *Montana Standard, Anaconda Standard, Livingston Enterprise, Helena Independent Record, Billings Gazette.*

Fm finds a home & KHGM a contract

Despite questions about fm's status (BROADCASTING, June 8), the medium spelled fine music *and* fine sales for a home builder in Houston, Tex., after a 13-week schedule over KHGM (FM) Houston.

Builder Cantrell & McMillan bought one hour Sunday morning for 13 weeks on KHGM (a Taft Broadcasting Co. station). During the campaign, President Glen McMillan counted 35,000 visitors to the "Heritage" home, a furnished sample house. During the same period, the company sold 50 homes and collected over 900 prospects who signed the "Heritage" home register as wanting to discuss C&M-built homes in the future.

Cantrell & McMillan used only fm radio and newspapers for the campaign. Mr. McMillan estimates that 25% of the 50 sales were a result of KHGM radio advertising. As the average home runs about $30,000, the total of the 50 homes sold is about $1.5 million.

The 25% which he attributes to fm amounts to $375,000 in sales. The price of the fm schedule: $540.

In the words of KHGM President Paul E. Taft, it "sounds fantastic," but is really logical because the home builder was in "an ideal position to take advantage of the type of audience which fm offers."

Mr. Taft describes Mr. McMillan as a builder of quality homes who wanted "an audience who would appreciate quality." The station president added that Mr. McMillan advertises only on fm and in newspapers, using some direct mail.

HAPPY RENEWAL

Messrs. McMillan (l), Taft

"He believes," said Mr. Taft, "there is a 'hidden' response connected with fm that pays off over several years. His commercials are dignified and well done, almost institutional in character. He attaches as much institutional value to his fm advertising as he does to actual sales and believes firmly that fm is the only medium where you buy both prestige and sales for the price of one."

Mr. McMillan's convincing act of faith: a signed contract last month for a five-hour program every Sunday for 32 weeks over KHGM.

Mass communications contain today's key

Today's pressing problems, created by modern technology, can be solved through enlightened use of the tools of mass communications, Robert Sarnoff, NBC board chairman, stated in a commencement address at Franklin & Marshall College, Lancaser, Pa. last Monday (June 8).

Mr. Sarnoff, who received an honorary Doctor of Laws degree, said that scientific and technological advances have created new human problems and aggravated old ones faster than man has been able to cope with them. Fortunately, he added, technology has also created communications of the same expanded dimensions as the problems.

Mr. Sarnoff argued mass communications offer "the only feasible public forum" for recognizing the urgency of society's problems, thrashing them out and finding broad solutions.

"Some criticize the mass media for disseminating trivia," he continued. "A mass medium by its very nature must reflect the interests of the society it serves in all their rich diversity. If it tries to please only a high level of taste, it is no longer a mass medium. This, too, is a limitation, but not a rigid one, for the media must also take the lead in offering broadened cultural and informational opportunities, and to the extent that the public responds, the level of mass fare will rise."

RAB expands number of 2-day conferences

The Radio Advertising Bureau schedule of two-day management conferences this fall has been expanded from seven to eight and an additional section has been placed on the agenda.

The regional conferences will open in Princeton, N.J., on Sept. 2-3, with other dates as follows: White Sulphur Springs, W.Va., Sept. 10-11; Ponte Vedra Beach, Fla., Sept. 14-15; Hot Springs, Ark., Sept. 17-18; Monterey, Calif., Sept. 21-22; Boulder, Colo., Sept. 24-25; Deerfield, Ill., Sept. 28-29 and St. Clair, Mich., Oct. 5-6.

The added section of the agenda of these conferences for 1959 will cover "What Radio Station Management Can Learn From Other Businesses." The emphasis will be on the study of the sales, promotion, production and management techniques of successful businesses, particularly those selling intangible products. The four principal sections of the conferences are: "Programming for More Sales," "Promoting for More Sales," "Managing the Sales Department," and "Managing Stations for More Sales and Profit."

as basic as the alphabet

EGYPTIAN

Drawings of animals, objects, and people were used in early writing to convey messages. For example, the Egyptian word-sign for *head* probably was the ancestor of our letter R.

PHOENICIAN

Discarding the idea of "talking pictures," the Phoenicians selected a few stylized Egyptian signs to serve as models for their alphabet. Thus, the *head* sign became their letter *resh*.

GREEK

Later, the alphabet spread along trade routes to countries which had no writing, and was fitted to new languages. The Greeks made *resh* their letter *rho*.

ROMAN

Conquest and colonization carried the alphabet still farther. Greeks in Italy gave it to the Romans, whose armies spread the letters throughout the ancient world. *Rho* became the Latin R.

Etv network starts

Educational WGBH-TV Boston and WENH-TV Durham, N. H., carried the first program in the New England Etv Network June 5. The network's organizers intend that it will eventually serve all New England and parts of northeast U.S. The initial simulcast was part of a conference on etv at the U. of New Hampshire. Excerpts from morning classes for schools and previews of evening adult shows also were telecast.

CATV voted down

By a 2-1 majority, voters of Salinas, Calif., defeated a proposed franchise for California Cablevision Co. to operate a CATV system in the city. The CATV firm, which proposed to bring in signals of San Francisco stations, had been granted an ordinance by city council to operate but a voter petition forced the question to be placed on ballot. Ch. 8 KSBW-TV Salinas actively opposed the franchise for CATV.

• Media reports

• CBS Radio last Monday (June 1) announced new affiliation agreements with WCAY Columbia-Cayce, S.C.; KOSY Texarkana, Tex., and KELD El Dorado, Ark. WCAY operates with 500 w, limited time on 620 kc. Effective date of the affiliation was June 1. KOSY broadcasts with 1 kw-D, 500 w-N on 790 kc; effective date July 2. KELD operates with 250 w on 1400 kc; effective date July 5.

• *KMOX* [St. Louis] *Takes a Stand*, a series of editorials, is attributed with helping passage of a bill to fluoridate the county's water. General Manager Bob Hyland kicked off the series 12 months ago with an editorial favoring fluoridation. He followed the bill's progress in his editorials until its passage last month.

• Concurrently with the all-jazz outlet KNOB-FM Long Beach, Calif., power boost (3.5 kw to 79 kw) (BROADCASTING, March 24, 1958; April 13), the station is inaugurating a nightly remote from the Brussels restaurant, Sunset Strip, Hollywood. Richard Lewellen conducts the jazz show (11 p.m.-1 a.m.) interspersed with interviews. Other jazz programs include *Java With Jazz* (7-10 a.m.) with Bob Mitchell; *Dinner Jazz* (6-7 p.m.) changes to *Fisher Hour* with Howard Lucraft, and *The Critics Ear* (Sunday 8 p.m.) with Charles Weisenberg. Hud Stephenson, formerly news editor of KHJ Los Angeles, is in charge of KNOB-FM's hourly newscasts.

• The Chicago chapter of Academy of Tv Arts & Sciences has announced following additions to its board from allied fields: (agencies) John Mosman, J. Walter Thompson Co.; William W. Ilson Jr., Young & Rubicam; Russell Tolg, BBDO and Jane Daly, formerly with Earle Ludgin & Co.; (networks) James Beach, ABC-TV central div.; (stations) Frank Atlass, WBBM-TV; James Hanlon, WGN-AM-TV, and Harry Trigg, WNBQ (TV); (packagers) Walter Schwimmer, Walter Schwimmer, Inc., and Ralph Bergsten, Don McNeill Enterprises.

Ear witness

Reference to KSFO San Francisco's log book was accepted as proof that a man had been listening to the station's coverage of a San Francisco Giants baseball game and had not committed an armed robbery.

The accused man's prime witness was a bartender who remembered the man was in his bar when the Chicago Cubs scored a home run. A check of KSFO's log showed the homer was hit at the time of the holdup.

• WRCA-TV New York had the highest May sales figures in its history, with billings up 16% over the same month last year, according to Max E. Buck, station manager. For the January through May period, the station is 18% ahead of the same months of 1958, Mr. Buck said.

• Radio Reports Inc., N.Y., formerly at 220 E. 42nd St., moved June 6 to new quarters at 16 W. 46th St. New telephone number: Columbus 5-7650.

• Al Davis, vice president of Art Franklin Inc., New York, has formed his own publicity firm, Al Davis Publicity, with offices at 17 E. 45th St., New York. Telephone: Murray Hill 2-3342.

• KHTV (TV) Portland, Ore., is slated to commence operations today (Monday) June 15. The ch. 27 outlet is an independent. It will be on-air 3 p.m.-midnight Monday-Saturday with longer hours on Sunday.

• KRON-TV San Francisco gave the local educational - noncommercial KQED (TV) a Gray Telop 11 as a gift for the etv station's fifth anniversary.

• Formation of a new firm—Cushman, Veeck & Samuel, Public Relations Inc. —to handle client financial, industrial and promotional activities has been announced in Chicago. The officers: Aaron D. Cushman, president of the public relations firm bearing his name, as president; Bill Veeck, president of the Chicago White Sox, vice president, and Marsh Samuel, head of his own Cleveland pr firm, as secretary.

• The New Jersey Broadcasters Assn. has received the annual New Jersey Mental Health Assn. award for an "outstanding contribution in creating better public awareness and understanding of mental illness."

• The Television & Radio Advertising Club of Philadelphia on June 5 was to present its first Gold Liberty Bell Award to Freeman Gosden and Charles Correll, CBS Radio's Amos 'n' Andy (Mon.-Fri., 7:05-7:30 p.m., EDT). Held in the Warwick Hotel in Philadelphia, the luncheon ceremony will be conducted annually to honor individuals for "their outstanding contributions to American broadcasting." Accepting the awards for the comedy teams, who were unable to attend, were Walter Cronkite and Larry Le Sueur, CBS News correspondents, the network reported.

• Tv Mountain, Mont., on which KMSO-TV Missoula has its transmitter, also is used by the U.S. Weather Bureau. Weather information from the bureau man on the 7,000 ft. mountain is relayed by KMSO-TV's engineer to studios in Missoula, then to the Weather Bureau office.

• Rep appointments

• WHK Cleveland appoints John Blair & Co.

• WDXB Chattanooga, Tenn., names H-R Representatives Inc. and Clarke Brown Co. as southeast representative.

• KXLA Los Angeles names Donald Cooke Inc. as national representative.

• Burn-Smith appointed for WJJL Niagara Falls, N.Y.; KLMS Lincoln, Neb.; WRIS Roanoke and WWOD Lynchburg, both Virginia, and WLBJ Bowling Green, Ky.

• WSET Glens Falls, N.Y., has appointed Donald Cooke Inc., N.Y.

• KEWB San Francisco-Oakland, formerly KLX which was recently acquired by Crowell-Collier Publishing Co., appoints The Katz Agency, N.Y.

• KGA Spokane names George P. Hollingbery, N.Y.

• KLAC Los Angeles has appointed Robert Eastman Co., N.Y., effective July 1.

• WAOK Atlanta names Daren F. McGavren Co., N.Y., effective July 1.

• KCRG-TV Cedar Rapids, Iowa, appoints the Branham Co.

RCA THESAURUS TURNS TIME INTO PROFITS FOR YOU

Here are just a few examples of the way RCA THESAURUS COMMERCIAL LIBRARY FEATURES build bigger profits for radio stations throughout the country:

"We billed $12,500 in 13 weeks with SHOP AT THE STORE WITH THE MIKE ON THE DOOR . . . 39 participating sponsors delighted . . . a great campaign." **Dale Woods, Manager, KUEN, Wenatchee, Washington**

"Sold SUPERMARKET CAMPAIGN, 9,464 spots on firm year contract to Stater Bros. markets . . . terrific sales results for sponsor. Nearly all of 100 new accounts sold in past few months were closed by using Thesaurus jingles." **Joe Klaas, Sales Manager, KITO, San Bernardino, California**

"Piggly Wiggly stores bought 52-week, 42 spots weekly schedule SUPERMARKET RADIO CAMPAIGN . . . 2,184 spots annually . . . we're charging a premium fee." **H. G. Parise, Manager, WMFG, Hibbing, Minnesota**

"1,000 SUPERMARKET CAMPAIGN JINGLES sold to Peerson Bros. Shopping Center... Superior Federal Savings bought 365 spots, DATELINES AND SELL-LINES SALES BOOSTERS." **James Fesperman, Commercial Manager, KSFA, Fort Smith, Arkansas**

"Sold DEPARTMENT STORE CAMPAIGN to Sears Roebuck, 50 announcements weekly, 52 weeks." Sponsor very satisfied! Just this one account pays for Thesaurus. The many other jingles that are sold are bringing us accounts that we never have been able to sell." **D. Pebbles, Commercial Manager, KDBS, Alexandria, La.**

"Sold England Brothers 1,000 spots, 52 weeks DEPARTMENT STORE CAMPAIGN . . . charging a premium fee! Jingles sold the sponsor, who kept humming them all the way through the tape demo—very pleased!" **Paul Edwards, Program Director, WBEC, Pittsfield, Massachusetts**

"Two SALES BOOSTER CAMPAIGNS sold on 2 calls! "What's the Meaning of This Name?" to savings and loan. "Little Known Facts" to furniture store. $3,300 new revenue in first two weeks with Thesaurus." **Robert Z. Morrison, Jr., Sales Manager, WKBH, La Crosse, Wisconsin**

"Sold 1,800 announcements to Royal Crown Cola Bottling with Thesaurus SOFT DRINK JINGLE . . . sponsor pleased . . . so are we." **Ed Morgan, Manager, WETU, Wetumpka, Alabama**

"Thesaurus LUMBER JINGLE increased account $1,700 a year." **Hank Behre, Commercial Manager, WMTR, Morristown, New Jersey**

RCA THESAURUS can do as much for you, and more! Wait till you hear about the many other sure-selling COMMERCIAL LIBRARY FEATURES we haven't even mentioned. Unsold time means lost income for you, so don't let another minute slip by. Call your nearest RCA THESAURUS representative now, and get the full low-cost high-profit story!

SUPER FCC CONCEPT CONSIDERED

House committee hears 13 man-panel agree it's a sorry spectrum, but break on possible formation of new Federal Spectrum Authority

The creation of a super FCC—to oversee both government and non-government radio frequencies — loomed last week as a possible result of Congress' interest in the radio spectrum.

A House subcommittee heard 13 eminent government and industry representatives discuss the state of the radio spectrum and what should be done about it.

All agreed that the spectrum was in a bad way.

But they divided on what should be done.

One group—including FCC Chairman John C. Doerfer, Electronic Industries Assn.'s D.R. Hull and H. Leslie Hoffman and Federal Aviation Agency's E.R. Quesada—emphatically urged that something like a Federal Spectrum Authority be established.

The FSA would assert jurisdiction over the entire radio spectrum. It would divide the electronic wavelengths between government and non-government users. It would be in a position to make final decisions when conflicts arose between government and civilian users.

It would, in a word, be the spectrum czar and bring to an end the amorphous dual jurisdiction exercised by the President and the FCC established in 1934 in the Communications Act.

It was implied that the FCC would be retained to handle civilian assignments and an organization established to supervise government assignments in the same way.

Some Say Premature • A majority of other panelists tabbed as premature the super-FCC recommendation. A large group, including Victor E. Cooley, chairman of last year's Presidential Advisory Committee on Telecommunications; Drs. Frank Kear and Irvin Stewart, members of that committee; Dr. William L. Everitt, U. of Illinois dean of engineering and Harold R. Huntley, AT&T chief engineer, urged the creation of a governing body or single administrator to exercise jurisdiction over the government portion of the spectrum.

This was also the position taken by FCC Comr. Robert T. Bartley, who endorsed Rep. Harris' bill which would create a Presidential board.

Two broadcasting spokesmen, Lester W. Lindow, executive director, Assn. of Maximum Service Telecasters, and Harold E. Fellows, NAB, called for a complete Congressional investigation of the spectrum before any move is made toward establishing or revising the organization of the spectrum's management.

They received no support from any other members of the panel. In fact, some panelists maintained that another study, before the management organization was established, would be a waste of time.

Both Leo A. Hoegh, director of the Office of Civil & Defense Mobilization, and Paul Goldsborough, former communications aide to the Secretary or Defense, urged the creation of a Presidential commission to study the matter further.

The hearing was highlighted by General Quesada's frank remark that it is only natural for users to "hoard" frequencies, and by Mr. Lindow's warning that the public would not stand for the loss of any tv channels.

Rep. Oren Harris (D-Ark.), chairman of the parent House Commerce Committee, presided at the subcommittee's hearings. More or less in regular attendance at the two-day hearing were five members of the communications and power subcommittee. They were:

Reps. John James Flynt Jr. (D-Ga.), John E. Moss (D-Calif.), William L. Springer (R-Ill.), J. Arthur Younger (R-Calif.) and William H. Avery (R-Kan.)

At the end of the two day-long sessions, the committee asked for additional material from members of the panel and promised that speedy consideration would be given to the problem.

Bills Pending • Pending before the subcommittee are three bills dealing with the administration of the radio spectrum. These are:

• H.J.Res. 292. This bill was introduced by Rep. William G. Bray (R-Ind.) and calls for an investigation of the government use of the spectrum by a five-man commission to be appointed by the President (two members), Vice President, Speaker of the House and the chairman of the FCC.

• H.J.Res. 331. This bill, introduced by Mr. Harris at the request of the Office of Civilian & Defense Mobilization, calls for the establishment of a five-member commission appointed by the President to investigate the management of the radio spectrum, calling for a report in one year.

• H.R. 7057. This bill introduced by Mr. Harris on request calls for the es-

REPS. SPRINGER, MOSS AND HARRIS

House spectrum probers discuss complex problems during break in hearings

Climbed Capitol Hill • The top drawer panel of government and industry spokesmen who made known their views on the radio spectrum to a House subcommittee last Monday and Tuesday: (1) Dr. Irvin Stewart, member, Presidential Advisory Committee on Telecommunications; (2) Victor E. Cooley, chairman, Presidential Advisory Committee on Telecommunications; (3) E. R. Quesada, administrator, Federal Aviation Agency; (4) John C. Doerfer, FCC chairman; (5) Robert T. Bartley, FCC commissioner; (6) Harold E. Fellows, president, NAB; (7) Lester W. Lindow, executive director, Assn. of Maximum Service Telecasters; (8) D. R. Hull, president, Electronics Industries Assn.; (9) Frank Kear, member, Presidential Advisory Committee on Telecommunications; (10) Harold R. Huntley, chief engineer, AT&T; (11) W. L. Everitt, dean, U. of Illinois School of Engineering; (12) Paul Goldsborough, former communications director, Department of Defense; (13) Leo A. Hoegh, director, Office of Civil & Defense Mobilization. The witnesses were asked to file additional material later.

tablishment of a three-member National Telecommunications Board in the Executive Office of the President to formulate telecommunications policy, oversee government use of the spectrum, study the overall use of the spectrum and the management policies of both government and non-government users. This is essentially the recommendations of the so-called Cooley committee.

Last week's hearings stem from the resolution last year by then Sen. Charles Potter (R-Mich.) for an investigation of the government use of the radio spectrum. This was passed in the Senate. When it reached the House side, it was amended under White House pressure to include non-government services as well. Civilian users of the radio spectrum, including broadcasters, opposed such an investigation and the bill was allowed to die.

Ike Named Committee • Late last year, President Eisenhower appointed a Presidential Advisory Committee on Telecommunications, asking it to report back by the end of the year its recommendations on frequency management. This committee recommended what is essentially embodied in H.S. Res. 7057 (BROADCASTING, March 9).

The committee was headed by Victor E. Cooley, a retired Bell Telephone executive and former deputy director of the Office of Defense Mobilization. Other members were Dr. Stewart, former president, West Virginia U. and former FCC commissioner; Dr. Kear, consulting engineer; William G. Thompson, retired Bell System official and Maj. Gen. W. Preston Corderman (retired), vice president of Litton Industries.

Dr. Stewart was chairman of a Presidential Communications Policy Board which in 1951 submitted a report on the spectrum resulting in the appointment of Haraden Pratt, Mackay Radio & Telegraph Co., as telecommunications adviser to President Truman.

When the Eisenhower administration came in telecommunications was relegated to the OCDM where it is handled by Fred C. Alexander, deputy assistant for telecommunications.

Democratic committee members stressed repeatedly that the radio spectrum is a natural resource and therefore under Congressional supervision. Rep. Harris recalled that the House Committee was instrumental in resolving the airspace problem through the creation of the Federal Aviation Agency.

All evinced great interest in the idea of a Federal Spectrum Authority as the super-agency to control overall the radio spectrum. They also seemingly agreed that some action was necessary to put the government's spectrum house in order.

Government frequencies are administered by the Interdepartmental Radio Advisory Committee. This is a group on which sit representatives of federal

agencies, including the military services. Assignments are made on a voting basis.

When a requirement is expressed for non-government bands, this is handled by OCDM. OCDM negotiates with the FCC for the pre-emption of that portion of the spectrum it needs. Where national defense is involved, the Commission usually complies, on the ground that it is not set up to question the basic military decision that the frequencies are needed in the national defense.

Statements and remarks by the panelists are condensed below:

FCC Chairman Doerfer • The basic problem is the dual jurisdiction exercised over the radio spectrum by the President and the FCC. This was established when the Communications Act was made law in 1934.

Actually, the President has power over the whole spectrum. This comes under his Constitutional prerogative as commander-in-chief of the armed forces.

The first step in resolving the jurisdictional problem is creation of an authority to supervise government use. Next step is creation of a "super board" to exercise responsibility over both government and non-government use.

Mr. Doerfer has a dim view of further studies of radio spectrum. A study is for the purpose of recommending some action and if there is no one with power to act, the study and the recommendations are useless.

A study to determine the type of structure to manage the spectrum is worthwhile. First consideration is organization, then it can be determined how the spectrum is being used.

Lack of decisive authority is pointed up by the tv situation. There are 70 uhf tv channels available for use by other services if a group of vhf frequencies can be secured for tv. This is under negotiation with the military. A single arbiter, with knowledge of spectrum facts and with the confidence of both sides, could make a decision in the best interests of country.

Messrs. Hull and Hoffman • Divided responsibilities over the radio spectrum means two cooks for one pie. Compromises between the FCC and IRAC means a settlement is accomplished, not a sound technical and policy decision.

They urged the creation of a Federal Spectrum Authority. This would oversee the entire radio spectrum, apportion bands to government and non-government. Also they would have some authority to handle government assignments and continue the FCC as is in making assignments to non-government users.

An FSA would also handle and bring up to date technical information on government and civilian requirements and would maintain such information. It would also conduct long-range planning studies.

Mr. Hoffman made a strong plea for improvements in transmission techniques. (Mr. Hoffman is chairman of EIA spectrum study committee.)

Mr. Hull recounted the long-history of EIA's interest in spectrum conservation, going back to 1952.

Mr. Quesada (Gen. Quesada, retired) • He urged a "detached" agency to determine the allocation of the radio spectrum between government and civilian users. Under present practices, the group which develops usable equipment in a new band is the one which asserts ownership rights. Today virtually all of this work is being done by the government.

A super agency would divide the spectrum and also plan and study overall telecommunications policies. Some type of organization should be established to supervise government assignments. The FCC could continue to exercise its jurisdiction over non-government assignments.

IRAC is doing a fine job, but is limited because it represents users. Need is for an "objective" authority to oversee government bands.

Mr. Lindow • He vigorously urged Congressional investigation of spectrum use. Charged that whereas Congress would find civilian use an open book, it would find lack of information and justifications for many government uses. Radio spectrum is a natural resource and the decision on how it is used is a Congressional responsibility. Study the spectrum first, before getting involved in a super spectrum agency.

Besides the technical aspects, use of the spectrum involves economic, social and political decisions.

Establishing an administration to manage the radio spectrum before studying how it is being used is "putting the cart before the horse."

Expressed opposition to all three bills under consideration because they do not contemplate a study of the spectrum by Congress. Objected strongly to any executive department group studying the use of the spectrum; it would be biased in favor of government users.

Mr. Fellows • The basic problem is that there are two users of the spectrum — government and non-government — "with each of them operating under different ground rules."

Government users do not have to justify their assignments; civilian users must make a public record.

Non-government users have been mindful of the need for more efficient use. There is no information whether government users are also aware of this necessity.

The solution is the proper administration of the entire spectrum but, before such a solution can be advanced, there must be a further study of the utilization of the spectrum. This must be done by the legislative branch.

In any study the needs of broadcasters must be kept uppermost.

Messrs. Cooley, Stewart, Kear, Everitt, Huntley and Bartley • These men urged the establishment of a three-man board in the executive Office of the President to formulate national policy, oversee government usage and study the overall management and usage of the entire spectrum.

They expressed the willingness to forego the last item after others had questioned the objectivity of a government administrator in studying all uses of the spectrum.

But all stressed the need for some kind of single authority to supervise government frequency administration.

Dr. Kear suggested that creation of a single, overall agency might be a "fateful mistake."

Both Dr. Kear and Dr. Stewart spoke of the possibility that a formal administrator for the government frequencies might obviate the need for a super-FCC, since negotiations would then be directly between two organizations (the FCC and the government administrator) with authority to make decisions.

Lots of room, but ...

Congressional probers opened their eyes wide when they were told that less than 1% of the entire radio spectrum was being used today.

The estimate was made by Fred C. Alexander, telecommunications executive in the Office of Civil & Defense Mobilization, who was briefing the House subcommittee on the spectrum.

The usable radio spectrum today runs up to 300,000 mc, he pointed out. Hertzian waves run the gamut up to 3 million mc, he observed.

But cold water was thrown on the possibility that an expanded spectrum might ease present problems (mainly due to overcrowding). The noted Dr. William L. Everitt, U. of Illinois engineering dean, told the committee not to expect for some time an expansion of the spectrum above 300,000 mc. In those higher frequencies, he said, there are propagation problems with infra-red, fog and water vapor.

Nothing else like it in Greater New York

IN PROGRAMMING: The voice of WVNJ is unique. It's the only radio station in the entire Metropolitan New York area that plays just Great Albums of Music from sign on to sign off — 365 days a year.

IN AUDIENCE: So different, too. So largely adult — so able to buy — so able to persuade others to buy. And in Essex County alone (pop. 983,000) WVNJ dominates in audience — in quality of audience — and in prestige.

IN VALUE: It delivers the greater New York audience for less than 31c per thousand homes — by far the lowest cost of any radio station in the market.

SEC. 315 HEARINGS THIS WEEK

Four political broadcast relief bills to be discussed by 20 Senate witnesses

Over 20 witnesses will testify before the Senate Commerce Communications Subcommittee on four bills to amend Sec. 315 of the Communications Act, which guarantees in broad and controversial language that all political candidates shall receive equal time on radio and tv stations.

The hearings begin this Thursday (June 18) and continue through June 25 (BROADCASTING, June 8) with more days to be scheduled if needed. To date, a large majority of the scheduled witnesses are in favor of amending the act to give broadcasters more discretion in applying the equal time rule.

Leadoff witness Thursday will be the FCC, headed by Chairman John C. Doerfer. Its line of testimony will be determined at a special FCC meeting today (Monday). An as yet unnamed Justice Dept. spokesman will follow the Commission. Also scheduled to testify on the opening day are Frank Stanton, president of CBS; and Sens. Gordon Allott (R-Colo.) and Spessard Holland (D-Fla.) and Rep. Joseph Barr (D-Ind.). The latter three are sponsors of equal time amendments.

Lar Daly Friday • Testifying Friday (June 19) will be Robert Sarnoff, board chairman of NBC, John C. Daly, ABC vice president for news and special events, Rep. Glenn Cunningham (R-Neb.), and Lar Daly, who started the current furor when he demanded and received equal time in the Chicago mayorality campaign in February.

Harold Fellows, president of NAB, Donald McGannon, president of Westinghouse Broadcasting Co., and Robert D. Swezey, executive vice president and general manager of WDSU-AM-TV New Orleans, will give their views June 23. The American Civil Liberties Union will send a spokesman but a definite date has not been set. In addition several other prospective witnesses have indicated a desire to be heard, but have not definitely been scheduled.

Broadcasters' difficulties in trying to comply with Sec. 315 were again placed before Congress soon after the FCC last February ruled—by a 4-3 vote—that Lar Daly should get equal time after the incumbent Chicago mayor appeared in an official capacity on Chicago radio-tv newscasts (BROADCASTING, Feb. 23).

Cunningham takes lead • Rep. Cunningham was the first member of the 86th Congress to take cognizance of the situation. Although he said he favored much broader amendments, Rep. Cunningham introduced HR 5389 to exempt newscasts only (BROADCASTING, March 16). Since then, nine identical bills have been introduced (three in the Senate, six in the House) and one bill, S. 1858, which gives broadcasters much broader exemptions. The latest amendment, HR 7602, was introduced June 5 by Rep. J. Edgar Chenoweth (R-Colo.).

(Last Wednesday [June 10] Rep. Cunningham inserted in the *Congressional Record* a BROADCASTING editorial from its May 25 issue advocating complete repeal of the political broadcasting law. The editorial was headed: "Repeal Sec. 315 Now or Repent Later.")

S 1858, which has a dozen co-sponsors, was introduced by Sen. Vance Hartke (D-Ind.), a member of the Communications Subcommittee. Sen. Hartke has been the prime mover in securing hearings. In addition to exempting newscasts, the Hartke bill defines qualified candidates for equal time and exempts broadcasters from libel as a result of political statements broadcast over their facilities.

The President got into the act in March when he termed the FCC Lar Daly decision "ridiculous" and told the Justice Dept. to investigate the situation (BROADCASTING, March 23). Attorney General William Rogers, in turn, urged the FCC to reverse its Lar Daly decision and apply a "common sense application of the Communications Act's public interest standard . . ." (BROADCASTING, May 11).

FCC Meets Today • The Commission has scheduled a meeting today (Monday) to consider the Attorney General's recommendation. In fact, the Senate hearings were postponed a week so the Commission could reconsider its Lar Daly-Chicago decision (BROADCASTING, June 8).

In addition to Sen. Hartke's bill, the subcommittee will have under consideration S 1604 by Sen. Allott, S 1929 by Sen. Holland and S 1585 by Sen Strom Thurmond (D-S.C.), also a member of the Communications Subcommittee. Sen. John Pastore (D-R.I.) is chairman and other members are Sens. Mike Monroney (D-Okla.), Gale McGee (D-Wyo.), Clifford Case (R-N.J.), Norris Cotton (R-N.H.) and Hugh Scott (R-Pa.).

The hearings will begin at 10 a.m. each morning in Rm. 5110 of the New Senate office Bldg.

Taft files with SEC to sell common stock

Newly-formed Taft Broadcasting Co. (formerly Radio Cincinnati Inc.) June 5 filed a registration statement with the Securities & Exchange Commission in Washington proposing to offer 483,222 shares (par value $1) of common stock to the public.

Taft Broadcasting was organized June 3 under the laws of Delaware and immediately acquired by merger the broadcast properties of Radio Cincinnati. The stock to be sold represents 33% of the 1,449,972 outstanding shares. Harriman Ripley & Co. is the chief underwriter and the asking price of the stock has not been determined.

Taft owns 100% of WKRC-AM-FM-TV Cincinnati, WTVN-AM-TV Columbus, both Ohio; WBRC-AM-FM-TV Birmingham, Ala., and WKYT (TV) Lexington, Ky., and 30% of WBIR-AM-FM-TV Knoxville, Tenn. All of the tv stations except ch. 27 WKYT operate on vhf channels.

Approximately 87.2% of the Taft stock currently is owned by descendants and relatives of the late Charles P. Taft, founder of the *Cincinnati Times-Star*. The SEC filing lists 29 selling stockholders with all proceeds to go to the sellers individually. President Hulbert Taft Jr., is selling 56,730 of the 170,189 shares he owns.

Other Sellers • Other large blocks will be sold by Executive Vice President David G. Taft (50,471), David S. Ingalls and Robert Taft Jr., under a December 1951 trust agreement with Jane Taft Ingalls (67,226), estate of Hulbert Taft (52,990) and David S. Ingalls (22,403).

A Radio Cincinnati balance sheet, dated March 31, 1959, showed total assets of $11,776,656, current liabilities $3 million and $4 million in retained earnings. The firm's net revenues for the past three years ended March 31 were $8.97 million ($6.98 million tv, $1.99 million radio) in 1959; $7.8 million ($5.98 million tv, $1.88 million radio) in 1958; and $5.1 million ($3.99 million tv, $1.1 million radio) in 1957.

Net earnings (after taxes) in 1959 were $1.2 million, $1.5 million in 1958 and $1.2 million in 1957. Retained earnings at the end of the March 31 year totaled just over $4 million. Only 1% of the net tv revenue accrued from WKYT, which showed a loss of $112,000 for the past year.

The firm reported that 43% of its tv incomes comes from national spot, 32% local and 25% network. In radio, 54% comes from local sources, 44% national and only 2% from networks (all of Taft's radio stations are affiliated). Dividends have been declared for each year since 1953, with 45 cents per share paid the past two years. A dividend of 10 cents per share in Taft Broadcasting has been declared, payable Sept. 1.

The multiple owner employs 365 persons. President Hulbert Taft Jr. was paid $51,424 last year, Vice President Kenneth Church $52,090 (including commissions) and Executive Vice President David G. Taft $38,915.

New FTC head

Earl W. Kintner, newest member of the Federal Trade Commission, was named chairman by President Eisenhower last week. Mr. Kintner, former FTC general counsel, was sworn in as the third Republican member of the five-man commission last Tuesday. He succeeds John W. Gwynne of Iowa who retired. Mr. Kintner was nominated to the FTC by President Eisenhower last month and was unanimously confirmed by the Senate June 4.

FCC's silver anniversary: no fanfare, just a look at the record

The FCC will be 25 years old this Friday (June 19)—a quarter of a century from the day the Federal Communications Act became law in 1934.

This is about the only sentimental observation contained in FCC "Special Release G 73762," distributed last week. The rest is a fact-packed summary of the evolution of the agency into today's arbiter and regulator of commercial broadcasting and other types of electronic communications.

The FCC succeeded the Federal Radio Commission in taking over broadcast regulatory functions and took over from other government agencies and departments the supervision of telephone and telegraph operations, government telegraph rates, interstate and international communications common carriers and domestic administration of global communications treaties made by the U.S. with other countries. The FCC has expanded and re-expanded its various divisions as the need arose.

In broadcasting, the FCC notes that fm and vhf tv were added in 1941 and uhf tv in 1952; that the U.S. is the only country where tv programs are received in color; that several tv antennas are higher than the Empire State Building and that over-the-horizon tv has been inaugurated between Florida and Cuba.

Today's Total • Today there are more than 4,800 commercial broadcast stations authorized—around 3,500 am, 735 fm and 670 tv—of which about 3,300 am, 600 fm and 500 tv (435 vhf, 75 uhf) are on the air, with video service extended by 200 translators. About 125 fm stations are engaged in functional music operations.

As for the educational broadcasting picture, there are some 150 noncommercial educational fm outlets and 43 tv (33 vhf, 10 uhf) and there is a total of 257 educational tv reservations (86 vhf, 171 uhf).

There are more broadcast receivers than people in the U.S., almost two thirds (150 million radio, 50 million tv) of the world total—and almost three times as many sets as there are automobiles in the U.S. The FCC is now considering test subscription tv, studying the possibility of vhf tv boosters and is also studying and testing "stereophonic" broadcasting.

In the 25 years, the FCC's total workload has increased 23 times, the budget has gone from $2 million to over $9 million and personnel has more than doubled —from 500 to 1,200 today.

Old Timers • Two of present FCC members were on the staff of the predecessor FRC: Comr. Rosel H. Hyde transferred from the FRC as an attorney, later became FCC general counsel and served a term as chairman. Comr. Robert T. Bartley headed FRC's Telegraph Division. T.A.M. Craven, twice an FCC member, also had served on the FRC and started with the FCC in 1935 as chief engineer. Comr. Frederick W. Ford joined the FCC in 1947 and was the first chief of the Broadcast Bureau's hearing division.

The FCC said that as late as 1940 usable spectrum space was insufficient to accommodate all who wanted to use radio, but that later developments have made possible the expansion of the usable part of the spectrum from 300 to 30,000 mc. Though there still is a shortage in popular parts of the spectrum, more than 65 categories of services today use radio for many purposes, it was noted. Technical refinements are making possible a more efficient use of the spectrum, the FCC said.

The start of communication with objects in outer space is proof that radio no longer is earthbound, the FCC said.

Actor Bellamy says tv at admen's mercy

Television does not give the people what they want to see, actor Ralph Bellamy told a House subcommittee last week. Mr. Bellamy made this observation when asked by Rep. Robert Giaimo (D-Conn.) why there is not more "culture" on tv.

"Tv is at the mercy of advertising agencies, sponsors and various kinds of ratings which are of questionable and not proven value," the actor charged. He was testifying before a House Education & Labor Subcommittee on a bill to create a federal advisory committee on the arts. Mr. Bellamy is president of the Actors' Equity Assn. and spoke for that group and the National Council of the Arts & Government.

Arthur S. Flemming, Secretary of Health, Education & Welfare, also testified in favor of the bill, introduced by Rep. Frank Thompson Jr. (D-N.J.). He said arts deserve equal billing with science and math.

Immediately after the open hearing last Wednesday (June 10) the subcommittee favorably reported the bill, which would establish an art council of 21 members to serve 6-year terms. The council would be appointed by the President.

FCC again awards ch. 7 in Seattle to KIRO

KIRO-TV Seattle, Wash., was "regranted" by the FCC last week by a 5-1 vote after an oral argument prompted by an appeals court decision in another case.

The ch. 7 Seattle outlet originally was granted in the summer of 1957 (BROADCASTING, July 29, 1957) over KXA and KVI of that city, which were again denied competing bids by the Commission last week. Comr. T.A.M. Craven did not hear the original oral argument in the case, held in 1955, but participated in the FCC decision two years later anyway. Under a court decision in the Indianapolis ch. 13 case this was erroneous procedure. The FCC therefore late last year (BROADCASTING, Dec. 15, 1958) ordered a further oral argument to be held this January. At the same time the Commission permitted KIRO-TV to continue operation.

The original FCC vote on Seattle ch. 7 was 3-2 for the grant to KIRO licensee Queen City Broadcasting Co. (Saul Haas, president). In last week's decision, Comr. Rosel Hyde did not participate, Comr. Robert Lee again dissented as he had done in 1957 and the others voted for KIRO-TV.

PULSE and NIELSEN AGREE!

A DIFFERENCE OF OPINION

FCC, FCBA part on improving Commission

The FCC and the Federal Communications Bar Assn. were at odds in testimony before the Senate Commerce Communications Subcommittee last Thursday (June 11) on how best to speed up the Commission's pre-hearing and protest actions.

Plumping for its own proposal (S 1733), the FCC, through Comr. Rosel Hyde, urged that it no longer be required to send McFarland letters to all applicants and interested parties prior to hearings. FCBA spokesman Percy Russell testified against the proposal, maintaining that there are many instances where McFarland letters speed up Commission processes.

J. Roger Wollenberg urged the committee to accept, instead of S 1733, its own proposals (S 1898) for amending Secs. 309 (protest provision) and 405 of the Communications Act. Both parties agreed that the hearing and protest procedure place undue burdens on the Commission but disagreed as to how best to solve this particular problem.

FCBA recommended that a pre-grant procedure be instituted limiting hearings to instances where material and substantial questions of fact are presented. The FCBA bill would provide "a method for reducing the possibility that the Commission will act erroneously by providing for consideration of objections before, rather than after, the Commission acts," Mr. Wollenberg said. "The effectiveness of a pre-grant procedure clearly depends upon an adequate system of notice which will permit interested parties to be apprised of the pendency of an application and give them an opportunity to invoke the procedure," he said.

Such a procedure will give the FCC ample discretion to dispose of frivolous objections, Mr. Wollenberg maintained.

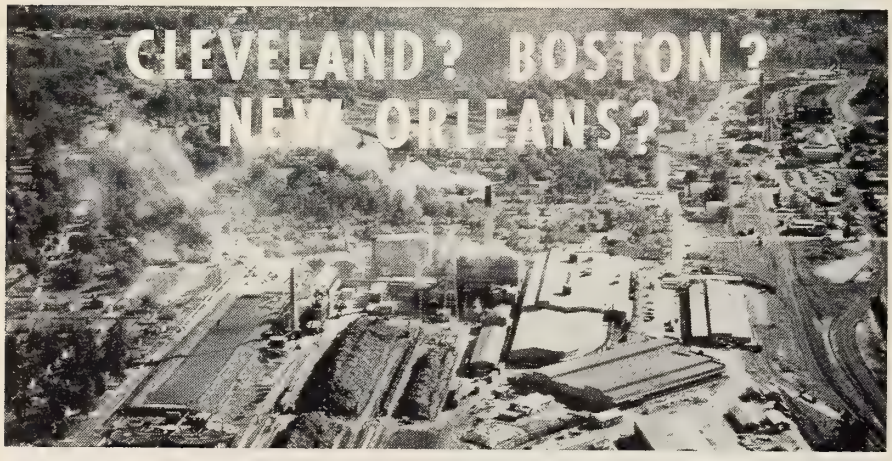
Sen. John Pastore (D-R.I.), subcommittee chairman and the only senator present, said that he was "very much impressed" with the FCBA argument and asked Comr. Hyde and the FCC to negotiate an acceptable compromise. Referring to FCBA testimony on another bill two days earlier, Comr. Hyde said the lawyers were opposed to broader use of the FCC Office of Opinions & Reviews because the staff might "impinge" upon a commissioner's thinking.

Hyde Takes Exception • "The commissioners are so weak that they can't be trusted to make their own decisions . . ." according to the FCBA, Comr. Hyde said, and in that atmosphere there could be no compromise. Mr. Russell, who had given the earlier testimony referred to by Comr. Hyde, denied that he had made such an inference.

Comr. Hyde said that he was in agreement with the bar association objectives but doubted the bill, as drafted, would accomplish the desired purposes. He said the protest provision has caused great delay and harm and that any desired benefits have more than been outweighed.

"Sophisticated" lawyers and applicants use the section to cause delay and it works a hardship on the little man, Comr. Hyde maintained. Mr. Russell, in stating FCBA objections to S 1733, said that any safeguard of the public interest will in certain instances cause some delay and that, in many instances, McFarland letters actually eliminate the need for hearings.

Mr. Wollenberg, in urging acceptance of S 1898, said that it would greatly cut down petitions for rehearing of grants.



No Action This Session • Sen. Pastore said that neither proposal stood a chance for passage during the present session of Congress and strongly urged the two sides to compromise their differences. Through unanimity, he said, the bill stood a good chance of passage.

Comr. Frederick Ford, the only other commissioner present, said that he had intended to outline the objections to S 1898 but would withhold them in light of Sen. Pastore's statement the bill would not be acted upon this session. He said that he personally was opposed to the bill in its present form.

Also Thursday, Comr. Hyde urged the committee to act favorably on S 1737, which authorizes the FCC to fine licensees up to $500 for certain violations in the common carrier and special service fields.

Donald K. deNeuf, vice president of Press Wireless, rose from the audience to protest two provisions of this bill. He asked why broadcasters also would not be subject to fines under the bill and Comr. Hyde said that such a provision is not needed.

Associated With Taxicabs • Mr.

deNeuf protested that Press Wireless is in the position of leasing its facilities and cannot control violations of the lessees and that practically all violations are unintentional and technical in nature. "I don't understand why we have to be classified with a taxicab," he said.

Comr. Hyde said the fines were proposed because the FCC did not want to use the only other sanction within its power—revocation of licenses. The legislation is needed to take care of common carrier licensees who disregard Commission orders and inquiries, he said.

The subcommittee, with Sen. Strom Thurmond (D-S.C.), held hearings Tuesday (June 9) on five other FCC-proposed amendments to the Communications Act. The bills and their provisions:

S 1734: Strengthens the law regarding ex parte contacts by prohibiting any person from making an off-the-record presentation to the FCC, individual commissioners or members of the staff.

S 1735: Prevents commissioners from accepting honorariums.

S 1736: Eliminates the requirement that applications be submitted under oath.

S 1738: Redefines the duties and functions of the Commission review staff, giving commissioners more freedom in its use.

S 1740: Gives FCC authority to regulate charges of common carriers for micro wave and point-to-point services (present authority covers only wires).

As stated earlier, Mr. Russell testified in opposition to S 1738. He said the FCBA favored S 1734, S 1735 and S 1736 but took no position on S 1740.

Unduly Restrictive • Comr. Hyde stated that Sec. 5 (c), which defines the duties of the review staff, is "unduly restrictive" upon the Commission. He said the bill would in no way "water down" the commissioners individual responsibilities.

In written statements submitted for the record, Comrs. Robert Bartley and Frederick Ford entered statements in the record recommending total repeal of the restrictions on usage of the review staff.

Mr. Russell maintained that "the present bill is unwise and does not deal with the heart of the matter. . . . It would permit the Commission to have a recommendation that nobody would know about."

Comr. Hyde retorted that "We are not asking for any opportunity to consider secret and undisclosed reasons . . ." for reaching a decision.

In Rochester
THE PEOPLE
will tell you . . .

WHEC is the radio voice of AUTHORITY In responsible, comprehensive News Coverage, presented by a staff of trained newsmen, backed by the complete staffs of Rochester's two daily papers—which, like WHEC, are owned by the Gannett Company . . . an AP subscriber, supplemented by the Gannett News Bureaus in Washington and Albany and on the national level by CBS News.

WHEC is a FRIENDLY voice Because we believe in the warm personalities of our staff. Rochester's most widely read columnist, Henry Clune, wrote of morning man Ed Meath ". . . he dearly loves his audience . . . he gets close to his people . . . that's the secret of his rousing success." And Meath starts the WHEC day.

WHEC offers VARIETY In programming with favorite local personalities and the best from CBS . . . always GOOD TASTE with a select schedule of pop, standard and concert music.

ADD TO THIS, CHANGING IDEAS FOR CHANGING LISTENING HABITS: In 34 years, we've never rested on our award-winning laurels! Our 1959 daytime schedule has a bright NEW feeling with a welcome hour of luncheon music and news at noon . . . a bright NEW afternoon personality in Jack Friel . . . a NEW Saturday morning record show for the "born to dance" set!

IN ROCHESTER, N. Y., WHEC IS A THOROUGHLY BROAD INVITATION TO ANYBODY'S LISTENING

NBC asks dismissal of Philco's protest

NBC last week asked the FCC to dismiss a protest filed by Philco Corp. in August 1957 against renewal of licenses for the network-owned WRCV-AM-TV Philadelphia. NBC's filing was a reply to Philco's request to the FCC the previous week to "expedite" a court-mandated hearing on the renewal (BROADCASTING, June 8).

The network last week said it doesn't oppose expedition but feels the four months since the mandate by the U.S. Appeals Court in Washington is not an "unreasonable" period of time. NBC asked dismissal of the Philco protest for its "failure to specify with particularity" facts to show the grant was improperly made and asked the FCC to find, after oral argument, that even if the facts alleged in the protest were proved there still is no ground for setting aside the license renewal action.

NBC said the present proceeding is not the proper forum for determining questions of must-buy and option time policies of the network, brought up by Philco. NBC noted Philco made no comments in the Barrow hearings on these questions.

The network added that it has discarded must-buy practices, that the FCC has found option time reasonably necessary, that the Barrow report recommends continuation of the "first-call" relationship of affiliates with networks, that public hearings have begun in the FCC's network program inquiry and that the Barrow report indicated the present compensation practices of networks do not require more specific rules.

Antitrust Scoreboard • Replying to Philco's summary of court litigation involving RCA-NBC, the network said that of 11 antitrust actions against RCA-NBC, six have been terminated and there has been no adjudication of facts. RCA-NBC never admitted violations of antitrust laws and Philco puts the "most strained and sinister interpretation" on the termination of these litigations, "exaggerating some facts, suppressing others," NBC said.

The civil and criminal suit on RCA patent licensing didn't involve NBC at all, the network said. NBC added that RCA merely signed a consent decree with Justice to alter certain practices, never admitting violations. RCA pleaded *nolo contendere* in the accompanying criminal action, paying $25,000 fines each on four counts. NBC said it's apparent that problems between Justice and RCA in patent licensing are settled since in a subsequent case RCA was named as a co-conspirator but not as a defendant.

NBC took exception with Philco's statement that litigation between RCA and Zenith had been settled "just recently." The settlement was in September 1957, NBC noted.

The network said it is appropriate for the FCC to consider RCA antitrust litigation if this has reflected on the qualifications of NBC as a station licensee, but said it feels the "facts and FCC precedent compel" the conclusion that no "adverse effect" on NBC should result; that the litigation has no relation to broadcasting or NBC conduct of its broadcasting business. NBC cited an FCC finding holding that Westinghouse Radio Stations Inc. (now Westinghouse Broadcasting Corp.) was not affected as a broadcast licensee by litigation against the parent Westinghouse Electric Corp.

Magnuson proposes new agency building

Sen. Warren Magnuson (D-Wash.) has proposed to the Senate Appropriations Committee that the FCC and seven other federal regulatory agencies in Washington be housed in a single new building. Present agency housing has long been "unsuitable, inefficient and generally unsatisfactory from the standpoint of the government, the related industries and the public," Sen. Magnuson said.

"With few exceptions, the facilities are wholly incompatible with the quasi legislative, quasi judicial functions for which the agencies are responsible." Sen. Magnuson, chairman of the Senate Commerce Committee and the Independent Offices Subcommittee of the Appropriations Committee, pointed out that one building for the eight agencies would save at least $300,000 yearly in service functions alone.

"The fact the commissions are widely scattered results in deplorable inconvenience to persons who have business with the agencies," the senator stated. The FCC currently is housed in the Post Office Bldg. at 13th St. and Pennsylvania Avenue.

In addition to the FCC, other agencies which would be placed in the proposed building are Interstate Commerce Commission, Federal Power Commission, Federal Trade Commission, Civil Aeronautics Board, Federal Maritime Board, Securities & Exchange Commission and the National Labor Relations Board. All of the agencies except two are under Sen. Magnuson's Commerce Committee.

Sen. Magnuson asked the General Services Administration to investigate his proposal and report back to the Appropriations Committee by January 31, 1960.

FCC & OVERSIGHT Panelists to weigh Commission problems

FCC Chairman John C. Doerfer heads a 13-man panel which will discuss four Commission problems before the House Legislative Oversight Subcommittee tomorrow (Tuesday). Other panelists will include FCC staffers, practicing attorneys and broadcasters.

Rep. Oren Harris (D-Ark), chairman of the subcommittee, said last week that the congressmen hope to "receive information which will be of great assistance in ascertaining the nature of important administrative problems and in determining what recommendations to Congress are necessary to protect the public interest." The four topics to be covered:

"1. What legislative or administrative measures have been or should be taken to preclude attempts to influence Commission members or employes by means which do not afford a fair opportunity to interested persons materially affected by Commission action to present their case and at the same time preserve the necessary access by the Commission to information from the public, the regulated industry and others?

"2. The role of hearing examiners. Present strengths and weaknesses. What legislative measures should be taken to increase their stature and effectiveness?

Commission Role • "3. The role of commissioners and their immediate staffs and agency staffs, and the division of responsibilities. Present strengths and weaknesses. What legislative or other measures, if any, are needed?

"4. The efficiency of the Commission. What changes, if any, in the existing statutory provisions relating to substance or procedure are needed to enable the Commission to cope with the increasingly enormous volume of business coming before it?"

The FCC will present a 15-minute paper on each of the four problems with discussions to follow. In addition to Comr. Doerfer, General Counsel John FitzGerald, Chief Engineer Edward Allen and Chief Hearing Examiner James Cunningham will participate for the Commission. Practicing attorneys on the panel, all of Washington, include Donald C. Beelar, William C. Koplovitz and Ralph L. Walker.

Industry representatives who will be members of the panel include Donald H. McGannon, president of Westinghouse Broadcasting Co.; Ward L. Quaal, vice president and general manager of WGN-AM-TV Chicago; Robert D. Swezey, executive vice president and general manager of WDSU-AM-TV New Orleans; Joseph H. Ream, CBS Washington vice president; Robert L. Werner, RCA, and E. B. Crosland, American Telephone & Telegraph Co.

The FCC is one of six agencies which will appear on separate days before the subcommittee, all discussing the same four topics. The Federal Trade Commission has been scheduled for Thursday (May 18). Next Tuesday and Wednesday (June 23-24), a general round-up discussion of the four topics will be held by the subcommittee. Participants will include representatives of bar associations, trade associations and the Federal Trial Examiners' Conference.

'Citizen' protest filed against KLX sale

A "citizen's" protest against the FCC's approval last month of the sale of KLX Oakland, Calif. (now KEWB) by the family of former Senate Minority Leader William F. Knowland (R-Calif.) to Crowell-Collier Publishing Co. for $750,000 (BROADCASTING, May 11) has been filed by Sheldon F. Sackett, who owns KOOS Coos Bay, Ore., and a string of daily and weekly newspapers in California and Oregon.

After FCC approval of the sale, Crowell-Collier consummated the KLX purchase and now is operating it with the call letters KEWB (BROADCASTING, June 8).

Mr. Sackett's *pro bono publico* (for the good of the public) petition—not an "economic injury" protest—charges the Knowland family with, among other things, obtaining control of KLX by fraud in 1933. He revealed in the petition that he intends to start a daily newspaper in Oakland which will compete with the *Oakland Tribune*, owned by the Knowlands, and with the radio station. Mr. Sackett's sale of KROW Oakland (now KABL) to the McLendon Corp. for $800,000 was approved by the FCC last month (BROADCASTING, May 4).

FCC St. Louis stand

The FCC announced on the June 5 deadline for asking Appeals Court to reconsider the court's St. Louis ch. 2 remand that it did not intend to pursue this course. There was thought the Commission would ask U.S. Court of Appeals to reconsider with a full nine-judge court, but legal aides are now convinced the Commission can handle this as another *ex parte* case. The appeals court told FCC to look into charges there were off-record representations in the rule-making proceedings which led moving ch. 2 from Springfield, Ill., to St. Louis.

NINE YEARS LATER AND NO NARBA

Hyde sees trouble unless broadcasters get behind treaties

Just suppose there were no traffic rules for the streets and highways of the nation.

Drivers would be on their own. Some would drive on the right side of the road, some on the left. They would park anywhere they liked. They would race through intersections. An erstwhile one-way street would be considered a challenge for two-way driving.

This is the gloomy picture for radio broadcasting implied by a sober-minded FCC commissioner who has worked arduously at many an international conference. He is worried at the lack of backing to get the U.S. Senate to ratify the new North American Regional Radio Agreement and its concomitant U.S.-Mexico radio agreement.

NARBA has been before the Senate for nine years; the Mexican agreement for two.

In this exclusive interview, FCC Comr. Rosel H. Hyde voices his concern.

Mr. Hyde, you have been active in representing the United States in many international conferences. Which one was the most important in your career?

NARBA, of course. That's the North American Regional Broadcasting Agreement. It regulates the use of radio broadcast frequencies in the countries of the North American region.

What are those countries?

U.S., Canada, Mexico, Cuba, Dominican Republic and the Bahamas.

Don't we have a separate treaty with Mexico?

Yes. We have two agreements with our neighbors. One is the 1950 agreement, the NARBA treaty. Mexico is not a party to that agreement. In January 1957 after many meetings we signed a separate treaty with Mexico.

What's happened to those two treaties?

They are before the U.S. Senate. As you know, ratification requires the approval of the Senate by a two-thirds majority.

You mean the NARBA treaty has been before the Senate for nine years?

Yes. After the first effort, there was no push to get the Senate to ratify the NARBA treaty because Mexico wasn't a part of it. Now that we have a separate treaty with Mexico, it's very important to the public and the broadcasting industry to take an interest in them. Unless those who are concerned take an interest, the United States could lose important benefits.

What are these benefits? Why must we have treaties with our neighbors?

The benefits are in maintaining order and stability in the spectrum. You understand, of course, that radio waves do not respect national boundaries. They flow over them as if they weren't there. In order to bring some order out of this chaotic condition—that is what would be chaos without regulation—it is necessary for us to sit down with our neighbors and agree upon methods of using frequencies, the powers to be used, and the places they are to be used. In this way we can mesh or coordinate our national radio requirements to avoid objectionable interference with each other.

It's similar to what happened in the United States in 1927. We had to enact legislation in order to maintain discipline in the use of channels.

Have there been past treaties?

Yes. The first treaties were brought about by exactly the same conditions that required the Radio Act of 1927. American broadcast stations were suffering interference from stations outside the country and when they failed to work out interference problems on an informal, private basis, they asked the government to help protect them. The first formal multilateral agreement came in 1937. It was negotiated in Havana.

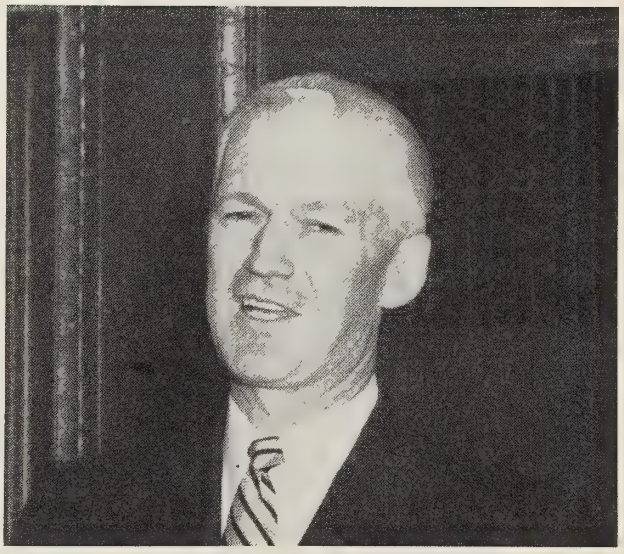
How long did that run?

For five years. But it didn't become operative immediately. It was signed in Havana in 1937, but it was not ratified by all the major countries concerned until 1940.

What caused that delay?

The ratification did not take place until there were additional negotiations with Mexico. These resulted in an exchange of notes, the so-called "Gentlemen's Agreement."

Did it work? Did it do the job?



Yes. After the signing of the gentlemen's agreement, an engineering conference was held in Washington. That was January 1941. At that time conditions were worked out for the implementation of NARBA and it became operative in March 1941. The five year period ran from 1941.

All right. In 1946 the first NARBA expired. What happened then?

There was a preliminary engineering meeting and then an official formal meeting in 1946. Since the time was at hand when the prior agreement would expire and it seemed impractical to look for a new agreement in time to succeed the old NARBA, it was decided to work out an interim agreement. This was negotiated in the 1946 meeting. It was a *modus vivendi*, in effect extending the 1937 agreement as implemented by the 1941 engineering conference.

It was just a continuance of the first NARBA?

Not exactly. There were some changes. Cuba received certain new assignments. . . .

Rosel H. Hyde is the epitome of the government career official. An Idaho Republican, he entered government service in 1924 as a clerk in the Civil Service Commission. He moved over to the Federal Radio Commission in 1928, first as a clerk, then as an attorney. When the FCC was created in 1934, Mr. Hyde remained as an attorney, was appointed assistant general counsel, then general counsel. He was named a commissioner in 1946 and reappointed in 1953. His present term expires June 30 this year. On June 4 he was confirmed by the Senate for a third seven-year term. The earnest and affable Mr. Hyde was chairman of the FCC from April 18, 1953, to Oct. 4, 1954.

How long did the *modus vivendi* last?

Three years. This was an executive agreement which, by its terms, was to expire in 1949.

Then you had another NARBA conference?

We had our first conference on this in Montreal in 1949.

With all countries attending?

No. Not all. Mexico and Haiti did not attend, although the Mexican government had an observer present.

Is this the NARBA which is now before the Senate?

Yes. The Montreal conference was followed by a meeting between United States and Cuban representatives in Havana in early 1950, and finally by all North American countries, save Haiti, in Washington in November 1950. The new NARBA was signed in Washington then.

Was it signed by all countries?

No. Mexico withdrew before the conclusion of the conference.

Oh, I see. We negotiated a bilateral agreement directly with Mexico. Is that it?

Yes.

But why didn't the Senate ratify the NARBA agreement—the 1950 treaty?

There were certain objections. The clear channel group opposed the 1950 NARBA and they were supported by the national farm organizations. This was brought out in the 1953 hearings before a subcommittee of the Senate Foreign Relations Committee.

Why did the clears object?

Their objections were based on the fact that under the new agreement certain primary U.S. clear channels would be used in Cuba on a secondary basis. These constituted a limitation on full U.S. use, it was felt. Also the clear channel group felt it was not wise to enter into an agreement with other countries when Mexico was not a party to it.

Do you think they were right?

I would not quarrel with their contention that it would be better to have no Cuban stations on the American clear channels and that it would have been desirable to have an agreement with all countries of the region. However, there has to be a mutual recognition of the interests and needs of each other in order to have agreement. This is not the sort of thing that you try before some impartial arbiter. The terms of an agreement have to be what all the parties agree to. We have far more to lose in case of a breakdown than any of the other countries. Don't forget we have three times as many stations as all our neighboring countries put together.

Can we pursue that? What do you mean "we have far more to lose"? Just exactly what would happen if this NARBA treaty is not ratified?

A brief answer would be that there is the risk of a general deterioration of engineering standards. I don't think broadcasting is going to be wiped out. But if one country begins to license stations without regard to others, who can tell where it would end?

Don't forget every sovereign nation claims the right to use every channel. If we assert that right, our neighbors will assert the same right.

But wouldn't that be cutting off our nose to spite our face? I mean that would be true of each country. Can't we just agree to limit interference?

There are various ideas on what constitutes interference. In our country we adhere to a rather high degree of engineering efficiency. We have found it desirable to insist on high standards in order to get good transmission and reception quality out beyond the confines of big cities.

Mr. Hyde, you spoke of deterioration of service. Just how would this show up?

The effects would vary according to the type of service. The extended service of the clear channel stations could be largely destroyed. These signals are of very low order and a transmitter of relatively low power in a neighboring country could impair this skywave signal to such an extent as to make it almost useless.

What distances are you talking about—100 miles, 200, 300?

It could impair reception as near as 50 miles from the station to points hundreds of miles away. It would affect the service of people in little cities and towns which do not have nearby stations.

Well now, what type of agreement prevents widespread interference now? There's no general treaty in existence today. Why doesn't Mexico or Cuba put on any station they want to any place they want to?

The main reason is to protect the negotiations. You maintain the *status quo* in order to keep faith with your signature on the agreement.

You mean a sort of gentlemen's agreement to maintain order?

I believe it is quite proper and within our legal responsibility to refuse to license stations in a manner that would be inconsistent with agreements we have signed while they are before the Senate. But this is the kind of a situation which may not go on indefinitely. Eventually the point will be made either in the prosecution of an application or in an attack on some action

TERRE HAUTE, INDIANA

Represented Nationally by Bolling Co.,

Los Angeles - San Francisco - Boston - New York - Chicago - Dallas

. . . Canada and Cuba have ratified 1950 NARBA but are not bound because of U.S. failure to follow suit . . . present 'gentlemen's agreement' could mean trouble . . .

Interview with

Rosel Hyde

we've taken that we are violating the rights of an applicant and that we have no legal basis to refuse a frequency that is applied for.

Well, what's causing the delay in ratification?

The lag in ratification, I think, is lack of interest by the broadcasters generally, and the objections of a part of the industry.

Whom are you talking about when you say "part of the industry"?

The one objection that came up at the very brief Senate hearing on the Mexican agreement was voiced by the daytime broadcasters. They objected to ratification because the agreement does not permit U.S. operation into the evening hours on Mexican clear channels. But I want to point out that neither does it permit Mexican stations to operate into the evening hours on U.S. clears.

Do you mean to say everyone else is in favor?

I would say so. The American delegation during the conferences and even prior to the negotiations was in close touch with interested members of the industry. Every participant agreed that, in the overall interest of the United States, we would do well to sign the agreement. This included representatives of the daytime broadcasters.

Does the lack of ratification embarrass the Commission in its normal duties?

This is something that could become more difficult with the passage of time. The question is how long can you go ahead and give recognition to understandings with foreign governments if the treaties are not ratified. Also, we are foreclosed from taking advantage of direct benefits which these treaties provide. For instance, under the new agreement we could license stations to operate with 5 kw daytime on Mexican clears. There is a limit of 1 kw now under the gentlemen's agreement, which, by the way, has no expiration date. Now the new agreement would replace the gentlemen's agreement and it would constitute a codification of all understandings with Mexico.

The point you are making is that the opposition of the daytimers works against them because, if the Mexican agreement were ratified, U.S. daytime stations would be permitted to go to 5 kw.

That is right. We cannot authorize such increases now without repudiating the gentlemen's agreement of 1940. It is an obligation of the United States. But it would become possible to do so if the gentlemen's agreement were superseded by the new agreement.

Have any of the North American countries ratified the 1950 NARBA?

Yes. Canada has ratified, with certain reservations which we have acquiesced in. Cuba has ratified.

Has Mexico ratified the bilateral agreement with us?

Mexico has not ratified. We have every reason to expect, however, that it will proceed expeditiously if we do.

Since we haven't ratified either of the treaties, the other countries are not bound by their terms, are they? Have any of them jumped frequencies, or boosted power beyond . . .?

The only instance in which we have out-of-band operation, or operation contrary to the standards of the agreement, is in the case of Cuba. Cuba has stated very frankly that it does not consider itself bound by the previous agreement. When we have pressed them to eliminate some of the sources of interference to our stations they have reminded us that while they have ratified the new agreement we have not.

So, although Cuba ratified the new NARBA, it has been operating off-base as it were?

That is true, but you will understand that the agreement does not become enforceable until both countries have ratified.

Well, in other words, because we haven't ratified it has given them the opportunity to disregard our use of frequencies?

That's right. Our failure to ratify has given them some argument for the position they take. Furthermore, there are certain changes—a limited number—which we were to make to accommodate certain Cuban operations. This we have been unable to do because of the lack of ratification.

Oh, they are operating under what they consider their rights under the new NARBA. . . .

No sir. They have a number of operations underway which could not be accepted under the standards of the new NARBA. It should be mentioned that most of the operations which have been giving us trouble were authorized in Cuba after the expiration of the old NARBA and before the signing of the new agreement of 1950.

Are these operations along a certain area or direction or are they all over the map?

Interference from these operations is more noticeable in the southeast part of the United States, because of U.S. proximity to Cuba, particularly on regional and clear channels.

Does this interference affect regionals and local stations too?

Oh yes. Actually there are far more stations of these classes that are vulnerable to the unregulated use of the spectrum than clear channel stations. If there is one class that is particularly vulnerable it would be regional stations. Many regionals operate with very expensive, highly directive antennas. The benefits of these very expensive directionals would largely be destroyed by the unregulated use of channels.

Would local stations—local full time stations—suffer at night without a gentlemen's agreement or a treaty?

They could suffer. For instance, the treaty provides maximum powers for local stations. Now in the case of Mexico there are provisions which would permit an increase in power on both sides under certain conditions.

In the case of Canada, certain changes in power are contemplated, with the understanding, however, that radiation towards the United States would not exceed certain standards. Obviously, a high powered foreign station on the border operating on the same frequency where we have 250-w stations could create severe dislocations.

I am looking at an allocation map. Here is WOOK Washington on 1340 kc. This station has limited coverage at night. Would it be further limited if Mexico and Cuba permitted their 1340 kc stations to increase power?

Yes. The effects would be something like this: Each additional signal adds interference to stations in the general area. Right now the Cuban stations are

operating under power limitations. Let's say the treaty is abandoned and Cuba increases the power of those stations. We could, perhaps, compensate by increasing the power of ours down in Florida. But when this increase occurs, in order to regain service area lost because of the Cuban increase, the Florida stations will impinge on stations to the north. And when those in the north increase their power to compensate for their loss, you get a chain reaction, you see.

Because of the sizable areas of interest in our country, we find it appropriate to protect signals for considerable distances. There is less need for that in Cuba or in the Dominican Republic.

In Mexico, they have the same kind of requirements in many respects as we do. Mexico has great areas of rural population. So has Canada. So those two countries have an interest in common with us to protect rural signals from interference. But in the absence of international agreements all such rural service loses international protection.

In other words, we're opening up a Pandora's box?

Yes. It's a situation where we have a tremendous stake and very much to lose. I still think radio is an important national asset and it would be folly to destroy the channels of nationwide communication.

Maybe fm is the answer.

Fm certainly can provide service, but I do not think it's good administration to abandon one service with the thought that we'll start over again in another part of the spectrum. You must remember there are more than 100 million air receivers in the hands of the public. Also listening habits are not something you change overnight. While fm should have much further development than it has had up to now, this is no reason to abandon appropriate engineering standards in am.

Is anyone trying to prod the Senate to move on the treaties?

There certainly has not been sufficient recognition of the present danger of loss. It seems not to have attracted the attention the subject deserves. Unless members of industry recognize the situation and undertake to develop an awareness of it, I'm afraid the United States could lose a very great and valuable asset, solely by default.

Isn't it possible to get the Senate to move on this, even though there are objections—in fact only a single objection?

The problem is that treaties require a two-thirds vote for ratification. If an air of conflict is created, there is not much incentive to push the matter.

Doesn't the FCC have a rulemaking proposal to permit daytimers to extend their hours of operation, from sunrise to sunset or 6 a.m. to 6 p.m., whichever is longer?

The Commission's rulemaking is to study the proposal that we allow extended hours of operation on daytime stations. This is not confined to Mexican clear channels at all. There are six Mexican clear channels. The Commission's proceeding involves all of the frequencies of the broadcast band.

How many daytime stations are there?

Approximately 1,300.

How many on the Mexican clears?

There are between 800 and 900 daytimers on regional channels. There are about 250 on the six Mexican clear channels.

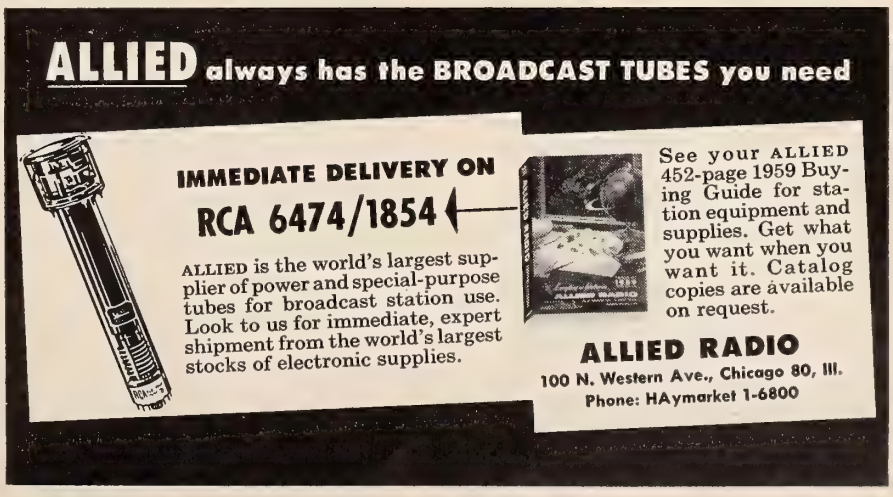
Well, sir, what can be done?

The answer is, I suppose, that the people who stand to lose the most—and that's most of the over 3,000 broadcasters in this country—have got to realize that these treaties should be ratified. They must use their influence, if you please, to bring to the attention of their senators, the vital need for some type of international agreement. Otherwise broadcasters of our country and the public stand to suffer irreparable loss. It is that serious.

Keene libel settled

The year-long legal bickering between Princess Theatre of Berlin, N.H., and WKCB, that city, was settled June 6. WKCB had been sued for libel after an editorial broadcast. Its operation was completely disrupted for a while when the writ of attachment, first step in a New Hampshire damage suit, captured the WKCB bank account and many of its accounts receivable.

Many stations and organizations raised a fund of $10,000 which was placed in escrow for release of the attachments. Among stations were WWLP Springfield, Mass.; WMCA New York, and KPOL Los Angeles. Richard P. McKee, WKCB president, said he still believed in editorializing despite the legal troubles. He voiced the hope state legislatures having writ of attachment laws would examine these laws so they may not be used to close up a newspaper or broadcast station prior to court action on libel or slander suits.



Mack defense begins; acquittal move denied

The defense in the criminal conspiracy trial of former FCC Comr. Richard A. Mack and his friend Thurman A. Whiteside was denied motions for acquittal last week and began presenting its own side of the case. The government completed its direct evidence on Tuesday (June 9).

Defense counsel in moving for acquittal held the government failed to make a case strong enough to present to the jury. The defense also moved to strike from the record the testimony of various witnesses. This, too, was denied by Federal District Judge Burnita S. Matthews in Washington where the trial is being held.

Nicholas J. Chase, attorney for Mr. Mack, told the court last week that Mr. Mack has been advised by two physicians that he faces permanent injury to his health if he appears on the witness stand in the trial. Mr. Chase made this statement in arguing for admitting various FCC documents offered by Mr. Mack, which he claims he relied on in voting in favor of Public Service Tv Inc., a National Airlines subsidiary, for the award of ch. 10 in Miami. Judge Matthews at first had held the documents could be admitted only if Mr. Mack testified he based his vote on them, but reversed herself and admitted the evidence after the health argument.

Mr. Chase earlier in the week had argued it was no more wrong for Mr.

Mack to accept financial help from Mr. Whiteside than for former Presidential Assistant Sherman Adams to take gifts from Bernard Goldfine. Mr. Adams resigned after testimony before the House Legislative Oversight Subcommittee that he accepted gifts from Mr. Goldfine, who at the same time had business before a government agency. The defense holds that money paid by Mr. Whiteside to Mr. Mack during the latter's tenure on the FCC merely represented the continuation of a relationship between the two friends that had existed before Mr. Mack joined the FCC and that the payments were not made to influence Mr. Mack's vote.

The leadoff defense witness last week was Mrs. Anne Hutterly, chief FCC minutes clerk, who testified on the documents which the defense claims Mr. Mack relied on in voting for PST in February 1957.

Sees global tv soon

An instantaneous worldwide telecast will be achieved in less than 2½ years, James C. Hagerty, news secretary to President Eisenhower, said June 8 in a commencement speech at Allegheny College, Meadville, Pa. He said he had "about a 40% chance" of helping arrange the telecast before President Eisenhower's term expires. Earth satellites would be used to relay the tv picture around the globe. The President's voice was bounced off the moon June 3 by radar from Millstone Hill, Westford, Mass., and picked up by Prince Albert Radar Lab., Saskatchewan. The Eisenhower message of 112 words was sent to Canadian Prime Minister John G. Diefenbaker and the Canadian people.

• Government notes

• Jack R. Poppele, for three decades chief engineer of WOR New York and onetime head of the Voice of America, is active in the radio management field again as president of Atom Broadcasting Corp., which has been granted assignment of WAUB Auburn, N.Y., by FCC a fortnight ago. Grant was made as the latest Commission decision in a complex case involving charges against WAUB on the assignment of its construction permit as well as the grant of an application for additional time to construct, leveled by WMBO-AM-FM Auburn. The FCC noted that "substantial construction has been expended toward the completion of the station," by seller Herbert P. Michels, who is to receive $5,400 for out-of-pocket expenses from buyer Atom Broadcasting and is to retain a 25% interest plus a vice presidency in Atom.

• Practically the remainder of this calendar year has been opened for the filing of comments on the subject of fm stereophonic multiplexing as part of the FCC's inquiry into possible wider uses for fm subsidiary communications authorizations. The Commission has granted a request by Electronic Industries Assn. and extended the time for filing of comments from June 10 to Dec. 11. Comr. Robert Bartley dissented in the Commission decision.

• Tucumcari Television Co., which has been battling for a ch. 70 tv translator station in San Jon, N.M., to translate programs of ch. 10 KFDA-TV Amarillo, Tex., (BROADCASTING, May 11), has lost the next to last round of its fight. The FCC directed preparation of a document which would deny Tucumcari's application for the translator. This action followed an oral argument which in turn had come after an initial decision of last March denying the Tucumcari bid on the issue of "unauthorized operation" among others.

• Educational ch. 9 KQED (TV) San Francisco, Calif., will be allowed to broadcast a single still shot, a record album cover, while the program *Portrait in Music* is broadcast aurally, according to an FCC rules waiver last week. The waiver will last for a year. Three Commissioners dissented in this case: Robert Bartley, T.A.M. Craven and Frederick Ford. Comr. Bartley was quoted as observing that "picture shows should move."

• CBS Radio last week filed comments supporting NAB's proposal to the FCC asking changes in rules so that the identification of the sponsor may be withheld in "teaser" commercials (BROADCASTING, May 25). CBS Radio said advertisers seem to be showing "more interest" in this form of advertising.

PROGRAMMING

A NEW $64,000 QUESTION

What's in the New York grand jury report on tv quizzes and why is it under wraps?

The long-anticipated New York grand jury report on alleged scandals in tv quiz shows went in the form of a presentment to General Sessions Judge Mitchell D. Schweitzer last week—who promptly put it under lock and key. The resulting howl at the imposed secrecy was heard on front pages across the land.

His action in sealing the report was attacked immediately both by the jury foreman and the assistant D.A. who prepared the case, each alluding to serious charges therein which they felt should be made public. After it was disclosed that parties to the case had challenged the presentment's validity even before its existence was made known, the district attorney's office said it was investigating a possible "leak" of the report's contents.

Judge Schweitzer indicated he would hear arguments on accepting or expunging the presentment before June 26.

The legal issue involved is whether a presentment (which is a statement of the jury's opinions on a given situation, as distinguished from an indictment, which charges violations of law) has standing under the laws of New York. Attorneys who opposed the presentment say it does not when a public official isn't involved.

What Precedent? • The district attorney's office, on the other hand, says it knows of no precedent for a presentment being challenged. Standard procedure, the D.A. said, would be to make the report public and later seek to have it expunged.

That was what the challengers wanted to avoid. James P. Durante of Lewis, Durante & Bartel (representing Entertainment Productions Inc., which produced the late *$64,000 Question* and *Challenge*, said: "If you're called a thief, you can defend yourself in court, and if you're acquitted you're vindicated, but with a presentment you don't have any recourse."

J. Norman Lewis, senior partner of the same firm, emphasized also that the briefs challenging any presentment which the jury might make had been filed two months prior to the report, with no knowledge that a presentment was forthcoming but as a routine "just in case" policy. He also stressed that his firm's briefs were not the only ones filed at that time, any others had not identified themselves late Thursday.

Jury foreman Louis M. Hacker, former dean of the School of General Studies at Columbia U., said the report covered matters of "large public interest," and that "charges have been

made in the course of which large sums as prizes were received by those who participated in these frauds." (Observers, noting the grand jury ended its work without handing down any indictments, assumed Mr. Hacker did not use the word "frauds" in a legal sense.) He continued to say that, "Obviously, moral questions affecting society, if not legal ones, are involved here." He said the public would benefit from publication of the report, and added that it affects the whole tv industry.

American Hoax • Assistant district attorney Joseph Stone said the presentment "uprooted a tawdry hoax which was perpetrated on the American people."

CBS-TV and NBC-TV, the two networks who carried programs principally involved in the grand jury probe, made it clear they had not joined in challenging the presentment, saying only that they had cooperated with the grand jury and would continue to do so. Most of the programs involved have long since left the air, largely because of publicity attendant to the grand jury's activities.

The only indictment to come out of the case involved Albert Freedman, a producer of *Twenty-one*, who was charged with perjury by another grand jury after denying he had furnished answers to quiz contestants.

Summer tv format

A study of summer programming on tv networks by the A.C. Nielsen Co. indicates that the continued use of the winter format with new material usually improves the share-of-audience figures for the program.

The Nielsen study covered sponsored network tv programs during July and August 1958. It aimed to determine the performance range of summer programming by measuring it against equivalent winter performance standards. The main conclusions reached by the study are:

• Summer re-run telecasts can maintain winter share-of-audience levels. Of the 47 programs using re-run episodes, 43 performed within 5%, or had better than winter share levels.

• Summer replacement programs, as a group, fell 18% below the share performance of the winter shows they replaced. Because of this, generally lower performance and fixed time costs, summer replacement programs must cost considerably less than re-runs to be as efficient, cost-wise.

Nielsen noted that in order to obtain useful performance comparisons, which would not be affected by seasonal viewing levels, share-of-audience figures were used throughout the study.

AFTRA, SAG TO STUDY MERGER

Cole named by two talent unions to report on union of radio-tv and film performers

The first step toward the long-discussed merger between the American Federation of Television & Radio Artists and the Screen Actors Guild was taken last week when David L. Cole, national consultant in labor affairs, was selected to conduct a study of the feasibility of a consolidation of the two talent unions.

The announcement of Mr. Cole's selection was made jointly by Clayton (Bud) Collyer, AFTRA president, and Howard Keel, SAG president. The merger study, they said, will begin immediately and Mr. Cole will make his report to the Merger Study Committees of the two unions. A date for submission of the Cole report was not revealed.

AFTRA holds jurisdiction over performers appearing in live tv presentations and in live and recorded radio programs. SAG is the representative of talent appearing in filmed shows. Many performers hold cards in both unions.

One area that is in dispute is videotape commercials. AFTRA has contracts with the networks and stations and SAG with film companies, who are active in tape. Last year AFTRA petitioned the National Labor Relations Board to hold a referendum among performers to select a single union to represent them in videotape commercials. NLRB heard lengthy testimony on the petition but has not reached a decision as yet.

The tape issue underscores the need for a merger, its proponents claim. They also point out that a consolidation would present a solid front by performers in negotiations with network, station and film company management. At the present time, merger supporters assert, management can "play off one union against the other."

A more ambitious merger of performer unions, encompassing the five unions belonging to the Associated Actors & Artists of America, was proposed seven years ago. A joint study was made by labor specialists at the U. of California at Los Angeles and Cornell U. over a period of more than six months but the recommendations proved unacceptable to the unions.

Mr. Cole is a former director of the Federal Mediation and Conciliation Service and currently is the permanent arbitrator under the national AFL-CIO no-raiding agreement. Mr. Cole, an attorney, has been active in industrial and labor relations work for more than 25 years. In 1955 he received the American Arbitration Assn.'s gold medal for "distinguished service in industrial relations."

17 to Community Club

Community Club Services Inc., New York, added 17 stations last month to its active franchised list bringing the total to more than 225. (CCS runs competitions for cash awards open to nonprofit charitable organizations.) The new stations:

KVMA Magnolia, Ark.; WFTL Ft. Lauderdale, Fla.; WBAT Marion and WKBV Richmond, both Indiana; WDOE Dunkirk and WTRY Troy, both New York; WAPA San Juan, P.R.; WCLE Cleveland, WKGN Knoxville, WMMT McMinnville, WMTN Morristown and WGNS Murfreesboro, all Tennessee; KDYL Salt Lake City, Utah; WHLL Wheeling, WSAZ Charleston and WCCM Parkersburg, all West Virginia, and WMVA Martinsville, Va.

MOVIES BLEED AT TV'S HANDS

Film men have lost millions: Sindlinger

The findings of a special report by Sindlinger & Co., Ridley Park, Pa., conclude that motion picture companies will have lost a total of $71.3 million net in the three years ending in 1959 because studios sold their theatrical product to tv.

The report, ordered by Theatre Owners of America and disclosed last week, explains the $71.3 million loss in this way: it is the difference between the amount the companies will have lost by the end of 1959 in film rentals and the amount realized from the sale of film to tv. The loss in film rentals is placed at $212 million for the three years and the income from tv is fixed at $141.7 million.

A Sindlinger official told BROADCASTING that the film rental losses were computed by collating and analyzing the leisure-time activities of people throughout the country. Information is gathered regularly by the Sindlinger field staff. During interviews, people tell how often they go to the movies, watch theatre product on tv and participate in other activities. From answers to questions, Sindlinger arrived at the number of people who stayed aways from movie theatres to watch theatre product on tv. The film rental, the spokesman said, is a fixed percentage of the theatre gross.

Year-By-Year Loss • The loss in film rentals for each of the three years was placed at $73.2 million in 1957; $80.6 million in 1958 and $58.2 million (estimated) in 1959. The income for the sale of product to tv by each year was reported as follows: $67.9 million in 1957; $43.7 million in 1958 and $29.1 million (estimated) in 1959.

Beyond 1959, Sindlinger estimates that the sale of films to tv will bring the companies an income of $21.4 million in 1960 and $56.7 million in 1961-68.

The report notes that the "sale of pre-48 libraries was a costly mistake for distribution, as well as hurting theaters." It claims that the millions in rentals lost through the sale of films to tv "would not only make a tremendous difference in the profit statements of the film companies but would pay for the production of a great number of 'blockbusters.'"

"And this," it adds, "doesn't even take into account the great toll on theater receipts and the number of theatres forced to close due to the competition of movies on tv."

The report observes that the impact on the nation's theaters of free motion pictures on tv is "in a stage of diminishing degree." It warns, however, that "the sale of any post-48 pictures in volume, of course, would change everything, based on past experience."

Epic approach

WMT-TV Cedar Rapids, Iowa, presented a video-taped history of the city to baptize its new Ampex equipment.

Seven Ages of a City, as it was called, was sponsored by the state's power company. Commercials were tied in by showing how electricity has played a part in Cedar Rapids' growth.

The history was presented as seen through the eyes of a painter, a poet and a composer. The painter, Edwin J. Bruns, was commissioned by industrialist-historian Sutherland Dows. Paul Engle, the poet, read his history of the city with background of the paintings plus slides, photos and film clips collected by WMT-TV creative supervisor Bruce Anderson. Philip Bezanson, of the U. of Iowa, wrote the music.

Baptist air awards

The American Baptist Convention, N.Y., meeting in Des Moines, Iowa, last week presented radio-tv awards to the following: Roy Rogers and Dale Evans, cited "For consistently identifying themselves with the Christian way of life on radio and tv"; Eugene W. Roddenberry, writer for *Have Gun, Will Travel,* for "skillfully writing Christian truth and the application of Christian principles into commercial, dramatic tv scripts."

Also to: Rev. John DeBrine, associate pastor of the Ruggles Street Baptist Church, Boston, for "producing *Songtime,* a radio program heard on some 80 stations"; Jane Goodman, director of radio and tv, Metropolitan Church Federation of Greater St. Louis, "for presenting the Christian message through an outstanding use of local tv."

CBS-TV News specials

Programming plans for the 1959-60 series of special informational tv programs produced by CBS News Div. have been revealed by Sig Mickelson, vice president of CBS Inc. and general manager of CBS News. In a speech before a meeting of Canadian broadcasters in Toronto June 2, Mr. Mickelson said that the full resources of the division will be mobilized in support of the series of hour-long shows which will be seen in pre-empted time on the CBS-TV nighttime schedule.

Discussing the series, Mr. Mickelson said: "These . . . specials will take up the momentous political, social and economic developments of the day. The contents, in the main, will be dictated by affairs of urgent national interest at the time of the broadcast. . . ." Two specials now being developed, he said, are: "The Population Explosion" and "600,000,000 Miles Per Hour." Signed as a co-sponsor of six of the specials is Bell & Howell Co., Chicago.

Producers who will be available for participation in the series include: Fred Friendly, Les Midgley, Av Westin, Don Hewitt, Paul Leviten, Al Wasserman and Steve Fleischman.

MGM-TV opens office in New York July 1

MGM-TV will open New York City studios about July 1 for expansion of its commercial and industrial films facilities, it was to be announced today (June 15) by George T. Shupert, vice president in charge of tv for Metro-Goldwyn-Mayer.

The New York studio, at 550 Fifth Ave., will augment the company's production plant at MGM Studios, Culver City, Calif. Construction and equipment plans are under the direction of Bill Gibbs, director of the industrial and commercial film division of MGM-TV. The eastern production unit will primarily be concerned with the completion of commercial and industrial films photographed at Culver City, it was reported. Clients include American Motors, Viceroy cigarettes, Camay soap and Owens-Corning Fiberglas.

Filmways' subsidiary

Filmways Inc., New York, a producer of tv film commercials and industrial films, last week announced the creation of a subsidiary, Filmways Television Productions, Hollywood, which will produce, finance and distribute tv film program series.

Martin Ransahoff, president, announced that Al Simon, vice president in charge of production for McCadden Productions, Hollywood, will be president of Filmways Television Productions, effective Aug. 15. McCadden has produced the *Burns and Allen Show, The Bob Cummings Show* and *The People's Choice.* Mr. Ransahoff said that sales and distribution plans for the new subsidiary now are being made.

UA-TV enters tv film syndication

As expected, United Artists television has entered tv film syndication. The move was announced last week by Bruce Eells, executive vice president of UA-TV, at United Artists' headquarters in New York.

Mr. Eels said *Tales of the Viking* will go into immediate syndication with regional sponsors first on the sales target. The series has a pre-sold title (UA's motion picture release, "The Vikings") it was noted.

It was revealed also that in shooting the motion picture more than $2.5 million was spent in props, an investment retained in the tv series. Since Ryna Productions shot more footage than was needed for the motion picture, the extra film is earmarked for the tv series. UA-TV expects to release *Hudson's Bay* in about two or three months for syndication followed by *Miami Undercover* after a similar time period. UA-TV plans to release about six tv series each year and will distribute for other independent producers if the product is satisfactory.

Since early this year, UA-TV has been gathering its syndication sales staff. Executive lineup of the syndication sales force:

Kurt Blumbert, manager of syndication operations; John J. Mulvihill, general sales executive (network-national advertiser presentations); Phil Williams, eastern division manager; William R. Dothard, regional sales manager of eastern division; John R. Allen, central division manager; Howard Christenson, regional sales manager of central division; Jack Gregory, western division manager; Myron A. Elges, regional sales manager of the western division.

Jingle lawsuit

Robert L. Sande and Larry Greene, producers of commercial jingles, have filed a $100,000 damage suit against Radio Recorders in U.S. District Court in Los Angeles. The suit charges that the defendant's new audio air check service (BROADCASTING, May 11) is a threat to them and other producers of station IDs. Specifically, the complaint alleges that the audition record package advertised in BROADCASTING (May 18) includes material broadcast on KFWB Los Angeles, which was created and copyrighted by the plaintiffs and that the sale and distribution of this package constitutes copyright infringement and also enables the purchasers of the package to use Sande and Greene's material without engaging their services. In addition to exemplary damages of $100,000, complaint asks for actual damages and the impounding of all copies of the aircheck of the KFWB material. District Judge William M. Byrne set a show cause hearing for today (June 15).

Westerns syndicated

Two syndicators—CBS Films and California National Productions—last week announced wild west properties newly taken off the network are being placed into syndication. CBS Films: *Trackdown* starring Roger Culp as Texas Ranger Hoby Gilman with 71 episodes (52 making up the first package) will be available in mid-October. The "adult western" has been on CBS-tv for two years. CNP via Victory Program Sales offers this entry: *The Californians* (San Francisco of the old west). It can be slotted as a once-weekly series or as a daily strip, and has been added to other westerns distributed by CNP as a "Western Omnibus" if a package is desired. It has been on NBC-TV for two years.

AFM protests victory in election by MGA

The American Federation of Musicians on Thursday afternoon (June 11), deadline for protesting the results of the NLRB election of a fortnight ago, filed its objection to the victory awarded Musicians Guild of America. The election, instigated by AFM, proposed elimination of the union shop clause in MGA's contract with the major motion picture studios, a move that would be tantamount to destroying MGA's power to collect dues and therefore its existence. (BROADCASTING, May 25).

The list of eligible voters was set at 1,402 and a majority of those was required to approve the AFM proposal to put it into effect. A total of 803 ballots was cast; 533 favored doing away with the union shop clause; 171 opposed this move; 95 were challenged and four were declared void. Since 533 is less than a majority of 1,402, MGA was held to have retained the clause in its contracts. AFM, in its objection, alleges that the number of eligible voters was actually only 1,020, and on that basis, the 533 votes to eliminate the union shop provision constituted a majority and the clause should be ordered eliminated.

Tape transfer

Transference of the KIRO Seattle library of CBS wartime newscasts (1939-45) from discs to tapes has been completed by students of the U. of Washington School of Communications.

The project was started in 1957 by the university with a $10,000 grant from the CBS Foundation. Cataloguing and cross referencing the tapes is expected to be completed by 1961.

Statistics: 4,000 15-minute reels of tape costing $12,000, 1,000 hours of newscasts, 2.4 million ft. of tape.

Mrs. Roosevelt in pilot

Mrs. Eleanor Roosevelt, who was delivering her first tv commercials for Good Luck margarine a few months ago (BROADCASTING, Feb. 23), is to appear in a pilot film this July for a possible tv discussion series backed by Colorado film producer - distributor Alexander Film Co., it was announced last week. Mrs. Roosevelt is to discuss world affairs with a panel of college students, some of whom will be from other countries, it was understood.

PAY TV TEST
Zenith planning on-the-air trial

Zenith Radio Corp. last week confirmed what everybody had known right along—that it plans to start field-testing its phonevision pay tv equipment and "negotiate arrangements" for an initial operation under the FCC's new test rules.

The confirmation came from Joseph S. Wright, Zenith president, in a major policy report before the Security Analysts of San Francisco last Thursday, June 11. He reiterated his belief toll tv is inevitable "and when it comes it will be on the over-the-air basis," not by coaxial cable, whose costs he described as "fantastic." Mr. Wright alluded to prospects of wiring San Francisco, Los Angeles and other cities for subscription television.

Unlike his predecessor, the late Comdr. E. F. McDonald, Mr. Wright took a more conciliatory attitude toward commercial network tv programming. He said: "One of the things which contributed to the poor showing of the tv set industry is the public apathy about current programming. Please don't misunderstand this as a criticism of the networks and broadcasters—they have done a magnificent job of programming within the economic limitations of advertising support . . . But the pressures of keeping from four to seven tv transmitters busy for 18 hours a day in the major cities are tremendous, particularly when you consider that all these stations' overheads and expenses, as well as the cost of the program product, can never exceed what an advertiser is willing to pay to sell his product."

No Details • Zenith spokesmen, playing it customarily close to the vest, declined to amplify Mr. Wright's remarks Thursday on (1) a proposed target date for launching its field tests (2) with what interests it has conducted "preliminary discussions" and hopes to complete negotiations, and (3) specifically what markets may be involved.

It's been known, however, that Zenith is eyeing the Milwaukee market and has had talks with Gene Posner, new owner of WXIX (TV), uhf ch. 18 (CLOSED CIRCUIT, May 11). Reports of similar discussions with the owners of WFOX-TV, not yet on the air (uhf ch. 31), also have been rampant but have been denied the past fortnight.

WFOX (and construction permit of WFOX-TV) is owned principally by Howard Miller, Chicago disc jockey. He said Thursday he had not been approached by Zenith representatives and had no plans to activate WFOX-TV on grounds the city could not support another tv station. He cited the lack of converters for uhf as the major stumbling block.

Reportedly, Zenith has also been investigating several cities other than Milwaukee in its search for a pay tv site.

Mr. Wright pointed out Zenith has pioneered in research and development of pay tv for 25 years and that "right now we are about to begin field testing our latest equipment for an over-the-air system which we feel can be produced and maintained in the subscriber's home for pennies a day, including the cost of servicing the equipment."

Despite the "rather restrictive conditions" attached by the Commission to trial runs of toll tv, Mr. Wright asserted, it'll "not then be a question of whether the system is to be made nation-wide, but how fast can it be done."

Limited Entertainment Experience • Zenith also is "actively exploring what needs to be done to initiate an operation under the terms and conditions of the latest FCC order on the subject," Mr. Wright acknowledged.

He added that because Zenith's experience in entertainment and broadcasting is limited, "we are very much interested in having the participation and cooperation of the individuals and companies who are experienced in these fields. We have had a number of preliminary discussions along this line, and hope to begin very shortly to negotiate arrangements which may make it possible to proceed with an initial operation."

Once this materializes, he continued, a new industry will be created, presaging "very favorable influences" on entertainment and broadcasting fields as well as the tv set business. Mr. Wright also reported a new sales record for Zenith's second quarter and predicted 1959 sales will increase substantially over its previous record year of 1958. First quarter sales and earnings jumped 40% and 63%, respectively, over the same period last year, he said.

Long poll

The WBRB Mount Clemens, Mich., *Sound Off* program turned into an all-day affair late last month when the station conducted an on-the-air poll on whether a personal or sales tax should be introduced by the state.

Sound Off (listeners telephone the station with their opinions) usually runs 10:05-11 a.m., but response to the poll was so great that the poll was continued until signoff at 7:45 p.m. The count: 290 for personal tax; 285 for sales tax.

Tape-live tv planned for 'Mrs. America'

Video tape plus live coverage means a "depth report" in the opinion of Production Alliance, New York tape-producer and packager, which plans to combine the two tv techniques for the "Mrs. America" pageant in Fort Lauderdale, Fla., to be telecast over CBS-TV on June 20 (11:15 p.m.-12:15 a.m.).

Production Alliance is delivering the telecast as a "total package" to CBS-TV. Since many of the events leading up to the selection of the winner are held for two weeks before June 20. Clay Yurdin and Phil Melillo, partners in the tape company, decided to pre-tape many of these sequences, and integrate them into a live climax.

Messrs. Yurdin and Melillo are convinced that this type of live-tape coverage will in the future give "more meaning" to such special events telecasts.

Taping of one sequence was completed last week in Washington, D.C. in which U.S. Treasurer Ivy Baker Priest congratulated the woman who will be selected as "Mrs. U.S. Savings Bonds" on June 20. Since Mrs. Priest could not be in Fort Lauderdale on that date, the congratulatory episode was taped with Mr. Melillo briefing Mrs. Priest while her children, Nancy and Ray, looked on.

Production Alliance officials estimate that 40% of the coverage will be live and 60% on tape.

The telecast will be sponsored by Whirlpool Corp., St. Joseph, Mich., through Kenyon & Eckhardt, Chicago; Culligan Inc. (water softener), Northbrook, Ill., through Alex T. Franz Inc., Chicago, and Johns-Mansville Corp., New York, through J. Walter Thompson.

CBS-TV obtains rights to Olympics in 1960

CBS-TV will present daily tape programs covering the 1960 Olympics in Rome, it was announced jointly last week by CBS-TV and the Italian Olympic National Committee.

CBS-TV was awarded exclusive North American tv rights after discussions between Sig Mickelson, vice president of CBS Inc. and general manager of CBS News, and Gardner Adv.,

representative of the Italian Olympic National Committee. The price for the rights was not disclosed.

Louis G. Cowan, president of CBS-TV, reported that the network plans to present daily telecasts, up to one hour in length, in prime evening time, starting Aug. 25, 1960. He said a majority of the events will be carried on the same day they take place in Rome. The network will make use of Alitalia Airlines to fly tapes to New York.

• Program notes

• Columbia Pictures Corp., N.Y., has assumed ownership of the independent film library of Sherman Grinberg, which will be integrated with Columbia's library, and offered for sale and rental as stock footage to tv film and motion picture companies. Mr. Grinberg will become exclusive representatives of the library.

• Warner Bros. Pictures Inc., N.Y., reports a net profit of $4,626,000 for the first six months ended last Feb. 28, as compared with a net loss of $2,894,000 for the similar period last year. Income from film rentals, including tv, rose to $40,373,000 from $31,332,000 in the previous period.

• Negotiations have been completed between NBC International and Nippon Television (NTV) in Tokyo for next season's new Perry Como series sponsored by Kraft foods to be seen in Japan in color. The announcement was made last week by Alfred R. Stern, director of NBC International operations and chairman of NBC International Ltd., who arranged to rush color video tape recordings to Japan by jet plane. NTV is reportedly in the process of building two tv studios for exclusive use of color. Including Japan, a total of 16 countries are scheduling the Como show, Mr. Stern said.

• CBS-TV has scheduled *For Better or Worse,* a new daytime series dealing with documented case histories of marital problems, to premiere June 29 in the 2:30-3 p.m. EDT period. Program host will be Dr. James A. Peterson, marriage counselor and teacher at the U. of Southern California. Program material will be drawn from his private files, the network reported. The program is a John Guedel production in association with CBS-TV. Hal Cooper and Myron Goldman are producer and associate producer respectively.

• Bernard L. Schubert Inc., N.Y., tv film production-distribution company, has climbed to an all-time company high in available products, according to Bernard L. Schubert, president. By year's end Mr. Schubert reports it will have a total of 12 half-hour tv film series and a minimum of two feature film packages in release. Three of the series will soon go before the cameras, Mr. Schubert said. They are: *Counterspy, Alexander the Great!* and *The New Adventures of Mr. & Mrs. North,* all to be filmed in California.

COLORCASTING

Here are the next 10 days of network color shows (all times are EDT).

NBC-TV

June 15-19 (2:30-3 p.m.) **Haggis Baggis,** participating sponsors.

June 15-19, 22-24 (4-4:30 p.m.) **Truth or Consequences,** participating sponsors.

June 15, 22 (10-10:30 p.m.) **Arthur Murray Party,** P. Lorillard through Lennen & Newell and Pharmaceuticals through Parkson Adv.

June 16, 23 (8:30-9 p.m.) **Price Is Right,** Speidel through Norman, Craig & Kummel and Lever through J. Walter Thompson.

June 17, 24 (9-9:30 p.m.) **Kraft Music Hall Presents Dave King,** Kraft through J. Walter Thompson.

June 18 (9:30-10 p.m.) **Ford Show,** Ford through J. Walter Thompson.

June 18 (10:30-11 p.m.) **Masquerade Party,** P. Lorillard through Lennen & Newell.

June 19 (7:30-8 p.m.) **Northwest Passage,** sustaining.

June 19 (8-9 p.m.) **Ellery Queen,** Gulf through Young & Rubicam.

June 20 (10-10:30 a.m.) **Howdy Doody,** Continental Baking through Ted Bates.

June 20 (10:30-11 a.m.) **Ruff & Reddy Show,** Borden's through Benton & Bowles and Mars through Knox-Reeves.

June 20 (9-10 p.m.) **Perry Presents Teresa Brewer & Tony Bennett,** RCA Whirlpool through Kenyon & Eckhardt and American Dairy through Campbell-Mithun.

June 21 (7-7:30 p.m.) **Midwestern Hayride,** local, co-operative sponsorship.

June 21 (9-10 p.m.) **Chevy Show,** Chevrolet through Campbell-Ewald.

• National Telefilm Assoc. Inc., N.Y., has started production of 13 new episodes for both *How to Marry a Millionaire* and *Man Without a Gun* at the Hollywood studios of TCF-TV, the tv film division of 20th Century-Fox. A third show, *The Third Man,* begins filming of 19 new episodes in England the week of June 22, at the Shepperton studios of British Lion, co-producer of the series. With the filming of the 39th episode of NTA's *U.S. Marshal,* current production of that series was recently completed at the Hollywood studios of Desilu productions, NTA reported.

• The Video Tape Facilities Committee of the Film Producers Assn. of New York has appointed a subcommittee to discuss video tape technical standards with broadcasting organizations. William Van Praag, chairman of the parent committee, has named William Unger, of Elliot, Unger & Elliot Inc., and Harry Sombor, of Filmways Inc., to meet shortly with the NAB to discuss standards in station transmission, and with the Society of Motion Picture and Television Engineers regarding production standards.

• Screen Gems, N.Y., reports its Latin American business for the fiscal year ended May 31 increased more than 50% over the previous year. Current dubbing commitments call for completing Spanish sound tracks for over 800 half hours of Screen Gems programming by the end of this fall, according to William Fineshriber Jr., director of international operations. The total number of dubbed half hours currently telecast each week in nine Latin American countries is reported to be just over 200.

• Trans-Lux Television Corp., N.Y., has signed its cartoon series, *Felix the Cat,* to a long-term pact with Transcontinent Television Corp., according to Richard Carlton, vice president in charge of Trans-Lux sales. The sale calls for delivery next winter of the first 260 four-minute *Felix* episodes to Transcontinent's WGR-TV Buffalo, WROC-TV Rochester, both New York, and WNEP-TV Scranton-Wilkes-Barre, Pa.

• WSGN Birmingham, Ala., is programming a new two-hour Sunday night record show featuring a Columbia Records' top star as the artist of the week, with original voice tracks of each artist commenting directly to the WSGN audience. Entitled *Great Moments in Music* (7-9 p.m.), the program was arranged for WSGN by Ben McKinnon, general manager of the station, Don Comstock of Columbia Records in Atlanta, and Bill Levy of Columbia Records in New York. The voice tracks are recorded in New York and sent to WSGN. The show is hosted by Bill Bolen, WSGN personality.

• NBC Radio's *It's Network Time* will present 10 hours of stereo broadcasting this week over the largest multi-city hookup of stations to date, according to the network. Stations in 15 cities will carry the stereo broadcasts on am and fm channels starting today (June 15) through Friday. The two-hour daily broadcasts will use the compatible stereo system developed by Bell Telephone Labs., it was reported.

• Independent Television Corp., N.Y., reports filming of 22 half-hour *Fury* tv shows will start June 22 at Desilu-Gower Studios, Hollywood. The series will be seen for the fifth year on NBC-TV this fall (Sat. 11-11:30 a.m.) Co-sponsors of the series, also for the fifth year, are The Borden Co. and Post Cereal Div. of General Foods, both through Benton & Bowles, N.Y.

• Roy P. Steckler and Bob Smith have formed Missile Men Productions, with

headquarters at 8152 Sunset Blvd., Hollywood, to film a new tv series, *Missile Men,* created and written by Mr. Smith and to be produced by Mr. Steckler. Filming of the pilot of this non-fiction series is scheduled to start this week. MMP's telephone number is Oleander 6-3800.

• Dick Ross, president of World Wide Pictures, and Georgia Lee, film, tv, and recording artist, who formerly had her own show on NBC, have formed Lee-Ross productions to syndicate tv properties, including *The Georgia Lee Show.* Headquarters are at 4626 Van Nuys Blvd., Sherman Oaks, Calif. Telephone: Triangle 4-5515.

• ABC-TV has completed negotiations with Desilu Productions Inc., Hollywood, for production of a new, weekly one-hour series, *The Untouchables,* to start this fall on ABC-TV. Robert Stack has been named star of the series. Series will be adapted from Desilu's recent two-part presentation of the "The Untouchables" on CBS-TV's *Westinghouse Playhouse.*

• Jerrild, Bouse & Schafhausen Inc., new commercial art and graphic design studio, has opened in Beverly Hills, Calif., at 241 S. Beverly Dr. Norman C. Bouse, president, formerly operated commercial art studio in Los Angeles as Bouse & Assoc. Robert H. Schafhausen, executive vice president, was advertising manager of U.S. sales division of Max Factor & Co. Asger Jerrild, vice president and creative art director, is graduate of Ecole des Beaux Arts, Paris, and native of Copenhagen, Denmark.

• Audie Murphy's Terrania Productions has formed an alliance with Revue Productions to produce *Whispering Smith,* a half-hour tv western series. The series, bought by NBC-TV without a pilot, will be time-slotted next fall.

• International Transmissions, N.Y., a voiced radio news service, has moved to 2 W. 46th St. Telephone: Columbus 5-2400. ITI serves 14 stations.

• Guild Films, N.Y., formerly at 460 Park Ave., has moved its sales and administrative offices to 655 Madison Ave., and 32 Court St. in Brooklyn. Guild's international distributor, Inter World Tv Films, will also be directed from the new addresses.

• National Recording Studios, N.Y., last week opened new and redecorated studios at 730 Fifth Ave. New recording equipment has been installed "to serve the requirements of advertising agencies," the company reports.

• The General Federation of Women's Clubs and the NAB have named Reino M. Takala, mathematics department head, Hinsdale (Ill.) Township high school, "Teacher of the Year." The award recognizes outstanding individuals who are helping in "America's effort to meet the challenge of the space age." About 12 other awards have been presented to teachers by the GFWC.

• MCA-TV Ltd., N.Y., reports the sale of the Paramount features library to WALA-TV Mobile, Ala.; WSOC-TV Charlotte, N.C., and WSYR-TV Syracuse, N.Y., raising the total number of markets sold to 57.

• Lindsey Spight, president, Television Communications Inc. (closed-circuit tv producer), S.F., has bought the 256-ft. tower and transmitter house formerly occupied by Television Diablo Inc. (KOVR [TV] Stockton, Calif.). Mr. Spight will operate the property under the name of The Diablo Communications Center as a microwave relay station and for miscellaneous common carrier two-way mobile unit transmission. The State Lands Commission has granted Mr. Spight a 15-year lease of the 60 acres on which the property stands. Diablo addess: NBC Building, 420 Taylor St., S.F.

• Copy Service Bureau, Chicago, announces availability of series of 60- and 30-second taped featurettes: *Dottie Frye, Your Friend; Guidance Message in the Stars; Feature Day;* and *Jonathan Price.* Company reports capsule featurettes have "merchandising packages" for advertisers desiring to buy adjacencies at local stations. Firm is located at 228 N. LaSalle St., with Charles Temkin as director.

• WOR New York has set up a special news bureau in Geneva, Switzerland, to cover the foreign ministers' conference. Assigned to Geneva: George Brown, director of news and special events, and John Scott, news analyst and reporter. They plan interviews with political leaders in other European countries when the conference terminates.

• Westinghouse Broadcasting Co., New York, is planning a public service tv series, *In Praise of Learning,* to be produced and directed by Lewis Freedman. Mr. Freedman's credits include production of 125 consecutive *Camera Three* shows (1957-58) in conjunction with CBS-TV and, more recently, direction of the Garry Moore variety show for CBS-TV and the Dore Schary, NBC-TV *Kaleidescope* presentation, "Blueprint for Biography."

• Film rights to more than 16,000 cases handled in the past 47 years by the Schindler Bureau of Investigation have been obtained by E. Pierson Mapes, president of Creative Merchandising Inc., New York, who will produce a tv series. The stories will be partially based on the book, *The Complete Detective,* by Rupert Hughes, which contains many of Schindler's cases, it was announced. Mr. Mapes, former vice president and tv head of the Hutchins Agency, New York, created and produced the tv show *Philco Playhouse* and also introduced the Miss America Pageant to television.

• First residual checks to musicians for live tv performances, totaling over $4,350 in checks from the Academy of Motion Picture Arts & Sciences, are being distributed to musicians, copyists and arrangers for the telecast of the 1959 Oscars award ceremonies in Great Britain. Announcing the distribution, John Tranchitella, president of AFM local 47 in Hollywood, hailed it as "a step forward in protecting the rights of musicians in their work."

• The Motion Picture Research Council and the Television Film Assn. are cooperating in the development of a new standard leader to be marked off

Volunteers vie for 'freshest hard news'

There's a two-fold purpose behind the monthly group of awards offered by Radio Press Inc., New York, for the most significant news stories submitted by a nationwide corps of volunteer radio correspondents. According to Lloyd Garrison, news and operations manager of Radio Press, the cash and merchandise prizes not only give more recognition to the individual radio reporters, they also stimulate competitiveness among independent stations, which assures Radio Press of wider coverage for the "freshest hard news."

Initiated two months ago by George H. Combs, Radio Press president, the awards each month include the gift of a Steelman "transitape" portable tape recorder to the correspondent who gives the "top coverage," three cash prizes of $100, $75, and $50 and five special $10 cash awards. Winners are featured in Radio Press ads placed in the trade press.

At present, Radio Press has approximately 300 card-carrying member correspondents who relay local news breaks to Radio Press in New York for distribution to its some 50 subscriber stations. The news donors are sent special cards indentifying them as accredited "Radio Press News Correspondents." These newsmen are referred to as "swappers" because the working arrangement calls for mutual news exchange.

The "swappers" volunteered their services in response to letters mailed by Mr. Combs to more than 3,000 U.S. radio stations, urging their participation. Except in specialized instances, no payment is made to the news caller, Mr. Garrison said. The flexible arrangement also makes its possible for Radio Press to contact a correspondent for a specific news report, he pointed out. Credit is given to the correspondent when his taped story is used in one of the company's transmissions to subscriber stations. A special note of thanks is tagged on the end of the report.

in seconds. Present leader, marked off in 35mm feet loses its meaning when it is reduced to 16mm for tv use. A time measurement, such as is proposed, would not be affected by the reduction printing.

• KYW Cleveland, Ohio, has received the Ohio State Bar Assn.'s Journalism Award for the second consecutive year. KYW was cited for its shows about various phases of the law and, in particular, *You and the Law* (Monday 8-8:30 p.m.), in which three members of Cleveland's Bar Assn. answer telephone calls about the law from listeners.

• California National Productions (NBC subsidiary) has started filming of the *Pony Express* television series on location in the Phoenix, Ariz., area. Grant Sullivan, who starred opposite Rosalind Russell in the Broadway play, *Auntie Mame*, for two years, has the lead. Robert Stillman is executive producer and Robert Neilson is director of the pilot film. The series will be placed in syndication along with *Provost Sergeant* which also is being headed into production.

• WIIC (TV) Pittsburgh newscaster Ed Conway flew to Rio de Janeiro to film an interview with Earl Belle, the Pittsburgh businessman who has been in self-imposed exile in Brazil for 10 months since his paper business collapsed. The exclusive interview was presented on one of Mr. Conway's newscasts.

• WHAS Louisville, Ky., carried 7½ hours of the Southern Baptist convention there May 19-22. WHAS-TV telecast one hour of convention proceedings. The programming included broadcasts of most of the major speeches and nightly quarter-hour *Southern Baptist Convention News.*

• California National Productions, N.Y., announces sales of its *Flight* series to Household Finance Corp. for KAVE-TV Carlsbad, N.M., and WISC-TV Madison, Wis.; Karp Motors for WTAS-TV Savannah, Ga.; and Interstate Life & Accident Insurance for WBIR (TV) Knoxville, Tenn. Lates station sales: WCTV (TV) Tallahassee, Fla.; WTVO (TV) Rockford, Ill.; KTVO (TV) Ottumwa, Iowa and WRAL (TV) Raleigh, N.C. Over 100 markets are reported sold.

• Suit of Maxson F. Judell for $750,000 against ABC-TV on grounds that a program, *What's the Joke?*, broadcast in 1955 over WABC-TV New York, used a format based on Mr. Judell's syndicated column, "The Fun Shop," was dismissed May 27 by Judge Ben Harrison of the U.S. District Court in Los Angeles. Judge Harrison ruled that there was no substantial similarity between the program and the column and that the plaintiff had suffered no damage from the broadcasts. Attorney Robert P. Myers represented ABC-TV.

• Transfilm Inc., N.Y., has contracted for the exclusive animation and art services of Wylde Studios Inc. there. Wylde will move its animation operation to Transfilm's quarters at 35 W. 45th St.

• Latest home-grown syndicating attempt comes from Denver where local columnist-tv personailty Max Goldberg who is m.c. of *On the Spot* interview show on KLZ-TV there reportedly is preparing a series for sale to other stations. He has 26 interview shows on tape, featuring such national figures as Sens. Stuart Symington and Wayne Morse, screen star Linda Darnell and comedian Jack Benny.

• *Across the Board,* an audience participation quiz show with a crossword-puzzle format begins on ABC-TV June 1 (Mon.-Fri. 12-12:30 p.m.). Contestants are to be given verbal and cartoon clues to words for crossword boxes. The show, with Ted Brown as m.c., will originate in New York. Hal Davis is producer.

• In cooperation with the Connecticut Assn. for Mental Health and its local Westport chapter, WMMM there sponsored a seven-hour "Mental Health Panelthon" on May 24. Panelists for the series of hour-long discussions were

leaders in the arts, business, industry and psychiatry, as well as community leaders in the Westport area. Moderator was Howard Whitman, author of articles on mental health. Panelists included: Douglas Edwards, CBS News correspondent; Dana Andrews, actor; James Kelly, author; Edward Hynes, president of Trendex Research Co., and Robert Louis Shayon, drama critic of the *Saturday Review of Literature*.

• WICC Bridgeport, Conn., on Saturday (June 13) launched a weekend marine news service for boaters on Long Island Sound. WICC's two-way radio equipped, 28-foot cabin cruiser will be roaming the Sound every Saturday and Sunday this summer to report water surface conditions, fishing news, interviews with yachtsmen and complete weather reports, the station announced. The three-minute broadcasts are aired from 7:45 a.m. to 7:45 p.m. at 15 minutes before each hour.

• Columbia Pictures Corp., N.Y., reported last week a net profit of $275,000 for the 39 weeks ended last March 28, as compared with a $1,047,000 loss for the comparative period of 1958. It was pointed out that the net profit for the 1959 period included $2,622,000, representing the profit on the sale of the company's laboratory facilities on the West Coast.

• Radio/Television, U. of Texas (Austin), has produced *Science Close-Up*, a lecture-demonstration series, on tv tape. WOAI-TV San Antonio telecasts the series June 7 through August. The 13-week series, available on kinescope to stations without tape facilities, features scientists from the university.

Two ways of not being tricked by the 'hidden ball'

"Follow the ball" is advice not only for the neophyte athlete, but also for the tv crew covering a sporting event. In the case of television, distortion of distance perspective by long-range cameras and lack of proper background creates problems in following the ball. Last week in a Brooklyn bowling center and on a golf course outside Baltimore, tv men demonstrated two ways antidotes:

The Blurred Bowling Ball • A change in bowling alley color schemes, to increase visibility of the sport on television, may have a significant subsidiary effect: the creation of a new type of bowling alley and ball.

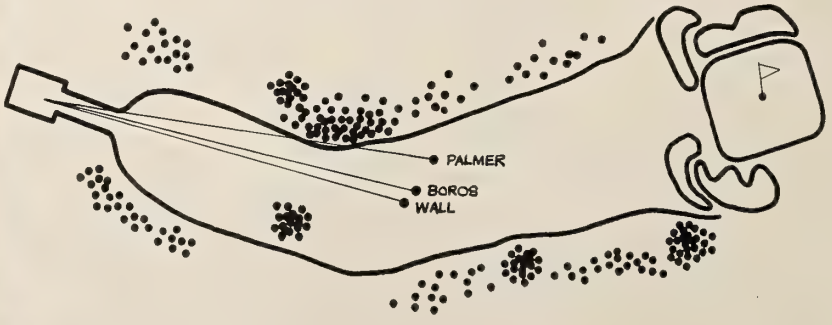
Guy LeBow, producer-commentator of *Major League Bowling* on WOR-TV New York, long had been dissatisfied with the bland appearance and the generally diffuse pictures of bowling lanes on tv. Six weeks ago, Mr. LeBow enlisted the assistance of the WOR-TV technical crew and the National Sports Center, owner of the Neptune Lanes alleys in Brooklyn.

After considerable experimentation, the technicians concluded that a white mottled ball, lamp black lanes and snow white gutters would provide the "perfect" color combination for telecasting. The idea was presented to Brunswick-Balke-Collender Co., Chicago, builder of bowling alleys and equipment, which, coincidentally, was experimenting with a white mottled ball. B-B-C technicians developed a paint formula for the alleys and gutters.

The results, according to Mr. LeBow, are "gratifying beyond our expectations." He reported that tv viewers applauded the sharper clarity and the bowlers themselves uniformly reacted in this fashion: "This is wonderful. We can follow the course of the ball much better than under the old conditions."

Brunswick-Balke-Collender officials are studying daily reports from Neptune Lanes carefully. If the enthusiastic reactions continue, the mottled white ball, the black alleys and the white gutters may well become the scheme of other bowling alleys.

How Far Off the Green? • W. B. Doner & Co., in setting up coverage of the Eastern Open Golf Tournament for its client, The National Brewing Co., utilized visual aids to spot player positions.



While towers were constructed to cover the 14th, 17th and 18th greens and the 18th fairway at Baltimore's Pine Ridge municipal course, it was the old story that long-distance shots fail to accurately show ball position. A plotting board of the 18th fairway was prepared and a transparent overlay with grid coordinates was used on camera to spot balls, based on information relayed by roving walkie-talkie operators.

In addition, name overlays identified golf players on camera, and a special scoreboard was maintained in the studios of WBAL-TV Baltimore.

The Eastern Open, scheduled to windup yesterday (June 7), was originated by WBAL-TV for a regional network that included four other stations in the Pennsylvania-Maryland area. Coverage details were worked out by W. B. Doner & Co. through Edward A. Trahan, director of radio-tv.

Emerson profit rises

Emerson Radio & Phonograph Co., Jersey City, N. J., has reported a consolidated net profit for the 26-week period ending May 2 of $2,244,417 before federal income taxes and $1,001,317 after provision for taxes, equal to 49 cents per share on 2,044,-023 shares outstanding. For the comparable period a year ago, net profit amounted to $165,090, equal to 8 cents per share on the same number outstanding.

• Technical topics

• Motorola Inc. racked up an 86% boost in sales volume for its consumer products during April over the same month last year, according to Edward R. Taylor, executive vice president. He cited five factors in this order: (1) console tv models; (2) one-piece stereophonic instruments; (3) a substantial pickup in automobile radio sales because of a resurgent market in new and used cars; (4) new transistorized portable radios, including a new shirt-pocket size model, and (5) favorable retail support of all lines. Added Mr. Taylor: Inventories will be at the lowest ebb in Motorola history when the company introduces its 1960 lines at regional conventions (July 6-28).

• The Turner Microphone Co., Cedar Rapids, Iowa, announces a new series of communication microphones known as the 250 series. The series features models 250, 251 and 256 with triple-switching action and single unit die-cast construction. Models 252, 253, 254 and 255 complete the new Turner microphone series. Models 252 and 253 have the same specifications as 250 but are without lift-switch. Prices vary from $16 to $49.50.

• RCA's Broadcast & Television Equipment Dept. has shipped to WDAS-AM-FM Philadelphia a magnetic disc recording system developed by RCA. Discs, same size as 45 rpm records, hold up to 70 seconds on each side and have been used and erased in RCA lab tests more than 10,000 times "without discernible wear or loss of sound efficiency." The magnetic disc equipment may be used with an RCA BQ 51A turntable, BA51A record reproducer - amplifier and magnetic head, tone arm and magnetic eraser.

• Grantham School of Electronics (FCC license training), Hollywood, Calif., has opened a Kansas City division at 3123 Gillham Rd.

CBC told to list advertiser charges

Canada's Parliamentary Broadcasting Committee has voted 11 to 9 for the disclosure by the Canadian Broadcasting Corp. of the amounts charged to Canadian advertisers for live television network programs.

Members of the committee have been pressing CBC Acting President Ernest Bushnel to reveal how much advertisers were paying for program production costs, and how much CBC was paying for these programs to develop Canadian talent.

Despite opposition from Revenue Minister George Nowlan, and letters from Canadian Assn. of Broadcasters, Canadian Assn. of Advertising Agencies and MacLaren Adv. Co. Ltd., Toronto, the committee June 2 ordered CBC to produce figures for one week of telecasting. Mr. Bushnell told the committee it would take eight employees a week to get the figures for the 210 live shows which would form an average recent week.

The committee felt that it should know what proportion of the costs of a given program were paid by the advertiser and what by public funds.

The full inquiry into CBC operations by the committee started last month in Ottawa. It was said then that sponsors on some CBC national television programs pay as little as 26% of the production costs, with CBC paying the balance. CBC gets the bulk of its revenue from the Canadian taxpayer through grants from parliament and excise taxes on radio and television receivers and components.

CBC showed figures on 10 typical English-language tv network programs which showed that only two made a profit. Heaviest loss was on one weekly show which cost CBC $22,100 to produce and on which the sponsor paid only $7,974. No shows were named during the hearings because CBC management stated this would give competing sponsors confidential information.

In an accompanying statement Mr. Bushnell stated that revenue from commercial sponsors "is just about what the market will bear." He told members of parliament that if Canada's population were sufficiently dense to justify a high

enough charge, then a commercial profit might result. He pointed out that it takes some 50 tv stations and a 4,000 mile microwave network across Canada to cover a population which could be reached by a single New York or London station.

On complaints of too many western films on Canadian tv, Mr. Bushnell agreed, but told the committee members that "sponsors find they are audience pullers and are not too expensive to show." He emphasized that the western shows were a trend and might be replaced with something else in six months or a year.

NABET agreement

Agreement was reached by Canadian Broadcasting Corp. and its 1,273 employees who are members of the National Assn. of Broadcast Employes and Technicians, at CBC's 22 radio and tv stations. NABET had voted to strike if no agreement was reached (BROADCASTING, May 25), jeopardizing the extensive coverage planned by CBC for the June 18-August 1 visit of Queen Elizabeth to Canada. Terms of the 30-month agreement provide for wage increases of 3% retroactive to August 1, 1958, a further 3% as of May 1, 1959, and a 3.775% increase on April 1, 1960. The new contract expires Jan. 31, 1961.

CBC plans awards

Canadian Broadcasting Corp. and its affiliated independent network television stations plan a system of awards of merit for both English and French language television broadcasting in Canada. At a committee meeting of CBC and affiliated network stations at Toronto late in May it was decided to submit recommendations of judging programs, financing and organizing the awards and the possibility of telecasting the awards presentation to the fall meeting of CBC and its affiliates. It is hoped to have the awards a reality next spring.

Tv monopoly in Canada to end in '60—Nowlan

Independently-owned competitive television stations will be operating in Canada's major markets some time next year, Revenue Minister George Nowlan predicted in Ottawa on June 2 during hearings of the Canadian Parliamentary Broadcasting Committee.

It has been government policy to date that only one tv station should operate in one city, with Canadian Broadcasting Corp. having the six biggest markets, Montreal, Toronto, Ottawa, Winnipeg, Vancouver and Halifax. The present Conservative government has intimated this policy was to be changed. Mr. Nowlan's prediction is the most definite word on a possible date.

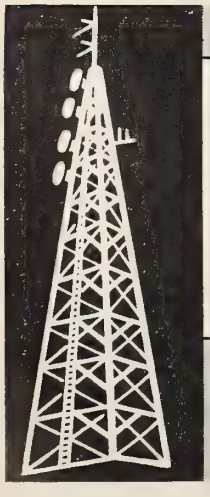
Mr. Nowlan is responsible for the government-owned CBC to the Canadian Parliament. He stated that in a few months the Canadian Board of Broadcast Governors would publish regulations under which applications for independent stations in Canada's six markets would be heard.

7 new radio stations authorized in Canada

One new fm and six am stations were approved by the Canadian Board of Broadcast Governors at its meeting at Ottawa in mid-May. At the same time the BBG ruled that it would hear no more applications for radio stations at Vancouver, B.C., and surrounding area for six months, and would study the problem of foreign-language broadcasting in Canada.

BBG has been asked to recommend a new foreign-language radio broadcasting station at Montreal, Que. However, it deferred the application and announced it would not accept any applications for foreign-language stations for a year until it has completed its foreign-language study.

New radio stations were approved at Corner Brook, Nfld., on 560 kc with 1 kw, to George E. Hillyard; at La Tuque, Que., on 1240 kc with 1 kw day and 250 w night to Radio La Tuque Ltd.; at St. Hyacinthe, Que., on 1240 kc with 250 w to Jean M. Lorange; at Fort William, Ont., on 800 kc with 5 kw to R. P. MacGowan; at Regina, Sask., on 1300 kc with 1 kw to J. M. Ellis, and at Vancouver, B.C., on 1320 kc with 10 kw to W. E. Bellman.



The new fm station approved is on 100.9 mc with 245 w at Lethbridge, Alta., to H. W. Brown.

Power increases were approved for CHSJ St. John, N.B., from 5 kw to 10 kw day, and 5 kw night to 1150 kc; for CHEF Granby, Que., from 250 w to 1 kw day and 250 w night on 1450 kc; for CKSO Sudbury, Ont., from 5 kw to 10 kw day, 5 kw night on 790 kc, and for CKOK Penticton, B.C., from 1 kw day and 500 kw night to 10 kw day and 500 w night on 800 kc.

More ad time per hour for Canadian stations

More advertising during evening hours is now permitted on Canadian radio stations, following hearings by the Board of Broadcast Governors. The BBG accepted, in part, representations of the Canadian Assn. of Broadcasters to allow the same advertising content in evening hours as during the rest of the day. Canadian radio stations can now use 75 seconds of advertising in a five minute program, and a maximum of seven minutes during an hour-long radio broadcast.

BBG retained regulations prohibiting beer and wine advertising, except in provinces where this is permitted by provincial legislation, and turned down permission on advertising for non-government securities (BROADCASTING, June 1). Planned restrictions on reconstructed sport programs were dropped.

DAVID JARET CORP.

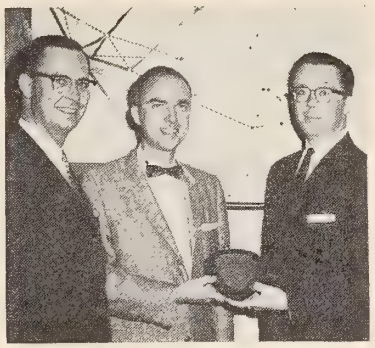
• Abroad in brief

• About 70% of West German radio sets have printed circuits, while about 35% of tv sets have this type of circuit. The figures are expected to rise to about 80% for radio and commensurately for tv by year's end.

• Canadian Broadcasting Corp. has bought rights to major eastern Canadian football games for an undisclosed sum, estimated at about $280,000. Four Canadian football clubs share in the proceeds. The CBC will broadcast 21 football games and has an option on the championship Grey Cup Games.

Bloomin' promotion

The tulip was the subject of a successful WANE-TV Fort Wayne, Ind., promotion for a local flower importer.



The American Coal & Supply Thrift Center consulted WANE-TV about publicizing a large quantity of tulip bulbs it had ordered from Holland. They decided to name one of the tulip varieties after the station's women's director Ann Colone, hold a "Tulip Festival Day" at the store and run a viewer contest that required viewers to identify a distorted picture of a tulip shown on her daily show.

A 20-second sound-on-film spot featuring the women's director dressed in a Dutch costume was telecast four times a day for about two weeks to announce the contest. A total 285 correct answers were received at WANE-TV. They were put in a hopper and 11 drawn for the owners to be given prizes.

The Thrift Center's owner estimates that it attracted a 40% larger crowd on the "Festival Day" than on a previous special sale day with sales up commensurately.

WQXR listeners—on the road

WQXR-AM-FM New York, radio stations of *The New York Times,* have released results of a study made by The Pulse Inc. to determine how much travel is done by the WQXR audiences. The report shows that this listener group spent more than $300 million on travel in 1958. Comparative figures since 1954 show more of the families took vacation trips in 1958, stayed away longer and that 20.5% went outside the U.S. compared to 14.1% on non-WQXR families. Listed in the report are 33 WQXR travel accounts, preceded by the question, "Did you get part of this business? These national advertisers did. . . ."

Ad prize • KBTV (TV) Denver chose Western Airlines to receive the station's May "Ad of the Month" award. Pictured with the prize (l to r): Jack Newell, media director, BBDO; Bert Lynn, advertising director, Western Airlines, and Jim Francis, Peters, Griffin, Woodward (KBTV's representative). Award is given monthly for the commercial showing greatest originality, art direction and effectiveness.

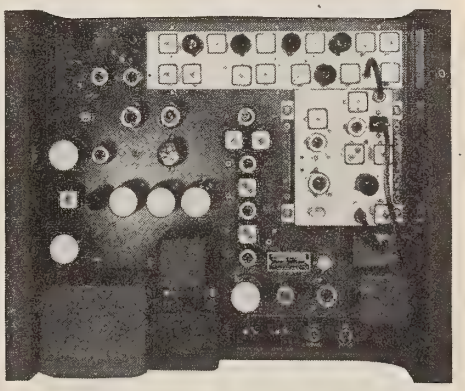
'Jockeyettes' for a day

The microphones and turntables of WIBV Belleville, Ill., were taken over for a "Fun and Funds Day" recently by the Women's Auxiliary of the local Memorial Hospital. More than 80 femmecasters played listener requests in exchange for contributions to their Hospital Fund. During a 14-hour day, the disc-jockeyettes made 500 dedications and collected approximately $525.

New sounds on the Sound

KOMO Seattle is promoting its ABC Radio affiliation yesterday (June 14) with a special four-page brochure. Issued to every major timebuyer and advertiser, the pamphlet heralds the station's "Bright new sound on Puget Sound." Highlights of KOMO's nine-man news department, air personalities, and two new programming features: *Here's a Job For You,* which broadcasts local job openings every hour, and "Community News Service," which presents news from weekly and daily newspapers throughout the station's listening area, were listed in the brochure.

Anyone for the moon?



WHB Kansas City, Mo., received 2,176 reasons why listeners wanted to take a trip to the moon after the sta-

Justice?

The Baltimore Commissioner of Traffic & Transit has ordered WBAL there to stop putting coins in expired parking meters.

For a month station staffers had been dropping nickels (supplied by WBAL) into meters so that auto owners would not get tickets for overparking. Staffers then slipped a card under the car's windshield wiper that said: "We noticed your meter had run out . . . so we dropped some change in it for you. We don't like to get tickets either. (signed) WBAL Radio 1090."

NEMS • CLARKE
Type TRC-1
TV Color
Rebroadcast
Receiver

The Type TRC-1 Color Rebroadcast Receiver has been designed specifically to meet the requirements for a high-quality receiver for use in direct pickup and rebroadcast of black and white and color signals.

SPECIFICATIONS

VIDEO CHANNEL
Output terminal ..... 75 ohms, coaxial
Level ..... Adjustable up to approximately 1 volt, peak to peak
Polarity ..... Sync negative
Frequency response ..... To 4.2 mc

SOUND CHANNEL
System ..... Separate IF (not intercarrier)
Output level ..... Adjustable from 0 to 18 dbm
Output impedance ..... 600 ohms or 150 ohms, balanced or unbalanced
Frequency response ..... 30 to 15,000 cycles with standard 75-u sec de-emphasis
Distortion ..... Less than 1%
Noise level ..... 50 db below +0 dbm

SYNC CHANNEL
Output connection ..... 75 ohms, coaxial
Output level ..... 3 volts, peak to peak
Polarity ..... Negative

MISCELLANEOUS
Gain control ..... Manual or keyed automatic
RF input connection ..... 75 ohms, coaxial
Crystal controlled R.F. ..... Employed for maximum and unattended operation
Power supply ..... Self-contained
Power requirements ..... 117 volts, 60 cycles, 150 watts

919 JESUP-BLAIR DRIVE • SILVER SPRING, MARYLAND • JUNIPER 5-1000

tion announced that the person who submitted the most original reason would be given an expense-paid lunar trip or $500. A student was chosen as the winner and elected to take the money to continue her education.

• Drumbeats

• WDAF-TV Kansas City, Mo., presented an especially-designed "Signal Award" pin to local fireman Leland V. Rock for saving the lives of two girls. The awards, presented during WDAF-TV's weekly *Rescue 8* series, will be made by the station when instances of bravery come to its attention.

• KEWB Oakland, Calif., disc jockeys gave away 91,000 phonograph records in a stunt to publicize its changeover June 8. (The outlet, formerly KLX, is now owned by Crowell-Collier Publishing Co.) The disc jockeys toured Bay Area streets for five hours in new convertible automobiles to distribute the records.

• A "Salute to WJAR-TV" on the 10th anniversary of ch. 10 in Providence, R.I., was arranged for Raynham Park last Tuesday night (June 9) when the first race at Raynham, Mass., Dog Track honored the Providence station. WJAR-TV personalities Nancy Byers, J. Kroll, Russ Vanausdale and Warren Walden were to arrive in a "tally-ho wagon." The WJAR-TV group was to have presented a trophy to the owner of the winning greyhound in the first race.

• KMOX St. Louis awarded a silver-plated chafing dish to the owner of the "Most Popular Sports Car" voted by more than 45,000 visitors to the "Concourse d'Elegance" sports car show in St. Louis. KMOX personalities Jim Butler and Bruce Hayward alternated as m.c.'s of the one-day event.

• WMAR-TV Baltimore received 20,000 entries in a contest for its *Bozo the Clown* cartoon program (weekdays 7-8 a.m.). Entrants were required to color a drawing of the clown placed in a local news paper. About 75 Bozo dolls and masks were awarded as prizes.

• "Radio Box Office" is a new feature offered to listeners of WMMM Westport, Conn. Choice tickets to top Broadway shows may be obtained from WMMM under the plan. The station arranged the audience service with leading Broadway producers. First to be made available in the projected series of shows is Tennessee Williams' "Sweet Bird of Youth."

• Everybody talks about the weather and WCAE Pittsburgh has proved people will also write about it. Pete Shore, WCAE d.j., invited his listeners last month to guess the hottest date in June and the temperature reading, with first prize of a transistor radio and record albums to five runners-up. Result: Mr. Shore's mail box jammed with 997 entries.

• WFBM-AM-TV Indianapolis this year began a "Checkered Flag" award for the winner of the Indianapolis 500 Mile Race, giving the first finisher the checkered flag of victory used in the race (attached to a wooden plaque) and a check for $500.

• Walt De Silva, weekend air personality of KBIG Avalon, Calif., has inaugurated a special June listener contest titled, "You Pick a Pair." The audience is invited to submit requests for two tunes whose titles form the most humorous sentence. Daily winners receive evenings for two at Hollywood's Moulin Rouge, cosmetic gift kits and record albums. The month's grand winner collects a gas range.

• A "Fireman of the Month" will be honored by KGW-TV Portland, Ore., on its program *Rescue 8* with a scroll signed by Portland's mayor, fire commissioner and the general manager of Miles California Co., program sponsor.

• A housewife was general manager for a day of KFMB San Diego on May 27 after winning a contest in which listeners told "why they would like to be general manager for a day and what it was about the station that they liked." Mrs. Margaret (Meg) Converse introduced these feminine touches: classical music on KFMB's "eye-opener" program and dedication of six Christmas carols to careless weekend drivers who wouldn't be around at Christmas to enjoy them.

Relics of the road • Parades aren't parades without old model cars. A two-part entry (top picture) in the Centennial Celebration Parade of Lake City, Fla., last month was that of WDSR there. The first half was a 1921 Model T Ford truck with old time radio gear and centennial belles attired in dresses and hats of that year. The second half was WDSR's current mobile news unit with a young lady carrying a transistor radio.

Up in Ohio, WMOH-AM-FM Hamilton entered a 1924 Packard touring car (bottom picture) in the Miami U. Sesquicentennial Parade in Oxford, Ohio. Naturally, the car was filled with girls waving to folks on the sidelines.

[1] There are, in addition, eight tv stations which are no longer on the air, but retain their licenses.

[2] There are, in addition, 37 tv cp-holders which were on the air at one time but are no longer in operation and one which has not started operation.

[3] There have been, in addition, 211 television cps granted, but now deleted (44 vhf and 167 uhf).

[4] There has been, in addition, one uhf educational tv station granted but now deleted.

William Wallace Greer Jr. for $5,000 and $17,500 for promissory notes held by transferors. Mr. Greer is in mausoleum business and is chinchilla rancher. Ann. June 10.

Hearing Cases

FINAL DECISIONS

By decision after further oral argument, Commission granted application of Queen City Bcstg. Co. for new TV station (KIRO-TV) to operate on ch. 7 in Seattle, Wash., and denied competing applications of KXA Inc., and Puget Sound Bcstg. Inc. It took following actions on pleadings: (1) affirmed Hearing Examiner's order which granted in part motion by Puget Sound to strike and expunge brief and proposed findings of fact of Queen City; (2) granted motion of Puget Sound to extent of striking extra-record materials in part "C" and appendix 1 of Queen City exceptions; and (3) granted request by KXA to file "rejoiner" but denied that pleading insofar as it requested that reply of Queen City be stricken. Comr. Lee dissented; Comr. Hyde not participating. (Dec. 10, 1958 memorandum opinion and order set aside July 25, 1957 decision favoring Queen City but permitted KIRO-TV to continue operation pending outcome of further proceeding.) Ann. June 10.

By order, Commission made effective immediately April 27 initial decision and granted application of Venice-Nokomis Bcstg. Co. for new am station to operate on 1320 kc. 500 w, D. in Venice, Fla. Ann. June 10.

OTHER ACTIONS

By memorandum opinion and order, Commission denied request of Interstate Bcstg. Inc. (WQXR), New York, N.Y., for reconsideration and rehearing directed against Nov. 5, 1958 grant without hearing of application of Patchogue Bcstg. Inc., to increase power of WPAC Patchogue, N.Y., from 5 kw, DA-D, to 5 kw-10 kw-D, Canadian restricted, continuing operation on 1580 kc. Ann. June 10.

By memorandum opinion and order, Commission denied petition by Deep South Bcstg. Co. for reconsideration of Sept. 3, 1958 decision which denied mod. of cp of its tv station WSLA (TV) (ch. 8), Selma, Ala., to move trans. site to location 50 miles from Selma and 25 miles from Montgomery, specify main studio site one-half mile from city boundary of Selma, increase ant. height from 387 ft. to 1993 ft., and increase power from 2.51 kw to 316 kw. Chairman Doerfer and Comr. Cross not participating. Ann. June 10.

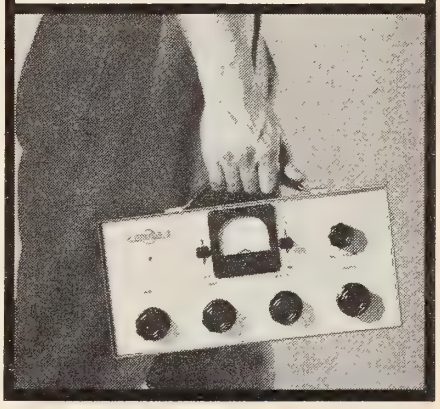
By order, Commission dismissed as moot petition by Cannon System, Ltd. (KIEV), Glendale, Calif., to enlarge issues in am consolidated proceeding with respect to application of Gordon A. Rogers, Colton, Calif. (since dismissed). Ann. June 10.

Designated for consolidated hearing applications for new daytime am stations in Michigan of Central Michigan Bcstg. Co. (1370 kc, 5 kw, DA), Oil City; Flat River Bcstg. Co. (1380 kc, 500 w, DA), Greenville; Stevens-Wismer Bcstg. Co., Caro Bcstg. Co. and Tuscola Bcstg Co., each seeking 1360 kc. 500 w in Caro; and Grand Haven Bcstg. Co. to change operation of WGHN Grand Haven, on 1370 kc from 500 w, D, to 500 w-N, 1 kw-LS, DA-2. Ann. June 10.

KPAP Redding, Calif.—Designated for hearing application to change facilities from 1270 kc, 1 kw, D, to 1330 kc, 5 kw, D; made KCRA, Sacramento, party to proceeding. Ann. June 10.

John Laurino, Ashland, Va., WNAV Annapolis, Md.—Designated for consolidated hearing applications of Laurino for new am station to operate on 1430 kc, 1 kw, D and WNAV to change operation on 1430 kc from 1 kw, DA-N, Unl., to 1 kw-N. 5 kw-LS. DA-N; made WDDY Gloucester, Va., party to proceeding. Ann. June 10.

Buckley-Jaeger Bcstg Corp., Providence, R.I., WHDH-FM Boston, Mass.—Designated for consolidated hearing applications of Buckley for new class B fm station to operate on 94.1 mc, and WHDH-FM to change operation on 94.5 mc from ERP 20 kw, ant. 455 ft., to ERP 3.25 kw ant. height 979 ft. Ann. June 10.



KFMC (FM) Santa Barbara, Calif.—Designated for hearing application to change trans. site and increase ERP from 29.5 kw to 41.34 kw and ant. height from minus 800 ft. to 2,911 ft.; made KANT-FM Lancaster, party to proceeding. Ann. June 10.

WTRN Tyrone, Pa., WFBG Altoona, Pa.—Designated for consolidated hearing applications of WTRN to change operation from 1290 kc, 1 kw, D, to 1340 kc, 250 w. unl., and WFBG to change from 1340 kc, 250 w, unl. to 1290 kc, 1 kw-N, 5 kw-LS, DA-2. Ann. June 10.

Routine Roundup

Granted request by Bay Area Educational Television Assn. KQED (TV) (ch. *9), San Francisco, Calif., for waiver of Sec. 3.651 (c) (2) for one year to allow broadcast of only one picture (record album cover) on its video channel while program "Portrait in Music" is broadcast on aural channel. Comrs.

BUILT-IN RADIO MONITORING

COLLINS NEW 3 CHANNEL REMOTE AMPLIFIER

Now, a remote that allows you to monitor on the spot. The new Collins Remote has a built-in, crystal-controlled superheterodyne receiver to let you monitor your station. Instantaneous switching is provided between receiver and line monitor. And the Remote is lighter, more convenient than any other three channel remote you've ever used. It's completely self contained — features line check control through a built-in microphone with a press-to-talk switch. All controls are front panel mounted.

The Collins Remote Amplifier measures a compact $6\frac{5}{8}$" high, $13\frac{3}{8}$" wide, and $7\frac{5}{16}$" deep — weighs approximately 14 lbs.

Check these specifications:

Frequency Response: 50 to 15,000 cps.
Distortion: 1% or less at 12 dbm output.
Signal to Noise Ratio: —68 db.
Input Impedance: 250 ohms (nominal).
Output Impedance: 600 ohms balanced.
Power Source: 117/230 v at 50/60 cps.

Collins is your one *complete* source for all your broadcast needs. For further information and technical specifications, call or write Collins Radio Company, Broadcast Sales Division, Cedar Rapids, Iowa.

Equipping a Radio Station?

New RCA 5000-Watt AM Transmitter

Type BTA-5R/5R1

A true high quality transmitter, requires less floor space than previous 5 KW transmitters, and it has been designed to provide years of outstanding performance. Available with conventional tube rectifiers or with the all new silicon high voltage rectifiers the BTA-5R/5R1 assures low operating costs and long life. There is easy access from the front to the vertical chassis containing tubes, feedback ladders and overload relays. It is also available with color doors to match studio decor . . . Whatever your equipment requirement see your nearest RCA Broadcast representative first!

Or write for descriptive literature to RCA, Dept. UC-22, Building 15-1, Camden, N.J.

RADIO CORPORATION of AMERICA

Tmk(s) ®

Bartley, Craven and Ford dissenting. Ann. June 10.

By memorandum opinion and order, Commission denied petition by Indiana Central U. for rulemaking to reserve ch. 13 for educational use in Indianapolis, Ind., where ch. *20 is reserved for such use. Comr Lee absent. Comr. Craven not participating. (Crosley Bcstg. Corp. operates station WLWL (TV) on ch. 13 in Indianapolis under STA). Ann. June 10.

By letter Commission granted application of First Baptist Church, Pontiac, Mich., insofar as it requests authority to transmit religious programs to CKLW Windsor, Ont., Canada, for period of one year. Ann. June 10.

BROADCAST ACTIONS

By Broadcast Bureau

Actions of June 5

WCTV (TV) Thomasville, Ga.—Granted cp to make changes in ant. system and other equipment; ERP vis. 100 kw, aur. 50 kw, ant. 1020 ft.

WIMA-TV Lima, Ohio—Granted cp to change ERP to vis. 214 kw, aur. 108 kw, and make other equipment changes.

WLEX-TV Lexington, Ky.—Granted mod. of cp to increase ERP to vis. 272 kw, aur. 146 kw; and make changes in ant. system and equipment; ant. 640 ft.

Following stations were granted extensions of completion dates as shown: WSUR-TV Ponce, P.R., to Dec. 8; WVEC-TV Hampton, Va., to Jan. 4, 1960.

Actions of June 4

WIRB Enterprise, Ala.—Granted assignment of licenses to **R. E. James**, trading under name **Wiregrass Bcstg. Co.**

KJFJ Webster City, Iowa—Granted acquisition of positive control by **D. D.** and **Mary K. Treu** through purchase of stock from **Glen** and **Opal Barnett** (BTC-3138).

KYSS Missoula, Mont.—Granted mod. of cp to change ant.-trans. location; studio location; specify remote control point same as main studio and change type trans.

WRKT Cocoa Beach, Fla.—Granted mod. of cp to change type trans.

Following stations were granted extensions of completion dates as shown: KJML (FM) Sacramento, Calif., to July 5; KYSS Missoula, Mont., to Aug. 15.

KDWD-FM San Diego, Calif. — Granted authority to remain silent for period of 60 days from May 25 to July 25.

Actions of June 3

WHBY Appleton, Wis. — Granted assignment of license to **Nobertine Fathers.**

WCPK College Park, Ga.—Granted license for am station; remote control permitted.

KYRO Potosi, Mo.—Granted license for am station.

WHKY-FM Hickory, N.C. — Granted license for fm station.

KBOY-FM Medford, Ore.—Granted license for fm station.

WQIK Jacksonville, Fla.—Granted license covering increase in power and installation new trans.; remote control permitted; condition.

WERE Cleveland, Ohio—Granted licenses covering installation new main trans.; and installation of old main trans. as alternate main trans.

KALI San Gabriel, Calif.—Granted license covering changes in hours of operation, directional ant. system, ground system, studio and station locations and specify studio location.

KBCH Oceanlake, Ore.—Granted license covering changes in facilities, ant. system and installation new trans.

WCHA-FM Chambersburg, Pa. — Granted license covering change in frequency, installation new trans., increase in ERP and change type trans.; ant. height 265 ft.

***WTHS-TV Miami, Fla.**—Granted cp to change ERP to vis. 43.6 DA, aur. 21.8 DA; trans. location; type trans., ant. and make changes in equipment; ant. 340 ft.

WKRC-TV Cincinnati, Ohio—Granted cp to change studio and trans. locations.

***WEDU (TV) Tampa, Fla.**—Granted cp to change ERP to vis. 56.2 kw, aur. 28.2 kw, make changes in trans., install amplifier and other equipment; ant. 490 ft.

KGMS Sacramento, Calif. — Granted license covering changes in daytime DA system.

WJHL-TV Johnson City, Tenn.—Granted cps to change type ant. and other equipment (main trans. & ant.) and install auxiliary ant. system at main trans. and ant. location.

***KPEC-TV Lakewood Center, Wash.** — Granted extension of completion date to Dec. 22.

Actions of June 2

KEED-FM Eugene, Ore.—Granted license for fm station.

WOMC (FM) Detroit, Mich.—Granted license covering installation new amplifier; increase ERP, ant. height; change station location and type ant.

KALB-FM Alexandria, La.—Granted license covering replacement of ant. and feed line, changes in ERP, ant. height, ant. system and deletion of remote control operation; ERP 8.4 kw.

WVOX - AM - FM New Rochelle, N.Y. — Granted mod. of license to change name to Radio Westchester Inc.

KBOX Dallas, Tex.—Granted mod. of license to change name to Radio Station KBOX.

KDKA Pittsburgh, Pa.—Granted cp to install new trans. and ant. for auxiliary purposes; remote control permitted.

WAAF Chicago, Ill.—Granted cp to install new trans. at main trans. location to be used as alternate main trans.

WDAF Kansas City, Mo.—Granted cp to install new trans. at main trans. location for auxiliary purposes; remote control permitted.

KEYJ Jamestown, N.D.—Granted cp to install new trans.

WLLH Lowell, Mass.—Granted cps to install new trans. at Lawrence and Lowell, Mass.

WJCD Seymour, Ind.—Granted authority to sign-off at 7 p.m., CDT, for period ending Aug. 31.

WRSA Saratoga Springs, N.Y. — Granted change of remote control authority.

Granted extensions of completion dates for following stations: KPQ Wenatchee, Wash., to July 7, and WIBC-FM Indianapolis, Ind., to Sept. 11.

Actions of June 1

KVRH Salida, Ohio—Granted assignment of license to **Regional Bcstg. Corp.**

KCOG Centerville, Iowa—Granted authority to sign-off at 7 p.m., Monday through Saturday and 5 p.m. on Sundays for period ending Aug. 29.

ELECTRONIC LIFE PRESERVERS FOR THE MISSILE AGE

They're known as countermeasures.

To you, they could represent the difference between life and death.

Their job: to make missiles miss.

Active countermeasures may jam the radar which guides a missile. Or blind its electronic eyes. Or deflect it from its course. Or help seek it out and destroy it—miles from its target.

They Cannot Wait

If an attack ever comes, there are only minutes in which to act.

ITT is one of the companies holding the stop watch.

More than 15 years ago, in fact, the Department of Defense anticipated missile warfare and assigned the ITT System to the development of countermeasures.

Since then, many have been perfected. Others are now being tested. Still others are being rushed to completion. Some are active countermeasures. Others are passive countermeasures, which record hostile electronic activities.

Hundreds of ITT scientists and technicians, specialists in fields such as physics, astronautics, electronics, chemistry and metallurgy, are devoting their energies to the job.

At their disposal are the facilities of 101 growing research and manufacturing plants.

Many Other Big Jobs

Countermeasure development is one of the many areas in which ITT is engaged for the defense of the United States.

Guiding, controlling and testing missiles—to defend, to retaliate—is another vital area of activity. Still another is the creation of a split-second global communications system for the Strategic Air Command. And the development of earth satellites is another.

The all-important job of operating and maintaining the DEW Line, our Distant Early Warning radar network in the Arctic, is also an ITT assignment.

Countermeasures Come First

The potentiality of missile warfare is a fact we must face squarely, realistically and *quickly*. Countermeasures must be on call. ITT will help to get them there in time.

ITT

. . . the largest American-owned world-wide electronic and telecommunication enterprise, with 101 research and manufacturing units, 14 operating companies and 130,000 employees.

OUR RESPECTS TO . . .

Samuel Jordan Slate

Ever hear of a Britisher with a Southern drawl? Sam J. Slate, general manager of WCBS New York, still chuckles today as he recounts the story.

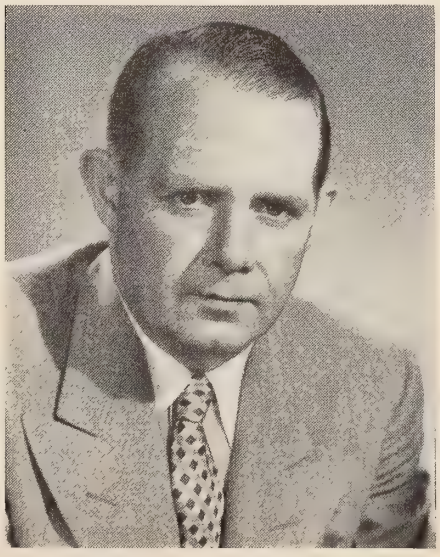
Mr. Slate, who left his native Georgia 26 years ago for New York but held on to his Southern accent, was program director for the BBC after World War II and often toured Britain. On a train journey in Scotland one day a native struck up conversation and noted Mr. Slate's distinctive accent. After talking for some time, his travelling companion finally asked if the BBC man were perhaps from India. Mr. Slate replied: "No." On several other occasions during their chat, he asked politely if Mr. Slate were from other parts of the Commonwealth with which he was unfamiliar—perhaps Australia or South Africa? Mr. Slate smiled and shook his head.

Finally the nonplussed Scotchman blurted out: "Do you happen to come from southern England?"

His associates believe the anecdote epitomizes Mr. Slate's quiet sense of humor and characteristic self-effacement. Mr. Slate is a large, easy-going man with a florid complexion, who can talk fluently and knowledgeably about a host of subjects, but he appears reticent to grab the spotlight. Some of his colleagues at CBS accordingly pay him this accolade: "Sam isn't a talker; he's a doer in a business that is full of so many people that blow their own horns. He's a real professional."

Emphasis on the Creative • Mr. Slate assumed the post of general manager of WCBS in April 1957, capping a career that has accentuated the creative end of radio. He always was interested in writing and even today calls himself "a frustrated playwright."

Samuel Jordan Slate was born in Columbus, Ga., July 27, 1909, and set his immediate sights on a career as a newspaperman. While attending the U. of Georgia, he served as a correspondent for United Press and the *Columbus Enquirer Sun*. Mr. Slate earned his B.A. in journalism in 1929 and then spent four years with UP in Atlanta, New Orleans and Montgomery, Ala.



In 1933, eager to broaden his experience, Sam Slate journeyed to New York and joined the newly-organized Columbia News Service, which supplied news to the CBS network. He remained with CBS until 1935 when he began a new phase of his career: writing documentaries and serving as a publicity-merchandising director.

Industry Experience • For several years before World War II, he was writer-producer of the National Assn. of Manufacturers' *Defense for America* network radio series, which told the story of industry's conversion to war production, and *This Nation at War* series. From 1937-40, he was publicity director for Phillips H. Lord Inc., handling promotion and merchandising for *We, The People, Seth Parker, Mr. District Attorney* and *Gangbusters*.

From 1942-45, Mr. Slate served with the U.S. Maritime Service as first lieutenant (senior grade) in the Third Naval District. As a radio public relations officer, he created, wrote and directed documentary and musical shows dealing with the merchant marine. In 1945, he began what he describes as "a most rewarding period of my life" when he joined the BBC as program director. He remained with the BBC for six years, writing-producing-directing a wide variety of programs designed to explain the U.S. to Britain and vice versa.

He confesses that he left BBC reluctantly, but the move was dictated by the need to improve his financial position. He was offered—and accepted—the post of WCBS program director in 1951 and fortunately, the station's programming approach coincided with Mr. Slate's philosophy.

Personalities on Parade • WCBS for many years has stressed live musical personalities, public service programming and news. Mr. Slate is credited with having placed even heavier emphasis in these areas during his tenure as program director and was responsible for engaging such stars as Martha Wright, Jim Lowe and Lanny Ross and for expanding the station's public service programming.

WCBS Radio's Sam Slate
Puts emphasis on the creative

It was not altogether surprising that Mr. Slate was named general manager of WCBS in 1957 when Carl S. Ward shifted to CBS-TV, although creative personnel often are not selected for administrative posts at major stations. In Mr. Slate's favor was the importance of programming in WCBS' operational plans and the growing respect his superiors and colleagues had acquired for his executive ability.

Meeting the Challenge • Mr. Slate, who maintains his interest in the station's programming, was put to a stern test last fall when CBS Radio cut back the amount of programming it provides to its affiliates with the institution of the Program Consolidation Plan. WCBS met the challenge of 30 additional hours of programming per week by extending the popular morning program featuring Jack Sterling and adding such personalities as Emily Kimbrough, Louis Nye, Johnny Ray, Johnny Desmond, Westbrook Van Voorhies, Portia Nelson and Lee Jordan. As an old newspaperman, Mr. Slate exerted considerable influence in the station's recent decision to build up a corps of about 15 news staffers to supplement CBS Radio's news operation.

Mr. Slate is optimistic about WCBS business in 1959. He offers this information about station activity: "The best year in a long time was 1957. We had a good year in 1958 but it was behind '57. I think 1959 will be the best year since I've been here."

In 1939, Mr. Slate married the former Ella Phillips of Roanoke, Va. They live in Manhattan with their daughter, Sally, 16. He is first vice president of the Radio & Television Executives Society and a member of the Players Club, the Dutch Treat Club and Sigma Delta Chi in New York. Mr. Slate is active in community affairs and is on the executive board of the Manhattan Council, Boy Scouts of America and of the New York Safety Council, and is radio advisor to the Light House (New York Assn. for the Blind).

He's an enthusiastic fisherman ("I'll go anywhere to fish") and collects cookbooks ("I know how to use them, too"). His one frustration?

"I want to write that play. But I can't find time."

Wise move

IT took 55 years for Madison Ave. to recognize the importance of Pennsylvania Ave. The Advertising Federation of America will establish a full-time staff and office in the Nation's Capital not later than September, with its headquarters to be moved from New York during the following year.

Broadcasters made the move 30 years ago when the NAB was reorganized and transferred from New York. This journal, from its start more than 27 years ago, has headquartered in Washington.

Whatever the sweet talk, the real reason for the move is the realization that a lobbying job needs to be done. Rep. Bob Wilson, of California, himself an agency owner, called the shot several months ago, in citing legislative threats to advertising.

Those of us headquartered in Washington for years have been aware of bureaucratic antipathy toward advertising. During both Republican and Democratic administrations, there have always been those of the intelligentsia who regard advertising as an economic waste, and who would have industry run strictly on a grade-labelling basis.

Broadcasters can be pardoned if they nod approval of this move by their contemporaries representing advertisers, agencies and other media. It is because the AFA parallel with their own plight is so striking, and because broadcasters have been on the front line from the start with practically no allies.

We welcome AFA to the Washington scene. And we predict other trade associations identified with advertising soon will find that Washington headquarters are in their futures.

FCC's tumultuous 25

THIS Friday, June 19, will be the Silver Anniversary of the FCC. On that day 25 years ago the Communications Act became law.

There was regulation of radio prior to 1934, but it was temporary. The FCC took over on July 11, 1934, from the Federal Radio Commission, created in 1927 as an interim body. The FRC was to "bring order out of chaos" in the broadcast band, which at that stage accommodated am radio only, after which the regulatory function was to return to the Radio Divison of the Dept. of Commerce.

But that was never to be. Radio grew like Topsy. So did other modes of communication then known to the art. So Congress created the FCC as a permanent agency to administer all non-government communications. The FCC's function in broadcasting was to make orderly allocations and to curb electrical interference. References to "programming" appeared in the Act only negatively, i.e., to bar program censorship, and to make illegal lotteries or use of obscene, profane or indecent language. (The last two provisions subsequently were transferred to the Criminal Code.)

All 25 years of the FCC's existence have been no less tumultuous than they are today. It took the politicians a while to recognize the importance of radio but once they did, there was no stopping them.

One public figure who did not underestimate the potency of radio was President Franklin D. Roosevelt. In appointing the late Anning S. Prall, of New York, to the first regular chairmanship of the FCC, he told him the job was the second most important in Washington—second only to the Presidency.

That somewhat exaggerated observation demonstrated FDR's affinity for radio as a means of reaching the people and of overriding a hostile press. In those days an estimated 80% of the nation's newspaper circulation was opposed to FDR. Yet he broke precedent by being elected to four successive terms through adroit use of the radio "fireside chat."

The last quarter century has seen an almost unbroken series of crises for broadcasting. There were battles in am broadcasting as bitter as those that later were encountered in television. Fm had to fight for survival, and even after it found its haven, channels went begging because of the rapid post-war emergence of tv. Only in the past year has fm begun to recover.

There were several fights-to-the-finish for television standards before the FCC settled the compatible versus incompatible color issue in 1953. Only during the World War II years, with the tight freeze on critical equipment, was there a hiatus, and even then there were problems of keeping stations operating with second-hand parts and tubes to maintain morale on the home front.

When the FCC opened its doors in 1934, there was practically no legal precedent. Every court decision plowed new legal ground. The FCC, with bright young New Dealers calling the legal shots, was led more and more into the forbidden area of program control—censorship we called it. Then came the Supreme Court decision in the chain-monopoly case in 1941, wherein Justice Frankfurter held that the FCC was not only the traffic cop, but was charged with responsibility over the "composition" of the traffic. This was eagerly construed by the New Dealers as giving the FCC the authority to take a look at programs to ascertain whether stations were satisfying the Congressional mandate of serving the public interest, convenience and necessity.

It lead to the infamous Bluebook of 1946, wherein the FCC tried back-door censorship. It is largely the basis for the FCC's current foray into programming regulation through the refusal to renew licenses of seven stations in Atlanta on the ground of program "imbalance." It is this case that can provide the test, to settle once and for all the FCC's program jurisdiction.

We could go on and on. But an important anniversary is no time for recrimination. It is true that, despite all the travail, the United States from the start has led the world in broadcasting. It is a tribute to the American system of free, competitive enterprise.

So to the present seven members of the FCC, their 25 predecessors, living and gone, and to the staff, present and past, we extend Silver Anniversary felicitations.

How To Make Your Speeches Sparkle! Get Locker-Room Laughs! Live It Up, Laugh It Up, and Be Suave About Sports!

Send $3 plus 25¢ Postage and Packing for Sam Molen's Newest Book — "TAKE 2 AND HIT TO RIGHT" (Money Back If Not Satisfied)

SAM MOLEN
Sports Director • KMBC-TV
KMBC-KFRM RADIO
Kansas City

Exhibits his newest book "Tak 2 and Hit to Right" publishe by Dorrance & Company, Phil delphia. Get your copy, b mail, for $3 plus postage.

SAM MOLEN, veteran sportscaster who celebrated his 15th anniversary with KMBC-KFRM and KMBC-TV of Kansas City May first, has done it again! His second book, **"Take 2 and Hit To Right"** is as big a success as was his first: **"They Make Me Laugh."**

The 208 pages of Sam's latest laugh-begetter are crammed with anecdotes which run the sports gamut from baseball to bowling. In it you'll read hundreds of humorous stories about the great and near-great of sportsdom . . . stories that will become part of our sports folklore as the years unroll . . . mirth-quaking stories you can use in after-dinner speeches . . . in newspaper columns . . . on the air in sports broadcasts . . . or just to tell the gang for laughs in the locker room!

It's all here and it's all funny, in the chuckle-chocked pages of Sam Molen's newest book! Every sports desk in the nation, in newspaper office or broadcast station, will be the richer for possession and use of this book.

The Devil, of Course!

Sample of the many offbeat stories is one about Bishop Fulton Sheen, scheduled to speak in a Syracuse, N. Y. armory used for wrestling, boxing, basketball and other indoor sports. Two ushers were discussing the coming events. "We'll have 'em jammed in here tomorrow night" said the first. "Who's gonna be here?" asked his friend. "Bishop Sheen, that's who!" "Oh," said the friend. "Who's **he** wrestling?"

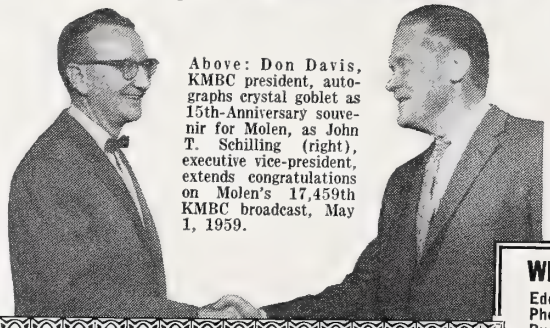
If you don't think that's funny, send for the book anyway—and see how much funnier they get as you scan these 208 pages averaging three stories per page. Maybe more to your liking would be the chapter: "Quotable — and Unquotable." Here appears the remark of a coed to her gym instructor: "I'm going to learn to stand on my head or bust."

Who Is This Fellow, Molen?

He's a working capitalist: Kansas City's highest-paid Radio and Television performer. It's an arrangement KMBC likes because it keeps Sam happy; and KMBC-KFRM and KMBC-TV make money, too. Sam is a completely dependable, thoroughly tenacious man with a microphone or a sponsor. He's never been known to let go of either one. He broke into Radio as a time salesman while a senior in college, during the depression. Since then he has been a broadcaster, writer, syndicator, agency man and salesman—two or three at a time.

His itinerary: WTAX and WCVS, Springfield, Illinois, as a salesman-sportscaster. Ruthrauff & Ryan for 5½ years in merchandising and account work, meanwhile doing baseball play-by-play for Hyde Park Beer. WCHS, Charleston, as sports director for a 4-station West Virginia network. Then, in 1944, to KMBC in Kansas City—where he has been steadily sponsored by a group of happy advertisers for 15 years. "Sustaining" is the dirtiest word Sam knows.

Sam's avocation is investing. He and his wife Randy play the market like a violin. KMBC would long since have installed Sam in an investment-counselling program—except that all the viewers and listeners would profit sufficiently in three months to move to the French Riviera—and where the h..... would the stations be **then?**



MOLEN'S AMAZING RECORD IN 15 YEARS AT KMBC

RADIO . . . 15,670 PROGRAMS		TV . . . 1,879 PROGRAMS	
Three daily 5-minute shows	14,040	Nightly 5-minute sportcasts	1,560
Play-by-play football and basketball	250	"Bowlin' With Molen" hour-long remotes from Plaza Bowl in Kansas City	260
Half-hour quiz shows	104	"Outdoorsman" programs	52
Baseball "dug-out" shows and "scoreboards"	1,120	"Big-Eight" football and basketball network originations	7
Half-hour "Memory Lane" sports shows	156		
Total, Radio Programs	15,670	Total, TV Programs	1,879

Note: Sam's nightly TV show has the highest cumulative audience rating of ALL non-network strips in Kansas City. His "Bowlin' with Molen"—oldest continual TV bowling show in the nation—rates 39% better than its opposition, and 35% ahead of the only other full-hour bowling show on Kansas City TV. But, Meanwhile, Back to Sam's Book—

GET IN AN "investing" mood yourself, and Clip That Coupon in the lower lefthand corner. Mail it with a check, money order or bank draft for $3.25 to the address shown. This is $3 for the book and 25c for packing and postage. Sam figures he'll lose money on the packing-postage bit; but he'd like your $3. And you'll **love** the book! Anyway, the whole thing is done on a "Satisfaction Or Your Money Back" basis . . . hence, you can't get hurt, **much!**

If you'd like to take the word of Ernest Mehl (sports editor of **The Kansas City Star**), writing in **The Sporting News**, here's one reviewer's report: "Composed to a great extent of fresh material. All those millions who profess an interest in some phase of athletics will find a great deal that is new to them. The chapter "Casey Stengel and the College of Babel" has to do with comments the one-time dental student has made during his visits to Kansas City, his home town. It is not likely these have been heard by very many . . . That's why this is a far better-than-average compilation of stories which one guy hears, tells another, and the latter embroiders and passes on."

Sam would like to pass his stories on to **you** . . . and the way you get 'em is to sign and mail the Coupon. Take $3.25 from your wallet and hit right: Send the money to Sam! Your book will be forwarded by return parcel post. Thanks!

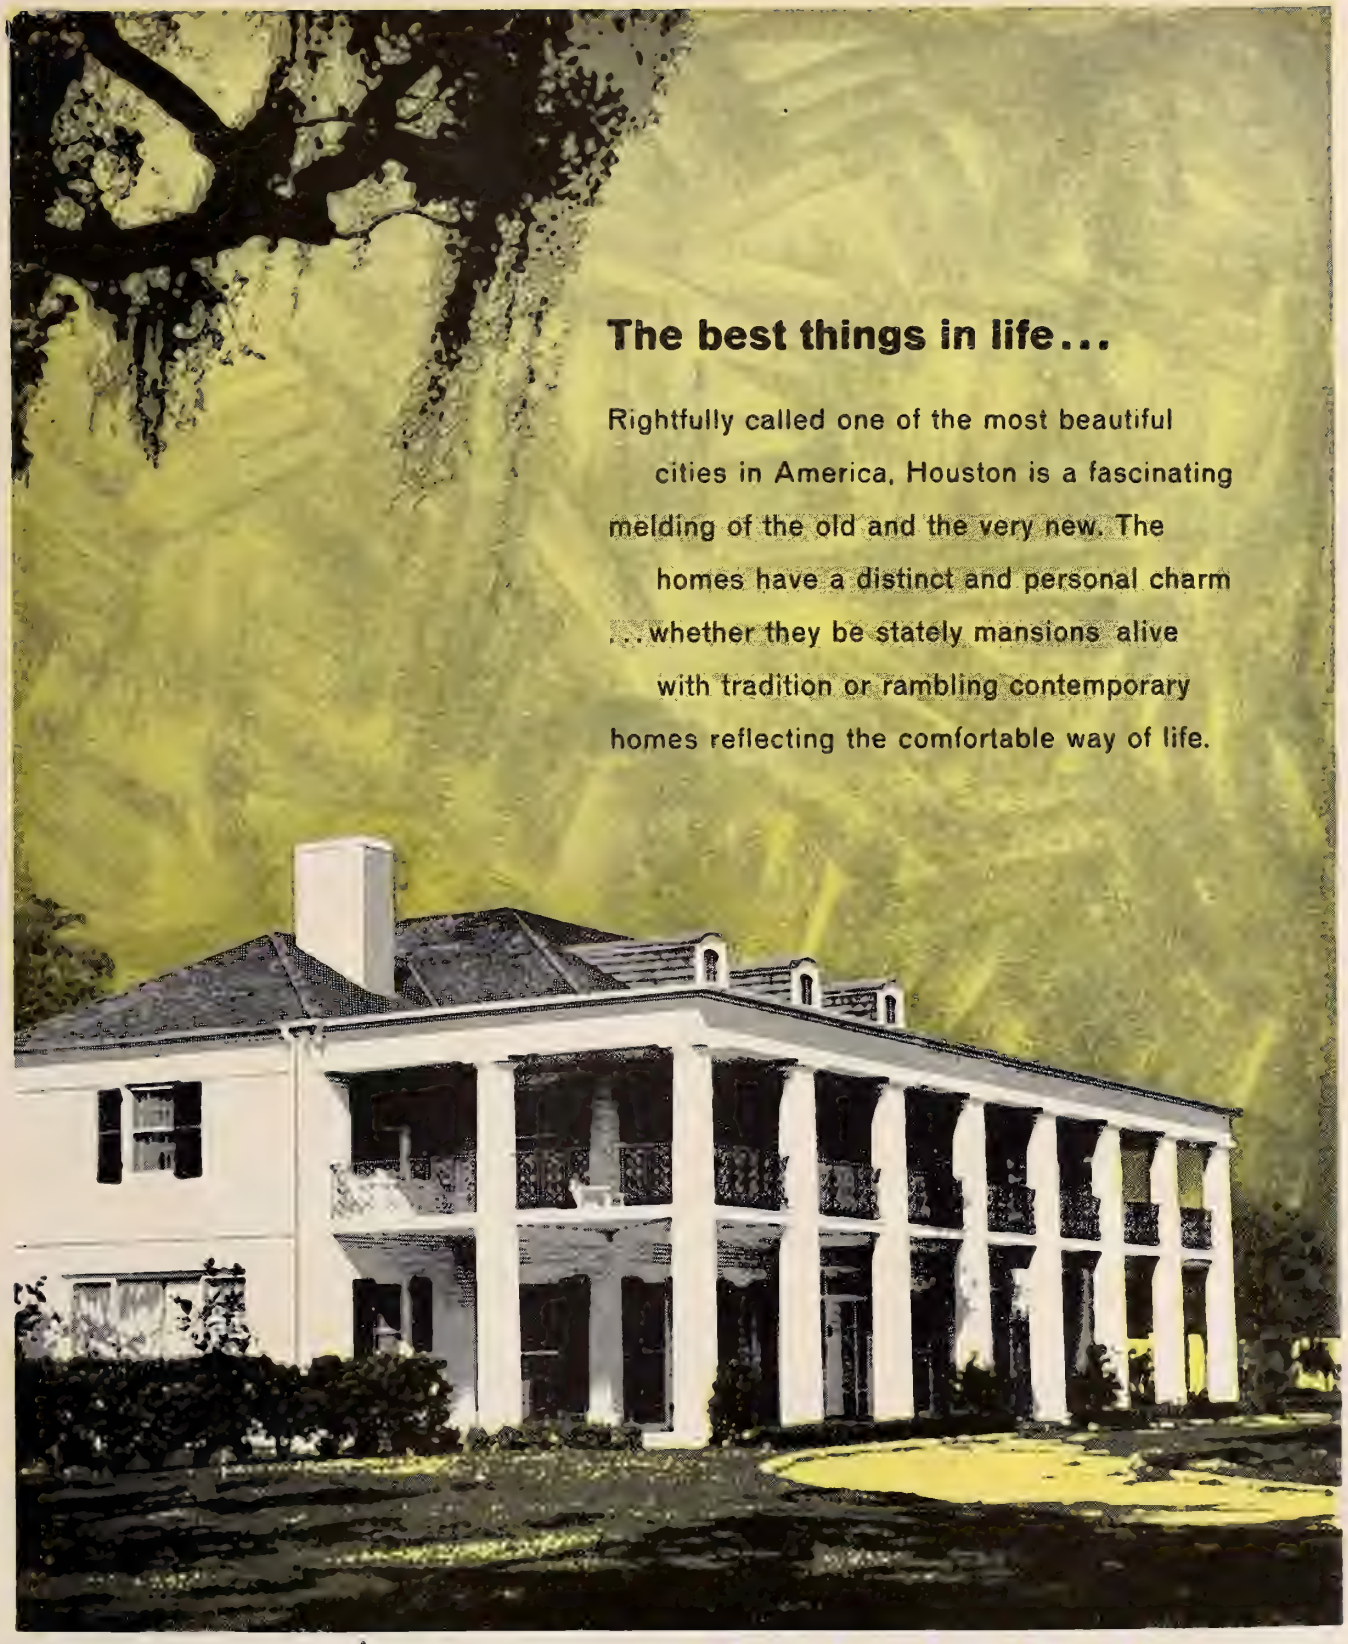
JULY FIRST
IS THE DAY

"PEOPLE ARE INTERESTED IN PEOPLE"

. . . and the PEOPLES' COURT OF SMALL CLAIMS has 'em. People by the dozens, from rich man to Indian Chief, in a half-hour of the most fascinating, informative courtroom drama ever presented on Television!

PRODUCED IN HOLLYWOOD this new show combines the quality, know-how and the vast talent pool available only in the nation's film capital. In compelling and powerful true-to-life style the Peoples' Court of Small Claims presents the gamut of emotions.



HUMAN INTEREST all the way. From a claim for the death of a parakeet to a typical case of noisy neighbors. From a fender-bender to a damaged front lawn. From the humorous to the sad . . . a typical day in Los Angeles' busiest court. People.

AVAILABLE ON VIDEOTAPE in your market too. It has been a big seller in Los Angeles (as in nine other TV markets) and it can work for you . . . to reach into more homes, to sell more of your products. Because "people are interested in people."

For information, facts and figures—call or write:

Peoples' Court Productions

CLOSED CIRCUIT®

Friend in need • Sen. Vance Hartke (D-Ind.) feels broadcasters so far have let him down in his efforts to obtain broad revisions of Sec. 315, political broadcasting law. All three network witnesses at Senate Communications Subcommittee hearings last week acknowledged they'd settle now for nothing better than exemption of newscasts from equal time provisions (story page 50). After their appearances Sen. Hartke confided that he and other Senators who support his bill think networks have killed all chances at this session for improvements beyond newscast exemption and have all but killed hope for broader corrections in future.

Here's Sen. Hartke's reasoning: There was (may still be) good chance to get strong bill reported out of committee. But there's no chance of strengthening bill after it reaches floor, and good chance of stiff floor fight on whatever bill comes out of committee. Weak network testimony before committee lends strength now to those favoring status quo and can forever be cited in opposition to future attempts at repeal or broad amendment.

Status for radio • Not announced after NAB board's meeting last week were two actions showing how radio membership is gaining strength in association's administrative structure. (1) Board adopted new budget with separate radio fund to match tv's fund. It's figured roughly at general fund, $750,000; radio fund $240,000; tv fund $225,000; tv code $107,000—total of around $1,320,000. With formation of separate Tv Information Committee (story page 116), NAB will donate $75,000 to its operation. New NAB public relations department headed by John Couric will have $60,000 radio and $15,000 tv budget. (2) Radio Board adopted resolution specifying that association meetings should be held only in hotels with radio in every room, subject to present meeting commitments.

McDermott quits • Thomas J. McDermott, senior vice president in charge of tv and radio for Benton & Bowles, New York, who was mentioned as possible successor to Hubbell Robinson Jr. at CBS-TV, tossed bomb-shell at agency last week. Mr. McDermott resigned—not to accept CBS-TV post, but to consider several promising offers from West Coast production companies. Lengthy memo was circulated to B&B executives last Friday (June 19), friendly in tone, disclosing Mr. McDermott's resignation, which will take effect in several weeks. Oliver Barbour, B&B vice president in charge of broadcast programming, is expected to succeed Mr. McDermott.

Wait and see • Despite indication by backers of new Television Information Committee (story page 116) that networks are favorably inclined toward $700,000-or-so nationwide campaign to improve public's image of tv, there's definite sign they won't buy any pie-in-the-sky project. Network representatives have stated privately they won't commit themselves to $65,000 yearly each until they see detailed draft of operating plans, consult list of nine TIC committeemen and find out who will be operating head. Project was formally launched at NAB board meeting last week.

Swing to tape • BBDO, tv's "taping agency" (for past eight months, it's been video-taping nearly all its live commercials), now reports there's trend at agency in direction of tape replacing some film commercials. Among its clients in this category are General Electric, using film exclusively for three years but now producing nearly all commercials for *General Electric Theatre* on tape; Pittsburgh Plate Glass, once heavy film user but now deeply involved in tape commercials "almost to exclusion of film." Not only is GE using tape, BBDO says, but doing commercials like those formerly filmed but at saving of about $2,000 per commercial.

End of era • Though all parties concerned aren't talking, it's virtually certain that RKO Teleradio stations in New York, Boston, Los Angeles, San Francisco and Memphis will defect from Mutual (which Teleradio once owned) when network affiliation agreement ends in August. It is understood that Mutual will not be "caught short" and already has lined up affiliates in those markets if and when disaffiliation develops. Reported to be New York outlet: WINS.

Outlook is that Bob Hurleigh, now senior vice president of Mutual in Washington as well as vice chairman of network, will take over administrative chores now being vacated by executive vice president Blair Walliser (see page 10).

Mr. Hurleigh already spends three days weekly in New York, would continue commuting under new plan.

NBC-TV switch in Norfolk • WAVY-TV Portsmouth-Norfolk (ch. 10) will switch affiliation from ABC to NBC. WVEC-TV Hampton-Norfolk, present NBC-TV affiliate, according to President Tom Chisman, has been offered contract with ABC-TV. Mr. Chisman said NBC had assured him that it would not switch affiliation until WVEC-TV is shifted from its present ch. 15 uhf assignment to ch. 13, earmarked for its use.

Out-foxed • Busy entrepreneur Matty Fox, who is reticent about revealing his plans for exhibiting widely-heralded tapes of Russia's Bolshoi Ballet, may be dismayed by announcement to be made today (Monday). Art Theatre of the Air Inc., New York, subsidiary of Essex Universal Pictures Inc., scheduled to announce deal with Soviet government, under which many hours of cultural film produced in Russia and embracing various art forms, including ballet, will be offered immediately for distribution to tv stations.

Ironic footnote to Soviet-Essex Universal deal: Essex-Universal is headed by millionaire-industrialist Joseph Harris, who was close associate of Mr. Fox for several years in tv film distribution business in early 1950's. Mr. Fox was chief executive officer of Motion Pictures for Television, New York, at that time and Mr. Harris was reportedly chief bankroller and advisor as well as officer of company.

Angel in the wings • New bankroll is hovering just outside precincts of Mutual radio network, may decide to go in for minority interest. He's Albert Gregory McCarthy, businessman whose realty interests range from Anchorage, Alaska, to Shannon, Ireland, with stopovers in Washington, Florida and other points. Mr. McCarthy and Mutual's newest owners, Malcolm Smith group (BROADCASTING, March 30), have been huddling for several weeks.

Bannister waiver • Mandatory retirement at 65 was waived by NBC board in case of Harry Bannister, vice president in charge of station relations. He reached retirement age April 30 but board extended his tenure for another year. Celebrated as raconteur, Mr. Bannister joined NBC eight years ago after 21 years at WWJ Detroit.

THEIR TIME IS YOUR TIME IN DETROIT!

with WJBK-TV's **EARLY SHOW** movie!

Busy day behind them . . . Time to relax. Now's the highlight of their day with a *topflight movie*—WJBK-TV's "Early Show," Monday through Friday, 5:00 to 6:30 PM – begins June 29. Team up with PARAMOUNT, UNITED ARTISTS, SCREEN GEMS, NTA and RKO to tap the 9-billion-dollar sales potential in the nation's fifth market—at a strategically receptive time!

WJBK-TV puts you right in the picture in 1,900,000 television homes in Detroit and southeastern Michigan.

WEEK IN BRIEF

MR. COHEN

Battle of summer tv reruns • There's shallow victory for economy in the present practice of summer tv rehash of winter programs, according to Philip H. Cohen, vice president and radio-tv director, Sullivan, Stauffer, Colwell & Bayles. He suggests possible way out through cooperation of all segments of industry in a new showcase plan for summertime. It's related in this week's MONDAY MEMO. Page **21.**

What broadcasters think of NAB • It's pretty good, but! Independent research firm submits bulky report on what members and non-members think is and isn't wrong with association. Government relations and public relations are main problems that concern members. Page **31.**

Code board gets tough • NAB Tv Board approves report yanking code seal from 13 station subscribers carrying hemorrhoid account. Another 17 stations resign from code structure. Total subscribers now 270 compared to 306 before Preparation H crackdown began. Page **34.**

Relief from Sec. 315 • Broadcasters' hopes for relief from Sec. 315 rise as Senate subcommittee begins hearings; Sen. Pastore indicates amendment is coming but splashes cold water on proposals for broad legislation hoped for. Page **50.**

Commission won't budge • FCC affirms Lar Daly ruling on newscasts; declares it's all or nothing on Sec. 315 in turning down petitions for reconsideration filed by CBS, NBC, Westinghouse Broadcasting Co. and Attorney General William P. Rogers. Page **55.**

New England on the march • A 44-page economic study of modern Yankeeland—the true story of how the oldest part of America is heading the nation's entry into the sophisticated industrial future. Pages **71-114.**

NAB Television Board • Plans for Tv Information Committee, with headquarters in New York, approved. Committee will have $600,000 or more to conduct campaign designed to improve image of television in public mind. Clair R. McCollough, Steinman Stations, submitted plans which received approval of Tv Board. Page **116.**

NAB Radio Board • F.C. Sowell, WLAC Nashville, Tenn., elected chairman, and Thomas C. Bostic, KIMA Yakima, Wash., vice chairman. All-Industry Radio Music Committee commended for its work. Page **118.**

Wire film • British beat jet plane in transmitting short pieces of news film by newly-developed system using Transatlantic telephone cable. Outcome: a rash of interest renewed in international tv transmission. Page **121.**

Pay-tv in Canada by December • Paramount Pictures' controlled Famous Players Canadian Corp. will start a pay-tv system in a Toronto suburb via wire lines later this year as subsidiary International Telemeter Co. sees wire as the immediate economic answer, broadcast systems later. Possibility: 'free' programs on the system during the daytime, supported by commercials for local advertisers. Page **122.**

RADIO MUSIC LICENSE SIGNED

Compromise accord reached with ASCAP

Agreement between radio broadcasters and ASCAP on terms for new music licenses was reached Friday afternoon in chambers of Judge Sylvester J. Ryan of U.S. District Court for Southern District of New York. Matter had been in air since expiration of old licenses Dec. 31, 1958.

New formula calls for reduction in blanket commercial fee from 2.25% of net time sales to 2.125% of net times sales. Sustaining fee was changed as follows: for stations with annual net receipts between $50,000 and $150,000 —from one-quarter hour rate to twice station's 1-minute rate; for stations with annual net receipts above $150,000— from half-hour rate to 2½ times station's 1-minute rate.

Agreement calls for combined blanket sustaining commercial license and combined program sustaining commercial license, giving broadcaster choice of one or other. Terms of latter category were not announced. New licenses are for five years retroactive to Jan. 1, 1959.

Representing All-Industry Radio Music License Committee, negotiating for stations: Chairman Robert T. Mason, WMRN Marion, Ohio; George W. Armstrong, Storz Stations; Sherwood J. Tarlow, Tarlow Stations; Emanuel Dannett, counsel to committee, and William Golub, associate counsel.

For ASCAP: Judge Ferdinand Pecora, Herman Finkelstein, David Horowitz and Jules Collins.

Agreement would seem to represent compromise between ASCAP and industry positions. Mr. Mason had indicated stations would seek reduction in commercial fee (which they got) and elimination of sustaining fee (which they didn't). Rate issue had gone to court under provisions of 1950 ASCAP consent decree, which provides that if acceptable formula could not be reached within 60 days of expiration of old contracts, matter could be taken to court for settlement. ASCAP initiated move late in January.

NAB: repeal Sec. 315; commend Martin role

NAB Board of Directors stuck by its historic stand for repeal of Sec. 315 of Communications Act at joint board meeting Friday (June 19) but instructed NAB staff to support pending legislation which seeks to remedy some of section's defects (early stories pages 50 and 55).

Board instructed special committee to negotiate contract renewal with President Harold E. Fellows, whose term expires June 1, 1960. In accordance with Mr. Fellows' request, contract will be for 13 months (June 1, 1960-June 30, 1961 or following June 1961 board meeting). It calls for $75-000 yearly, his present salary, and expenses up to $13,000. Board resolution voiced hope Mr. Fellows will remain in presidency until his retirement in 1964 when he will be 65.

High commendation was given Donald N. Martin, who has resigned as public relations assistant to President Fellows after 2½ years service to operate his own public relations firm. G. Richard Shafto, WIS-TV Columbia S.C., Tv Board chairman, introduced resolution which was seconded by E. J. DeGray, ABC Radio vice president.

John Couric, NAB news-publications head, was promoted to manager of public relations department. He had been with UPI for a decade, joining NAB in 1957 as chief writer.

Va. group elects

Resolutions urging repeal or drastic modification of Sec. 315, equal time provision of Communications Act, and for repeal of Canon 35, barring radio-tv from court room coverage, were unanimously adopted by Virginia Assn. of Broadcasters at its business meeting Friday at Irvington, Va. Tom Chisman, WVEC-AM-TV Hampton-Norfolk, was elected president for new year with Robert C. Walker, WCHV Charlottesville, elected vice president and N. Wilbur Kidde, WAYB Waynesboro, elected secretary-treasurer. Directors for ensuing year, in addition to outgoing president Milton B. Henson, WREL Lexington, are Hamilton Shea, WSVA-AM-TV Harrisonburg; Charles Blackley, WTON Staunton; E. S. Whitlock, WRNL Richmond; C. T. Lucy, WRVA Richmond and Carl Lindberg, WPIK Alexandria (earlier story, page 60).

Sec. 315 hill hearing still drawing blood

Short but loud outburst between Lar (America First Daly and Sen. John Pastore (D-R.I.) and repeated clashes over how broad equal time amendments can get through Congress highlighted Friday (June 19) hearings by Senate Commerce Communications Subcommittee on Sec. 315 of Communications Act.

NBC Board Chairman Robert Sarnoff (see earlier story, page 50) and ABC Vice President John Daly both urged Congress to act immediately to repeal "the gag" on political news placed on broadcasters by the FCC-Lar Daly decision. Both said broader amendments to Sec. 315 were needed but industry could live with lesser relief in time for 1960 campaigns.

Sen. Pastore, chairman of subcommittee, maintained that this is all broadcasters can hope for from this session of Congress. Sen. Vance Hartke (D-Ind.), author of S 1858, also granting broadcasters relief from libel and defining qualified candidates, questioned witnessess at length on his proposals.

Mr. Sarnoff said NBC would be "most grateful" with reversal of Lar Daly decision that candidates must be given equal time on news shows but that network would not be content with just this. Sen. Pastore asked both network executives for comment on FCC proposal (see page 50), which he indicated frequently is favored plan. He said he will call FCC, Justice and networks back before Committee to definitely spell out just what types of news, panel, interview, special event and discussion shows would be exempted from equal time under amendment, proposed by Comr. Frederick Ford.

ABC's Daly said that "first of all, I want to assure that next year we can operate as a news media." ABC is concerned, he said, lest push for broader amendments of Sec. 315 delay action on limited change sought.

Lar Daly, perennial political candidate whose race for mayor of Chicago started current furor, started smaller

CONTINUES *on page 10*

AT DEADLINE

CONTINUED *from page 9*

furor when his turn came to testify. Called shortly after 12:30 p.m., Lar Daly shouted from rear of room for recess until 2 p.m. because he planned to speak "four hours." Witness and chairman shouted back and forth for several minutes with Sen. Pastore saying "nobody is going to come here and threaten this committee."

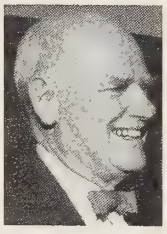
Lar Daly said he resented use of words "horrible, terrible and ridiculous" in describing FCC ruling that he was qualified for equal time in mayor's race. Also, he said, "individual who used word ridiculous [President Eisenhower] knows nothing about Sec. 315. I am far more qualified to speak than he." Witness also said he objected to "attorney general of the U.S. sticking his snout in somebody else's business."

He said any move to upset FCC ruling would be declared unconstitutional because of "subjective determination," which he described as giving broadcasters right to determine "who is news and who is not." Lar Daly maintained that his filing for mayor of Chicago was of "staggering importance" yet radio-tv failed to cover event but did report filing of two major opponents.

Witness said "if the networks think they have trouble now, just wait until 1960. So long as this law is on the books, I am going to take full advantage of it."

Mr. Daly charged that CBS "deliberately and with malicious forethought" taunted FCC ruling in Chicago mayor race by taking ruling to court. FCC's affirmation that he qualified for equal time is "a victory for everyone of the little guys," he stated.

W. D. (Dub) Rogers, president of KDUB-AM-TV Lubbock, Tex., followed Mr. Daly to stand and said his station is network affiliate and he, not network, is master. He said he did not want "umbrella" protection provided by Sec. 315 but would rather have responsibility to make political decisions himself.



First witness Friday was Rep. Glenn Cunningham (R.-Neb.) author of HR 5839, first equal time amendment introduced in present Congress. He said Congress "should and must" act during this session on amendment of Sec. 315. If not, he said, "I fully expect that there will be at least 5,000 candidates for the Presidency" in next election.

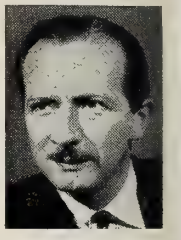
Eugene C. Pulliam, publisher of *Indianapolis Star* and *News*, urged Congress "to put an end to usurpation of legislative functions by federal commissions." He said Communications Act was never intended to give FCC power of censorship.

Democratic National Committee Chairman Paul Butler wrote Sen. Pastore urging passage of all but one section—that exempting newscasts—of Hartke bill. "Frankly, I am very much concerned that this section [favored by Sen. Pastore and other witnesses] . . . could lead to some very serious abuses. . . . We must not open the door to any abuses in 1960 which could be unfair, unjust, undemocratic and fatal politically to even one candidate of any political party," Chairman Butler said.

Statement by John Fetzer, president of Fetzer stations, favoring amendment of Sec. 315 was entered in record. Hearings resume tomorrow (Tuesday) in Room 5110 of New Senate Office Bldg. and are scheduled to run three days.

WEEK'S HEADLINERS

MR. HINCKLEY



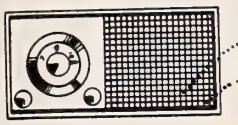
ROBERT H. HINCKLEY retires as vp of American Broadcasting Company in charge of Washington office. Mr. Hinckley remains as member of board and member of executive committee. Washington office continues under Edgar Shelton and Mrs. Roseanna Kinney, and Joseph Jacobs who recently joined that office. Mr. Hinckley has been with ABC since 1946 in charge of its Washington office and as company director.

MR. WEAVER MR. SARMENTO

SYLVESTER L. (Pat) WEAVER JR., onetime NBC top executive, elected board chairman of McCann-Erickson International. He steps into spot vacated by ROBERT E. HEALY, recently appointed vice chairman and supervisor of eastern offices of parent McCann-Erickson in U.S. ARMANDO M. SARMENTO, since 1957 senior vp of M-E International responsible for company's 19 Latin American offices, elected president of international arm. He succeeds WILBERT G. STILSON, named executive vp of parent company.

Mr. Weaver joined NBC in 1949, moved up to presidency and board chairmanship before resignation in 1957. Since then he has been advertising consultant to clients including Kaiser Industries, Coca-Cola and McCann-Erickson. Also announced by M-E International were promotions of ARTHUR L. GRIMES, senior vp, to executive vp, and of MORGAN MCDONOUGH, vp, to senior vp.

MR. WALLISER



BLAIR A. WALLISER, executive vp of Mutual radio network, resigns. His actual departure date from network not yet determined. Mr. Walliser, who recently moved from New York to Newtown, Mass., anticipates going into station ownership in that state. He joined Mutual in July 1958 after serving as eastern manager of John W. Shaw Adv., Chicago, and account supervisor for Colgate-Palmolive at that agency. He was program director of WGN Chicago from 1932 to 1941.

MR. STEWART

BILL STEWART appointed to newly-created post of assistant to president of Star stations (KOIL Omaha, KICN Denver and KISN Portland, Ore.) and vp. Mr. Stewart served for past 3½ years as national director of programming for Storz stations. He was prime mover in setting up and coordinating first and second international Radio Programming Seminar & Pop Music Disc Jockey Conventions. It was immediately following conclusion of second conclave, in Miami Beach two weeks ago, (BROADCASTING, June 8) that he tendered his resignation to Storz group.

.....LOOK FOR THE LOTION
.....WITH THE SHIP THAT SAILS THE OCEAN.....

Blair Stations SELL!

...for example, Old Spice

To keep this "ship that sails the ocean" in front-running position, Shulton relies heavily on the selling power of Spot Radio — with saturation schedules in America's major markets.

In many of these markets, Blair Stations carry a heavy share of the advertising attack. The simple fact is: BLAIR STATIONS SELL. Through applied audience-research, they have intensified the elements that give radio its real selling power:

1 *Local interest programming,* which serves listeners throughout the station's own area in a personal way no distant source can equal.

2 *Local selling personalities,* who endow commercial messages with believability that converts ratings into cash-register results.

Over 40 stations in major radio markets are represented by John Blair & Company — by far the most important group of markets and stations served by one representative firm. So when you're thinking about radio, as most advertisers are, talk with Blair.

FILM SYNDICATION

How well off are Steelworkers?

Let their own union leaders answer...

in statements and official reports from the Atlantic City Convention of United Steelworkers of America last September

Highest Wages in America

"We have the highest industrial wages in America, 25 to 35 cents per hour above even those of the automobile industry.

"The average basic steelworker now earns approximately $2.95 an hour, or $5900 for a 2000-hour year."

Pay Outstrips Living Cost

"This (rise in minimum pay since 1953) represents an increase of close to 48 percent. In the same period the cost of living has risen by a little more than 8 percent.

"And we got 48!"

But What About Layoffs?

"A laid-off American steelworker under SUB (supplemental unemployment benefits) was receiving more income than a fully employed steelworker in any other country, even taking into account the differences in cost of living."

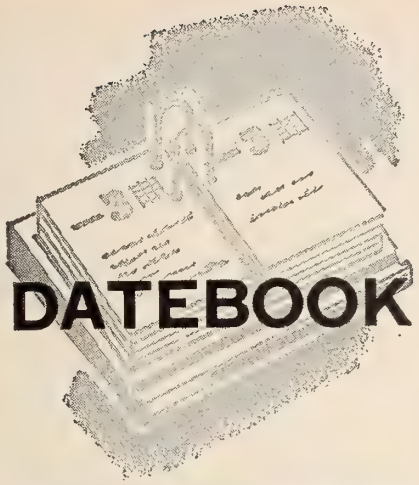
Steelworkers in Forefront of Industry

"The wage increases and improved benefits place the wages, hours, and working conditions of most steelworkers in the forefront of American industry."

* * *

Steelworkers are well off, in all of the ways their leaders claim.

Wages and benefits in steel have been rising sharply. In fact, throughout virtually all industry they have risen much faster than productivity could be increased. That's one big reason for the inflation which cuts the buying power of your dollar.



This message is being brought to you by

REPUBLIC STEEL

because

INFLATION ROBS US ALL

Republic Steel's management seeks constantly for materials and methods to help customers make their products at lower cost. Republic pioneered in the development of cold finished steel bars—a cost reducer for thousands of products. Republic also offers a wide variety of special sections, in essence partially preshaped parts. Continuing progress in techniques and metallurgy promise even further improvements in machinability—a vital ingredient in keeping finished part costs in line.

A CALENDAR OF MEETINGS AND EVENTS IN BROADCASTING AND RELATED FIELDS

(*Indicates first or revised listing)

JUNE

June 21-22—Colorado Broadcasters & Telecasters Assn., Colorado Hotel, Glenwood Springs. Howard Bell, NAB assistant to the president, will speak.

June 22-25—Iowa Tall Corn Network, annual meeting, Crescent Beach Lodge, Lake Okoboji.

June 22-23—Montana State U. School of Business, Missoula, advertising conference. Thomas D'Arcy Brophy, former board chairman of Kenyon & Eckhardt, will be chief speaker. Joseph Sample, KOOK AM-TV Billings, is chairman.

June 22-26—First Advertising Agency Group, annual conference, Belmont Hotel, Cape Cod, Mass.

June 22-Aug. 15—Summer Radio-Tv Institute, Stanford U., Calif. George A. Willey, director.

June 23-25—National Community Television Assn., Sheraton Hotel, Philadelphia.

June 23-Aug. 1—Broadcasting Symposium, **Northwestern U. Radio-Tv-Film Dept.**, Evanston, Ill. Speakers include FCC Chairman John C. Doerfer, Hugh M. Beville Jr., NBC; Gilbert Seldes, Saturday Review, John O'Brien, Voice of America; Eric Barnouw, Columbia U.

June 25—FCC Comr. Robert E. Lee addresses monthly luncheon meeting of **Federal Communications Bar Assn.**, Willard Hotel, Washington.

June 27-July 1—Advertising Assn. of the West, annual convention, Tahoe Tavern, Tahoe, Calif. Speakers include Nelson Carter, AAW president and vice-president-manager, Foote, Cone & Belding, Los Angeles; George Gribbin, president, Young & Rubicam, N.Y.; Robert B. Murray Jr., executive vice president, Pan American World Airways; James S. Fish, vice president, General Mills; Paul Willis, vice president, Carnation Co., Los Angeles; Franklin Graf, vice president, A.C. Nielsen Co., Chicago.

June 28-29—South Carolina Broadcasters Assn., William Hilton Motel, Hilton Head Island, summer convention.

June 28-July 4—National Advertising Agency Network, management conference, Del Monte Lodge, Pebble Beach, Calif.

June 29-July 1—Military electronics convention sponsored by **Professional Group on Military Electronics of Institute of Radio Engineers**, Sheraton Park Hotel, Washington. Space propulsion, space electronics, radar, missile guidance, computers and related topics will be discussed.

JULY

July 5-11—Advertising Federation of America management seminar in advertising and marketing, Harvard Business School, Cambridge, Mass. Emerson Foote, McCann-Erickson senior vice president, is in charge.

July 5-17—NAB Management Development Seminar, Harvard Graduate School of Business Adm., Cambridge, Mass. Designed to give station management principles and analytic techniques involved in the executive job. Dr. J. Sterling Livingston, professor of business administration, Harvard, and president of Harbridge House, is academic director. William P. Gormbly Jr., assistant dean and director of Harvard advanced management program, is administrative director. Sixty broadcasters were accepted for enrollment by university.

July 14-15—Idaho Broadcasters Assn., Shore Lodge, McCall.

July 16-17—Air Traffic Control Symposium cosponsored by Radio Technical Commission for Aeronautics and Los Angeles section of Institute of Radio Engineers. FCC Comr. Robert E. Lee and James T. Pyle, deputy administrator of Federal Aviation Agency, will speak.

July 16-19—American Federation of Television & Radio Artists, annual convention, Chase Hotel, St. Louis.

AUGUST

Aug. 3—Comments due on **FCC** proposal to revise television network rules including cutting down on option time, counting straddle programs as option time entirely, etc. Commission requests that comments also refer to same revisions in radio network rules. Docket 12,859. Postponed from June 22.

***Aug. 16-18—Georgia Assn. of Broadcasters**, summer meeting, Jekyll Island.

Aug. 18-21—Western Electronic Show & Convention (Wescon), Cow Palace, San Francisco.

Aug. 21-23—Arkansas Broadcasters Assn., Hot Springs.

***Aug. 23-24—UPI Broadcasters of Connecticut**, Massachusetts and Rhode Island aboard aircraft carrier **Wasp**, at sea; board destroyer at Quonset, R. I., for transfer to **Wasp** 100 miles out; return to Boston.

Aug. 24-28—American Bar Assn., annual meeting, The Americana, Miami Beach, Fla.

Aug. 28-30—West Virginia Broadcasters Assn., Greenbrier, White Sulphur Springs. FCC Comr. Frederick W. Ford will speak.

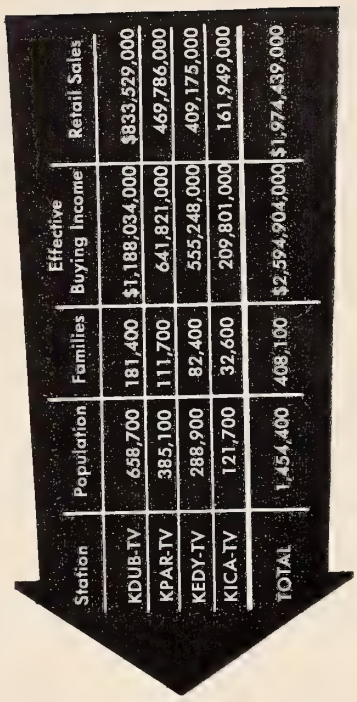
Aug. 29—Oklahoma Broadcasters Assn. summer meeting, Lake Murray Lodge, Ardmore. Judge John Brett, presiding judge of Oklahoma Criminal Court of Appeals whose court rendered decision in favor of court broadcasting, will address luncheon. Ben Sanders, KICD Spencer, Iowa, will conduct sales clinic.

SEPTEMBER

Sept. 4-5—Texas AP Broadcasters, 1959 convention, Rice Hotel, Houston.

Sept. 10 — Advertising Research Foundation seminar in operations research, on 13 consecutive Thursdays starting this date. Further information from ARF.

Sept. 12—AP Broadcasters of Ohio, Columbus.



Sept. 16-18—Michigan Assn. of Broadcasters, fall convention, Hidden Valley, Gaylord.

Sept. 17-19 — Mutual Adv. Agency Network, second in series of three-day workshop-business sessions under new format calling for three (instead of four) annual meetings, Bismarck Hotel, Chicago.

Sept. 21-22—Louisiana Assn. of Broadcasters, Francis Hotel, Monroe.

Sept. 21-23 — Westinghouse Broadcasting Co. Third Industrywide Public Service Programming Conference, Stanford U., Palo Alto, Calif.

Sept. 25—Advertising Research Foundation, fifth annual conference, Waldorf-Astoria, New York.

Oct. 22-23—Audit Bureau of Circulations, annual meeting, Drake Hotel, Chicago.

Oct. 26-30—National Assn. of Educational Broadcasters convention at Sheraton-Cadillac Hotel, Detroit.

Oct. 29-30—Electronic devices meetings sponsored by Professional Group on Electronic Devices, Institute of Radio Engineers, Shoreham Hotel, Washington.

Oct. 29-31—New Jersey Broadcasters Assn., fall meeting, Nassau Inn, Princeton.

NOVEMBER

Nov. 2-4—Broadcasters' Promotion Assn., 4th annual convention, Warwick Hotel, Philadelphia.

Nov. 8-9—Fall meeting, Texas Assn. of Broadcasters, Texas Hotel, Fort Worth.

Nov. 9-10—Institute of Radio Engineers, radio fall meeting, Syracuse Hotel, Syracuse, N.Y.

Nov. 18-20—Television Bureau of Advertising, annual meeting, Sheraton Hotel, Chicago.

Dec. 11—Comments due to the FCC on stereophonic multiplexing rules as part of FCC's inquiry into possible wider use for fm subsidiary communications authorizations.

BOOKS

• *Why People Buy: Motivation Research and Its Successful Application, by Louis Cheskin, Liveright Pub. Corp., 386 Fourth Ave., New York; 319 pp.; $5.00.*

Written by a veteran motivational researcher, noted for both honesty and perception, this volume is a clear exposition on what for many otherwise well-trained people is still an unclear subject: human behavior in the market place. Coming to his life's work through the worlds of education and art, Mr. Cheskin has embraced synthesis as his only doctrine in what is often a "one viewpoint" field.

Why People Buy covers it all. It explains that the structure of a marketing program cannot consider pricing at the expense of packaging. It shows why present American film commercials would fail if an attempt to transfer them to the movie screen were made. It points out the sobering effect the Russian Sputniks had upon the American psyche and why national soul-searching became a common indoor sport. Mr. Cheskin discusses symbols and names and trademarks. He weaves actual case histories into his narrative with the skill of a Persian carpetmaker. He rightfully pats himself on the back with a revealing reprint of articles which predicted automobile trends more than a year before this book was published.

Why People Buy, then, is a book to buy, read and keep. But social scientist Cheskin would be the first to agree that it is also not to be digested whole; each reader will have to decide for himself wherein lies its nutrition.

• *The Technique of Film Animation, by John Halas & Roger Manvell, Hastings House Publishers Inc., 151 E. 50th. St., New York 22; 348 pp. $10.*

Comprehensive and liberally illustrated, this book declares at once that it is not a text on "how to do it" but rather an account of "how it is done." And, according to these two English authors, "it is done" in many ways in many places.

All areas of animation are herein covered: entertainment, instruction, advertising. All work involved is discussed, from color systems to sound tracks to story boards. A glossary of terms is provided for the beginner. Some interesting views on the animated film are brought home to the reader. One figure in the field calls animated children's series on tv the largest new use for the cartoon film, with the possibility of cartoon features produced as tv "spectaculars." Another feels that the greatest area of growth is in the tv spot commercial.

Those interested in animation, as well as the entire film art form, will surely wish to own this book but will no doubt note the growth in publishers' selling prices. There are a lot of pictures in *The Technique of Film Animation*, but $10 is a heavy price for a book.

— to some, just a ship. To others, a monument to our great heritage . . . diligently, almost reverently constructed. In the same way, it often takes those who fully appreciate QUALITY to recognize it in today's better radio and television stations.

The three top-rated personalities in New Orleans are on...

WWL-TV

Channel 4

MORGUS the Magnificent on House of Shock

Check the ratings, any ratings, and you'll see that Morgus and the House of Shock rate tops on Saturday night TV in New Orleans. This is the man whose fans have tied up an entire telephone exchange "just to talk with Morgus." The Senior Class at Tulane University School of Medicine has awarded Morgus an "honorary degree" in medicine—and he's being boosted as a candidate for Governor of Louisiana!

MISS GINNY with Romper Room

Miss Ginny has proven that it *is* possible to build a big morning audience. On Romper Room she presents games, films, storybook time—entertainment that makes kids 6 to 60 come back for more all week long.

UNCLE HENRY with Popeye & Pals

Weekdays at 5:15 kids all over town flock to tune in the Pied Piper of New Orleans —Uncle Henry Dupre. They love this genial entertainer, whose television and radio career in New Orleans spans 27 years.

NEW ORLEANS

MONDAY MEMO

from **PHILIP H. COHEN,** *vice president, radio-tv director, Sullivan, Stauffer, Colwell & Bayles, New York*

The battle of summer tv reruns . . .

As usual everyone is talking about repeats, but no one is doing anything about them except Mike Stokey.

Yet, just look at the line-up of repeats during one week last summer: Sunday—13 repeats between 6:30 and 10:30 p.m.; Monday—13 repeats between 6:30 and 10:00 p.m.; Tuesday—9 repeats between 6:30 and 11:00 p.m.; Wednesday—12 repeats between 6:30 and 10:30 p.m.; Thursday—13 repeats between 6:30 and 11:00 p.m.; Friday—15 repeats between 6:30 and 11:00 p.m.; Saturday—16 repeats between 6:30 and 11:00 p.m.

Repeat shows, as clients and agencies know well, are economic necessities in the tv show market as it is now priced. Shows that once cost $20,000 or $25,000 have virtually doubled due to regular escalator increases, talent increases, union increases, etc. No one *wants* repeats—not the client, not the show packager, certainly not the stars and most important of all not the public.

Total Viewing Important • The client is well aware of the fact that repeat shows by and large mean lower ratings and lower ratings mean that fewer people are receiving his message. Low cost-per-thousand is important to all clients, but it is not the full story. The total number of viewers is still of vital importance to the advertiser.

The show packager in addition to the first run of his show is interested in residuals. When 13 of his programs are rerun in the original contract, he is selling third runs of one-third of his programs the first time he goes into the syndicated market with them. This is a fact occasionally glossed over in the buying and selling of syndicated shows.

The stars have a concern in the repeat problem because their professional lives are based on continuing acceptance. Repeats, with their attendant rating decreases, to some degree hurt the stars' acceptance.

Except in rare instances such as the Fred Astaire show and "Green Pastures," the public is unhappy about repeats and relays its dissatisfaction to Nielsen, Arbitron and Trendex.

Damage Is Excessive • Shows are repeated in order to cut down the average annual cost. The damage done by repeat programs is far greater than the 13-week lull which they create. In addition to the negatives listed above, it should be noted that repeat shows mean:

1. A loss of interest and audience for specific shows.
2. A decrease in general tv tune-in which hurts television as a medium.
3. A decrease in ratings even when new product comes back on the air because people are repeat-conditioned.

It would be impossible (and unfair) to ask the network, client, or packager on his own to break the summer repeat cycle, but perhaps all working jointly could tackle the problem constructively.

Philip H. Cohen b. Honolulu Aug. 15, 1911. Received B.A., government, Harvard U., 1932. Was director of Rockefeller Research Project, Library of Congress, Washington, 1939-41; director of American broadcasting station in Europe for Office of War Information 1941-45; head of daytime radio for Ruthrauff & Ryan 1945-46. He started with SSC&B in 1946 as head of radio-tv and was elected v.p. 1948. Married Henriette Herz. They have two sons, Philip L. and William E.

One Possible Solution • For example, supposing a client would make a deal with a packager to do 39 films of his major show and 13 live or filmed shows of a new and different property with the client having the option to pick up the new show.

The network would be asked to make some concession in terms of time cost. The packager and client would make some investment in the new property, but it could be an investment that might well pay dividends in terms of developing new properties and preventing the dilution by repetition of the going property. The talent and other unions might make some concessions, too, for it is surely to their interest to have new material on the air.

This is merely one way to face up to the repeat problem.

Dollars and Sense • For a moment let's consider the numbers in the problem of abolishing or decreasing the number of repeats. A $50,000 show with 13 free repeats means a saving to the show's clients of $650,000 or $325,000 to each of the alternate clients. If the repeat costs are cut from $50,000 to $20,000 per show, the clients save around $400,000, or $200,000 per client.

In a market that is now almost at the breaking point in terms of cost-per-thousand, the clients will not and should not be asked to bear the cost of a repeat-free television schedule. Most clients would probably be happy to play a part in such an effort, but all of the people interested in new, fresh television would have to work together in such an endeavor.

The problem of repeats may well get worse before it gets better. This is indicated by the fact that several shows have been offered on a 26-new and 26-repeat basis and there is one case where there will be 13 new and 39 repeats.

At any time now we can look forward to a series called *Son of Reruns.*

. . . shallow victory for economy

LINE PROTECTION SYSTEM

Originally developed for Continental's famous super-power transmitters, ***MAGN/PHASE*** is now available to all broadcasters!

MAGN/PHASE is an electronic device used to protect the antenna system from damage due to arcing. Whether an arc is caused by static discharge or a line fault, the ***MAGN/PHASE*** system will instantaneously squelch the transmitter output. This prevents the arc from being sustained by RF energy. Immediately self-restoring, the transmitter interruption goes unnoticed on the air.

Fm is doing nicely

EDITOR:

Re your June 8 article "Fm Meeting: Circle of Confusion": We beg to take exception. Especially with the lead which reads "Fm broadcasting, mid-1959 model, is all mixed up."

We're doing nicely, thank you. Or at any rate, those of us who are fm *broadcasters* are doing nicely (and in this case I speak for myself, for Wallace Dunlap of WXHR-FM Boston and, we're sure, many others around the country).

There may be confusion, but it seems to us to originate with those in fm who are pushing other than broadcast services. Those of us who believe in fm as a broadcast medium of superior technical quality are not the least confused. We are not interested in subsidiary services, background music or storecasting. And, in the case of stereo, we know that we cannot foist off on the listening public less than the best that is technologically feasible—and certainly not on the ground that the public doesn't know any better. We know further that a meeting like the one described in your article was bound to end in confusion, but hope the broadcast and advertising industries realize this is not representative of the state of the fm art today.

We were further disturbed that the old charge of "pirating" was raised again. We had hoped this ghost had been laid to rest when the background operators won their case to continue simplexing. It is absurd to speak of pirating background music by allowing receivers into the hands of the general public, when that same background

PHILADELPHIA
WCAU-TV

Sign of Responsibility

Philadelphia looks to WCAU-TV for far more than the finest *entertainment*. During the past 26 weeks, CBS Owned Channel 10 originated close to four hundred programs designed to *inform* and *enlighten* Philadelphia audiences on matters of vital concern to the community, the nation and the world.

Included are 15 regularly-scheduled public affairs programs every week, *plus* five "special reports"...live or on film, covering newsworthy topics from the Cuban revolt to a close-up of law enforcement agencies in operation throughout the Philadelphia area.

All produced *locally* by Channel 10's Department of Public Affairs, these programs are patterned to the same high standards which distinguish the station's *entire* broadcast schedule, of both local and network origin.

It is this sign of responsibility toward the community that creates a unique image of trust. And makes possible the very special response, far above and beyond the ordinary, on the part of Philadelphia audiences to *all* the programs and advertising they see on

CBS OWNED CHANNEL 10 *WCAU-TV*

music is heard on the operator's main fm channel. We had also hoped it would be obvious there is nothing illegal about the purchase of a background receiver, provided one does not *use* it illegally. To establish the precedent that the public may not own or purchase receivers capable of picking up music transmitted over the background operators' spectrum might in turn lead to the absurdity of ham operators having to stop listening to Press Wireless, marine communications and mobile telephone calls—which, incidentally, has gone on for a long time without piracy being raised.

The problem, to the way of thinking of those who are broadcasters, is simply that these gentry (the background and storecast operators) are trying to have their cake and eat it too. They want to capitalize on growing public interest in stereophonic broadcasting, but not sacrifice their background and multiplex commercial usages. Fine if they wish, but don't let them call it "high fidelity," and don't let them confuse those of us—or be confused with those of us—who are devoted to the highest technological capability of the fm art.

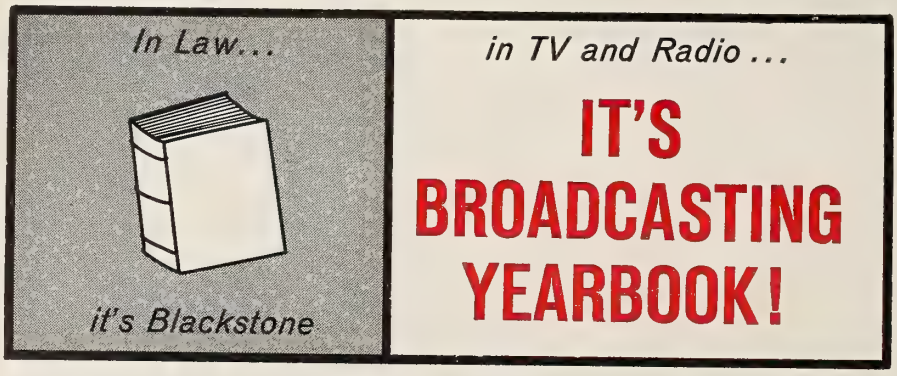
WBAI (FM) New York



NARBA treaty drags

EDITOR:

That was a fine exclusive interview with FCC Comr. Rosel Hyde on the subject of NARBA (page 72, June 15). It covers the situation [dangers in protracted delay of Senate ratification of NARBA and Mexican treaties] more thoroughly than any I have ever seen. The point made that the industry as a whole has been reluctant to push for the ratification of NARBA is all too true.

At WQXR we have been active for years in trying to get the Senate to act . . . I wrote Senator Fulbright, Chairman of the Foreign Relations Committee of the Senate . . . April 3, 1959. Copies of this letter were also sent to all members of the Foreign Relations Committee. I had responses from most of the Senators, but for the most part they were rather indefinite and do not hold any promise of action at this session of Congress. It is interesting to note that the State Dept., in the interest of better Latin American relations, is also urging the ratification of these two treaties . . . it behooves the industry to get behind this and push.

Elliott M. Sanger
Executive Vice President
WQXR-AM-FM New York

A lawyer without his copy of Blackstone is a little like a trombone player without a trombone. For Sir William Blackstone's famous "Commentaries on the Laws of England" has been **the** standard legal reference and textbook in its field for generations. Radio and TV are much newer than jurisprudence – but in their field, too, a recognized authority has emerged as the standard source of information. **BROADCASTING YEARBOOK** is read each year (and saved **all** year) by thousands of people whose jobs in broadcast advertising demand a ready, accurate source of TV-radio facts. The 1959 **BROADCASTING YEARBOOK** – out in August – will give some 16,000 of them the most comprehensive round-up on the dimensions of today's broadcast media. If **you** have something to tell the decision-makers, **BROADCASTING YEARBOOK** is the place to testify on your own behalf. Witness the deadlines: July 1 for proofs; July 15, final. **Call or wire collect to reserve space!**

It's constant attention to little details that makes RCA-833-A's last longer

GRID...Zirconium-sprayed to minimize grid emission.

PLATE..."electron-scrubbed" to remove minute traces of gas, from the plate, and zirconium-coated to help maintain superior vacuum and provide greater heat radiation.

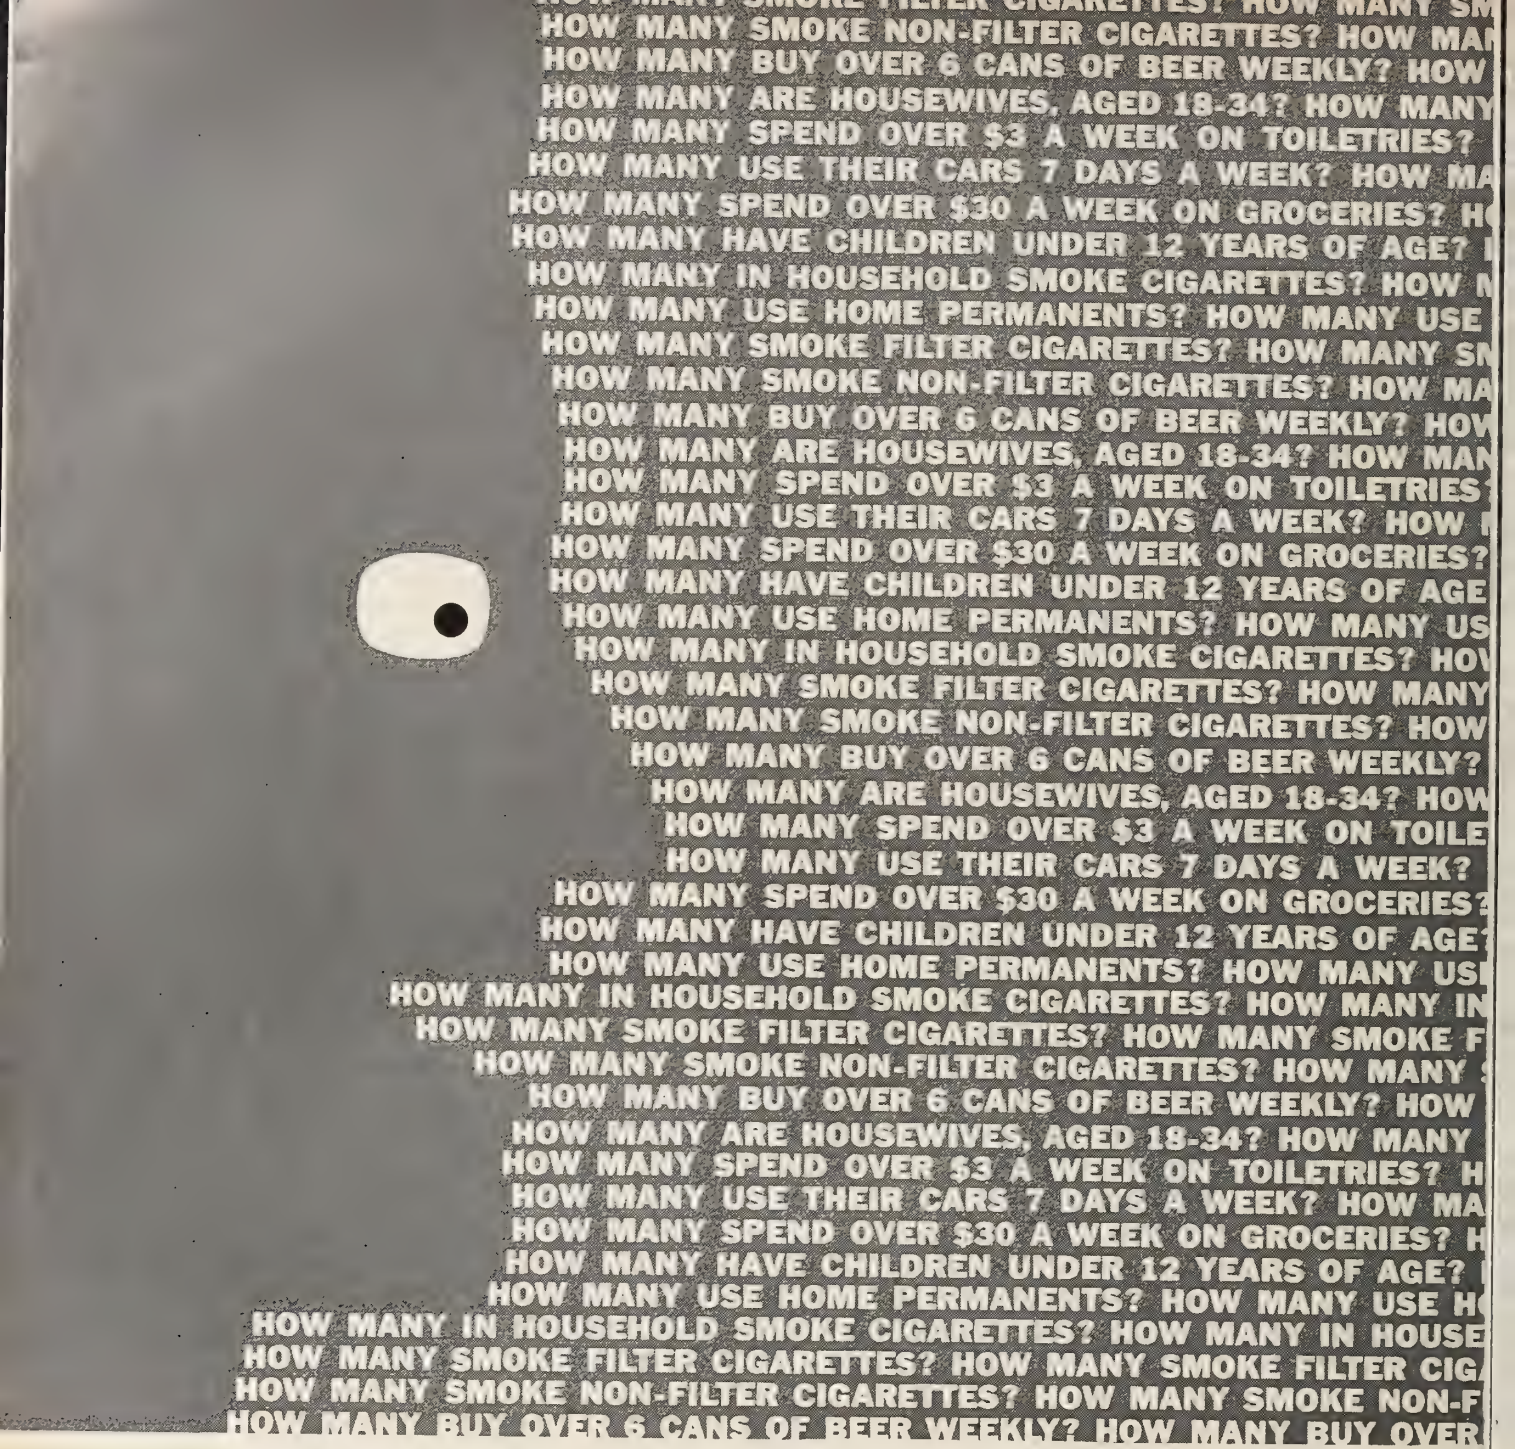
FILAMENT..."double-flashed" for high emission reserve, longer life.

BULB...special hard glass featuring extra low power losses.

FILAMENT..."double-flashed" for high emission reserve, longer life.

GRID AND PLATE...vacuum-fired to reduce gas evolution during tube life.

ENTIRE TUBE...spot-knocked at tens of thousands of volts to provide high dc resistance, and thus low leakage between terminals.



Inside the envelope of this famous power triode are incorporated many modern techniques of power tube manufacture. Some were basic to the "original" design. Many others have been adopted over the years—in line with RCA's never-ending effort to increase tube reliability and operating life.

But whether these techniques are old or new, this fact is sure:
every one pays off for you in lower tube cost per hour of transmitter operation.
A typical example, this, where constant attention to tube engineering details makes the better tube!

Your RCA Industrial Tube Distributor handles RCA Power Tubes for every broadcast and TV station application. He's standing by to serve you.

RADIO CORPORATION OF AMERICA
Electron Tube Division **Harrison, N. J.**

another great first from WRCA-TV—a local program Audience Characteristic Profile that tells you who's watching and what they buy!

Now WRCA-TV cracks the big research barrier and brings you the first qualitative measure of audiences of local TV programs like "Hi Mom" and "Dr. Joyce Brothers." Based on vital new research by Pulse, Inc., the AUDIENCE CHARACTERISTIC PROFILE takes audiences apart, shows who they are, what they buy, and how much. Examples: Both "Hi Mom" and "Dr. Joyce Brothers" reach a higher proportion of housewives in the high-purchase 18-34 age group than does the average daytime TV show. Both shows reach more homes spending over $30 a week for groceries. Both reach a higher proportion of homes where the family auto is used 6 to 7 days a week.

WRCA-TV, the leadership station in New York television, offers this information to advertisers, free and without obligation, to aid them in making the most efficient investment of their TV dollars in the nation's first market. Get the full details now.

WHAT'S RIGHT AND WRONG WITH NAB

- **Survey shows opinion divided on association's usefulness**
- **There's no groundswell of rebellious discontent**
- **But half of members find some reasons to be dissatisfied**

NAB is "reasonably successful" as a trade association but about half its members show "some dissatisfaction."

This nationwide image of industry reaction to NAB's operations is shown in a study conducted by an independent management research firm—Stewart, Dougall & Assoc.

Through the bulky document run critical comments by small groups of important member and non-member stations who feel that:

- NAB's internal structure isn't adequate.
- Some staff officials don't understand many primary industry problems.
- President Harold E. Fellows should have a strong operating man prepared to assume the presidency when he retires.
- A better job is being done by present leadership than was the case a decade ago.
- The association is "excessively *status quo*" and lacking a forward-looking leadership.
- The board and committees are dominated by "a perpetuating group, some of whom don't understand today's operating problems."

This board-committee criticism prompted three large stations to say this was one of the reasons they were going to resign from NAB.

The research report says that assuming NAB is adequately representing the industry, it faces a public relations problem in telling its achievements to broadcast management. The association was urged "to build a more positive image of its abilities and leadership."

Stewart, Dougall & Assoc. was commissioned after the NAB board's February meeting to conduct an impartial image study of NAB. A fund of $15,000 was provided. The interviews covered all classes of stations, including 102 member outlets.

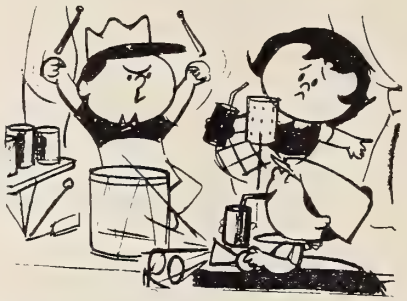
The two basic jobs of NAB, the survey shows, are government relations and public relations. Important segments of the membership feel NAB should create a better public image of radio and tv (see story of tv information project, page 116).

What Members Get • Frequent complaint was made that NAB is sending the members large batches of printed matter they aren't interested in and don't read. On the other hand many want more and better information on the association's activities and accomplishments plus more personal contact with the headquarters organization.

Some larger stations showed they aren't interested in some of the basic NAB services such as legal, engineering, wage-hour and labor relations because they have their own counsel and consider the services mostly applicable to small stations. On the other hand, those who have used these services said they liked them.

Best-known association activities, according to the survey, are the codes, labor relations, engineering, ASCAP contracts, and freedom of information. Numerous broadcasters said they didn't know what NAB's committees are doing. The *Highlights* weekly report was referred to as uninteresting to a large part of the membership, with some respondents feeling there should be a top management section, inspirational stimulus to stir up more interest in NAB and material promoting industry pride.

NAB's station relations unit was said to lack personnel. The department, it was suggested, should conduct



What NAB should do

The Stewart, Dougall & Assoc. survey of industry reaction to NAB includes this list of "should do's" for NAB, based on comments by 102 NAB member stations (Numbers of respondents suggesting each correction are shown at right below):

More emphasis and strength in government matters, especially in "creative relations"	18
Create stronger public image of radio	21
Create stronger public image of tv	15
Press for equitable radio ratings	12
Strengthen adherence to radio, tv codes	12
Campaign against double-billing and rate-cutting	8
More information on NAB activities, achievements	11
More personal contacts between NAB and members	23
More data such as comparable finance and wage reports	11
Less printed material	9
Directory of NAB services and publications	7
Stronger assistance for President Fellows	20
Entice more key successful broadcasters into NAB affairs	21
More concern over problems of broadcasters in secondary market areas	13
Cut size of annual convention (limit to management, operating people)	16
More specialized problem-solving convention sessions	17
Better speeches	14
Separate groups at conventions (large, small stations, etc)	10

PREVIEW

U.S. Steel's Penelope • In the summer it's soft drinks and for U.S. Steel Corp. the soft drink season is a time for consumers to think in terms of "Throw-Away Cans. . . . Made of Steel." Last Wednesday (June 17) on the *U.S. Steel Hour* two animated commercials produced by Transfilm-Wylde Animation for BBDO, U.S. Steel's agency, introduced an animated Penelope who has appeared before in print and outdoor advertisements. The campaign will run through Labor Day. While ushering in U.S. Steel's creation of an animated tv character for soft drink cans, the commercials also marked the first completed work of Transfilm-Wylde animation, a new affiliation between the film commercial house and the animation studios formed last month. Jack Zoller of BBDO was agency producer on the one-and-a-half and two-minute commercials.

In one sequence, Penelope joins with friend Elwood in a sidewalk soft drink cafe enterprise (left sketch) only to be annoyed by little Freeman who drives his auto all around the premises and constantly interrupts the entertainment and discourses on the advantages of drinks in cans. Attempt to keep Freeman under control by lashing his car to the scenery (right sketch) results in the curtain being pulled down. But it does enable Penelope to deliver the final message.

a member-relations program, keeping members informed on all events from legislative activities to meetings.

Family Bias • This appraisal of station attitudes was made in the report: Member stations are more favorable in opinions than non-members; larger stations are more critical than medium or small stations; small and medium non-member stations are more critical than members; tv managers are more critical than radio managers; station managers active in NAB tend to have more reservations about NAB achievements than non-active managers.

Those who are favorable in their attitude toward NAB give it credit for many accomplishments in cutting down government interference with radio, "mollifying FCC attitudes" toward the industry and leading successful ASCAP negotiations.

On the other hand, NAB's critics argue the association has been unsuccessful in one or more of these areas and claim it fails to take strong positions or display adequate leadership.

In general the survey showed approval of the NAB spring conventions and autumn regional conferences, feeling they are useful. Greater specialization was advocated and elimination of the "carnival atmosphere" at conventions was favored.

These figures were cited:

• 92% of members oppose discontinuance of fall conferences.

• 25% receive no benefits from the conferences.

• Over 60% of members attend conventions to see other people.

In comments on NAB's printed matter, some managers said they were mainly interested in information on financial, labor and engineering matters. Some said they keep abreast of industry activities through other sources and have no time to read NAB material which repeats what they have already seen in trade publications.

And in any case, it was observed, NAB should concentrate on industry-wide activities rather than services and publications which aren't especially necessary.

The report showed 20% of members and 31% of non-members do not identify NAB with any objectives. The non-members included large outlets that feel NAB lacks direction and smaller stations that aren't interested in an industry association.

The Leadership • A fifth of NAB members said they feel some broadcasters active in association affairs are perennial or self-perpetuating in their NAB roles, contending others should assume responsibility. A fifth feel NAB lacks enough strong staff members with industry experience and stature. They feel a strong operating executive should be in training to fill the president's position on his retirement.

About 10% want a division of NAB functions with more autonomy for radio and tv. Others assert, "The association should function as an embrella over many diverse elements in the industry, maintaining a primary interest in industry-government matters only."

A division to serve small stations and secondary markets in cooperation with Radio Advertising Bureau is favored, along with regional clinics on rate maintenance and a small-market public relations program.

In favoring a public relations program on behalf of broadcasters some of those interviewed cited the high respect accorded NAB efforts on behalf of the radio and tv codes, feeling they should receive wider publicity. Committees should include successful operators of all sizes of stations regardless of whether they conform to NAB codes, it was noted.

Dissension • Interviewees showed sympathy with NAB's member dilemma —refraining from firm stands on issues where different membership groups have conflicting interests. They advocated, however, "less neutral positions" where possible and guideposts showing station attitudes on public-interest problems. Stations not in sympathy with association stands will go along, it was said, if members understand its strength of character and dedication.

Giving their reasons for NAB membership, less than 40% (members and ex-members) list support of industry-wide efforts, and 23% of members want coordinated industry activity in government relations.

More than 25% of members and ex-members mention services and information supplied; a third of ex-members have no clear reason for joining (some were talked into it, some wanted to see what it was like); 10% of members seriously consider resigning and an additional 17% aren't enthusiastic about membership; over half trace dissatisfaction to value received rather than dues; a fourth not belonging are directly affiliated with member stations.

In the big eight years, 1950-1958, Food Sales in this big 26-county market jumped an amazing 146%! Now, more than a third of Florida's total Food Sales are made in the area delivered by WFLA-TV—*the Land of Profitunity!*

Use the blanket coverage of WFLA-TV to cash in on the sales opportunity—and profit opportunity—in America's 26th Retail Sales Market plus 26 counties packed with year 'round buying power from rocketing industrial and agricultural expansion.

COMMERCIAL CLEAN-UP UNDERWAY

Tv code board settles Preparation H mess, turns to other copy

NAB's television code office is clearing the air of Preparation H, a hemorrhoid remedy—as far as 270 code subscribers are concerned.

Next problems—sexy depilatory commercials and multiple spotting.

The association's Tv Board of Directors upheld the Tv Code Review Board Thursday (June 18) at a Washington meeting by pulling the seal from 13 tv code subscribers. Another 17 stations resigned from the code structure.

To date, 19 stations have had their seals taken away during the spring months because they refused to stop carrying the Preparation H account, handled by Ted Bates Inc., New York (BROADCASTING, April 27)

The tv code box score for the March-June period reads as follows:

Code subscribers (3/4/59)	306
Code subscriptions revoked	21
Code Stations resigned	17
Total	268
New code subscribers	2
Total subscribers (6/18/59)	270

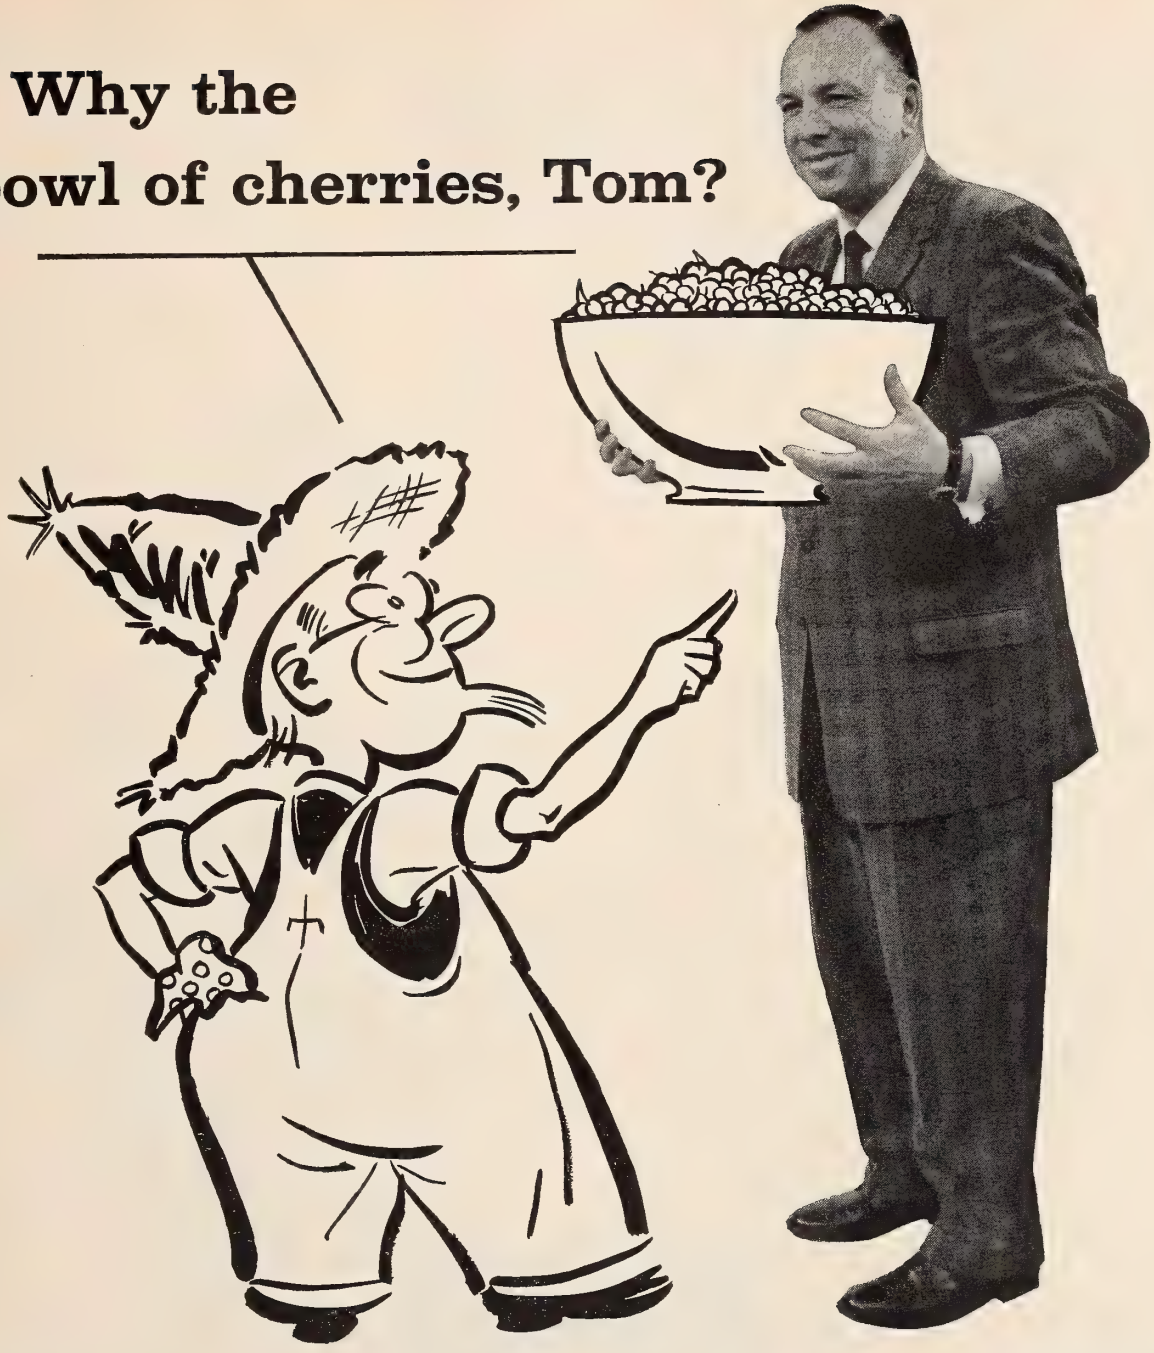
The number of operating commercial stations totals 520 in mid-June.

The Tv Code Board met June 15 in Washington under chairmanship of Don McGannon, Westinghouse Broadcasting Co. The board stuck to its two-year policy decision that Preparation H is a product of a delicate personal nature that is not suitable for broadcast advertising by code subscribers. Joining in the decision were the other four members—Gaines Kelley, WFMY-TV Greensboro, N.C.; Mrs. A. Scott Bullitt, KING-TV Seattle, Wash.; E. K. Hartenbower, KCMO-TV Kansas City, and Joseph Herold, KBTV (TV) Denver.

Their recommendations were adopted Thursday by the Tv Board, though stations cited earlier by the code's staff officials in Washington were given a chance to resign from the code or have a hearing before the top-ranking NAB Tv Board (two stations were given hearings).

In announcing that 21 code subscriptions had been revoked, Mr. McGannon said 19 had been for "unacceptable advertising." Asked if this meant Preparation H, he said it was a hemorrhoid remedy. The plain inference remained that the product was Preparation H. A single station lost its seal because of overcommercialization and the 21st outlet is involved in procedural routine. Cited stations still have 30 days to comply with the code mandate, resign from the code or have their seals revoked.

How Many Haven't • Mr. McGannon said 222 tv code stations have never carried hemorrhoid remedies. At one time, he conceded, 84 subscribers carried the product. Of these, 17 resigned from the code, 21 lost seals, one is under citation and 45 cancelled the advertising or have stated their intention to cancel.



NAB and code officials said resignations from the NAB association structure because of code troubles have been negligible. Mr. McGannon said three successive code boards and three tv boards have in all instances unanimously affirmed the anti-hemorrhoid policy.

A special code subcommittee headed by Mr. Hartenbower will start contacting American Assn. of Advertising Agencies, networks, advertisers and agencies in an effort to refine code definitions of objectionable telecast material. Much of their attention has been devoted to depilatories and sexy-voiced continuities that accompany commercials on behalf of these products.

Time to decide • A historic meeting of NAB's Tv Code Review Board was held June 15 in Washington when citations were drawn up for stations that persist in carrying Preparation H, hemorrhoid remedy. Members are (seated, l): Donald H. McGannon, Westinghouse Broadcasting Co., board chairman; Mrs. A. Scott Bullitt, KING-TV Seattle; (standing, l to r) Gaines Kelley, WFMY-TV Greensboro, N.C.; E.K. Hartenbower, KCMO-TV Kansas City, and Joseph Herold, KBTV (TV) Denver.

Why the bowl of cherries, Tom?

"Life is *really* a bowl of cherries in the Fargo area, these days, for advertisers on WDAY-TV—our new 1206′ tower is giving our advertisers 96% more coverage area . . . a 60% larger audience . . . and retail sales volume increased by 100%!

"You can imagine what this means to our dozens of top national advertisers. They were *happy*, even before we gave them this tremendous bonus. Now most of 'em say WDAY-TV is the best buy in America!

"As a matter of fact, the Market Data Section of Standard Rate & Data shows that Fargo is the No. 1 Retail-Sales-Per-Household Area in the United States . . . with an average purchasing power of $5,970, as compared with the national average of $3,944!

"Yes Sir, that's a bowl of cherries—tremendous extra *audience*, among people with tremendous extra buying power. What more could you want?"

Yours,

Tom Barnes

PETERS, GRIFFIN, WOODWARD, Inc.
Exclusive National Representatives

Messrs. Kelley and McGannon are on the subcommittee.

Thus far no sanitary napkin advertising has been detected by monitors on tv, Mr. McGannon said, though some have been heard on radio.

Checking Job • The code board last April started monitoring at the rate of 110,000 station hours per year. This job is done by Broadcast Advertising Reports and two staffers. Previously the pace had been 40,000 hours per year. In addition, code board members do personal monitoring and there is qualitative program checking of network and local programs.

A report on depilatories has been prepared by the Hartenbower subcommittee but it was not available at the weekend.

Mr. McGannon emphasized that the code is voluntary and there is no substitute for the judgment of the individual licensee.

The NAB personal product action, he added, "does not foreclose the manufacturers from the use of television since there are stations which are not code subscribers and this advertising could be placed on these stations as well as any who believe that they couldn't comply with the code and are prepared to forego the seal."

American ad films win top prizes at Cannes

Television commercials produced in the United States won two grand prizes and 11 other top awards in the Sixth International Advertising Film Festival concluded at Cannes, France, on June 13.

The tv "Grand Prix," selected from a total of 453 entries, was won by the Calo Dog Food commercial. It was produced by Cascade Pictures of California for Foote, Cone & Belding Chicago.

The Grand Prix for cinema advertising, picked from a total of 442 films, went to the Chevrolet station wagon commercial, produced by Lawrence-Schnitzer Productions, Hollywood, for Campbell-Ewald, Detroit. A spokesman for Lawrence-Schnitzer in New York explained that the commercial was entered in the cinema advertising category because it was in color. Tv commercials, he said, are projected in black-and-white at the festival, while cinema advertising films are presented in color.

Other U. S. winners were: Ford Dealers' "Shaggy Dog" commercial, produced by Playhouse Pictures, Hollywood, for J. Walter Thompson, New York (first prize for animation up to 30 seconds); Piel Bros. "Hockey" spot, produced by CBS Terrytoons, New York, for Young & Rubicam, New York (first prize for live action or animation up to 60 seconds), Anderson Soups' "Splitting Peas" commercial, produced by Goulding-Elliot-Graham Productions, New York, for Bryan Houston, New York (second prize for animation up to 60 seconds). Eight other U.S.-produced commercials were presented with special commendations.

Package sales plan for Baltimore, D.C.

A plan for increasing advertising dollars in Baltimore and Washington was advanced Friday (June 19) by Newman F. McEvoy, senior vice president and director of media, Cunningham & Walsh Inc., New York, in an address before the Maryland-D.C. Broadcasters Convention at Ocean City, Md.

Speaking in terms of "market clusters" instead of individual markets, Mr. McEvoy said that while the two cities have "profoundly different interests . . . manufacturers are serving them as one great, big market."

Specifically, Mr. McEvoy suggested a fourfold plan for broadcasters in these two cities to benefit by "association":

Sell a twin-market concept; sell the area as an especially endowed territory —"the eastern Gold Coast"; sell the national advertiser on peculiar local interests in this area which make it necessary to supplement national advertising in each city, and sell the rank of the combined Washington-Baltimore market for any product category.

Show-stopper at Cannes • Kelly Smith pouts proudly in rear of Chevrolet station wagon in scene from two-minute commercial that won Grand Prix du Cinema at Cannes International Advertising film festival. Commercial was produced by Lawrence - Schnitzer Productions, Hollywood, for use on NBC - TV's *Dinah Shore's Chevy Show.*

CBS-TV closes up fall availabilities

As new advertiser signings for nighttime programming continued last week at the networks, CBS-TV came within 1¼ hours per week from SRO for the fall and NBC-TV picked up some missing pieces of business for its schedule.

CBS-TV neared its mark by moving Oldsmobile Div.'s *Dennis O'Keefe Show* from a contemplated Sunday, 7:30 p.m. slot to 8-8:30 p.m. on Tuesday, opening up a half hour that night as station time and entering a Kellogg sponsored series *(Dennis the Menace)* in the Sunday 7:30 period vacated by Oldsmobile.

Dennis the Menace moves from its proposed Friday, 8:30 p.m. slot. That half hour on the schedule will be replaced by a Kellogg and Liggett & Myers sponsored series, *Hotel de Paree.* The Tuesday night schedule now will open at 8 p.m. with *Dennis O'Keefe.* The SRO flag can go up for CBS-TV when the network settles *The Lineup* (Wed., 7:30-8:30) for which a pilot has not yet been delivered for advertisers to see, and a half sponsorship of *Space* for which American Tobacco has signed as an alternate sponsor. *Space* follows *Lineup* on Wednesday.

Dropped from CBS-TV's fall schedule on Tuesdays was a projected hour-long show. *The Lawbreakers,* which has been postponed "until 1960."

NBC-TV, meanwhile, signed advertisers for three of its hour-long shows. Corn Products Co. (Mazola salad and cooking oil, Skippy peanut butter, Hellman's and Best Foods mayonnaise, Karo syrups among other products) signed for full sponsorship on alternate weeks of *Riverboat* (Sun., 7-8 p.m.); Liggett & Myers, through McCann-Erickson, signed for alternate half hours of *Bonanza* and *Laramie* (7:30-8:30 p.m. on Tuesday and Saturday respectively) and RCA, via Kenyon & Eckhardt, for alternate hours of *Bonanza* (CLOSED CIRCUIT, June 15).

MLWS candy seminar

Mogul Lewin Williams Saylor Adv., New York, hosted an informal seminar June 16 at its headquarters for 25 owners and managers of European confectionery companies on the methods employed by U.S. agencies to advertise, promote and market confectionery products. MLWS detailed its advertising strategy, including heavy radio-tv investment, on behalf of its clients, Gold Medal Candy Co. and Barricini Candy Shops, and, in turn, learned about European methods. The manufacturers are on a two-week tour.

WLOS-TV *announces with pride*

THE FCC DESIGNATION OF WLOS-TV TO SERVE AS A "HOME-TOWN" STATION IN GREENVILLE, S.C. ASHEVILLE, N.C. AND SPARTANBURG, S.C.

By official action of the FCC on Wednesday, June 10, WLOS-TV became the *only* station licensed to serve the Carolina Triad cities of Greenville, S.C., Asheville, N.C., and Spartanburg, S.C.

WLOS-TV based its application to the FCC on the station's signal strength in the individual cities, the programming which the station delivers, and the degree of community integration which WLOS-TV has accomplished in these Carolina Triad cities.

WLOS-TV accepts this responsibility with pride and pledges its continued effort to be of maximum service to all of the 446,650 TV homes in the Carolina Triad.

CO-OP WEAKENS?
Weiss study says yes; sponsors reconsider

A trend study on cooperative advertising by E.B. Weiss, director of merchandising for Doyle Dane Bernbach, New York, concludes that many large manufacturers and many giant retailers are questioning seriously the value of co-op advertising and are exploring alternative approaches.

Mr. Weiss' observations are contained in a 64-page study, "Why Cooperative Advertising Is Being Reappraised," which was circulated last week. It makes various salty comments about retailers' use of co-op money in the various media, including radio-tv. But beyond this, the study asserts that most manufacturers have come to the conclusion that "never before in the approximately 50 years of co-operative advertising history has the co-op dollar brought so little in lineage or time, and so little in brand-building, sales creative advertising as it buys right now."

For years, manufacturers tended to shy away from reappraising co-op advertising because they concluded that competition gave them no area of decision, the study states. It adds that some manufacturers today believe that co-op can be eliminated or the percentage reduced by offering some other forms of trade allowance that will buy a more effective in-store producer of volume and will not be charged to the advertising budget.

The study points out that theoretically co-op offers the manufacturer lower cost advertising, but in actuality, "local newspaper lineage bought cooperatively with the giant retailer has a total cost that is higher than the national. . . . This is equally true with respect to radio and television time."

How It Works • Mr. Weiss explains this apparent paradox in this way: "Let's assume that a local station has a half-hour time slot available three times a week. Rate-card time charges are $600 per week. A packaged show is available for $400. Total costs for time and package, $1,000. But the station, anxious to get a sponsor, offers it to the dealer for $800. The dealer requests cooperation from the manufacturer. He states that the package totals $2,000 per week. The manufacturer goes along with it on a 50-50 basis, paying $1,000 per week, as his share. The dealer starts with a net profit of $200 per week.

"But that's only the beginning. Assuming that the show provides nine commercials per week, the manufacturer will have difficulty learning whether all nine spots were in reality devoted to his product. The dealer may devote fewer than nine, selling off some of the other spots to other manufacturers. . . .

"It is probable that, in 1959, co-op in the broadcast media—radio and tv—will total, at what are presumed to be card rates, in the area of $300 million. It will be split almost evenly between radio and tv."

Mr. Weiss cautions that there is "no flight from co-op," but claims that "first straws spotted in the market" indicate that the medium is being re-evaluated by manufacturers, wholesalers and other distributors and by the giant retailers. In the undetermined future, Mr. Weiss believes, manufacturers may reduce or eliminate co-op advertising and offer retailers other inducements, such as promotional programs, an increase in warehouse discounts, an increase in national advertising, special display allowances and more payment for preferred shelf space.

Going national • Executives of General Life Insurance Co., Seattle, last week participated in a closed circuit presentation on NBC Radio to tell General's agents and field personnel at meetings in 58 markets that NBC's *Monitor* will play a key role in the company's first major, national advertising campaign. Shown before microphones in Seattle are: (l. to r.) W. L. Campbell, president of General Life; Floyd Robbins, vice president in charge of business development, and C. M. Noren, advertising manager. *Monitor* communicators Don Russell and Ben Grauer joined in the talks from NBC Radio Central in New York. General will co-sponsor sports segments on *Monitor* for 13 weeks starting Aug. 29 and for 13 additional weeks beginning April 2, 1960.

Toy makers' budgets show more tv dollars

One of the most talked about developments in advertising this year has been the blossoming of toy makers in television.

Last week Television Bureau of Advertising documented the rise. The bureau found usage by toy advertisers nearly doubled last year over the year previous (1957), that is 121 firms compared to 64, an increase of 89%. As a group the toy makers spent $3,500,900 (at gross rates) of which $2,819,000 was in national spot and the remainder in network.

And the trend is going to become more pronounced. Toy manufacturers already are lining up spot schedules for the fall, much in advance of the season (BROADCASTING, June 15), TvB found Louis Marx, called the world's largest toy maker, ready to launch this season with a relatively large tv campaign (Marx formerly did little advertising and tv this year will get most of the ad dollars now appropriated).

Mattel's Tv • Other companies mentioned: Transogram Co. this fall expands its tv activities to include 90 markets. Mattel Inc., top tv toy advertiser last year, spent $492,945, and in the fall will launch a new program, *Mattel's Funday Funnies* (ABC-TV, Sunday, 5-5:30 p.m.), that will more than double the company's 1958-59 budget. The year-round trend of tv in toys was pointed up by TvB in the advertising blueprint of Remco (buys 39-week campaigns), Mattel and Colorforms.

TvB also expressed its conviction that tv ought to be the major advertising medium in future campaigns for toy and game items and noted sales dipped from $808 million in 1957 to $776 million in 1958, indicating a need for additional advertising promotion.

BACKGROUND: The following programs, in alphabetical order, appear in this week's BROADCASTING tv ratings roundup. Information is in following order: program name, network, number of stations, sponsor, agency, day and time.

At The Movies (NBC-171): Rexall (BBDO), Sun. May 3 10-11 p.m.

Jack Benny (NBC-188) American Tobacco BBDO), Sun. 7:30-8 p.m.

Perry Como (NBC-172): various sponsors, Sat. 8-9 p.m.

Emmy Awards (NBC-183): Benrus, Procter & Gamble (both Grey), Wed. May 6 10-11:30 p.m.

Gunsmoke (CBS-146): Liggett & Myers (D-F-S), Remington Rand (Y&R), Sat. 10-10:30 p.m.

Have Gun, Will Travel (CBS-170): Lever Bros. (JWT), Whitehall (Bates), Sat. 9:30-10 p.m.

Alfred Hitchcock Presents (CBS-183): Bristol-Myers (Y&R), Sun. 9:30-10 p.m.

Bob Hope (NBC-180): Buick (M-E), May 15th 10-11 p.m.

I've Got a Secret (CBS-183): R. J. Reynolds (Esty), Wed. 9:30-10 p.m.

Perry Mason (CBS-148): various sponsors, Sat. 7:30-8:30 p.m.

Maverick (ABC-136): Kaiser (Y&R), Drackett (Y&R), Sun. 7:30-8:30 p.m.

Peter Gunn (NBC-190): Bristol-Myers (D-F-S), Mon. 9-9:30 p.m.

Playhouse 90 (CBS-158): various sponsors, Thurs. 9:30-11 p.m.

Rifleman (ABC-152): Miles Labs. (Wade), Ralston Purina (Gardner), Procter & Gamble (B&B), Tues. 9-9:30 p.m.

77 Sunset Strip (ABC-132): American Chicle Whitehall and Carter Products (all Bates), Harold Ritchie (K&E), Fri. 9:30-10:30 p.m.

Red Skelton (CBS-171): Pet Milk (Gardner), S. C. Johnson (FC&B), Tues. 9:30-10 p.m.

Ann Sothern (CBS-192): General Foods (B&B), Mon. 9:30-10 p.m.

Ed Sullivan (CBS-179): Eastman Kodak (JWT), Lincoln-Mercury (K&E), Sun. 8-9 p.m.

Summer on Ice (NBC-176): U.S. Brewers Foundation (JWT). June 1, 10-11 p.m.

Danny Thomas (CBS-194): General Foods (B&B), Mon. 9-9:30 p.m.

Wagon Train (NBC-180): National Biscuit Co. (M-E), R. J. Reynolds (Esty), Ford Motor Co. (JWT), Wed. 8:30-9 p.m.

Wells Fargo (NBC-194): Buick (M-E), American Tobacco (SSC&B), Mon. 8:30-9 p.m.

Wyatt Earp (ABC-142): General Mills (D-F-S), Procter & Gamble (Compton), Tues. 8:30-9 p.m.

Zane Grey Theatre (CBS-153): S. C. Johnson (B&B), General Mills (B&B), Thurs. 9-9:30 p.m.

Reynolds Tobacco tops Nielsen radio report

A. C. Nielsen Co., Chicago, last week released its second monthly report on network radio's leading advertisers and the R. J. Reynolds Tobacco Co. retained its top position in both homes reached and in total commercial minutes delivered categories (BROADCASTING, May 25).

Nielsen's listing, which covered the four weeks ending May 10, showed a change in second place, with Ex-Lax Inc. assuming that position and displacing Lewis Howe in total home broadcasts and Bristol-Myers in total commercial minutes.

Unlike the old Nielsen listing, the new compilation makes no attempt to show the popularity of specific programs but, on the other hand, shows what each leading network radio advertiser is getting in "homes" and "minutes" from his total radio network purchases. The second report follows:

NATIONAL NIELSEN RADIO INDEX
NETWORK RADIO'S LEADING ADVERTISERS
Based on Four Weeks Ending May 10, 1959

Ranked by Total Home Broadcasts Delivered and by Total Commercial Minutes Delivered for Individual Advertisers by All Programs and Participation on all Radio Networks Used.

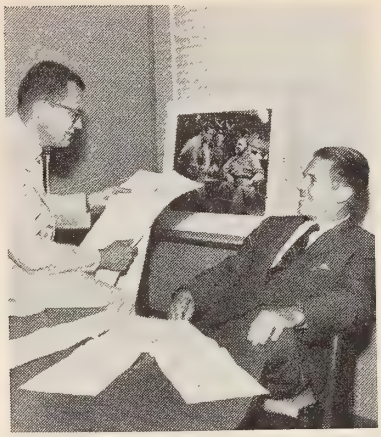
RESEARCH LAG
Tv advertisers fail to use full facilities

Advertisers and marketers have been slow in taking advantage of television's basic research services, Leon Arons, vice president-research, Television Bureau of Advertising, told the American Marketing Assn.'s 42nd national conference in Cleveland Thursday.

Some advertisers have availed themselves of these services, he acknowledged, but on the whole, response to facilities for special analysis has been surprisingly slow.

"Television can furnish a tremendous amount of information on a very broad front," Mr. Arons reported. He cited data on frequency of reaching people—say, "optimum frequency" for carrying out marketing strategy. Toward the end of better understanding through mass media, he reminded, TvB has instituted a "program of basic research on the nature of the communication processes."



Mr. Arons spoke on "Reaching the Consumer in the 1960s—Television as a Selective Medium." Among other topics he explored were various phases of marketing, new teaching tools, ways of increasing market share, marketing management, economic forecasts and consumer behavior.

Reaching consumers in the 1960s may pose problems "somewhat beyond the use of a slide rule and the old-time numbers," Mr. Arons suggested. Television itself "has on hand now and is developing further, many tools which should prove useful," he added. Advertisers and media will better be able to meet their common goals with better understanding of mass media communication and "active participation" by everyone concerned, he concluded.

Pressures Noted • A Friday panel on "Research Mentality" included Donald L. Kanter, creative research director, Tatham-Laird Inc.; Joseph E. Ratner, creative and marketing services director, General Mills; Dick Twedt, research development manager, Leo Burnett Co.; Henry O. Whiteside, vice president and research director, J. Walter Thompson Co., and Leo Bogart, marketing research director, Revlon Inc.

Mr. Ratner claimed that "advertising agency researchers generally are as well equipped as other researchers but they tend to be distracted by the account executive function and in many cases are not allowed to use their own judgment. Agency pressures and client desires do not always produce the best kind of research, he observed, while researchers maintain a "very strong tendency to justify agency campaigns and agency marketing plans."

Dr. Kantor felt one reason the research profession is not up to its potential is "because the client won't let it—and agencies frequently don't allow it."

Final check • Galley proofs of a new college textbook, *Successful Television and Radio Advertising*, are scanned by co-authors Gene Seehafer (1), media supervisor at Needham, Louis & Brorby, and Jack Laemmar, account executive at J. Walter Thompson Co., both Chicago. The book is slated for publication by McGraw-Hill later this summer.

Rating the salesman

"The rating a local advertiser or agency gives the station salesman is often as important as the rating from an audience survey," Warren J. Boorom, vice president and director of member service for Radio Advertising Bureau, told the Florida Assn. of Broadcasters in Miami Thursday (June 18). "It's time our industry exercised the same care, concern and control over our sales efforts as we do over programming," Mr. Boorom declared.

The RAB executive said that while management will monitor its station "at every opportunity . . . it won't monitor a sales call for months."

Reporting on findings of a recent survey among key Florida local and regional advertisers on the frequency and quality of media sales calls, Mr. Boorom revealed that a fourth of those interviewed said they "were never called upon by a radio salesman" and more than two-thirds "received less than two media sales calls per month."

'Open door' attitude helps agency buying

Erwin Wasey, Ruthrauff & Ryan maintains an "open door" policy for station salesmen and representatives for selfish reasons, Robert L. Redd, vice president and radio-tv director in Los Angeles, told the monthly luncheon meeting of the Southern California Broadcasters Assn. Thursday (June 18) in Hollywood. "That's the only way we can keep abreast of the station situation and its continuing changes," he said, "and that's essential to our doing a proper job of timebuying for our clients."

His department spends several million dollars a year on radio, Mr. Redd reported, noting that "as of this morning we have commercials for our clients on 814 radio stations throughout the country." He reported that radio listening in Southern California, where much of the radio money is spent, is the largest of any part of the nation, running about 25% above the national average.

Muriel Bullis, supervisor of radio-tv timebuying for EWR&R, Los Angeles, said that when a station salesman has an idea to present for any of the agency's clients, he should telephone the agency and give a brief synopsis

ARBITRON'S DAILY CHOICES

TV COMMERCIAL PREVIEW

A new tv commercial format for Mary Ellen's Distributors, Berkeley, Calif. (jams & jellies), consists of a humorous take-off on life among the English aristocracy—the absent-minded, irascible lord who reads the *London Times* and his unruffled lady who tolerates his idiosyncrasies.

One of several commercials in the same genre, scheduled to run in about two weeks in five major west coast markets where Mary Ellen's sponsors *Treasure Hunt,* opens with Lady Safetyseal reading a letter from Reggie, their son in America, and Lord Safetyseal, with shotgun poised at the window, is shooting "pesky rabbits."

LADY S.: "I do wish you'd stop poking that gun of yours out of the window and come sit down. We've got another package from Reggie in America.

LORD S.: Can't talk to Reggie now. Got to get rid of those pesky rabbits in the garden.

LADY S.: Reggie's not here, dear. He went to American four years ago. Remember? And he's sent us a jar of Mary Ellen's peach jam. My! Looks delicious."

But his lordship answers abstractedly and irrelevantly as Lady S. keeps up a barrage of praise for Mary Ellen's products. Lady S. finally chides the lord for not paying attention.

LORD S.: "Not paying attention? Mary Ellen's peach jam! Cup to cup! Flavor of the fruit, not the sweetness of the sugar! Right at the nearest grocer. Mary Ellen! I know that!

You think I'm balmy or something! Hah! [Two shotgun blasts].

The commercials were created under the supervision of the client's agency, Guild Bascom & Bonfigli, San Francisco. The writer was Maxwell Arnold, vice president and copy director of GR&B. Production supervisor was Karl Gruener of GB&B's Hollywood Office. The producer was ARCO Productions, Hollywood.

of the idea and identify the client he has in mind. "If the idea is not usable, we can tell him so then and save a lot of time all around," she commented. "If it sounds feasible, we'll ask him to submit it in writing."

With many stations and limited budgets, not every station is going to get on every EWR&R clients' list, Miss Bullis reminded. "We'll be glad to explain the reasons to any station who lost out," she stated, but asked that they please wait until "after the campaign has been bought and we have time to sit down and talk with you."

At a board meeting the previous evening, Robert M. Light, managing director of SCBA, was elected president of the organization, whose members include 62 radio stations in Southern California.

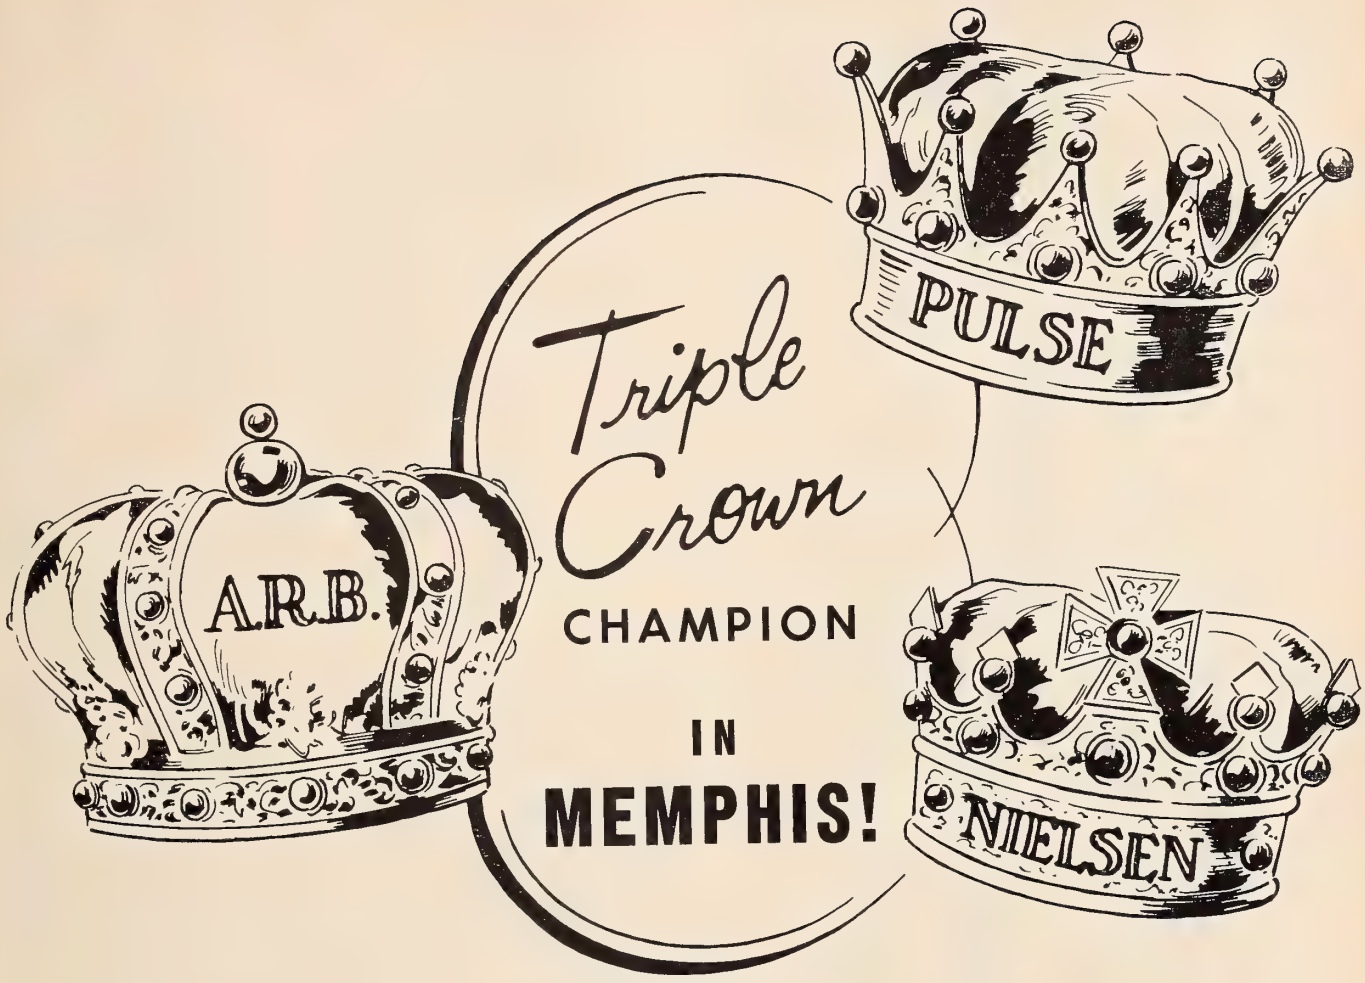
Furniture men told best buy broadcasting

Furniture dealers received almost identical advice on advertising strategy from spokesmen for the radio and television media last week. Each espoused the use of his own medium to reach customers in the suburbs who are often missed by newspapers.

In separate talks before The ARM of Retail Merchants Inc. in Chicago last Wednesday (June 17), Howard P. Abrahams, vice president, retail sales, of the Television Bureau of Advertising and Robert H. Alter, manager of sales administration, Radio Advertising Bureau, underscored the superiority of his own medium over newspapers. They both concluded that newspapers, which receive the bulk of the retailers' budget, fail to provide dealers with adequate coverage in the suburbs.

Mr. Abrahams made the point that tv reaches both city and out-of-city homes, in contrast with newspapers which do not reach suburban readers "sufficiently." He added that tv also is effective in communicating advertising messages to "young families," which he called "the best customers for furnishings."

Mr. Alter pointed out that furniture dealers allot 80% of their budget to newspapers, which he called "a medium that misses a large part of the furniture dealer's best potential—the suburbs." Radio, he added, not only penetrates the entire market but "allows you to pinpoint specific audiences."



MISSIONARIES Farm chautauqua held on Madison Ave.

The National Assn. of Television & Radio Farm Directors, meeting in New York for the first time, held its annual spring - summer convention last week (June 17-20). Assembling at the Statler-Hilton Hotel, their chief objective was to tell Madison Avenue that the nation's farmers make up a large, important segment of purchasing power and farm programming is the best way to share in it.

"Agencies know relatively little about farm programs or their audience," Donald Frost of the radio sales representative Peters, Griffin & Woodward Inc., New York, told NATRFD members at the Thursday afternoon panel session on "This Business of Marketing." This lack of knowledge can be changed to a profit-making position for reps, agencies and stations, Mr. Frost said, if the stations will keep their reps informed of their programming and service activities.

"In the past year I have not had one broadcast media salesman come to my office," M.E. Carroll, vice president marketing, Minneapolis - Moline Co. (farm equipment) told the group Thursday. "M-M does not use much radio-tv advertising," he said, "and the reason is nobody has tried to sell us on broadcasting. We would like to know how many people you reach, how many potential customers we have with your listeners and what impact you have on buying decisions of customers. With a little shorter line of communication we can all make a buck," Mr. Carroll remarked.

While the Thursday session was an opportunity to hear what is demanded from the radio-tv farm directors, Friday morning was given over to the NARFD's own presentation, "Make the Big Reach Even Bigger." This session was arranged by various rep firms and stations. Agency representatives were invited to hear the full message of the farm broadcasters. They were told how they can share in the annual $37.8 billion farm market. On early morning farm programs advertisers can reach consumers at a non-competitive time, the group was told. In addition, farm broadcasting attracts many non-farm people—other early-risers and businessmen closely associated with farm market development.

Channel 3 is First By All Surveys

Here are the latest Memphis Surveys, showing leads in competitively-rated quarter hours, sign-on to sign-off, Sunday thru Saturday:

	A.R.B. Jan. 12- Feb. 8 '59 (Metro Area)	Pulse Feb. '59 (Metro Area)	Nielsen Feb. 8-Mar. 7 '59 (Station Area)

CBS TELEVISION

Represented Nationally by the Katz Agency

*Nielsen Television Index, 2nd May Report

**NTI, October 1958—May 1959; Average audience basis; nighttime, 6-11 pm, Sunday-Saturday; daytime, 7 am-6 pm, Monday-Friday

GRAND TOTAL...

Today, for the 94th consecutive rating period since July 1955, THE CBS TELEVISION NETWORK is attracting the biggest average nighttime audiences in television.*

Since the latest television season began last October, the Network has provided its advertisers not only with the greatest average nighttime audiences but with the largest average daytime audiences as well. It has also averaged as many of the Top 10 programs and as many of the Top 40 as the other two networks combined.*

This record provides the simplest explanation of why the CBS Television Network is today for the seventh consecutive year the world's largest single advertising medium.

CONTADINA'S 'SELFISH' REASON

Stays with radio-tv alone because of payoff

Because "the tv set and the radio set have become important members of the family" and because "people are looking more and more to broadcast media for their entertainment and information," Contadina Foods concentrates most of its advertising money in broadcasting. Martin L. Morici, vice president for sales and advertising, said this last Monday (June 15) to the Hollywood Advertising Club.

"We've been doing so [concentrating on radio and tv] for four years now, for one very selfish reason: We want to move goods," Mr. Morici stated. "Past experience and a look at our sales curve proves this decision is a wise one. We will continue to concentrate our advertising efforts in broadcast media. At least, until many millions of Americans suddenly change their habits."

Mr. Morici traced the history of Contadina's broadcast advertising, playing recordings of the company's radio commercials—"From the East to the West, every one is undressed. . . . Contadina's ripe peeled tomatoes," "Who put eight great tomatoes in that little bitty can?" —and films of the tv spots to illustrate his talk.

The off-beat commercials stand out so vividly that people talk about them, he reported, adding: "That's important. We not only want to be heard, but we want to be talked about later. This stretches our advertising dollar." Those dollars were limited in 1954, when Contadina was fighting for shelf space against tough competition, he said, and "the more we discussed the problem with our agency, the more apparent it became that there was just one correct solution: spot radio.

"The results are history. So successful was that first campaign that we were actually completely out of the product long before the new crop of tomatoes was ready for harvesting."

Expansion into Tv • Contadina continued its off-beat commercials on radio year after year and last fall went into tv for the first time, using the same comedy approach, but concluding each tv spot with a straightforward recipe and cooking demonstration to show young housewives what tomato paste is and how to use it.

"We have been using spots in eight-week flights," Mr. Morici said, "rather than on a continuing 52-week basis. During these flights, we attempt to dominate the medium with as heavy a schedule as possible. We use as many as 180 spots per week in a market. In other words, when we advertise, we attack with saturation impact. As a result, radio listeners are 'Contadina conscious' for a relatively short period of time. But, during this time, we are able to establish lasting buying habits and brand loyalty."

Nelson Carter, vice president of Foote, Cone & Belding, L.A., and president of Advertising Assn. of the West, installed the Hollywood Ad Club's new officers at the meeting, final one of the season.

• Business briefly

Time sales

• American Motors Corp., Detroit, is renewing its Friday night saturation tv campaign for the Rambler car in more than 70 markets (BROADCASTING, May 4). The Rambler schedule extends through the weeks of July 10, 17 and 24. Agency: Geyer, Morey, Madden & Ballard Inc., N.Y. and Detroit.

• Olin Mathieson Chemical Corp., N.Y., has renewed *Small World* for the 1959-60 season on CBS-TV, beginning Oct. 4 (6-6:30 EDT). The program, produced by Edward R. Murrow and Fred W. Friendly, won several awards during its first tv season. Agency: D'Arcy Adv., N.Y.

• Kitchens of Sara Lee (bakery products), Chicago, buys two weekly segments of CBS-TV *Captain Kangaroo* (Thurs., Fri., 8:45-9 a.m. EDT) starting June 25. Agency: Cunningham & Walsh, Chicago.

Agency appointment

• Northam Warren Corp., Stamford, Conn., names Doherty, Clifford, Steers & Shenfield, N.Y., for its Cutex line of lipstick, nail polish and manicure items. The account formerly was at Doyle Dane Bernbach, N.Y. Billing on the account, an active spot radio-tv user, is approximately $1 million.

• Also in advertising

• Chesebrough-Pond's Inc., International Div., N.Y., reports advertising control for the company's markets in Chile, Uruguay, Paraguay and Brazil has been switched from New York to Buenos Aires in line with a policy of decentralizing overseas operations. Advertising responsibility in these South American areas is transferred to Juan Carlos Bernsau, advertising and merchandising manager of Pond's Argentina.

• Tatham-Laird Inc., N.Y., has moved from 3 E. 54th St. to 420 Lexington Ave. New telephone: Murray Hill 9-8733.

• Fuller & Smith & Ross Inc., N.Y., located since 1938 at 230 Park Ave., is moving to 666 Fifth Ave. where it will occupy the 36th and 37th floors.

• The McCarthy Co. of New York has been established as a subsidiary of the McCarty Co. Adv. of Los Angeles, with offices at 60 E. 56th St. Robert Holley, executive vice president of the New York company, is head of the office. The new company replaces a former affiliate, the McCarty Co. Adv. Inc., which is changing its name, according to H. E. Cassidy, president of the Los Angeles parent agency.

• West Assoc. is the new name of Bill West Adv., L. A. Staff appointments: Roger Kennedy and John Graham named art director and assistant art director, respectively. Both formerly served the agency as free lance artists. Gloria Rossi, formerly publications assistant, *Kiwanis magazine*, Chicago, named traffic coordinator. Address: 1144 S. Robertson Blvd.

• Northwest Adv. Agency now is located at 1645 Hennepin Ave., Minneapolis 3. Telephone: Federal 6-9311.

• Mexico City has established Etica Comercial, A. C., patterned after the American Better Business Bureau. The BBB reports that Etica Comercial is sponsored by the Rotary Club of Mexico City under the presidency of Jose Riojas Guerra, operations head of The Rudolph Wurlitzer Co. division there. Eduardo Garcia Godoy is manager. Address: 463 Melchor Ocampo, Mexico 5.

• Commercial Adv. Assoc. Inc. (subsidiary of Commercial Recording Corp.), Dallas, Tex., has been formed to produce radio-tv advertising campaigns. Executives: Tom Merriman, president; Bob Farrar, executive vice president-creative director; Dick Morrison, vice president-account executive, and Jerry Blum, account executive. The radio-tv portion of Baker's hair tonic ad budget is assigned to CAA. Telephone: Riverside: 8-8004.

• A $100,000 damage suit by Robert L. Sande and Larry Greene against Radio Recorders for breaching copyrights in its new air check service (BROADCASTING, June 15) has been postponed to June 29 in U.S. district court in Los Angeles.

Man who "never uses" the railroads

The food he's eating . . .
The airplane he's riding in . . .
The car waiting for him
at the airport . . .
The new ranch house
he'll sleep in tonight . . .

They've come to him all or part of the way on the railroads — either as raw materials, as component parts, or as finished products.

Man who "never uses" the railroads? There's never a day when he doesn't!

Railroads carry more of the things you use than any other form of transportation. And they save you money, too — because railroads are a *low-cost* way of shipping freight.

Financially sound, progressive, and strong railroads are essential to a dynamic American economy and to our national defense. It is of vital interest to everyone that the railroads be given the equality of treatment and opportunity upon which their health depends — now and in the future.

ASSOCIATION OF
AMERICAN RAILROADS
WASHINGTON 6, D. C.

ODDS IMPROVE ON SEC. 315 CURE

Senate unit receptive to changes; House hearings next week

Prospects brightened last week for at least some relief for broadcasters from the mixed-up political broadcasting law as a Senate subcommittee began hearings on four bills to amend it.

Sen. John Pastore (D-R.I.), chairman of the Communications Subcommittee of the Senate Commerce Committee, repeatedly emphasized that Congress must do something about the situation —and that his committee would act expeditiously.

A member of the committee, Sen. Vance Hartke (D - Ind.), continually plumped for support for his bill, the broadest and most palatable to broadcasters.

In other Washington equal time developments last week:

• Rep. Oren Harris (D-Ark.) said his House Communications Subcommittee would hold equal time hearings June 29-July 1 with emphasis on the Justice Dept. intervention in the Lar Daly-Chicago case (see page 55).

• The FCC, by a 5-2 vote, reaffirmed its February decision that Lar Daly was qualified for equal time following appearances by his opponents for mayor of Chicago on local newscasts (see page 55).

Bills under consideration by Sen. Pastore's subcommittee include S 1828 by Sen. Hartke with an additional 12 senators as co-sponsors, S 1585 by Sen. Gordon Allott (R-Colo.), S 1604 by Sen. Strom Thurmond (D-S.C.) and S 1929 by Sen. Spessard Holland (D-Fla.). The last three bills are limited to reversing the FCC's Lar Daly decision by exempting bona fide newscasts from Sec. 315. In addition, Sen. Hartke's bill also would relieve broadcasters of responsibility for libel as a result of aired political statements and "qualified" candidates under Sec. 315.

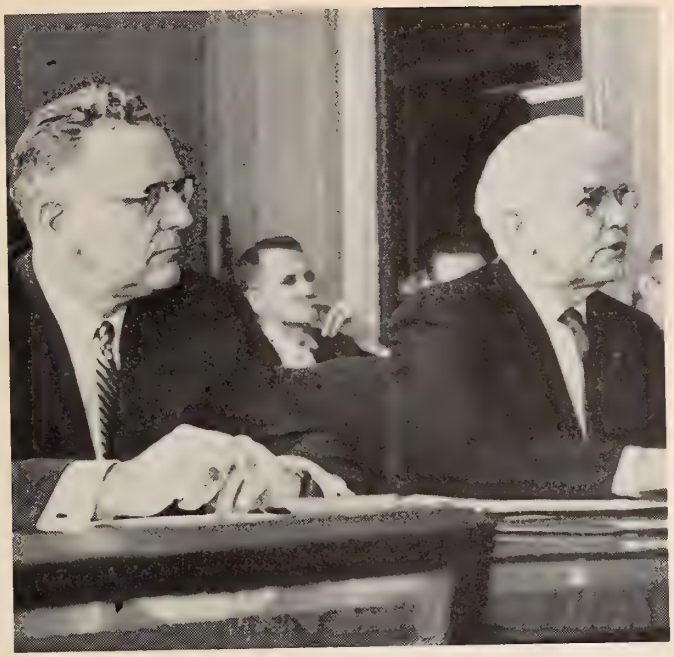
Attendance by members of the subcommittee at last Thursday's session indicated the high interest of the Congress in the political broadcasting problem. Six of the eight members were present at least part of the time and, in addition, Sen. Warren Magnuson (D-Wash.), chairman of the full committee, sat in on the testimony. The hearings continued last Friday, were recessed today (June 22) and will resume tomorrow through Thursday (June 23-25).

Hartke Views • "We face a great task in these hearings," Sen. Hartke asserted in an opening statement. "First, we must protect the public's right to know. We must encourage radio and tv licensees to broadcast and telecast news about political candidates and campaigns and to encourage free debate of the issues in these campaigns.

"Second, we must protect the rights of all candidates to see that the air is used to the interests of all. Without this, our primary goal is impossible." He said the "seemingly inconsistent position of the Commission can to a great extent be explained by the lack of any definite statement of congressional policy in Sec. 315."

As currently drafted, Sen. Hartke's bill defines qualified candidates for President and Vice President. He also has drafted an amendment spelling out qualifications that must be met by lesser candidates to be eligible for equal time.

The Indiana Democrat closely questioned Thursday's witnesses on provisions of S 1858 which are not covered in the language of the other three bills under consideration. In many instances, he elicited support for his much broader measure.

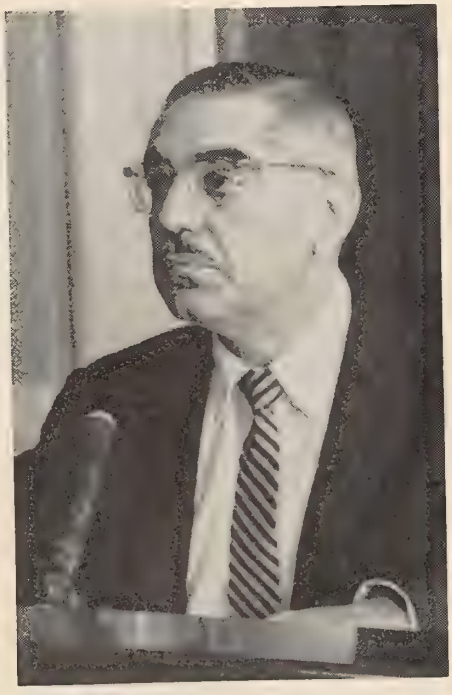


FCC Testimony • Comrs. John C. Doerfer and Frederick W. Ford represented the Commission. Mr. Ford offered a proposed addition to Sec. 315 which immediately won the approval of Sen. Pastore. Submitted and approved by a majority of the FCC Wednesday (June 17), the Ford proposal would add a new paragraph to the act stating:

"Provided, that newscasts and special events such as political conventions shall not be considered a use within the meaning of this section, but this proviso shall not exempt licensees who broadcast such news and special events from an objective presentation thereof in the public interest."

Comr. Ford, who spoke for the FCC majority voting to uphold the Lar Daly decision, said his proposal had received approval by a majority of the Commissioners. Under questioning, he said Comrs. Robert E. Lee, John Cross and

Urge major cure-all • CBS Vice President Richard Salant (l) and CBS Inc. President Frank Stanton listen closely to preceding testimony before Mr. Stanton pleads for Hartke bill.



Back limited changes • Sens. Gordon Allott (R-Colo.) (l) and Spessard Holland (D-Fla.) plead for exemption of newscasts only; warn broader amendments will bog down any action in controversy.

FCC commissioner sentiments • Comr. Frederick W. Ford (l) submits proposal favored by FCC while Chairman John C. Doerfer advocates Sec. 315 repeal by step-by-step procedure, if necessary.

Warns of gag • NBC Board Chairman Robert W. Sarnoff predicts curtailment of radio-tv news coverage unless gag is lifted.

For partial change • Chairman John Pastore (D-R.I.) expresses strong sympathy for limited amendments; warns repeal is out.

Hoosier with a plan • Sen. Vance Hartke (D-Ind.) presses witnesses, with notable success, for support of his equal time solution.

Rosel Hyde gave unqualified endorsement, Comr. Doerfer picked it as his "second choice" solution, while Comrs. Robert T. Bartley and T.A.M. Craven dissented. No formal vote was taken, with only informal opinions expressed.

Doerfer for Repeal • Comr. Doerfer gave the committee his "personal" views on Sec. 315, speaking individually and not for the FCC. "In my opinion, Sec. 315 should be repealed," he said bluntly. "Programming of political candidates should be left to the judgment of the broadcast licensee. Bias or prejudice should not be subject to the same sanctions as the unfair treatment of controversial matters are handled today.

"The broadcasters were never given the opportunity to demonstrate their ability to present political candidates in a fair and impartial manner. It is inconceivable to me that a broadcaster would risk the loss of a valuable privilege—his license—by attempting to discriminate unreasonably between contending candidates and the public's

right to see and hear news programs.

"The hazards, hardships, inequities and inequalities flowing from Sec. 315 are matters of common knowledge. Applying the measure of experience, the bad outweighs the good. This provision, like prohibition, has been a 'noble experiment'. The weakness of prohibition brought on its repeal. Sec. 315 is ripe for similar treatment."

In answer to Sen. Pastore, Comr. Doerfer said that he had been trying to sell his views to commissioners for the past five years. "I would say they disagree with me," he said. To which Sen. Pastore observed: "Maybe in time Sec. 315 will be repealed," but he left no question that he doubted that time has come. By the same token, he made it plain several different times that he expected the Senate, at least, to revise the act.

The Hartke bill, Sen. Pastore said, is a good starting point but it, too, probably goes further than Congress will accept. Comr. Doerfer said that he is "heartily in favor of a step-by-step approach" to repeal of the controversial section.

The commissioner agreed with Sen. Hartke that the Lar Daly decision will open the flood gates to uncounted additional demands for equal time during the 1960 campaigns. Also, they both agreed, it will lead to a cutback in the news coverage of radio-tv stations to the detriment of the public. Further agreement was reached that Congress needs to clarify and define a qualified candidate.

Stanton Testimony • Frank Stanton, president of CBS Inc., said the problem has not been whether to change Sec. 315 but rather how to change it. He urged immediate approval of Sen. Hartke's bill, S 1858. While it is not a cure-all, "the great danger is that we will delay correcting the fundamentals because we cannot find all at once the solutions to scores of details," the CBS president said.

"This bill is not only of first importance to broadcasters. It is . . . even more important to the public and its full participation in the democratic process," Dr. Stanton said. Radio's and television's "great potential contributions to the democratic process have been frustrated by the rigidity and unrealism of Sec. 315," he added. Whatever the objectives when the bill originally became law, he said, 30 years of experience shows that the section represents a good idea gone completely wrong.

"The inescapable conclusion is that Sec. 315 does far more harm than good and that its result is neither to increase diversity of opinion nor expand free speech but rather as a matter of practical necessity is a compelled suppression and blackout," Dr. Stanton maintained. He outlined these three major areas in which the Hartke bill would aid broadcasters:

(1) It relieves broadcasters of the obligation to give equal time to insignificant and fringe candidates. "The bill recognizes the political reality that normally ours is a two-party system. Up to now, broadcasters have been forbidden to recognize this fact of political life."

(2) It exempts news documentary, panel discussion, debate, or similar programs under the exclusive control of the broadcaster from the equal time requirements.

(3) "The third important step forward, and perhaps the most urgent one, . . . is the legislative exemption from the reach of Sec. 315 of any regularly scheduled bona fide newscast." Actually this is not a step forward but a recovery of lost ground, Dr. Stanton said.

Simple Mathematics • If the Lar Daly decision is allowed to stand, one conclusion is inescapable, the CBS president stated. "Simple mathematics establishes that we will have no choice but to turn our microphones and cameras away from all candidates during campaign periods. For the first time in American history, there will be a federally enforced blackout on full electronic news coverage on grounds which have nothing to do with national security."

The witness pointed out that a presidential election year is just six months off. "There is not time to draft legislation that will answer every objection to either Sec. 315 or the remedial legislation. The urgent thing is to take care of the most prevading and besetting dangers. . . . The Hartke bill does furnish direct relief to those of the primary destructive effects of Sec. 315 which can most readily be dealt with.

"Its prompt passage can very well mean the difference between the survival of free journalism in this country and the beginning of an erosion that can be interpreted as nothing less than the negation of democratic principles as old as the republic. Equally important, it can mean the difference between brodacasting contributing importantly to the election process and

FCC dislikes Sec. 315 amendments

The FCC told Congress last week that it doesn't like the proposed legislation which would exempt newscasts from the provisions of Sec. 315. The written comments were filed with the Senate and House Commerce Committees as official statements of the full FCC, which adopted them June 17.

Following basically the approach it maintained in the Lar Daly ruling (see page 55), the Commission told Congress that enactment of these revisions would give rise to "serious and difficult administrative problems which would be almost impossible to decide."

One of the major problems, the Commission said, was that the FCC would be required to determine whether a newscast is regularly scheduled and *bona fide*.

The same objection was raised to the phrasing that the newscast "be determined in good faith in the exercise of the broadcaster's judgment to be a newsworthy event and in no way designed to advance the cause of or discriminate against any candidate."

Both of these provisions should be deleted the Commission said.

In one paragraph the Commission contended that broadcasters don't know the meaning of the word "fair."

It urged that the phrase "fair and equal" should be eliminated because "the word 'fair' as used in the broadcasting industry to describe a licensee's statutory obligation to be fair and impartial in allowing divergent viewpoints on controversial public issues to be expressed via a station's facilities, has come to mean something less than equal. . ."

The Commission also urged that candidates themselves be required to determine their eligibility as legally qualified candidates.

In discussing other bills, the Commission endorsed provisions which would grant immunity from libel suits for expressions made by a candidate appearing under Sec. 315. One clause now prohibits a broadcaster from censoring a political candidate's speech. The FCC raised the question, however, how this immunity would be carried over to candidates appearing on news or discussion programs if Congress expressly exempted them from the requirements of Sec. 315.

being merely the purveyor of time. And the difference depends upon how promptly this subcommittee and the Congress act."

Hands Are Tied • In answer to questions, Dr. Stanton said that broadcasters are operating "with one of our hands tied behind us. . . . If you confine yourselves to just reversing the Lar Daly decision, I think you are short changing all of us—that is, the people." The Hartke bill is the only measure pending which will give broadcasters freedom in panel and debate shows, he maintained.

"This committee is going to be very desirous of doing something," Sen. Pastore said but throughout the day indicated the relief probably will not go as far as that advocated in the Hartke bill.

Dr. Stanton promised that if Sec. 315 is modified, CBS will offer debates and discussion in prime evening time during the 1960 campaigns.

Robert W. Sarnoff (NBC board chairman) • In a statement prepared for delivery before the subcommittee Friday, Mr. Sarnoff charged that "an irksome, self-defeating section of the law, poorly conceived and difficult to administer, has imposed on the public too long. Most recently it has generated an administrative interpretation so absurd that it has aroused a national outcry of indignation."

Because of Sec. 315, he said, an onerous burden is being borne by the American electorate. "It takes the form of a severe restriction on the public's right to be freely informed and it weighs most heavily in the most vital area which that freedom is intended to protect—the enlightened exercise of the ballot," Mr. Sarnoff told the senators.

Sec. 315 has a history of frustrating the very ends it was designated to serve, he continued, but never has it aroused such profound frustrations as in the Lar Daly decision. "The ruling is unsound in principle, unrealistic in practice and harmful in effect. Its clear and immediate effect is to clamp a political gag . . . on the eve of a national political campaign. Unless the gag is lifted during the current session of Congress, a major curtailment of tv and radio political coverage in 1960 is inevitable."

Supports Minor Amendments • Mr. Sarnoff, in advocating all the provisions of the Hartke bill with NBC-suggested minor amendments, said the only way to remove the destructive effects of Sec. 315 is through legislation. "It has been a deterrent rather than a stimulant; it has clogged the political pump it was intended to prime," the NBC executive stated.

Participation of political candidates on panel shows and interview programs should not be considered as "use" under Sec. 315, he said, and promised that if Congress acts, NBC will make ample time available to major Presidential and Vice Presidential candidates during the 1960 race.

In stamping NBC's approval to the four bills being considered by the committee, Mr. Sarnoff incorporated in his statement suggested amendments to the bills. As Sen. Hartke has proposed, Mr. Sarnoff also advocated extending the definition for qualified candidates to state and local office seekers.

Holland Testimony • Sen. Spessard Holland (D-Fla.) argued for limited revision of Sec. 315. "Worst situation that has arisen in the field of politics in my time" is the way he described the FCC's latest equal time ruling. His bill (S 1929) "is designed for one purpose and one purpose only, which is to overcome the strained interpretation of Sec. 315 . . ."

The senator said the scope of S 1929 was limited to the newscast exemption because "time is of the essence and efforts to repeal or substantially amend Sec. 315 would lead us into very technical and controversial areas. . . ." Complete repeal at this time is not the solution, Sen. Holland said, and the industry is unrealistic in seeking repeal if it wants timely relief from the Lar Daly case.

Sens. Hartke and Pastore questioned their colleague at length about his bill and other pending amendments. Sen. Holland said that he is not opposed to the Hartke bill but would resist any effort to add controversial language to S 1929. He said that it is the duty of Congress to help the broadcasting industry by passing legislation that is clear. However, portions of the Hartke bill going beyond the newscast exemption are controversial and "will hold up and delay and will possibly defeat this vitally important legislation," Sen. Holland maintained.

Sen. Pastore agreed that the FCC interpretation has led to a "ridiculous situation and we should cure that situation."

In answering Sen. Hartke, Sen. Holland said that it would be "unreasonable" to require a candidate to receive 1% of presidential vote in the past election to be eligible for equal time because this would be a federal encroachment upon state rights.

Allott Testimony • Sen. Gordon Allott (R-Colo.) said the FCC's Lar Daly decision "abridges radically the freedom of radio and tv and consequently their usefulness to our society. It will necessitate, on the part of the broadcasting industry, a negative approach to the role that broadcast journalism plays in our present way of life."

The "crippling" decision, the senator said, deprives broadcasters of the important right to make their own decisions about programming. "The practical effect may well be to eliminate coverage of political campaigns by radio and tv," Sen. Allott stated. "Judgments as to the newsworthiness of any event concerning candidates will no longer be made on a basis of their news value; they will have to be made with an eye to the amount of time which must be given the candidate's opponents, present and potential."

Sen. Allott pointed out that his bill (S 1604) would safeguard reasonable equal time requests but would exempt straight news coverage. He said that probably the entire section should be reviewed but that would require long, complicated investigation. "The problem created by the recent decision is an urgent one, a potent one, and one which can be easily and simply corrected by the amendment I have offered," Sen. Allott said.

The senator also entered in the

Equal time for a king • Bishop Homer A. Tomlinson, general overseer of The Church of God, who also counts himself as "King of the World" plans to face the subcommittee this week with a plea for minority parties in application of equal time. Here Brother Homer, as he also describes himself, examines one of his publications which he distributed at last Thursday's hearing. In it is reported his unsuccessful quests for the presidency in 1952 and 1956, but with a forecast that he would be elected into office on Nov. 8, 1960. Brother Homer, of Queens Village, New York, will have as his vice-presidential running mate Bishop John L. Rogers of Missouri.

record statements from several Colorado broadcasters urging the amendment of Sec. 315. They were by Hugh Terry, KLZ Denver, William Grant, KOA Denver, Harry Holt, president of the Colorado broadcasters' association, Russell Shaffer, KBOL Boulder, and Clif Hendrix, KCSJ Pueblo.

Voice from Past • Ex-Sen. Clarence Dill (D-Wash.) was a surprise witness. Sen. Dill told the committee what Congress meant with the word "use" in the original enactment of the Communications Act. Sen. Dill was the principal author of the radio act when it was first passed in 1927 and was chairman of the Senate Commerce Committee when the Communications Act was adopted in 1934.

Sen. Dill said that "use," as embodied in the act, was intended to mean that a candidate had to initiate his appearance on a station. "There is no doubt about it," Sen. Dill emphasized. "Nobody ever thought about it any other way."

He said it would be "extremely unfortunate" for Congress to repeal Sec. 315, but that the FCC should be given discretion and authority in applying its principles. He said it is impossible to cover all situations by statute and that the FCC should have the authority to deny time to splinter candidates.

Any amendment to the act should be made as brief and simple as possible, he urged, but the equal time provision was never meant to cover legitimate newscasts.

Mrs. Bullitt's Testimony • Mrs. A. Scott Bullitt, president of King Broadcasting Corp., said there are two respects in which the improvement of Sec. 315 is seriously needed.

One would be a proper interpretation of the word "use" as used in the act and the other would be adequate protection for the broadcaster against libel. On the whole, she said, the FCC has administered Sec. 315 "wisely and fairly" but that the Lar Daly decision produced "very undesirable results."

"I believe that a broadcaster should not be forced to the Hobson's choice of failing to carry a leading news item," Mrs. Bullitt said, "or, if it carries the item, of making available valuable time without cost to all competing candidates."

She urged that Congress act to clarify the libel and newscast provisions before the next general elections.

Under questioning by Sen. Hartke she said she supported his bill.

Hall's Testimony • Payson Hall, director of Meredith Publishing Co. stations, said Sec. 315 has the effect of unduly restricting the ability of stations to provide essential informative programs and compels them to devote time to purposes which fail to serve the public interest. He strongly advocated that provision of the Hartke bill which defines a "qualified candidate" under the meaning of 315.

"The fringe candidates will no longer be able to deprive people of the opportunity to see and hear substantial, qualified candidates," he said, and stations no longer would be obligated to set aside substantial blocks of time for fringe candidates.

Mr. Hall also called for passage of proposals to exclude news coverage from Sec. 315 and to relieve broadcasters from responsibilities for libel, all provisions of the Hartke bill. He said "exceptional cases" will arise when a station may depart from fair play but these should not be dealt with by "strait-jacketing" all programs in which a candidate might incidentally appear.

More for the Record • Additional statements were entered in the record by Sen. Eugene McCarthy (D-Minn.); Rep. Joseph Barr (D-Ind.), sponsor of a House bill identical to the Hartke measure; W.H. Lancaster, president of WJHL Johnson City, Tenn.; Harlan B. Snow, KSIS Sedalia, Mo., and Charles Crutchfield, vice president and general manager of WBTV (TV) Charlotte, N.C.

The National Assn. for Better Radio & Tv submitted a statement urging Congress to leave Sec. 315 as it is. Stating the equal time provision is the only specific requirement placed on licensees, NABRT stated: "We fear that the destruction of this one specific standard would be the first step in an erosion of the broadcaster's responsibility for fair and impartial news coverage.

"We have no doubt that if the standard were eliminated in the narrow field in which it specifically applies, the broadcasters would regard this elimination as a signal that they are permitted to relax these standards in other aspects of elections and news coverage."

Harold Fellows, NAB president, is the first scheduled witness when the hearings resume tomorrow. He will be followed by Donald McGannon, president of Westinghouse Broadcasting Co.; Palmer Hoyt, publisher of the *Denver Post;* Rex Howell, KREX-AM-TV Grand Junction, Colo.; Victor Sholis, WHAS-AM-TV Louisville, and D.B. Lewis.

Wednesday witnesses will include Ralph Renick, WTVJ (TV) Miami, and president of the Radio-Tv News Directors Assn.; James A. Byron, WBAP-AM-TV Ft. Worth, president of Sigma Delta Chi; Edward Barrett, Columbia U.; F. Van Konynenberg, WCCO-AM-TV Minneapolis; Tom Chauncey, KOOL-AM-TV Phoenix; Robert B. McConnell, WISH-AM-TV Indianapolis;

Paul Morency, WTIC-AM-TV Hartford, Conn., and "King of the World" Homer A. Tomlinson, candidate for President in the 1960 elections.

On the stand Thursday will be John E. Stemple, journalism professor at the U. of Indiana; E.G. Harris, U. of California; Walter Brown, WSPA-TV Spartanburg, S.C.; Robert D. Swezey, WDSU-AM-TV New Orleans, chairman of the NAB freedom of information committee, and Lamarr Newcomb, WFAX Falls Church, Va.

This witness list is tentative with additions and deletions expected.

On the Senate floor Sen. Kenneth Keating (R-N.Y.) interrupted Senate debate on the nomination of Lewis Strauss as Secretary of Commerce to say that amendments to Sec. 315 must not hurt major third parties. He said he was in favor of legislation to clarify the statute but warned that "in their zeal . . . some sponsors seek to go too far. . . . We should not tolerate a complete blackout of substantial parties."

FCC AFFIRMS ITS DALY RULING

Sec. 315 still held to cover newscasts; stations are not 'free' as newspapers

The FCC last week said Sec. 315 was all-encompassing. This was its stand in officially affirming its four-month-old ruling that appearances of political candidates in newscasts invoked the equal opportunity provision of the Communications Act.

The Commission stood steadfast on this opinion in denying petitions for reconsideration of its Lar Daly ruling last February. These were filed by CBS, NBC, Westinghouse Broadcasting Co. and U.S. Attorney General William P. Rogers.

Two commissioners dissented last week. They were Chairman John C. Doerfer and Comr. T. A. M. Craven. Comr. Cross dissented in part and concurred in part. Comr. Rosel H. Hyde issued a concurring statement.

The latest FCC ruling was again termed "ridiculous" by President Eisenhower. The President, through News Secretary James C. Hagerty, said that he had asked Mr. Rogers to look into the matter further.

In the most significant paragraph, the Commission said the word "use" as provided in Sec. 315, meant exposure to the public or appearance, irrespective of the format in which the candidate appeared.

Sec. 315 requires that if a broadcast station permits one candidate to use its facilities it must provide equal opportunity for all other candidates for the same office to use its facilities.

It All Began in Chicago • The case stemmed from the primary campaign earlier this year in Chicago. There the Democratic primary candidate, incumbent Mayor Richard J. Daley, and Republican primary candidate, Timothy P. Sheehan, were shown via film clips in newscases over local tv stations. Two clips showed Mayor Daley in ceremonial activities. One was when he greeted Argentina President Frondizi at Chicago Airport and the other showed the Mayor opening the March of Dimes polio campaign.

Perennial splinter candidate Lar Daly demanded equal time. The Chicago television stations asked the FCC for an interpretation and on Feb. 19 the Commission ruled that Mr. Daly's demands were justified. The FCC voted unanimously that seven of the nine newscasts fell under the equal time provisions of the Communications Act, but split 4-3 on the last two items.

All except the CBS-owned WBBM-TV gave Mr. Daly equal time.

According to the FCC Mr. Daly was due the following amounts from these stations:

- WBBM-TV—6 minutes, 53 seconds.
- WNBQ (TV)—9 minutes, 51 seconds. (NBC-TV).
- WGN-TV — 1 minute. *(Chicago Tribune).*

CBS petitioned for reconsideration. It was joined by NBC and Westinghouse Broadcasting Co. Following President Eisenhower's expression that the ruling was "ridiculous," Attorney General Rogers also filed a brief asking the Commission to reverse itself.

News Judgment Involved • The basic complaint was that the decision disrupted the editorial judgment of the stations in telecasting news events. It was also charged that the unrestricted interpretation of the word "use" in Sec. 315 was a twisted and distorted definition.

It was also asserted that the Lar Daly decision conflicted with an earlier ruling that held a news showing of a candidate does not invoke the equal opportunity clause of Sec. 315.

This was a reference to the Blondy case, decided in 1957. In this, Detroit television stations showed a group of judges being sworn in at courthouse ceremonies. One of the judges, a re-

cess appointee, was a candidate for the position in the forthcoming election.

In its 50-page "interpretative opinion" last week the Commission told CBS it was wrong in not offering Mr. Daly the equal time he demanded following the FCC's Feb. 19 decision. It refused, however, to comply with Mr. Daly's request that the CBS petition be stricken because of this.

The FCC also turned down Mr. Daly's request that Chairman Doerfer disqualify himself from sitting in the case. Mr. Daly claimed that Mr. Doerfer should be disqualified because he had made public statements that he believed Sec. 315 should be repealed entirely. Mr. Doerfer did not participate on this point.

FCC also denied Mr. Daly's motion to dismiss the Attorney General's participation in the case and to "implead" (prosecute) WGN-TV. In the latter point, the FCC said that Mr. Daley had never demanded equal time of that station.

Key Points • In its opinion last week the FCC made these points:

• The primary and dominant purpose of Sec. 315, based on the legislative history of the provision, is "to put it beyond the power of a licensee to determine which legally qualified candidates for a particular office should be heard via radio once the station had permitted one candidate for that same office to use its facilities."

• Any exposure of a candidate is bound to benefit the candidate. Therefore the appearance in a newscast falls within the purview of Sec. 315.

• The language of Sec. 315 is unconditional and unequivocal. This leaves no room for Commission discretion in any cases brought before it.

• The Blondy case was decided on one set of facts; the situation at hand on another. The appearance of the candidate in the Blondy case was decidedly *de minimis*, at the most a second or two.

Semantics at Issue • There were two salient paragraphs in the FCC's opinion.

In one the Commission discussed the word "use." In the other, the FCC stated that broadcast stations are not newspapers.

Here is the paragraph on the semantics of the word "use":

"There are many definitions of the word 'use'. Use, of course, generally means usefulness, utility, advantage or productive of benefit. In the broadcast field, 'use' has taken on a secondary meaning. To permit a candidate to use a broadcast facility appears to mean, in the light of radio and television, to permit an advantage to the candidate or inure to the benefit of the candidate. This meaning appears to be the meaning which Congress had in mind in enacting Section 315. Congress there trusted that broadcast facilities would not be used so as to inure to the benefit of one candidate and to the disadvantage of another candidate or candidates. As the Commission has employed the word, it seems clear that the word 'use' is synonymous with 'appearance' and that the word appearance is essentially the same as the word 'exposure'. These words seem to import a meaning of showing publicly or offering to the public view or ear. In the instance of television, it seems apparent that it is the 'exposure' itself which constitutes the use of the facilities without regard to the format of the use. We believe that it was the intent of Congress to balance, insofar as it could, the advantages and the equities which flow from exposure on the broadcast medium."

What the Commission thinks of "electronic journalism" is contained in the following paragraph:

"It is true that news presentation by radio and television stations is of inestimable value to the public interest, a proposition with which no one can quarrel. It can be admitted also that a licensee, in its newsgathering functions, may be classified as an 'electronic journalist.' But it simply does not follow from this classification that station licensees have in every instance the exact freedom of choice in presenting the news that a newspaper enjoys. For all practical purposes, the respective areas of editorial choice are co-equal as between newspaper and radio, subject to the vital difference, however, that station licensees must be fair in presenting all important views on controversial public issues, and most importantly, subject to the explicit condition of Section 315 that candidates for public office must not be treated on a discretionary basis. As has been noted, these vital differences rest on the limited availability of spectrum space, as well as Congress' undoubted right, in consideration of the nature of the spectrum, to condition the use of the public domain in a manner designed to prohibit the abuses which might follow licensee discretion."

Minority Opinions • Chairman Doerfer went against the majority view on the ground that Congress meant the FCC to use its discretion in applying the provisions of Sec. 315. He maintained that a *bona fide* newscast should not be counted as a political broadcast. If abuses crop out, he said, stations should be prosecuted.

Comr. Cross dissented from the majority's view that any exposure means use. He felt that the Commission has the discretion to weigh the facts in each case and although he would not absolve all newscasts of Sec. 315, he expressed the view that the two news clips involving Mayor Daley in his ceremonious activity as Mayor were not political.

Comr. Hyde emphasized that in 1956 Congress was asked by CBS to exempt newscasts from Sec. 315 and refused. Since this is so, Mr. Hyde said, no discretion is left to the FCC. If any change is to be made, it must be made by Congress, he said.

Sec. 315 backwash douses Beall offer

Sen. J. Glenn Beall's (R-Md.) request that Maryland radio stations carry a weekly 5-minute "report" by the senator came at the wrong time for M.H. Blum, president and general manager of WANN Annapolis, Md.

"The plan has merit," Mr. Blum wrote the senator in declining the offer. "Unfortunately, there exists today a restraint on broadcasters which has prevented them from attaining equal access with the press. We refer specifically to Sec. 315 of the Communications Act," Mr. Blum wrote.

The WANN president said that he was sure the senator is aware of the "idiocies" of Sec. 315 and urged him to "lend his considerable weight to outright repeal" of the equal time provision during the Senate hearings beginning last week. Until the section is repealed, Mr. Blum said, WANN cannot carry the senator's program.

Two state broadcaster associations last week officially urged Congress to act favorably on the Hartke bill. In his capacity as president of the New Jersey Broadcasters Assn., Fred Walker, WTTM Trenton, wired all members of that state's congressional delegation. He said "early action is needed if broadcasting is to maintain a journalistic standing as far as political coverage is concerned."

Sen. Andrew Schoeppel (R-Kan.) placed in the *Congressional Record* a resolution of the Kansas Assn. of Radio Broadcasters urging that state's delegation to support the Hartke bill. The resolution was signed by Thad M. Sandstrom, WIBW Topeka, chairman of the resolutions committee.

Lar keeps firing

The man who caused it all—Lar (America First) Daly, the Chicago perennial independent candidate—has

been working the hustings overtime on the Sec. 315 issue.

The FCC last week denied him fourfold—on his request to strike the CBS petition for reconsideration, to strike the Attorney General's memorandum, to "implead" WGN-TV, and that Chairman Doerfer be disqualified (see story page 55).

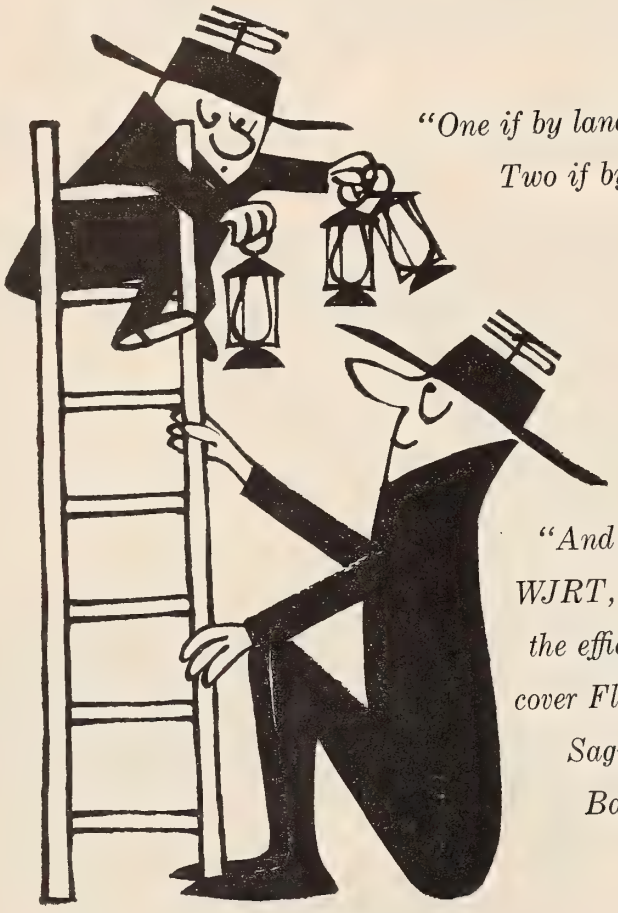
Last week, the irrepressible Mr. Daly was still hard at it.

• He asked Sen. Pastore to postpone the Sec. 315 hearing until June 25.

• He asked the FCC to require the three television networks and Westinghouse Broadcasting Co., Mutual Broadcasting System and RKO Teleradio pictures to grant him free 30 minutes to broadcast his side of the equal time question. For the past three months, he said, only the broadcasters' side of the question has been presented to the American public. Same request was made of 23 tv stations.

• Under date of June 13 he circulated a questionnaire to all Indiana television stations asking six questions about their policies and actions when Sen. Vance Hartke (D-Ind.) was running for the office he won in the November 1958 election. Sen. Hartke is the author of the bill (S-1858) which would exempt legitimate newscast, discussion and forum programs from the provisions of Sec. 315.

Harris calls hearing on 7 Sec. 315 bills



Sec. 315 of the Communications Act was assured a thorough airing on Capitol Hill during the month of June when Rep. Oren Harris (D-Ark.) announced last week that his House Commerce Communications Subcommittee would hold hearings on the political equal time law June 29, 30 and July 1.

Unlike Senate hearings currently in progress (see story, page 50), however, the House version will highlight who attempted to pressure whom in the FCC's Lar Daly decision.

During Wednesday hearings by the Legislative Oversight Subcommittee on the FCC (see story, page 66), Rep. Harris complimented the Commission for affirming its Lar Daly decision "under the circumstances." He obviously was referring to a Justice Dept. recommendation that the FCC reverse itself (BROADCASTING, May 11).

By a straight partisan vote, Rep. Harris' Oversight Subcommittee accused the Attorney General of interference and attempting to pressure the FCC and asked him what right he had to intervene in the case (BROADCASTING, May 25). In a bitter dissent, Rep. John Bennett (R-Mich.), ranking minority member of both the Oversight and House

Another thriller-diller from WJRT—

"One if by land! Two if by sea!"

"And four if by WJRT, Ponsonby—the efficient way to cover Flint, Lansing, Saginaw and Bay City."

Listen, admen, and you shall hear—plenty! That WJRT is *the* single-station way to reach the other big Michigan market. That you get Flint, Lansing, Saginaw and Bay City with one buy and a grade "A" or better signal. That you're right where things happen with WJRT's inside-out coverage of mid-Michigan and its nearly half-million TV households. If you're aiming at Flint, Lansing, Saginaw and Bay City, WJRT is your bull's-eye buy. Come on in—it's open season on sales.

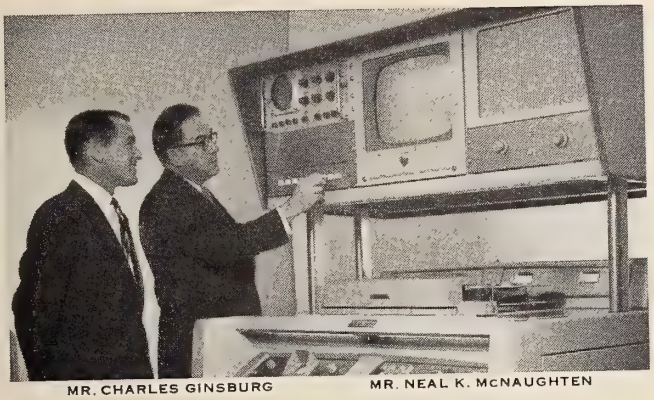
ANNOUNCING THE NEW



VIDEOTAPE* TELEVISION RECORDER

AMPEX VR-1000B

This new model of the widely accepted Ampex Videotape* Television Recorder is now being delivered to networks and stations everywhere. With many new features and a number of refinements, it brings even greater efficiency and convenience to station operation. For all of its new features, however, the "B" retains full compatibility with the over 360 Ampex VR-1000's already in operation, and so becomes a new and important part of the world-wide system of Ampex Videotape Television Recorders.

AND A MESSAGE OF IMPORTANCE TO THE TV INDUSTRY

MR. CHARLES GINSBURG MR. NEAL K. McNAUGHTEN

We at Ampex are asked many questions by station management about both tape recording and our equipment — questions directly related to the success of a television recorder installation. Of these, eight have stood out as particularly important, and they are answered here for you by Neal McNaughten, Manager of the Professional Products Division, and Charles Ginsburg, inventor of the Videotape Television Recorder . . .

HOW WIDESPREAD ARE AMPEX VR-1000 INSTALLATIONS?

"The first prototypes of the VR-1000 were delivered to the three networks, ABC, CBS and NBC in the spring of 1956. Since that time more than 360 production models have gone into service throughout the world — with over 250 of these in the U. S."

WHY ARE YOU INTRODUCING A NEW "B" MODEL?

"During the year-and-a-half that we have been producing the VR-1000 on a production line basis, a number of developments have occurred and new features have been introduced. Most of these have been offered in the form of kits from time to time to VR-1000 owners. Finally there were enough of these innovations to justify the introduction of the 'B' model."

WHAT ARE THE FEATURES OF THE NEW VR-1000B?

"Very briefly — guaranteed signal-to-noise ratio of 36 db for even finer picture quality. RF/RF inter-connection for finest quality tape duplicates. Faster tape start (2 sec.) for quick cueing. Automatic brake release for easier tape handling. Adjustable tape playback speed control for lip synchronizing two or more recorders. Simplified set-up procedures. Improved accessibility. Complete, accurate monitoring. And operation aids that include full width erase, cue channel with tone generator and tape timer. Even stereo sound tracks may be added."

DO I HAVE TO WORRY ABOUT OBSOLESCENCE?

"No — not if you buy an Ampex! While there have been refinements in the equipment there has been no change in the basic operation of the Ampex Recorder itself — nor is any anticipated in the future. The present Ampex recording system has been accepted as the standard throughout the industry — by independent stations, networks, and production companies alike. We expect to see all VR-1000's and VR-1000B's in operation for many years to come."

IS THE VR-1000B COMPATIBLE AND INTERCHANGEABLE WITH THE VR-1000?

"Yes — the 'B' is fully compatible with the VR-1000's now in operation. Tapes will be completely interchangeable.

"Interchangeability of television tapes, as with audio tapes, is achieved when all recorder units are set up to the same standard. Since some of the factors in the 'standard' are chosen arbitrarily, the practical day-to-day reference is a standard alignment tape. With adherence to this standard, full interchangeability is assured between Ampex recorders.

"This is evidenced daily in commercial operation. Right now, 10 different companies are syndicating over 20 taped programs on a national basis — and we have a report that one, 'Divorce Court,' is now in 23 markets 'on tape'."

CAN THE VR-1000B BE EQUIPPED TO RECORD COLOR?

"Yes. Both the VR-1000B and the VR-1000 television recorders are engineered to record color by the addition of a single rack of electronics to the basic unit. The VR-1000B can be ordered from the factory ready to record color — or the color addition can be made at any time after installation. Right now (June 1959) NBC is operating 16 VR-1000's with full Ampex color — 12 factory equipped and 4 with Ampex color added after installation. And CBS is operating 4 VR-1000's to which Ampex color has been added."

SHOULD I WAIT FOR FURTHER IMPROVEMENTS?

"No — no more than one should wait for possible refinements in next year's camera chain or transmitter. Certainly future refinements will come — but the important thing is that Ampex television recording is now a completely proved and accepted television technique.

"Evidence of this is the number of Ampex recorders in regular use throughout the country. 90 within the networks; NBC, CBS and ABC — each with approximately 30 recorders. Over 100 in independent stations. And over 20 in production companies. These users, representing every phase of the industry, DICTATE that there will be no change to basic Ampex techniques.

"And, most important — these recorders are making money — which after all is the **real** determining factor of when to buy. In present installations many Recorders have already paid for themselves — and almost all stations are experiencing greater income and higher profits.

"To wait — is to pass up the money-making opportunities that exist today."

IF YOU HAVE ANY OTHER QUESTIONS —

. . . we would like the opportunity to answer them — and to describe more fully the significance and features of the VR-1000B. Our representative will be glad to do this with you personally — may he call you for an appointment? Or if you prefer, write to Dept. 304 for our two new publications — one describing the 'B' and all its features, the other a report on how stations are making and saving money with their Ampex VR-1000's.

934 CHARTER STREET / REDWOOD CITY, CALIFORNIA

Offices and representatives in principal cities throughout the world

Commerce Committees, accused the Democratic majority of exerting improper influence itself.

Justice quickly replied to Rep. Harris, spelling out its basis for intervention (BROADCASTING, June 8), but Rep. Harris termed this reply "political." Rep. Bennett, in turn, accused Rep. Harris of playing politics.

Rep. Harris said Attorney General William Rogers will be extended a special invitation to testify during the Sec. 315 hearings, speculating "I don't see that he could well afford to refuse." Industry and other government witnesses also will be invited to testify, the chairman said.

The subcommittee considered seven bill to amend Sec. 315. Rep. Harris indicated there is a strong possibility the subcommittee would introduce its own amendments after taking testimony.

Virginians hear Bartley on Sec. 315

Broadcasters do not have the affirmative responsibility to seek out opposition candidates either under Sec. 315 of the Communications Act or under the so-called editorializing rules, FCC Comr. Robert T. Bartley told the Virginia Assn. of Broadcasters last Thursday (June 18) at Tides Inn, Irvington, Va.

Answering a hypothetical question, Mr. Bartley said that in politics a picture is worth a thousand words. He explained that equal time complaints were almost unheard of before tv. In the Lar Daly ruling, he said, the FCC in substance held that "exposure is use" whatever the circumstances.

Contending that the full story of the Lar Daly decisions has never been told, he said that only nine minutes of time were involved in all of the Daly-provoked incidents. No problem has received more "sincere study" than Sec. 315, he asserted. He said the decision was the only one that could be reached under the language of Sec. 315.

Allocations Outlook • Comr. Bartley predicted action by Congress on spectrum control growing out of the panel symposium before the Harris Communications Subcommitte a fortnight ago. Civil control over allocations always must be maintained, Mr. Bartley said, except in time of hot war. There must be an organization that can say "no" and Congress should control policy.

Harry Bannister, vice president in charge of station relations of NBC, took New York's television-radio critics apart in a crackling off-the-cuff talk. He said they are writing for "the New York trade" and that they take refuge in such slogans as "mediocrity" on the theory that if a lot of people like anything it's no good.

If broadcasters heeded the critics, he said, tv soon would be performing for the thousands and then the hundreds instead of the millions. He urged broadcasters to challenge its detractors whenever they are in error by using their own medium. And he counseled support of whatever massive public relations program may emanate from the special project being coordinated through the NAB.

If the campaigns of "the critics, the eggheads and the hungry bureaucrats" go unheeded, Mr. Bannister said, it could seriously damage and ultimately destroy the American system of competitive broadcasting.

Sol Taishoff, editor and publisher of BROADCASTING, addressed the association on the editorial responsibility of broadcasters.

New solution

A new idea for tv allocations has been advanced to the FCC by Blonder-Tongue Labs., Newark, N.J. The New Jersey company, which manufactures master tv systems, industrial tv facilities, amplifiers and converters, urged the FCC to reallocate television from the present ch. 7 upward for 30 channels. Present uhf chs. 70-83 would continue to be used for translators and for educational tv, Blonder-Tongue suggested. The company said that it could produce a quality converter costing about $20 to the consumer. It also suggested that boosters or repeaters on an off-channel basis could be authorized for use in difficult reception areas. Some time ago the same company recommended a "Bi-Tran" system for pay tv. In this system, two video pictures are broadcast at the same time, with the viewer enabled to switch from one to the other at will.

Senate investigating radio treaty matter

A special *ad hoc* subcommittee of the Senate Foreign Relations Committee has been formed to look into the North American Regional Broadcasting Agreement and a separate U.S. treaty with Mexico on broadcasting. The subcommittee, headed by Sen. Wayne Morse (D-Ore.), announced that hearings will be held before the present session of Congress adjourns later this summer.

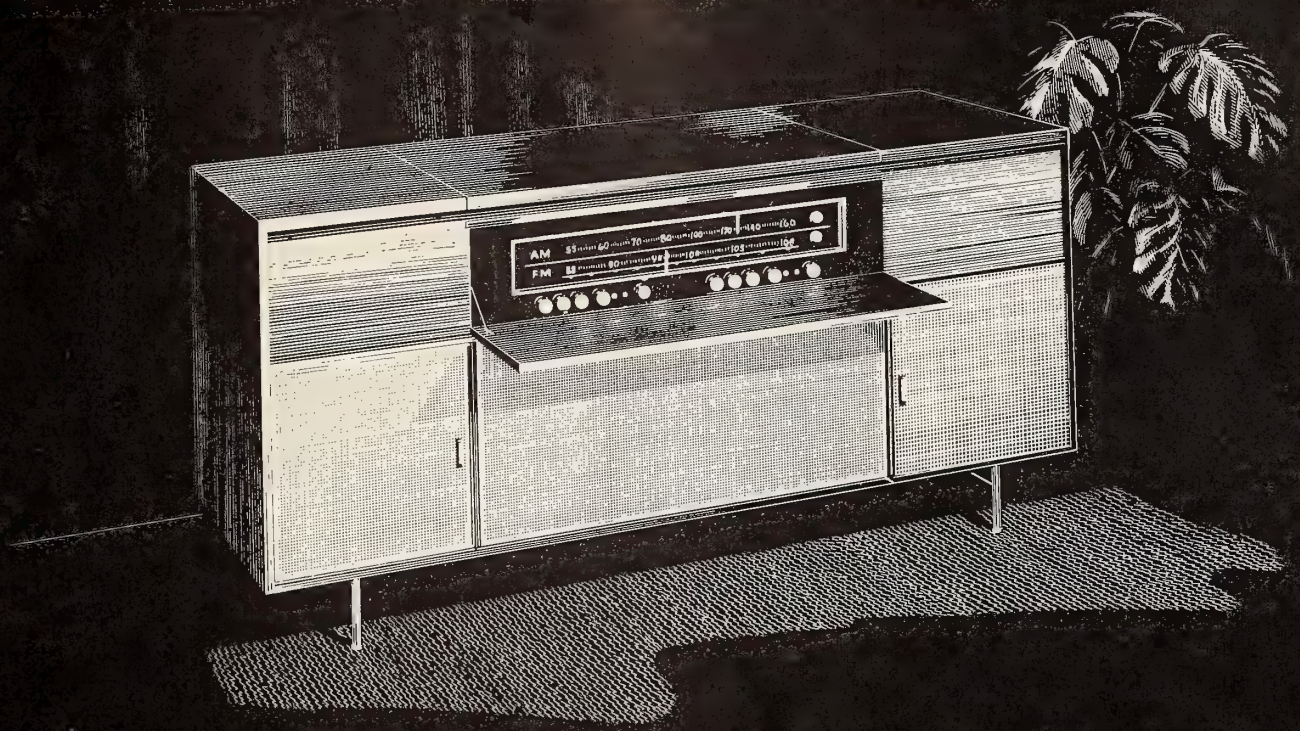
Other members of the subcommittee are Sens. Frank Lausche (D-Ohio), Frank Church (D-Idaho), George Aiken (R-Vt.) and Frank Carlson (R-Kan.). The NARBA treaty was signed by the U.S. in 1950 with Canada, Cuba, Dominican Republic and the Bahamas. The separate Mexican agreement was signed in 1957. Both still are awaiting ratification by the Senate, for which a two-thirds majority is required.

Sen. Morse was chairman of a 1957 Senate subcommittee which criticized the FCC for inaction on requests for standardized hours by daytime stations. The Senator disputed the FCC contention it could not act until the NARBA treaty had been ratified (BROADCASTING, Sept. 16, 1957).

Comr. Rosel Hyde, chief U.S. drafter of the two treaties, in a BROADCASTING interview last week warned that there would be international complications if the Senate does not ratify the agreements (BROADCASTING, June 15).

Mack trial near end after 10-week grind

The 10-week-long trial of former FCC Comr. Richard A. Mack and his friend, Thurman A. Whiteside, appears headed for the jury this week as the defense introduced three witnesses to show that Mr. Whiteside was generously free with funds to help friends in economic distress.



Mr. Mack and Mr. Whiteside are on trial for conspiracy to swing the grant of ch. 10 Miami to National Airlines. The government prosecution completed its case two weeks ago. U.S. District Judge Burnita S. Matthews denied a defense motion for immediate acquittal.

Part of Mr. Mack's defense is that Mr. Whiteside had been helping him financially for a long period, years before he became an FCC commissioner. The witnesses last week underscored this point of citing Mr. Whiteside's generosity to them and their families. Also on the stand was Charles Sheldon, Miami insurance agent, whose Stembler-Shelden Agency has figured in prosecution testimony as the viaduct for payments to Mr. Mack.

Mr. Shelden testified that Public Service Corp. commissions paid to the insurance agency did not go to Mr. Mack. He also stated that his company received the insurance business of the ch. 10 station because of his long-time friendship with George T. Baker, president of National Airlines. Public Service is a subsidiary of National Airlines.

Nicholas J. Chase, defense counsel for Mr. Mack, failed to gain permission to put into evidence bank records of the former FCC commissioner, following

At last in its rightful place . . .

and for the first time anywhere on KFJZ in Fort Worth

COMPATIBLE Stereo

Perfect sound on AM only . . .
Perfectly **wonderful** on AM **and** FM, and **only** on KFJZ.

WCKY

IS CINCINNATI'S No. 1 NEWS STATION

Here's proof, straight from the Jan.-Feb. '59 Nielsen, that WCKY has the largest news audience in Cincinnati:

Station	Rating
WCKY	11.15 avg for 70 newscasts per wk
Sta A — Ind	5.9 avg for 60 newscasts per wk
Sta B — Net	9.8 avg for 70 newscasts per wk
Sta C — Net	9.3 avg for 50 newscasts per wk
Sta D — Ind	5.0 avg for 80 newscasts per wk

(5 day cumulative rating Metro Area)

The reasons for WCKY's News Leadership:

1. Large news staff of veteran experienced reporters and newscasters.
2. Scoops — WCKY consistently scoops the town on most local news stories.
3. On-The-Spot-Reports — WCKY's mobile unit is on the scene reporting big local stories when they happen or moments after they happen.
4. News tapes—the people who make the news tell the news to WCKY's audience via news tapes. WCKY has them on the air first.
5. Background—WCKY's newsmen present the reasons behind the news so that WCKY listeners receive a more complete understanding of the news.

REMEMBER — WCKY News is No. 1 in Cincinnati and has earned its reputation for prestige, because Cincinnatians know they get the news first, fast and accurately on WCKY. Smart advertisers know they get the prestige of WCKY's news plus a large responsive audience when they sponsor news on WCKY.

Ask Tom Welstead to tell you about WCKY news operation — in New York at ELdorado 5-1127; ask AM Radio Sales in Chicago and on the West Coast.

objections by government lawyers. He was given permission to submit relevant deposit slips and other documents.

CATV CONTROLS
NAB Tv Board, Moss bill ask restrictions

Community antenna operations were hit from two sides last week—virtually on the eve of the annual convention of CATV owners Tuesday-Thursday at the Sheraton Hotel in Philadelphia and one week before the start of Congressional hearings on community antenna and booster legislation.

The Television Board of NAB asked FCC to reconsider its policy on licensing microwave facilities to bring tv signals to antenna systems from distant cities.

The NAB resolution held that it was in the public interest for the FCC to regulate community antenna systems, boosters and translators. It not only asked the FCC to reconsider its microwave ruling, but also expressed support of the legislation requested by FCC involving boosters and CATV operations "and more particularly with respect to the requirement that no tv signal be used by any distribution system without the consent of the originating station."

The resolutions were taken at the Tv Board's meeting last week in Washington.

Sen. Frank E. Moss (D-Utah) will revise his community-booster bill (S-1886) to not only bring CATV systems under the control of the FCC, but also to require the Commission to deny licenses for such operations—and for boosters and microwave relays primarily intended to service CATV systems—in those situations where they may adversely affect the creation or maintenance of a regular local television station which would originate television programs.

Sen. Moss' revised bill amends proposed legislation introduced by the Utah legislator last month (BROADCASTING, May 11).

Unequal Status • In remarks to be made on the introduction of the revised bill, Sen. Moss will state that he has become convinced of the "inherent unfairness in having comprehensive and exacting Governmental regulation of television stations by the Commission while community antenna television systems are left totally free of regulation and are not required to adhere to any Federal standard of public responsibility."

Sen. Moss' original bill encompassed the recommendations suggested by the FCC in its report on this subject last April (BROADCASTING, April 20). In this report, the Commission refused to assert jurisdiction over community antenna systems, but recommended that Congress pass legislation which would require an antenna system to (1) receive permission from the station whose signals it picks up and distributes to subscribers and (2) to carry the local station on its wire lines if so requested.

Other recommendations of the FCC, also included in Sen. Moss' bill, would amend certain sections of the Communications Act to permit the operation of boosters without the need for having an operator in attendance and to allow existing booster stations to continue operating even though built before being granted an FCC permit.

High on the Agenda • Legislative problems of the community antenna business will be the major topic at the Philadelphia convention of the National Community Television Assn. this week. More than 500 registrations have already been made for this event, it was reported.

Hearings on the CATV and booster legislation will be held before Sen. John Pastore (D-R.I.), chairman of the Senate Commerce Committee's subcommittee on communications. The hearings, scheduled to begin June 30, will be on four bills—three introduced by Sen. Warren G. Magnuson (D-Wash.), chairman of the parent committee, at the request of the FCC, and the other by Sen. Moss.

The tentative schedule calls for consideration of the booster legislation June 30 and July 1, with the community antenna problem due to be considered July 7-9.

Tax protection bill for interstate trade

An Ohio congressman last week introduced a bill to prohibit states from taxing income derived exclusively from interstate commerce. The move is aimed at reversing a U.S. Supreme Court decision last February which held that a state has the right to collect taxes on that portion of a company's income made from sales in the state (BROADCASTING, March 2).

Rep. William M. McCulloch introduced the bill (HR 7757). It would amend Title 4 of the U.S. Code to exempt from taxation by a state or subdivision of a state income derived exclusively from interstate commerce when the only activity within the state is sales solicitation and where no office or warehouse or place of business is maintained.

The bill was referred to the House Judiciary Committee.

The Supreme Court's tax decision related to taxes imposed on out-of-state

Buildings... Color... and NATIONAL STEEL

It can come today or tomorrow—that time when you need a new building for your store, manufacturing plant, warehouse or farm.

You want your building to be low cost yet handsome. Quickly erected yet solidly built. Efficient. Easily maintained. Long lived. For all of these, select a fine building from the broad line that has established National Steel, through its Stran-Steel division, as a leader in the development of steel buildings.

And now, color . . . a National Steel first! Today, through its Stran-Steel division, National Steel is offering a major new building development—beautiful factory-applied color coating in lustrous Stran-Satin blue, rose, green, bronze, white, gray or any combination. Yes, lasting beauty and extra weather protection at a cost usually less than 1 per cent of building cost. (*For literature, write Stran-Steel Corporation, Detroit 29, Michigan.*)

Pre-engineered buildings in factory-applied colors are typical of the many continuing advances that National Steel brings to American industry through its six major divisions: Great Lakes Steel Corporation, Weirton Steel Company, Enamelstrip Corporation, The Hanna Furnace Corporation, National Steel Products Company and, of course, Stran-Steel Corporation.

NATIONAL STEEL CORPORATION, GRANT BUILDING, PITTSBURGH, PA.

companies by Minnesota and Georgia. In upholding these taxes, the Court in a 6-3 vote held that income derived from a state was taxable by the state—whether or not the company involved maintained an office or warehouse or other place of business there. The implications to broadcasters, whose programs cover many states, is obvious.

Rep. McCulloch, ranking Republican on the Judiciary committee, expressed fear that the decision could lead to a race by the states to impose "onerous" tax laws "which would unduly hamper interstate business activity."

Commerce ad group readies D.C. meeting

First meeting of the newly organized Advertising Committee of the Dept. of Commerce will take place in Washington next Monday (June 29).

The committee, which will devote special attention to development and problems in the field of advertising, was established as a segment in the National Distribution Council, an advisory group to the Secretary of Commerce. The Distribution Council will meet the following day, June 30.

Picked as chairman of the Advertising Committee was Frederick R. Gamble, president of the American Assn. of Advertising Agencies. Others are: William K. Beard, Associated Business Publications; Paul B. West, Assn. of National Advertisers; Robert E. Harper, National Business Publications Inc.; John C. Freeman, National Industrial Advertisers Assn. These are already members of the council.

Also Charles W. Collier, Advertising Assn. of the West; C. James Proud, Advertising Federation of America; E.C. Nash, Agricultural Publishers Assn.; Cranston Williams, American Newspaper Publishers Assn.; Robert F. Delay, Direct Mail Advertising Assn.; Robert E. Kenyon Jr., Magazine Publishers Assn.; Harold E. Fellows, NAB; Harold B. Mers, National Assn. of Transportation Advertising; Edgar S. Bayol, National Editorial Assn., and Karl L. Ghaster Jr., Outdoor Advertising Assn.

Sackett sale protest hit by KEWB reply

Terming the protest a "private vendetta," the Tribune Building Co. and KFWB Broadcasting Corp. (KEWB Oakland, Calif.) filed an opposition to the protest by Sheldon Sackett against the sale of what was formerly KLX Oakland, Calif. (BROADCASTING, June 15).

KLX was sold by the Knowland family (*Oakland Tribune*) to Crowell-Collier Pub. Co. for $750,000 last month.

Mr. Sackett, owner of KOOS Coos Bay, Ore., and a string of daily and weekly newspapers in the Northwest, charged that the Knowland family fraudulently obtained control of KLX in 1933.

In its opposition, the Tribune Building Co. and KEWB tagged Mr. Sackett's pleadings as frivolous and irrelevant; claimed that Mr. Sackett lacked standing to protest the sale and that some of the charges were "ethereal." It asked the Commission to dismiss the complaint.

Mr. Sackett sold his own KROW Oakland (now KABL) to the McLendon Corp. for $800,000 earlier this year (BROADCASTING, May 4).

TV'S BILLION DOLLAR YEAR

FCC officially confirms 1958 record, puts radio at $519.5 million last year

Television's total broadcast revenues in 1958 for the first time went over $1 billion, the FCC reported last week. The Commission released 1958 financial figures for both radio and tv, based on a first tabulation of financial reports from radio and tv networks and stations.

Only the overall total figures for both services were given. Detailed am and tv broadcast financial data will be released in the near future, it was stated.

The exact figure for tv's 1958 total revenues was $1.03 billion up 9.2% over 1957's $943.2 million. Tv's total expenses for 1958 reached $858.1 million, up 9.6% over 1957's $783.2 million leaving tv's 1958 broadcast income before federal taxes at $171.9 million, up 7.4% over 1957's $160 million.

Radio's total revenues for 1958 reached $519.5 million, an increase of 0.7% over 1957; expenses were $481.4 million, up 4.4%, resulting in income before federal taxes of $38.1 million—a decline of 30.9% from the 1957 figure.

Details of the 1958 financial year are given below:

Comparative Financial Data of Am and Tv Networks and Stations 1957-1958 ($ Millions)

	1958 Amount Am	Percent of Increase (Decrease)	1958 Amount Tv	Percent of Increase (Decrease)
NUMBER OF NETWORKS REPORTING	7[1]		3	
NUMBER OF STATIONS REPORTING	3,178[2]		514[3]	
REVENUES FROM THE SALE OF TIME:				
NETWORK TIME SALES	$46.5	(8.1)*	$424.6	7.7
NATIONAL AND REGIONAL TIME SALES	172.0	1.5	345.2	14.9*
LOCAL TIME SALES	320.2	1.1*	181.1	4.1*
TOTAL TIME SALES	$538.7	0.3	$950.9	9.5
TOTAL BROADCAST REVENUES	$519.5	0.7	$1,030.0	9.2
TOTAL BROADCAST EXPENSES	$481.4	4.4	$858.1	9.6
BROADCAST INCOME (BEFORE FEDERAL INCOME TAX)	$38.1	(30.9)	$171.9	7.4

[1] Includes 3 regional networks.
[2] 3,097 stations reported in 1957.
[3] 501 stations reported in 1957.

* Revised to reflect reporting errors for 1957 detected too late to be included in the 1957 reports. 1957 tv national and regional time sales are revised from $296.4 to $300.5 million and local time sales from $178.1 to $174.0 million. 1957 am network time sales are revised from $51.7 to $50.6 million and local time sales from $316.5 to $316.8 million.

NOTE: Excludes independently operated fm stations and data for 108 am stations and 9 tv stations whose reports were not available or in proper form for tabulation as of this date. 2 of these 108 am stations and 8 of these tv stations were in operation less than the full calendar year 1958.

NAB asks legislation on secondary boycotts

NAB last week urged Congress to amend the Taft-Hartley Act to prohibit unions from threatening or inducing a customer boycott of a sponsor's product advertised on a broadcasting station involved in a labor dispute.

Relief from secondary boycotts is "the most important aspect of labor legislation for broadcasters," NAB said in a statement filed with the House Education & Labor Committee. "The secondary sponsor boycott, or the threat of

TASO in print

The complete 731-page printed report of the Television Allocations Study Organization has been received by the FCC and is now available to the general public, according to an announcement by Dr. George Town, executive director of the study organization. The report is available at $10 per copy. It includes a 30-page summary and verbatim reports of all panels and committees. Copies may be secured from Dr. Town at 104 Marston Hall, Iowa State U., Ames, Iowa.

it, has been used in almost every station strike that has taken place in the broadcasting industry during the past 10 years," NAB said.

Two bills currently pending before Congress accomplish the desired end, the trade association said. These measures are S 76, introduced by Sen. Carl Curtis (R-Neb.), and HR 5545, introduced by Rep. John A. Lafore Jr. (R-Pa.). The NAB statement was drafted by Charles H. Tower, manager of broadcast personnel and economics.

Tv agency executives to testify on networks

The second round in the FCC's investigation of television network program practices will start July 7 in New York with top level executives of advertising agencies on the witness stand.

Among agencies asked to have men on hand are major users of prime television network time. They include J. Walter Thompson, McCann-Erickson, BBDO, Benton & Bowles, Ted Bates, Young & Rubicam. Each have been visited in recent weeks by network study staff members of the FCC.

The object of the hearings, it is understood, is to discuss the function of the advertising agencies as it relates to policies and practices in the selection and production of programs and the continuance of schedules on network television.

The program investigation—part of the Commission's investigation of tv network practices—opened last month with representatives of the three tv networks identifying a mass of exhibits (BROADCASTING, May 11). The hearings are being conducted by Chief Hearing Examiner James D. Cunningham. Broadcast Bureau attorneys Ashbrook P. Bryant and James F. Tierney represent the Commission.

The resumed programming hearings will be held in the U.S. Courthouse, Foley Square, New York.

CRITIQUE ON FCC'S FUNCTIONS

Panel from government, private industry sounds off to House Oversight committee

The House Legislative Oversight Subcommittee attempted to find out in a few short hours last week what is wrong—and right—with the FCC but found itself bogged down with loquacious federal officials, lawyers and broadcasters.

An all-day panel had been scheduled to discuss four specific Commission problems last Tuesday (June 16). The panel actually talked for approximately 1½ hours Tuesday and 2½ hours Wednesday, with three-fourths of the time spent on one topic—what to do about industry-FCC ex parte contacts.

FCC Chairman John C. Doerfer opened the panel with a strong defense of commissioner-industry off-the-record talks in general policy and rulemaking matters. To prohibit talks with broadcasters and lawyers on such matters "would change the very purpose for which the administrative agencies were founded," he pleaded.

Almost to a man, the 15 other members of the panel agreed essentially with Comr. Doerfer, although some of the congressmen and one panelist, Louis Jaffe of Harvard U., had some sharp questions on the activities in the St. Louis-Springfield, Ill., ch. 2 deintermixture case. The commissioner said he could not discuss the matter as it had been returned to the FCC by the courts. He expressed "distinct shock" at the court's ruling in the case, however.

Panelists in Agreement • While the panelists agreed in essence with Comr. Doerfer, there was considerable concern over the "grey area" surrounding ex parte contacts. There was far from unanimity as to just when proper talks would become improper. Washington attorney Donald Beelar said that clarifying legislation is needed as the problem is "important and urgent." He said FCC personnel have become so "chilled" that they are afraid to talk to anybody about anything.

William Koplovitz maintained that in rulemaking where someone stands to acquire a tv channel, all talks should be on the record. "I don't know of anybody in the industry who holds a contrary view," CBS Washington Vice President Joe Ream replied. He maintained rulemaking proceedings should not be encumbered with court room procedures.

A large majority of the panelists agreed that congressional legislation is needed to guide both the industry and the FCC but Robert Swezey, WDSU-AM-TV New Orleans, said bills that have been introduced do not accomplish the desired purpose. They also said the FCC should be required, at the beginning of a proceeding, to state for the record whether or not informal talks would be in order. This was especially espoused by Washington attorney Ralph L. Walker, who posed several unanswerable questions as to when ex parte talks become improper in given instances.

Rep. Oren Harris (D-Ark.), chairman of the subcommittee, complained that the Commission has not helped much in suggesting ways of eliminating backdoor pressures and attempts to influence. He noted both the FCC and the industry had been asked for help in drafting legislation without much success.

Examiner Rulings Final • Chief Hearing Examiner James Cunningham discussed the role of hearing examiners, giving their strengths and weaknesses. He maintained the "system does not provide them with the dignity and stature commensurate with the importance of their work." Also, he said, rulings of hearing examiners should be final and above review by the Commission unless findings of fact are not supported by substantial evidence. The panelists were given very little opportunity to comment on Mr. Cunningham's statement, as well as the final two delivered by FCC General Counsel John FitzGerald and Broadcast Bureau Chief Harold Cowgill. Washington attorney Frank Fletcher asked for permission to file a statement on Mr. Cunningham's comments while Mr. Beelar said examiners are one of the "brighter spots" in administrative procedures.

Mr. Cowgill gave a paper on the Commission's administrative processes, of which, he said, "I don't think this topic is too fruitful for discussion." He said one problem in the FCC's never ending fight to catch up with its work load is the strict administrative separation of the commissioners and staff on adjudicatory matters. It was pointed out that legislation has been introduced rectifying the situation and Senate hearings were held two weeks ago (BROADCASTING, June 15).

Mr. FitzGerald, in discussing the efficiency of the FCC, also hit the rigid separation of function.

On Tuesday and Wednesday of this week (June 23, 24), a general round-up discussion of all four problems as they

affect the six major regulatory agencies will be held. Among participants will be Leonard Marks, president of the Federal Communications Bar Assn., Vincent T. Wasilewski, NAB manager of government relations; FCC Hearing Examiner J. D. Bond and representatives of federal and state bar associations.

An FTC panel will appear before the subcommittee Friday (June 26) to discuss the same four topics which faced the FCC body.

Two Honolulu outlets ask third's revocation

Two Honolulu radio stations last week petitioned the FCC to revoke the license of a third Honolulu outlet. Charges were leveled against KPOI (formerly KHON) by KPOA and KULA and involved veteran broadcaster John D. Keating.

The KPOA-KULA petition alleged multiple violations of FCC rules and policy by KPOI. The petition raised the question of whether or not KPOI has "really been sold," as the official record indicated, and if so whether Commission policy has not been circumvented by possible overlapping of radio interests through Mr. Keating.

KPOI equipment and building were sold at foreclosure last summer by H.G. Wells Jr. and associates to George T. Davis, but this was not reported at once to the FCC, according to KPOA-KULU. Also, the petition noted, the Commission's request for a KPOI balance sheet was ignored. The FCC this spring approved the sale of KPOI for $125,000 to Jock Fernhead, WINS New York manager (BROADCASTING, April 13). KPOA-KULA declared that Mr. Davis had merely been acting as a "trustee" for Mr. Keating, whom, the complaining stations said, is 25% owner of WINS. According to the KPOA-KULA petition, it is Mr. Keating's further ownership of 25% of KONA (TV) Honolulu which raises the issue of the joining of "two standard broadcast stations in a common market." KONA is 50% owned by the *Honolulu Advertiser*, owner of KGU Honolulu.

KPOA is part of the Founders' Corp. Stations, principally owned by John M. Shaheen. KULA is owned by the Burnett Broadcasting Co.

• Government notes

• A San Francisco federal court last week upheld a 1956 Federal Trade Commission ruling that Carter's Little Liver Pills would have to drop the liver from its name. The FTC had said that the 70-year-old remedy had nothing to do with the liver and the U.S. Court of Appeals in San Francisco upheld this contention. Carter's had asked the court to reverse the FTC's finding. Neither the court nor the FTC banned the company from advertising the cathartic properties of what now will be known as Carter's Little Pills.

• Broadcasting witnesses, including NAB, Assn. of Maximum Service Telecasters, Fm Broadcasters and educational radio-tv groups, are expected to be called later this week to testify in the FCC's month-old 25-890 mc spectrum study (AT DEADLINE, June 8.) Among non-broadcasting witnesses appearing last week were representatives of the State of California, who called for a reservation of the vhf tv band for mobile services.

• KSOO-TV Sioux Falls, S.D. has been designated by the FCC for hearings on its applications for additional time to construct and to modify its construction permit as to power, antenna and transmitter. The Commission made KELO-AM-TV Sioux Falls, which petitioned for the modification hearing, a party to the proceeding. The FCC noted that "to date no construction has been commenced" on KSOO-TV, that issues in the ch. 13 applications involve the station's president and majority owner Morton H. Henkin and include alleged unauthorized relinquishment of control of the station, possible trafficking and financial qualifications to build.

• By a 4-3 vote, the FCC has granted a waiver of its rules to ch. 13 WLOS-TV Asheville, N.C., to enable that outlet to identify itself as a Greenville and Spartanburg (both South Carolina) station as well. Comrs. Robert Bartley, Robert Lee and Frederick Ford dissented. The Commission was unanimous in another case where it granted the application of ch. 6 WITI-TV Whitefish Bay, Wis., to move its main studio location from 6.7 miles north of Whitefish Bay to a site in Milwaukee.

• Another station has had its licenses renewed by the FCC with a warning, prompted by the "Kohler hearings" kinescope controversy, that there must be full identification of the source or sponsor in the use of donated tv film. WISN-AM-TV Milwaukee, Wis., was the outlet to have its licenses renewed with this reminder. The Kohler incident involved some two dozen tv stations which carried films of hearings before a Senate investigating committee without identifying the source of the films as the National Assn. of Manufacturers (BROADCASTING, Dec. 1, 1958).

Top Sherwood prize goes to 'Playhouse 90'

The first prize of $5,000 in the fourth annual Robert E. Sherwood Television Awards competition was presented last week to "Made in Japan," a *Playhouse 90* drama presented over CBS-TV.

The awards, totaling $14,000 to seven programs, were made last week during a luncheon ceremony at the Hotel Plaza in New York by Mrs. Eleanor Roosevelt, representing the Sherwood award jurors. The awards were established in 1955 by the Fund for the Republic in honor of the late Pulitzer Prize playwright and singled out tv presentations which "deal most dramatically and effectively with the subjects of freedom and justice."

MR. BRODKIN ACCEPTS
As Mrs. Eleanor Roosevelt awards

The winning programs, which were telecast between Oct. 1, 1958 and May 31, 1959, are:

"Made in Japan" over CBS-TV ($5,000), produced by Herbert Bradkin, written by Joseph Stefano and directed by Herbert Hirschman; "Twenty Cent Tip" over NBC-TV's *Loretta Young Show* ($2,500), produced by John London, written by Pauline Stone and directed by Jeffrey Hayden; "Report from Alabama" over NBC-TV ($2,000), produced by Julian Goodman, directed by Charles Jones and written by Frank McGee; "The American Stranger" over NBC-TV ($2,000), produced by Reuven Frank, directed by George Murray and reported by Robert McCormick; *Small World* series over CBS-TV ($1,000), produced by Edward R. Murrow and Fred Friendly; *Bishop Pike* series over ABC-TV ($1,000), produced by Wiley Hance and directed by Bob Robb; "Meet Mr. Lincoln" ($500) over NBC-TV, produced and directed by Donald B. Hyatt and written by Richard Hanser.

The cash awards were shared by the producer, director and writer of the winning programs, except for the *Small World* and *Bishop Pike* series, which were given cash prizes to be divided at the discretion of Mr. Murrow and Bishop Pike. Bronze plaques also were presented to the various networks.

KFWB, AFTRA sign

Disagreement between the American Federation of Television & Radio Artists and KFWB Los Angeles has been amicably settled, Claude McCue, executive secretary of the Los Angeles chapter of AFTRA, reported last week. KFWB now has a new two-year contract with AFTRA, calling for a flat $15-a-week increase for staff announcers for the two-year period. Other exceptions to the general pattern for non-network Los Angeles area stations of a $10-a-week raise the first year and $5 the second (BROADCASTING, June 15) are KDAY Santa Monica, which is giving its staff announcers a flat $27.50 increase for the two years and KPOL Los Angeles, where the flat increase is $29.50. Staffers at KMPC Los Angeles receive increases of $13.75 the first year and an additional $2 the second. The only station which has not signed a new AFTRA contract is KIEV Glendale.

The problem of newscasters who write as well as broadcast the news is being handled on an individual basis, Mr. McCue said. Their extra compensation varies from $15 to $23 a week.

CBS Radio comedians

Next Monday (June 29) CBS Radio will inaugurate an hour of nighttime comedy shows starring Andy Griffith, George Burns and Gracie Allen, Bob and Ray, and with *Amos 'n' Andy* retaining its present time period. The comedy hour will be heard from 7 to 8 p.m., Mondays through Fridays. The schedule also permits two 5-minute periods within the hour for *Business News* (7-7:05 p.m.) and *News Analysis* (7:30-7:35 p.m.).

"This new program sequence . . . represents a significant turn in the nighttime programming concepts of recent years," said Howard G. Barns, vice president in charge of network programs, in announcing the new acquisitions for CBS.

IBM to tally '60 vote for CBS

CBS News will team up with International Business Machines Corp., New York, to facilitate the network's coverage of the 1960 Presidential election year, it was announced last week by Sig Mickelson, vice president of CBS Inc. and general manager of CBS News.

A CBS spokesman said that the network and IBM now are studying the various ways that IBM can provide "maximum speed and efficiency" for CBS News' coverage, including, if practicable, the resources of IBM in various parts of the country. CBS News, he said, will have access to the full data-processing facilities and technology of IBM. CBS News' coverage in 1960 will include the various state primaries, the Presidential nominating conventions, the election campaigns and the Presidential election.

In the past, CBS had joined forces with Remington-Univac and NBC had been allied with IBM in election coverage. There was speculation that NBC would team up with Univac in 1960 but NBC officials said they had not made any decision, saying that RCA equipment also is under consideration.

History award contest

Broadcast Music Inc. and American Assn. for State & Local History are co-sponsoring competition under which an award of $500 will be presented to the radio or tv station which produces the best program dealing with state or local history during 1959. Additional grant of $500 will be made to the state or local history agency which cooperates in production of the winning broadcast. Entries should be sent to American Assn. for State & Local History, 816 State St., Madison 6, Wis., before Jan. 15, 1960.

Liberty Bowl on NBC

NBC has signed a five-year contract for radio-tv coverage rights for the Liberty Bowl Game, a new post-season football event to be held each December in Philadelphia's Municipal Stadium. The announcement was made June 16 by Tom S. Gallery, NBC sports director, and George J. Kerrigan Jr., cofounder of the game, at a luncheon meeting of charter members of the Liberty Bowl Assn. in Philadelphia. The NCAA-sanctioned game, featuring the number one team in the East as host team, will be the first major college football bowl game to be played in the East. The first game will be Dec. 19, 1959.

COLORCASTING

Here are the next 10 days of network color shows (all times are EDT).

NBC-TV

June 22-26, June 29-July 1 (4-4:30 p.m.) **Truth or Consequences**, participating sponsors.

June 22, 29 (10-10:30 p.m.) **Arthur Murray Party**, P. Lorillard through Lennen & Newell and Pharmaceuticals Inc. through Parkson Adv.

June 23, 30 (8:30-9 p.m.) **Jimmie Rodgers Show**, Liggett & Myers through McCann-Erickson.

June 24, July 1 (8:30-9 p.m.) **Price Is Right**, Speidel through Norman, Craig & Kummel and Lever through J. Walter Thompson.

June 24, July 1 (9-9:30 p.m.) **Kraft Music Hall Presents Dave King**, Kraft through J. Walter Thompson.

June 25 (9:30-10 p.m.) **Ford Show**, Ford through J. Walter Thompson.

June 25 (10:30-11 p.m.) **Masquerade Party**, P. Lorillard through Lennen & Newell.

June 26 (7:30-8 p.m.) **Northwest Passage**, sustaining.

June 27 (10-10:30 a.m.) **Howdy Doody**, Continental Baking through Ted Bates.

June 27 (10:30-11 a.m.) **Ruff and Reddy Show**, Bordens through Benton & Bowles and Mars through Knox-Reeves.

June 27 (8-9 p.m.) **Perry Presents**, RCA Whirlpool through Kenyon & Eckhardt and American Dairy through Campbell-Mithun.

June 28 (7-7:30 p.m.) **Midwestern Hayride**, local, co-operative sponsorship.

June 28 (9-10 p.m.) **Chevy Show**, Chevrolet through Campbell-Ewald.

Pennsylvania AP men saluted for newscasts

The Pennsylvania AP Broadcasters Assn. has announced winners of its annual newscasting awards. The entries, submitted on tape, film or brochure, were judged by a board of Virginia AP Broadcasters.

Results in the **"Under 5,000 w division"**:

- **Outstanding News Operation:** 1st, WKAP Allentown; 2nd, WLAN Lancaster; 3rd, WHLM Bloomsburg. The judges also awarded WEJL Scranton and WEST Easton.
- **Outstanding Reporting:** 1st, WHOL Allentown; 2nd, WEJL; 3rd, WNAR Norristown.
- **Outstanding Coverage of a special event:** 1st, WACB Kittanning; 2nd, WHLM; 3rd, WAZL Hazleton. The board also awarded WAKU Latrobe, WKAP, and WEJL.
- **Outstanding Sports Reporting:** 1st, WHLM; 2nd, WEJL; 3rd, WEST.
- **Outstanding Commentary:** WLYC Williamsport and WKAP.
- **Outstanding Farm News:** WHLM and WEJL.

The board also gave awards to WEJL for a freedom of information entry and to WHLM for a women's news entry.

Judges announced an entry from WPEN Philadelphia, in the "5,000 w and over" division, was rated "excellent" and WPEN accordingly was awarded certificates for outstanding work in the fields of editorial-commentary, freedom of information and reporting.

In television, the judges announced certificates for outstanding news operation to WDAU Scranton, and WIIC Pittsburgh.

Both stations also were awarded certificates for outstanding reporting.

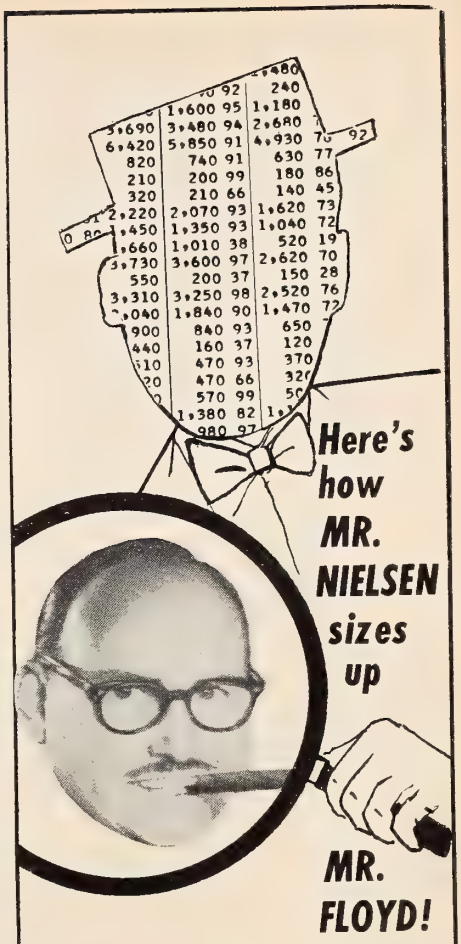
WIIC also was given an award for outstanding coverage of a special event and another for outstanding commentary.

The judges gave additional certificates to WDAU for outstanding sports reporting and for an entry on freedom of information.

Resist pressures— Cowan in Chicago

Several major "special interest" groups demand and expect television broadcasters to live up to their own particular expectations within the industry. But in the end, the broadcaster "must take and keep the responsibility for the final determination of the best possible programs in the best possible sequence and with the best possible range, variety and choice."

So said Louis G. Cowan, president of CBS-TV, in an address at the U. of Chicago Alumni Communications dinner June 13. He was featured speaker on a program that included talks by Alec Sutherland, head of educational broadcasting for the university and John Gunther, author-commentator, who received its "Communicator of the Year" award.



Mr. Cowan pointed out several of the problems facing broadcasters from various pressure groups and observed that "the character of opinion depends on the last person or representative of a group you spoke to." Among "parties at interest," he cited "every household in the nation and every member of each household," the government, political parties, producers of goods and services and their advertising agencies, educators, and creators and producers as well as talent in tv.

Tv critics, civic and community associations and government agencies and committees all have great expectations in terms of tv, Mr. Cowan observed. In the case of the FCC, "it goes beyond expectation and assumes the form of explicit injunctions, which, if disregarded, may deprive the broadcaster of his franchise to use the airwaves. All of these expectations add up to 'quite a conglomeration'," he said.

The network broadcaster ought not to keep his ear constantly to the ground of public and private whims, lest he display a "posture [that] leaves one terribly and transparently exposed," Mr. Cowan cautioned. And inasmuch as the broadcaster must program for 170 million people 17 hours a day, he is likely to make some mistakes in terms of content and quality.

"If it is true that in a democracy the public is king, the television broadcaster today is the court juggler," Mr. Cowan observed. ". . . Whenever he drops one [a tenpin] and he often does, he can be sure that someone out there in the audience has a tomato in his hand."

Mr. Sutherland felt that while instructional tv may have proved successful, there is room for skepticism about its actual usefulness thus far. He commended commercial broadcasters for their contributions to educational radio and tv through the years.

Warner Bros. tv films at $30 million level

Warner Bros.' tv film production, which has increased 800% in the past three years, is now expanded to a 1959 program representing an income of over $30 million and providing eight hours a week of tv entertainment, Jack L. Warner, studio president, said Thursday (June 18) at the company's international sales convention at the Hotel Ambassador in Los Angeles.

The new tv program schedule comprises 10 series, all to be broadcast on ABC-TV, Mr. Warner reported. Included are four new programs, all of one-hour length: *The Alaskans,* scheduled for Sunday 9:30-10:30 p.m.; *Hawaiian Eye,* Wednesday 9-10 p.m.; *Bourbon Street Beat* and *Bronco,* for which no broadcast times were given.

Warner Bros. programs which will continue on ABC-TV are: *Cheyenne,* Monday 7:30-8:30 p.m.; *Maverick,* Sunday 7:30-8:30 p.m.; *77 Sunset Strip,* Friday 9-10 p.m.; *Lawman,* Sunday 8:30-9 p.m.; *Sugarfoot,* Tuesday, 7:30-8:30 p.m.; *Colt .45,* time to be set.

Tracing the growth of tv activities of Warner Bros. from its start three years ago with one one-hour program on the network, Mr. Warner commented that today's schedule of "putting eight hours of film on a network each week is equivalent to producing a full-length motion picture each working day. With all of its present magnitude, however, ours remains a growth program. We are confident there is a growing market for top grade film entertainment that will expand with the growth of our national economy."

Musicians battle over Bolshoi tv job

The feud between the American Federation of Musicians and Musicians Guild of America took on an international aspect Wednesday (June 17) when the Bolshoi Ballet was named as one of 10 defendants in unfair labor practice charges filed by MGA with the NLRB office in Los Angeles.

Papers filed by Carlton Sand, executive assistant to MGA President Cecil Read, charge that 10 of the musicians who played in the orchestra for the Bolshoi Ballet performances at Los Angeles Shrine Auditorium were omitted from the orchestra which performed when the ballet was recorded on tv tape "in favor of others whose political and union activities were more satisfactory to AFM and Local 47 [AFM's Hollywood Local]."

Defendants in addition to the ballet, include Sol Hurok, impresario who brought the troupe to America; Skiatron of America Inc. and its tv tape subsidiary, Television Industries; Mills Tv Assoc. of New York and Hilliard Elkins Inc., program organizations in charge of producing the taped ballet programs; Al Lapin and George Kast, music contractors who are members of AFM Local 47; George Koukly, New York musician who served as liaison man for the ballet; AFM and Local 47.

AP's Kramp urges more stress in news

An "aristocracy" of broadcasting newsmen, who strive for factual and well-modulated newscasts, was advocated a fortnight ago at the Pennsylvania AP Broadcasters Assn. meeting in Pittsburgh by AP General Executive Louis J. Kramp.

Mr. Kramp urged radio-tv newsmen to help sponsor an awareness of the responsibilities of their position, to be more quality-conscious about their work. He asked station owners and managers to learn more about news practices and principles. A station's character depends on top quality news, he said. (For election of new officers at the meeting, see FANFARE, page 131.)

• Program notes

• California National Productions, N.Y., with two weeks to go before its 1959 half-year end, last week announced a 26.3% gain in contracted sales over January-June 1958. So far in 1959, CNP has invested $6.5 million in new product, while 1958's total investment was more than $8 million. CNP expects this year to add 12,000 more half-hours of programming across the nation to the 1958 total of 50,000 half-hours, according to Earl Rettig, CNP president.

• WPIX (TV) New York has placed in national syndication its third documentary, *The Secret Life of Adolf Hitler* (BROADCASTING, May 18). The hour-long program traces the ascendancy of Hitler from the early twenties to 1945.

• *The Narcotics Story,* the history of a drug addict, is available gratis from Lee Bartell, KCBQ San Diego, Calif.

• National Telefilm Assoc., N.Y., sold its *Tv Hour of Stars* to 20 additional stations during the past month, according to Harold Goldman, president of NTA International Inc. A total of 60 tv markets now carry the 90-episode series, he reported.

Special report

WHAT'S REALLY HAPPENING IN NEW ENGLAND

Don't believe the area's bad publicity; the area is making a game—and winning—fight

FOR the past decade or longer New England has been stereotyped as, at best, an inert island in an otherwise booming U.S. or, at worst, a region suffering slow, inexorable decay.

As with most stereotypes, this one is exaggerated. New England is neither vegetating nor decaying. While nobody outside was looking, old New England has been turning modern. It has been lifting its face and strengthening its muscles. The deserted mill is no longer the landmark of the region. A more accurate symbol is the modern factory built of aluminum and glass and set in a landscaped park just off a six-lane highway.

New England isn't what it used to be. It is better, much better; so much better that it is now one of the nation's liveliest markets for merchandise—even though a lot of people with merchandise to sell don't know it.

The rebuilding of New England has to be seen first-hand to be appreciated.

View of Recovery • A 2,500-mile tour covering over 90% of the New England population provides a dramatic picture of the way Yankeeland is recovering from its depression, tooling up for the space age and remaking its physical structure. A 65-mile drive

New England has only:

2.0% **of the nation's land area**
5.8% **of its people**

But it produces:

6.6% **of the nation's personal income**
6.7% **of its wages and salaries**
6.5% **of its retail trade**
10.0% **of its total manufacturing**
37.0% **of its jewelry**
37.0% **of its footwear**
25.0% **of its cut stone**
14.0% **of its potato crop**
12.0% **of its aircraft parts and products**
85.0% **of its sterling silverware**
56.0% **of its newsprint**
16.0% **of its pulp-paper**
80.0% **of its sporting firearms, ammunition**
12.0% **of its electronics**
80.0% **of its packaged frozen seafood**
33.0% **of its fabricated plastics**

And it possesses:

6.7% **of the nation's telephones**
13.0% **of its commercial laboratories**
20.0% **of its life insurance assets**
27.0% **of its machine tools**
13.0% **of its colleges and universities**

along Boston's circumferential Route 128 unveils a panorama of a hundred big electronic, scientific and precision instrument plants. A decade ago this area was farm land and forest.

Here are a few mid-summer 1959 readings on New England's business pulse:

• High income, well above the national average.

• High savings, ditto.

• Jobs in both manufacturing and non-manufacturing on the increase.

• Above-national-average household equipment.

• High retail spending.

New England has become a center for advanced technology. Last spring it was divulged that a New England radar rig had delivered electronic energy all the way to the planet Venus and back. Nose cones for missiles, pocket-size tv transmitters, yards-long computers, gadgets that play tricks with atoms—all the intricate gear of the space age is being conceived and produced in New England. The region is now the most concentrated center of research and scientific industry in the U.S.

All this in an area that has had the highest ups and lowest downs of any major geographic segment of the country. New England has survived its downs, including the loss of 300,000 textile jobs in the past 25 years. It has learned to survive better than many other regions of the nation. The 1957-58 recession didn't hit New England as hard as it hit a good many other places in the U.S.

A Poor Image • Unluckily, New Englanders haven't been able to sell their story of progress. Their investment in the future gets scant attention outside their boundaries. Their products aren't properly promoted, even in their own backyard. Maine grows excellent potatoes, but the Somerset Hotel, Boston's social shrine, serves Idaho Russets in its dining rooms—and emphasizes their Idaho origin on its menus.

Outsiders hear the bad things about New England, but get little word about the good. They notice the loss of 57,000 New England factory jobs in the past decade, but seldom mention the 310,000 increase in total employment that took place during the same 10 years as service industries expanded. The valiant struggles of local and state development groups to replace lost employment are mostly ignored.

No other region has been so minutely scrutinized and so flagrantly misrepresented by media analysts.

"Their stories and pictures provoked a widespread pessimistic belief . . . that the region's manufacturing sun had crossed the zenith and was well on the wane," the Boston Federal Reserve Bank recently stated. "Their preoccupation with the decline of textiles obscured their view of the growth of other industries and the final supremacy of New England metal-working.

"Especially significant are the newer research-based industries which put the electron to work."

The story of modern New England can't be told by a two-day peek at Boston's scientific plants or a skimming of library stacks. New England is intricate and complex. It is split into three general sections:

• Southern Connecticut, an extension of the Manhattan dormitory in Westchester County, N.Y., in its own right a crowded blend of old and new industry.

• The Yankee factory, from New Haven north through Hartford-New Britain to Springfield and Worcester, Mass., east to Greater Boston and all the area east and south of this right-angled perimeter with a northward bulge.

• Old New England, New Hampshire, except the southern strip, Vermont, and Maine. This beautiful area combines rural and hill country economies and unlimited water supplies with some industry. It's one of the few areas left into which mechanized America can spread; the potential is enormous.

This is the country of Colonial heroism, tough conservatism, thrift and energy—once the solid backbone of old America. It now is at the northeastern top of this backbone, with mixture of old Yankee stubbornness and new blood from all over America and the world.

Pessimistic Reports • Yet the country's oldest region is also the least understood. A spring newscast on the NBC-TV network was based on "four dying towns." The four towns didn't act at all dead that morning of March 19, as NBC discovered a few minutes later at its Rockefeller Center headquarters. A few weeks later NBC-TV described an industrial miracle in four New England towns (page 76).

The June issue of *Esquire* described Boston as a place with "no future unless it gets great planning and greater luck." Just about every phase of modern Boston was misrepresented, according to those who know the city. The metropolis teems with planning and modernization (see Boston story, page 102).

Newsweek magazine recently had a textile-tragedy piece.

The New England Council and busy chambers of commerce are kept off balance by this parade of pathos. They promote diligently and do a constructive job of making New England attractive to new employers, but their voices don't reach out loud enough or far enough.

Last May 24 the *New York Times* surprised them by describing the way thousands of small industries are sprouting into big plants. The *Times* added, "If the Yankees have a shortcoming it is a reluctance to do much shouting about it. Consequently they often are sold short by outsiders. The record of the flight of textile mills has hung like an albatross around the necks of the Yankees for years."

Old and New • New England is combining old and conservative capital with a rising generation of younger management during the transition from soft goods to hard goods and scientific products. Its supply of skilled labor is

GOOD AND BAD ABOUT NEW ENGLAND

New England has its pros and cons. Unluckily its cons, or minus factors, are better known than the pros, or plus factors.

A matching of these plus and minus elements shows that much progress has been made since New Englanders set out to salvage the region from a textile-inspired collapse, but there's still trouble ahead.

Here is the plus and minus balance sheet of New England:

Rock-hard New England weathered the 1958 recession in good shape, suffering less than the U.S. as a whole.

Three good reasons for this show of resistance were cited by Robert T. Westermark, economist at New England Telephone and Telegraph Co.: Better balance of manufacturing industries, growth in one industry offsetting declines in another; volume of business in non-manufacturing fields continued to grow; New England's great research centers were working on extensive military assignments plus their growing volume of private engineering and industrial studies.

Here are economic strong points:

Plus • Factory employment steady for a decade at 1.5 million (see chart).

Plus • Retail sales have dropped only one year since 1947 (see chart).

Plus • Non-factory employment was 1.8 million in 1947; 2.2 million in 1959.

Plus • Total employment was 3.3 million in 1947; is 3.6 million in 1959.

Plus • Output per worker is increasing as textile and metal industries replace old equipment.

Plus • Local and state development groups attract new industry.

Plus • The region's schools train one of every seven scientists.

Plus • Developing industrial uses of atomic energy, especially motors.

Plus • There's lots of finance—insurance funds, Boston banking, college endowments, big family trusts and investment houses (eight of U.S. bank, insurance and investment trust assets).

Plus • New England has seven of first 100 U.S. banks.

Plus • Over 75,000 aircraft employes, led by United Aircraft.

Plus • There are more well-paid white-collar workers in new industries (textile plants had few executives and technical people).

Plus • There is one auto for every three persons (10 million population).

Plus • $30 billion life insurance is in force; 18 million policies.

Plus • Air defense facilities are all over the place, including SAGE (Semi-Automatic Ground Environment) and some not generally discussed.

Plus • There is 45% more cash in savings accounts than the U.S. average.

Plus • There is high ownership tv sets, radios, telephones and appliances.

Plus • Export-import trade means $2

Plus • There are 5,000 boats. New Englanders spend $200 million a year on boats.

Plus • Personal income up 4.5% in year.

---

aided by a growing scientific culture—the engineers, technical specialists and research people turned out by its universities.

The New England business trend is generally upward, "a pleasant contrast with the opening 1958 months," the Boston Federal Reserve Bank said in reviewing 1959 developments. It found "a tone of hopefulness and buoyancy."

Other findings by the reserve bank:

• The usual mid-winter employment decline was relatively mild.

• All six states have employment gains over a year ago.

• Jobs in ordnance industries (missiles) are up 50% in two years.

• Leather and shoes are strong; best first quarter since 1956.

• Chemical outlook favorable.

• Good pickup in electronic components, communications equipment.

• Textile machinery up, non-electrical machinery down.

• Pulp and paper well up over a year ago.

• Factory work weeks are longer.

• Drop of 17% in business failures; new incorporations up 39%.

• Opening of summer tourist season backed by record winter resort business.

• Department stores sales up 5% in first quarter.

• Even textile mills report improving business.

The bank summed it up this way:

"More people had jobs, worked more hours per week, received more income, spent more money and supported a larger volume of business."

And then it added:

"The overall gain in purchasing power has had a stimulating effect upon trade and business in general."

Building Program • New England's industrial, residential and municipal structure was old, some of it worn out, at the end of World War II. Many of its sprawling multi-storied mills were strung along rivers where water and power resources were available. Most of these mills are still there, some empty but others bustling with low-rental garment plants and scientific industries.

New housing developments are appearing outside central cities. Local communities are facing up to the commercial and traffic problems created by old, winding, narrow streets. New Haven, Worcester and many others are razing wide swaths in major rebuilding operations.

Newest symbol of progress is the super-highway. New England was among the first areas to sense the importance of fast motor traffic in economic development. The old Merrit Parkway, built before World War II, still feeds heavy flows of autos in and out of metropolitan New York.

Later came other Connecticut arteries, a Boston-Portland link, Portland to Augusta, Me., Boston's circular Route 128 and the cross-state Massachusetts Turnpike.

The most important single development in recent commercial history, many economists believe, is the 60-mph limited-access highway. Boston is now four hours drive from New York, less than nine from Washington. Short spurs reach out to a population of 20 million.

New business and residential settlements are developing at every access point. A warehouse suddenly appears at a turnoff; trucks drive in; a gas station, restaurant and small electronic components plant spring up at woods edge.

The Big Street • This is new America and new New England. Boston to New York is on the way to becoming a single metropolis of many separate governments but many common commercial interests. New York to Washington likewise.

The combined Boston-Washington stretch of 500 miles is known by economists under such names as Linear City and Big Street. Its development was predicted years ago by Dr. Christopher Tunnard, of Yale.

"When will Linear City be a single economic unit?" Dr. Tunnard was asked.

"In less than a quarter-century," he replied. "And later it will reach from Portland, Me., to Norfolk, Va."

New England's end-of-the-line locale, long one of its worst handicaps, may become one of its most precious possessions. The fast highways are bringing skiers in the winter, anglers in the spring, vacationers in the summer, land-

Plus • Shipbuilding is active.

Plus • Unemployment drop—256,000 collected benefits in 1957, 178,000 in 1958.

Plus • Construction contracts up 9% last year.

Plus • All-time record in department store sales last December (up 3%); suburban sales up 23%—both over December 1957.

Plus • There's a $1.2 billion tourist industry.

The New England survival story is a series of gutty struggles. The results are found everywhere—well, almost everywhere, but effects of the textile decline are still obvious.

Here are some of the obstacles that can effect New England's progress:

Minus • Taxes are high in several states.

Minus • There's much dependence on military business; a Pentagon decision can upset a large plant and its feeder plants.

Minus • Transportation costs are high; New England is at the end of the line.

Minus • Fossil fuels are expensive because of the long haul, but atomic power promises to be an equalizer.

Minus • Japanese textile imports are troublesome and getting more so.

Minus • Shoe imports, too, are rising.

Minus • Factory earnings are $1.79 an hour compared to $1.97 for the nation (early spring figure).

Minus • Much of the industrial plant is archaic and inefficient.

Minus • Many New England young men move away in search of executive opportunities.

Minus • New England's capital has financed some of its competition in other regions.

Minus • There's a shortage of mineral resources.

Minus • Welfare-state laws, public spending and business taxes create a business climate unfavorable to efforts to attract new industry. General Electric Co. and Raytheon Mfg. Corp., for example, constantly complain of this climate.

Minus • Massachusetts, Rhode Island and Connecticut are so heavily industrialized that some economists figure their growth potential is limited.

Minus • Massachusetts' state debt is described as the highest in the nation.

Minus • Other regions are expanding in the electronics field.

Minus • The center of population is moving westward.

Minus • The research and educational edge on the rest of the country isn't necessarily permanent. New England has no monopoly on brains.

Minus • The winters are tough.

Minus • A high percentage of the housing is old even though substantially built.

Minus • Tourist business is hurt by old, beat-up hotels at some of the beaches and by slow development of modern motel-hotel facilities. Some major cities have sad accommodations.

Minus • Vermont, New Hampshire and Maine (north of Augusta) have highway problems.

Minus • Municipal housekeeping is sloppy in some places, excellent in others. It's expensive to pretty-up old streets and buildings.

Minus • New England's advantages are under-promoted. There's still plenty of defeatism.

scape lookers and hunters during the colorful autumn.

Roads to Work • The highways are taking people closer to their work by the clock and farther from their work by the mile. With 60-mph roads, New Haven folk work in Bridgeport or the New York environs, or in New Britain or even Hartford. Hartford residents drive to Windsor Locks or Springfield, Mass. Springfield residents drive to Windsor Locks or all the way to Worcester.

Railroad Woes • As in other parts of the nation the railroads are slipping while highway networks speed up motor traffic. Rail upkeep has been cut to a minimum, and passenger car housekeeping is pathetic.

But New England needs the railroads. How else, for example, can General Electric ship its big transformers out of the Pittsfield, Mass., plant? Some require specially built flat cars, some two cars.

While old New England's man-made surface is being reshaped, there's no need to alter its geography. The hills, rivers, lakes, ponds and indented coastline combine commercial and recreational advantages.

There's little waste land in the six states. Some of the rocky acres gave colonial farmers a bad time, but modern agriculture and industry know what to do about them.

In Transition • New England is changing, swiftly and inexorably. Even staid Beacon Hill, crusty center of Boston's blue-blooded financiers, is turning modern. Its money is going into the newer industries—research, nucleonics, all the products of the late 1950s.

Legend says, though, that inside Beacon Hill's brick mansions there still remain a few descendants of stubborn Tories who peer out from behind window shades in hope they once more will see the Red Coats marching across the Common.

New England is changing—and for the better. Its people are hard-working. Their economic status is improving.

The fight back to economic affluence isn't over, but one thing is certain—New England isn't about to collapse.

Some day the canards about its purported miseries will be dispelled and the true story will be told—widely, vehemently and frequently.

That's one problem New England hasn't licked.

For marketers who want to reach New England customers with advertising, television and radio are ideal vehicles. There is exceptionally heavy tv and radio penetration in all six New England states.

In Connecticut, Massachusetts and Rhode Island a whopping 92% of all homes are equipped with television. These figures are exceeded by no other states in the U.S. and are equalled by only two (New Jersey and Ohio). The national penetration figure for television is 86% of all homes; New England, as a region, has 91%.

All six New England states have heavy radio penetration. At the latest estimate (March 1958 by A.C. Nielsen Co.), radio homes totalled 96.3% of all U.S. homes. All six New England states had higher percentages of radio penetration.

	% of Homes Having Tv	% of Homes Having Radio
Connecticut	**92%**	**96.7%**
Maine	**89**	**97.6**
Massachusetts	**92**	**96.8**
New Hampshire	**90**	**96.5**
Rhode Island	**92**	**96.7**
Vermont	**86**	**96.9**

Note: Tv homes estimates are from Nielsen as of spring, 1959; radio homes are from Nielsen as of March 1958.

FOUR OBITUARIES BY MISTAKE

These classic cases show how bad publicity dogs New England despite record of recovery

". . . And today four Massachusetts towns are dying."

Today was March 19, 1959.

The words, accompanied by film, were heard on the NBC-TV news segment of Dave Garroway's *Today*.

The towns are really cities—New Bedford, Fall River, Lowell and Lawrence. Each is a community of more than 100,000.

In New Bedford, Mayor Francis J. Lawler hung up the phone and noted as he took a breather between howling callers that spring was only hours away. Winter hadn't been trouble-free, not at all, but all around were signs of recovery and progress.

Buzzards over Buzzard's Bay? Not again, New Bedford's civic leaders prayed. Another textile tragedy would crumble the bones of old Hump Back, the whale, star attraction in the city's famed Whaling Museum.

Alfred R. Thackrey, executive secretary of the Board of Commerce, paced the floor. Charles J. Lewin, quietish editor and general manager of the *Standard-Times* (operating WNBH), was fuming. "Permanently depressed," the newscast had stated. The words rang in his ears while the phone kept ringing.

The Comeback • By lunchtime they knew in Radio City, 200 miles away, that New Bedford wouldn't let New York get away with this story. Mayor Lawler's snappy telegram included a request for equal time and a positive account of the city's comeback from decades of textile troubles.

Three other Massachusetts cities wanted it known they, too, were hurt. At Lawrence, P. J. Greely, Chamber of Commerce executive secretary, pulled a cutie. Instead of complaining openly, he sent his congratulations to Garroway: "Let's face it, we do have problems," he wrote *Today's* m.c. "We had a lot of calls. Our people were sore."

Mr. Greely thought NBC-TV might be interested in developing the New England theme by telling how Lawrence businessmen had bought the 20 Arlington Mills buildings for $325,000 (assessed at $2.8 million). He added, "Today those buildings house 7,500 employes, more than were employed before the mills were closed. Twenty-seven firms and the Internal Revenue Service (processing short tax forms) are feeding more families than their textile predecessor."

When the returns were in, NBC-TV was convinced the New England textile story had two sides.

New Lead • One month later, April 22, NBC-TV opened its *Today* newscast this way, "One of the most dramatic industrial revivals in the nation is taking place in four New England towns . . . towns hard-hit by the collapse of the New England textile business."

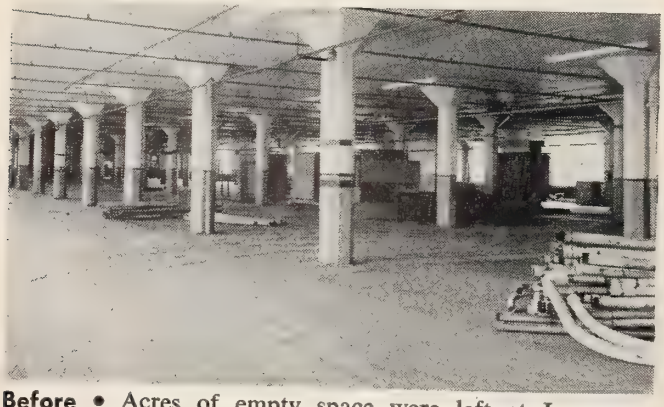
Breakfasts tasted better that morning in New Bedford, Fall River, Lowell and Lawrence.

But all New England wondered how this could happen, how a communications company in New York, hardly four auto hours away from these textile towns, could take so one-sided a look at a two-sided story—the story of a successful fight for economic life.

The answer was simple. These textile centers had bled freely but not until dry, and had supplied their own industrial transfusions. Unfortunately they were still tagged with the "Gone South" label.

Making a Vacuum • What happens when major industries move out?

In New Bedford, textile miseries began as far back as 1929 during a long strike. A second strike in 1934 was part of a nationwide work stoppage. But soon most of the city's 26 mills were humming again and business was getting better. Aerovox Corp., capacitors, was induced to set up in New Bedford, a plant employing several thousand. Cornell-Dubilier (electronics) came later.



New Bedford was diversifying its industry. World War II kept the mills busy, especially those producing hard goods and all types of machinery and metal products. By 1947, however, the southern migration was resuming.

Last year New Bedford lost two big mills—Wamsutta and Hoosac, throwing 1,800 out of work. Yet unemployment has declined from 9,000 to 8,000 since spring of 1958. Rubber products led the new jobs.

Filling a Vacuum • These shocks aren't absorbed automatically. It takes planning, pushing and persuading to rebuild a city's industrial structure. New Bedford decided in 1949 to solve its own crisis by forming an Industrial Development Legion. Another group, Greater New Bedford Industrial Foundation, was set up to raise capital to improve sites and finance new factory buildings. A Cooperation Unlimited Crusade raised $1 million, and New Bedford added an 800-acre industrial park and a 64-acre marine terminal.

New Bedford is only 30 miles from Plymouth and its exalted rock. "We have no intention of making a burial ground out of the land where American industry began," Mr. Lewin said. "Look what's happening," he added, citing this list:

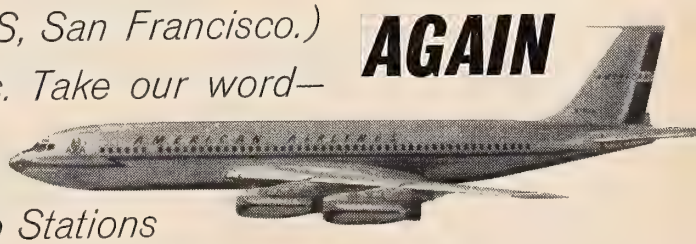
Berkshire-Hathaway, textiles, plant re-equipped with latest machinery, employs 2,000 and is headquarters for the

Before • Acres of empty space were left at Lawrence, Mass., as American Woolen closed its big Shawsheen plant.

After • When Raytheon moved into Shawsheen to make Hawk missiles it gave area $2-million-per-month payroll.

AMERICAN AIRLINES COMES AND GOES

There's nothing unusual about getting an account. That's one of the joys of business. Losing it is one of the hazards—that happens, too. But when it does, we like this kind of sequel: American Airlines ("Music 'Til Dawn"), after an initial three-year cycle on WEEI, left to go to a higher power Boston station. Now they're back on WEEI!



Such contracts are the greatest tribute a sponsor can pay a station. They mean he's assessed both stations' performances . . . and he's picked you.

In this case, American Airlines confirmed what we've been saying for a long time: an advertiser is simply not in Boston unless he's on WEEI. Listeners believe in WEEI, follow it, swear by it. And WEEI's entire staff is determined—through inventive promotions and aggressive merchandising—to translate that audience loyalty into sales.

This kind of performance is typical of all seven CBS-Owned Radio Stations. Each one is the bedrock of any advertising program in its market. ("Music 'Til Dawn" is now in its seventh successive year on WCBS, New York, WBBM, Chicago, KNX, Los Angeles, and KCBS, San Francisco.)

They're great stations. Take our word—and American Airlines'.

organization; J. Curry Mendes Corp., paper machinery, new plant this summer; Quaker Oats, pilot pet-food plant at the harbor; Morse Twist Drill, $3 million in new equipment; Goodyear, $2.5 million invested in three years, with 850 working on three shifts; Firestone, new contract for shell casings.

The whaling industry is history but the current seafood catch at New Bedford is valued at $14 million annually, led only by San Pedro and San Diego on the Pacific Coast.

Omega Aircraft Corp. is making twin-engine helicopters, hopes to turn out 500 eventually.

New Bedford is distribution point for Cape Cod, Martha's Vineyard and Nantucket. Its fishing industry employs 3,000 and produces 75% of the world's scallop supply. Fishing is of such public interest that local radio stations list the daily catch of these boats. Ocean cargo ships come into the harbor. Beaches have been improved, new streets built. A heavy share of the factory buildings are of the one or two-story type favored by modern industry. Many small businesses occupy once-vacant mills.

Mr. Thackrey said 50,000 out of the total 105,000 population of the city were employed during the spring. "Does that sound like we're dying?" he asked.

The Second City • Fall River, between New Bedford and Providence, R.I., has a similar story. Alarmed in 1954, it staged a BJ (Building for Jobs) Day, raising $500,000 in a fast sidewalk campaign. Greater Fall River Development Corp. was formed and a new plant was built on speculation. Minneapolis-Honeywell leased it. A second "spec" building is to be ready by July.

May payrolls in Fall River were more than $500,000 above May 1958, said John Scanlan, of the Chamber of Commerce. Globe Mfg. Co., girdles and elastics, is expected to add 150 jobs this year. Artcraft Fixtures, planning to move out, was induced to stay when more plant space was provided. Montoup Electric (Stone & Webster unit) has a $20 million expansion program under way across the river in Somerset. Firestone and Latex are active; C.N. Beetle, plastics, is enlarging; Berkshire-Hathaway is busy; Marscot Plastics is making boats.

The gloomiest spot in Fall River a decade ago was Pleasant Street, where Union Mills had shut down. Now 1,700 employes work in garment, furniture, finishing and other industries housed in this group of sturdy buildings.

Fall River has a 35-foot-deep harbor with a $2 million state pier. Shell and other refineries get their oil via the Atlantic. A new super-highway has brought Boston within a one-hour drive. A big suspension bridge is planned

across the river. Several downtown blocks have been razed for commercial buildings, a park and parking space. A new expressway through the city is in the works. "You can see why Mayor John M. Arruda and the chamber got after NBC-TV when they did that 'dying town' program," Mr. Scanlon said.

The Third City • Lowell was the next Massachusetts city given an advance obituary by NBC-TV, receiving favored treatment when the telecast opened. "This is Lowell, Mass., where the Appleton Mill, now unused, used to employ thousands of textile workers. And the Bigelow carpet mill in Lowell, another onetime major employer, also is out of business. As though a period is being put on the New England textile industry—the mill is now being torn down."

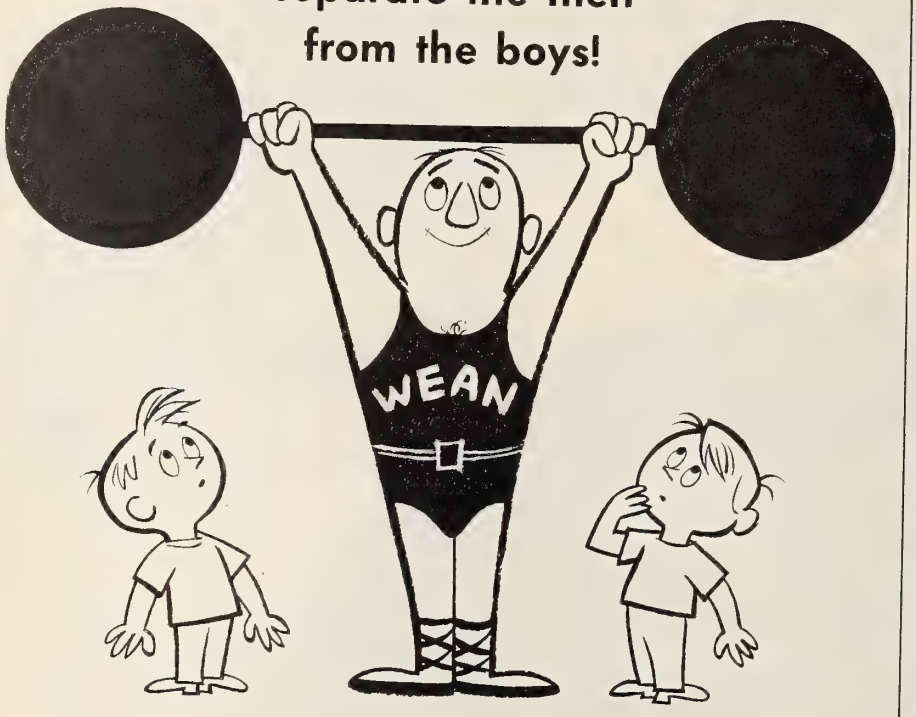
"We're now an ex-textile city," said Andrew McCarthy, executive director of the Lowell Chamber of Commerce. "A long bus strike has hurt us but we're holding no wakes. The last textile shutdown was the Merrimack Mfg. Co. cotton mill in 1957."

CBS-Hytron was the first to set up in an industrial park started by a local foundation. It has 650 employes and is putting in a $5 million addition. Raytheon has 3,500 employes. Wakefield Industries, making cases for Symphonic Radio & Electric Corp., has grown from 69 to 450 employes since 1954. Symphonic had 84 then, now has 1,500. Lowell has Carrier Corp., Reiss Associates and is planning two urban redevelopment projects—"a leader in New England's switch from a one-industry economy," Mr. McCarthy said of the community that Charles Dickens had once described as "the most beautiful industrial city in the world."

The Fourth City • The final city in NBC-TV's left-handed eulogy, Lawrence, suffered one of the major shocks of the textile migration when American Woolen Mills moved out of one of New England's largest mills, a shutdown that had started in 1952 and ended three years later. Shawsheen Village, it was called, an industrial showplace with "company houses" that looked more like a Westchester County community.

Lawrence and adjacent Andover lost thousands of jobs when Shawsheen shut up shop. But along came Raytheon. Shawsheen is now turning out Hawk missiles that add security to 20th century America. Raytheon has a $2 million monthly payroll at Shawsheen —at least six times the old woolen payroll. A spring evening drive around this vast plant showed a late shift at work; 6,200 are on the payroll now, and it is headed toward 7,000. American Woolen had 2,000 at peak.

The redevelopment program is bringing results in Lawrence. Western Electric has opened a multi-million dollar plant. Employment went up 600 in a recent month, even textiles showing a gain of 190 jobs.



NBC-TV's followup telecast in April told a constructive story of New England's revival. New Bedford, Fall River, Lowell and Lawrence were vindicated.

A lesson was taught, a simple lesson: Don't go around calling New England a corpse.

Tallest of all

The highest structure in the United States will be the 1,619-foot tower being erected for WGAN-TV Portland, Me. The tower is located at Raymond, Me., 20 miles northwest of Portland. It will top by nine feet the antenna of KSWS-TV Roswell, N.M., now the tallest in the country. Creighton E. Gatchell, WGAN-TV vice president-general manager, said the RCA antenna wil be a traveling wave array with an 18-gain factor.

SCIENCE TAKES UP TEXTILE SLACK

A new industrial era brings jobs and payrolls to New England

Two twists of economic fate have shaped New England's destiny: the decline and migration of textiles and the growth of scientific industries.

Textiles have been slipping nationally and shifting regionally for more than three decades, aside from the abnormal demands of World War II.

Electronics, nucleonics, aeronautics, astronomics—all the industries based on modern science and engineering—were exactly what New England needed to offset the textile tragedy. Its concentration of capital, research and technical training facilities, production skills and resources served to adapt the region ideally to these latter-day phenomena. One of the results: a fifth of the nation's entire missile program is centered in New England.

New wages and new business helped the harassed region survive the textile shock. Automatic bookkeeping and mechanized mathematics have facilitated the industrial evolution, helping to consume the tubes, transistors, coils, sub-assemblies and finished units required by the billion-dollar computer manufacturing business.

The textile industry, New England's oldest, dates back to the years immediately following Plymouth Rock; the electronics industry is one of its newest.

At least a third of the stuff now coming out of the scientific plants wasn't in use at the end of the Korean War. Ten years from now the scientific industries will be turning out thousands of products not now in use.

Here are the stories of the falling textile and rising scientific industries and their place in New England's present and future.

Textile story

The best told story of contemporary New England is the collapse of its textile industry.

Told by itself, as it usually is, the story is a tragedy of vacant mills and dying cities. Take the story of "Black Christmas" in Manchester, N.H.

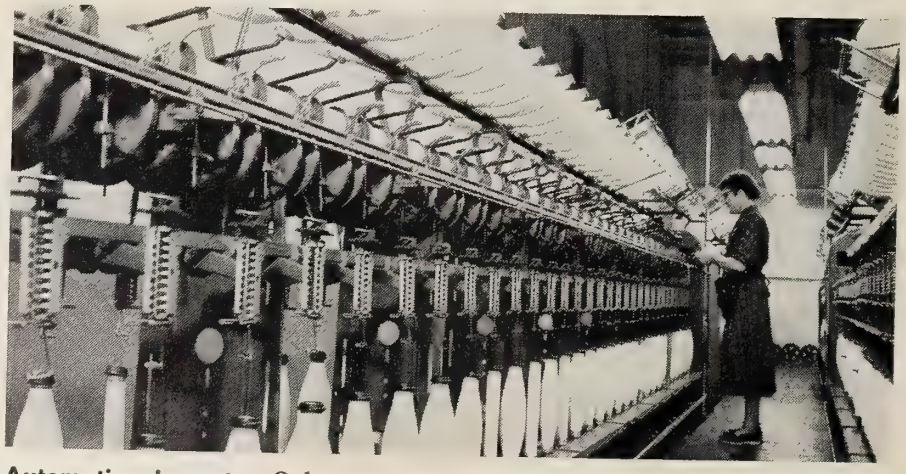
On Dec. 24, 1935, the huge Amoskeag plant, over two miles of mills lining the Merrimack River in Manchester, shot Santa Claus. The plant closed, and suddenly 18,000 families faced poverty.

Leave the story at that point and you have a drama of human misery. Carry it to its conclusion, however, and you have a story of another kind.

After recovering from the first great shock of the Amoskeag closing, a citizens group raised the money to buy the 10.5 million square foot plant for $5 million. Today 12,000 persons are working in 128 separate industries housed in the Amoskeag mills—electronics, bottling, tanning, other enterprises.

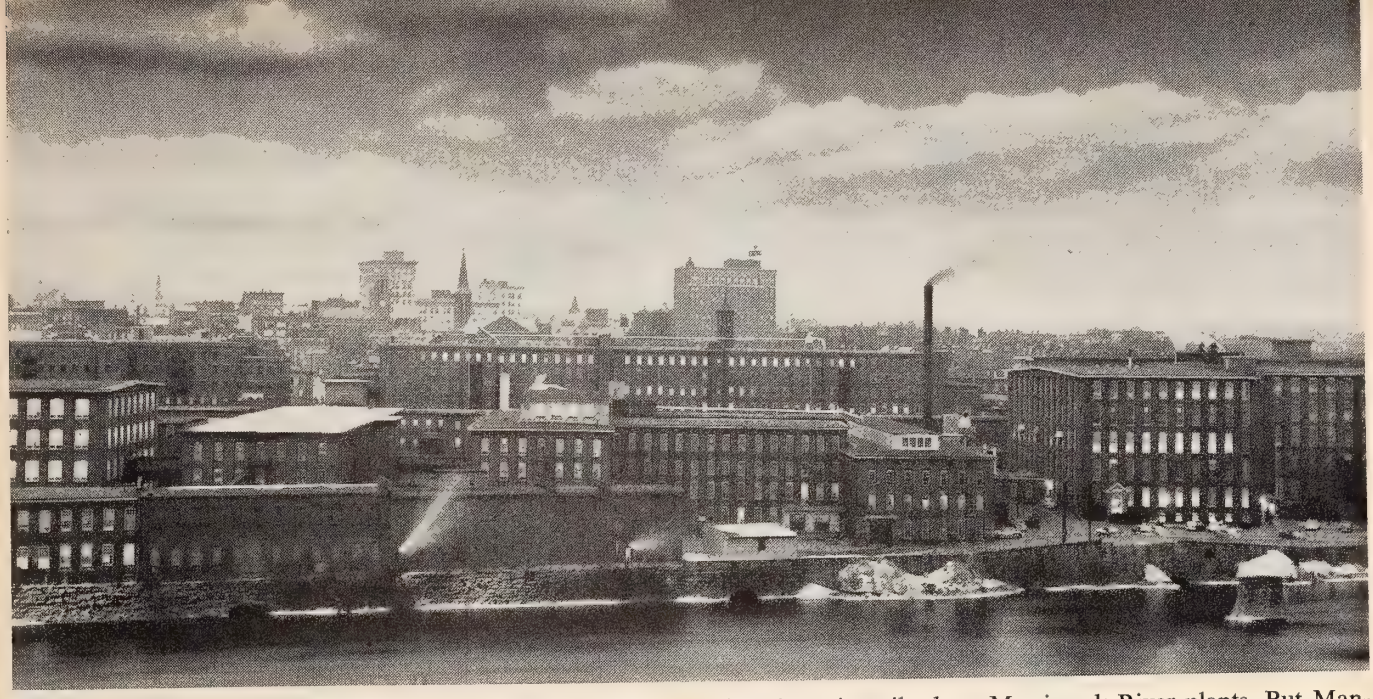
A Classic Story • The Amoskeag folding and the resultant comeback is a familiar event in New England. Somehow the rest of the nation still thinks of the region's troubles rather than its recovery.

New Englanders readily admit their textile plant has shrunk but they remind that it's just one of many billion-dollar-plus segments of the economy. Last May the Boston Federal Reserve Bank had a pleasant comment, "Improving business even extended to textile mills," with backlogs or orders leading to a spring speedup in cotton, woolen and worsted, dyeing and finishing, "the best tone it has had for some time." Over $400 million has been spent since the war in plant improvements.



Essentially the textile situation looks this way:

- Textile jobs dropped from around 240,000 to 160,000 in roughly a decade, following a national trend in the industry.
- Shutdowns of mills and migrations southward have cut the industry to a third its 1919 level.
- The skidding trend is leveling off.
- Once New England's first industry, it's now behind electronics, transportation equipment and other hard goods.
- Textile wages are below the general factory level.
- Jobs are dropping faster than production.
- A half-million jobs are tied directly to textile production.
- Migration to the South is practically over; closings are mostly shutdowns.
- Half of the displaced textile workers, often in older age brackets, never get back into industry.
- The South's low-cost advantage is disappearing; wage scales aren't far apart but New England has more fringe benefits and holidays. Spring contract settlements brought a series of pay boosts.



Industry Problem • Actually the entire U.S. textile industry has been sickish for many years. Two-thirds of the foreign market has been lost and imports have risen. Southern textile plants are hurting, too, but not as badly as their northeastern competitors.

A recent textile study by the U.S. Senate pointed out that the textile industry hasn't shared the growth of the U.S. economy since 1947. People are spending less for apparel as recreation opportunities increase. Some of the new fabrics are more durable; plastics and paper are used as textile substitutes in industry.

Textile profits are down and a lot

Automation impact • Only one person is needed to operate textile machine, turning out tricot cloth, lingerie and sweaters.

Textile transition • All Manchester, N. H., went in mourning during the Christmas holidays in 1935 when Amoskeag shut down its miles-long Merrimack River plants. But Manchester snapped back, the mills now house 128 industries.

of the national textile plant is obsolete, the committee found. Among solutions suggested were import quotas and a realistic approach to depreciation rates to encourage plant modernization.

Woolen mills have suffered the most, with a 50% drop in woolen-worsted fabrics jobs in two decades; 65% of worsted spindles have been liquidated.

New England's textile problem was reviewed last April by governors of Massachusetts, Rhode Island and New Hampshire. They asked President Eisenhower for a high-level study of their difficulties. The request was granted. An inter-agency committee of top federal officials will direct the study. Less successful has been New England's effort to get Congressional aid for needy cities.

The Ways Out • The solutions to New England's textile-based troubles are known to every New Englander—1, rebuilding, with financial aid and faster write-offs for new equipment; 2, development of new types of business and industry and 3, a brake on textile imports.

Modernizing can help. Take Berkshire-Hathaway's plants in New Bedford, Fall River and adjacent cities. First the New Bedford plant was transformed into what Edmund B. Rigby, treasurer, calls the most up-to-date in the country. Eight mills employ 6,000, same as a year ago, but the payroll is up due to a general textile wage boost last April.

Berkshire-Hathaway is now competitive with the South. Three full shifts are operating five days a week. Output is greater than a year ago. Said Mr. Rigby, "I feel confident a large part of the textile industry now operating in New England will stay here and continue to prosper."

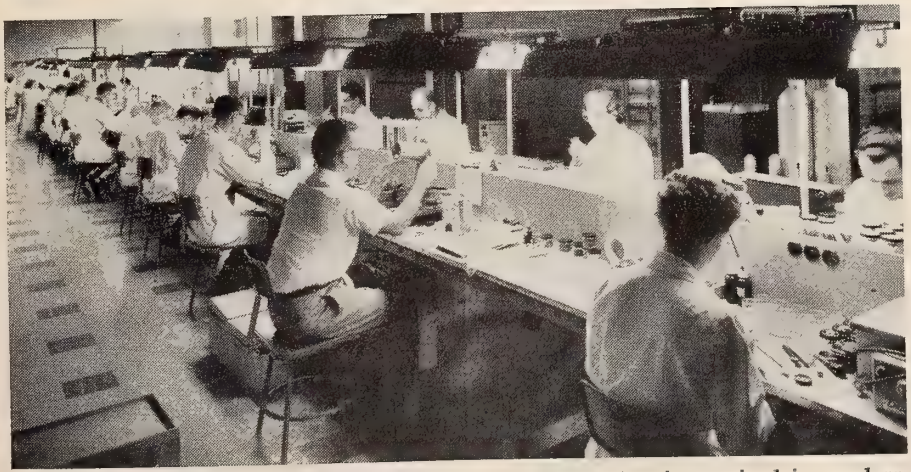
The industry's decline has been a cruel blow to many communities. Manchester, Nashua, Lawrence—the cities of tragedy were legion. But they haven't rolled over to die (see recovery story, page 76). Some hard-hit cities are still losing ground one month, gaining it back the next.

But dying? That's no way to speak of the living.

Electronics story

"Electronics saved New England's life."

This statement, more than any other, was heard in a month of observation around the factory, commercial, financial and scientific facilities that crowd the landscape of the six northeastern states.



Dramatic, but not quite true.

Best obtainable data, blended with first-hand checking, indicate New England's electronic output will exceed $1¼ billion this year, over one-seventh the U.S. total factory value in electronics.

This is big business, but in itself the electronics industry hasn't replaced all the jobs lost in textile shutdowns and migration, or in feeder and textile service enterprises.

A steady and at times spectacular growth of electronic plants has been accompanied by growth in the parallel brain-backed or sophisticated industries that go along with missiles, satellites and the automated way of life.

Elusive Figures • Exact figures for electronic jobs aren't available. First, the official job classifications of federal and state agencies have just started to catch up with the $9-billion-plus electronics industry. Dr. William H. Miernyk, of Northeastern U., Boston, a leading economist, suggested it would take one person at least three years to estimate the number of workers em-

Scientific contrast • Minimum square footage per worker is required in modern plant turning out measuring instruments.

ployed in New England's electronics plants.

Even if such a study were conducted, the final result would face an insoluble problem—the cross-pollination of electronic, nucleonic, computer, instrument and space-penetrating industries. Literally hundreds of large plants are mixtures of engineering, scientific, research, precision, electrical, chemical and metallurgical industries.

Electronics' place in New England's economy and its future can be shown by a few figures and trends:

- Over 700 plants, many working extra shifts.
- Fastest-growing electronics area in the U.S., with greater dollar volume than Southern California.
- Enormous backlogs of orders.
- No seasonal factor.
- Prospects of meteoric expansion in military business (over half the cost of a missile is electronic).

Combined research, design, machine-tool and instrument facilities give New England leadership in the super-miniature, light-weight and shockproof items needed for space vehicles, missiles and the hardware of the future.

The Space Future • John L. Burns, RCA president, speaking at the dedication of RCA's new missile, electronics and control plant on Route 128 at Burlington, Mass., said New England "is destinated to play a leading role in the coming electronics and space age." By 1968, he predicted, electronics and space gear will be the region's largest industrial activity.

The Burlington project is RCA's first major plant in New England. Present employment is near 800 and is to be 3,000 by 1962. A semi-conductor plant had been set up in 1955 in leased space, giving RCA the feel of New England's electronics charms.

Mr. Burns described it in these words, "Few if any areas in the United States offer greater stimulus to intellectual curiosity, original research—basic materials of electronic progress." The Burlington plant is devoted to missiles, anti-missile techniques, electronic fire control and other intricacies of defense.

Raytheon's Story • The fantastic growth of Raytheon Mfg. Co. symbolizes New England's electronics industry. In 1942 it was a small tube plant with a $6 million volume. World War II led to fast production of the Magnetron power tube for radar. Raytheon broke the radar bottleneck with its mass-output techniques. Its radar assemblies provided three-fourths of the surface-search systems used by United States and Allied navies.

By 1951 Raytheon's sales had reached a pre-Korean War figure of $89 million; by 1954, $177 million. A policy change in 1956 took the com-

. . . when WBZ-TV moved into the homes of intrepid New Englanders. Just *one* out of every 20 homes in the area had a television set then. Today there are TV sets in 92% of the homes . . . and WBZ-TV is by far the No. 1 station.

We at WBZ-TV are proud of the enthusiastic response shown us by this vast and prosperous six-state community. We're proud because it justifies our faith in the area's growth.

And we're proud because the constantly increasing number of viewers (6½ million strong) means that they like us here . . . and that we are informing, entertaining and selling them.

And what else is a broadcaster for?

WBZ 4 TV Boston

Effective July 1st, represented by TvAR

Westinghouse Broadcasting Company, Inc.

pany out of consumer tv. Military business was growing, pointing to a new market in what are called "sophisticated electronic weapons." The company invested heavily in engineering leadership in key scientific frontier areas instead of consumer markets, patents and low-cost facilities. This led Harold S. Geneen, executive vice president, to say, "The self-generating ability of profitable growth within the company has been established."

It's hard to argue with Mr. Geneen after a look at the first-quarter statement for 1959. This shows: $333 million backlog of unfilled orders, a gain of $50 million for the quarter; sales of $109 million ($80 million for the same 1958 quarter). Total sales in 1958 were $375 million, a 45% increase over the $279 million in 1957; 1958 earnings after taxes were $9.4 million, or $3.08 per share, 95% above 1957.

Raytheon is the only electronics company in the nation with prime contracts for two major missiles, the Army Hawk and Navy Sparrow III. The Hawk, a ground-to-air missile, has been tested and is believed near the operational stage. It has knocked down the XQ-5 six miles aloft and traveling at twice the speed of sound. Sparrow III is an air-to-air missile. The entire unit is made in New England.

Raytheon, a sprawling giant, largest employer in Massachusetts (35,000 employes), is scattered all over the central New England landscape in old textile plants, efficient new industrial parks and even in glorified tool sheds—wherever convenient space can be leased. Floor space totaled 6.5 million square feet, a recent checkup showed.

One in 10 of Raytheon's employes is an engineer, scientist or executive. The near-4,000 crew of specialists is growing as fast as Raytheon can recruit from industry and campus sources.

The laboratories conceal secrets known to only a few, a common condition in this research reservoir. Some of the military developments have civilian uses. Radar tests in freeze-drying of food suggest a revolution in the processing and distribution of food products.

Famous Names • Other leading electronic names are found everywhere. Sylvania Electric Products occupies eight locations in Massachusetts, New Hampshire and Maine. Radar, data and missile plants are at Waltham, outside Boston, a second data plant at Needham, Mass., and transistor-diode production at Woburn, Mass., and Hillsboro, N.H. Most of the other plants concentrate on lighting products.

Sylvania isn't doing much talking about its Project Plato, an anti-missile guided missile it has been working on several years. It's active in radar, computers and other devices.

Last May 24 NBC-TV network devoted a Sunday hour to the dedication of Avco's $20 million laboratory array on Route 128. Here Avco is developing re-entry nose cones for Titan missiles under a $111 million Air Force contract. Titan's job is to deliver a hydrogen bomb to targets thousands of miles away.

Electronic Sampler • CBS-Hytron, Bomac, Sprague, Tracerlabs, Datamatic, International Business Machines—the names of electronic and partially electronic firms run into the hundreds. Datamatic is a joint Raytheon and Minneapolis-Honeywell project. Its growth is spectacular, its computers even more so. IBM's plant is at Burlington, Vt., one of the compact list of major industries in that state. Another Vermont industry is the Rock of Ages setup in Barre, which turns out a strange pair of items—multi-ton blocks of granite and tiny capacitors that a finger-nail can conceal.

Nationally the computer business runs into the billion-dollar bracket. New England's share isn't easy to compute. A good guess would give it at least a fourth of the U. S. total, maybe more when the long racks of missile-space equipment are included.

Electronics equipment fits into the

office operations of every known type of major industry, even television audience research (BROADCASTING, May 25). But related industries turn out equipment used to house and operate electronic gear.

Example of Growth • An example is D. S. Kennedy Co., at Cohasset, southeast of Boston just beyond the eastern terminus of Route 128. At the end of World War II the plant, headed by Donald S. Kennedy, employed five people building radar reflectors for Raytheon. After the Korean war the company got into antenna systems and its volume rose to $4 million in 1956 as it went into big tracking antennas.

Charles Creasor, vice president of Kennedy, said the company's 1958 business was $14 million. All but a dozen of its 700 employes are in New England. "Right now we're taking a breath to decide how big we want to be," he said.

Kennedy installations include the long-range dish at Lincoln Lab., west of Boston, MIT-operated plant that delivered the blip of radar energy to Venus and back, plus others in the Cape Canaveral-Ascension Islands chain. The company's four plants had a $11 million backlog at a recent checkup. Its reflectors and associated radar gear automatically stick to the course of a skyward satellite.

High Pay Jobs • One of the mushrooming computer outfits is Epsco Inc., Boston. An engineer who is handy with the stuff that goes into its air-traffic control systems and missile trackers can earn $15,000-$20,000 a year. Epsco figures this is a good investment in its business. It has been a pacemaker in combining digital (number) and analog (physical quantities) computers.

Starting from a basement in 1953, Epsco is now in the $10 million-a-year bracket. It has equipment that will measure in terms of a millionth of a second. The Epsco Stardac is designed to guide Polaris missiles from submerged submarines to distant targets.

A heavy industry unit, United Shoe Machinery Corp. has a contract to build reactor components for atomic power generation.

Scattered Installations • Raytheon, Epsco, Bomac and the other electronics manufacturers in New England have their components, sub-assemblies, assemblies and specialties all over the extensive defense installations that dot the six states.

The science of nucleonics, less than two decades old, has been embraced eagerly by New England where high fossil-fuel costs (oil, coal and gas, mainly) have been a competitive problem, raising production expense in comparison with areas closer to fuel sources.

As atomic power sources increase, the disappearance of shipping expense for older fuels will place New England closer to competitive equality with other regions. After all, the ingredients of an atomic power plant can be delivered in a relatively tiny package.

Nuclear Development • There's secrecy everywhere — along Boston's Charles River, around Route 128 and in research laboratories. Four big Boston-area nucleonic projects are said to involve around $200 million. A reactor at Rowe, in western Massachusetts, will supply power in a region that uses lots of it.

Two nuclear-powered naval ships, adding up to around $200 million, are under contract to Bethlehem Steel. Atomic submarines are coming out of the General Dynamics yards at Groton.

Lowell Technological Institute has plans for nuclear education and a research center. Massachusetts Institute of Technology, Harvard, Northeastern U. and Worcester Polytech are deep in atom-splitting. Medical schools, hospitals, industrial plants and research centers are utilizing new products in their economy-promoting operations.

It's a safe guess that all the newer sciences are going only one way—up. And New England intends to lead the ascension.

All New England is mad about it...

Planning the future • Research center in Cambridge, known as Trillion Dollar Triangle, provides scientific and production know-how for business, industry and the military. It's working on devices that will shape destiny.

THINKING: BIG ECONOMIC RESOURCE

Research and education are major money makers in New England

Brains are big business in New England.

A complex of universities, colleges and prep schools plus the nation's largest collection of research laboratories adds up to a multi-billion-dollar factor in the economy.

They don't even stop at billions in New England when they talk about their cerebral industry. The main group of research firms in Boston, once renowned as Research Row, has lately been dubbed Trillion Dollar Triangle.

This idea factory consists of a cluster of imposing buildings adjoining Massachusetts Institute of Technology on the banks of the Charles River. When the center ran out of river front it backed into the city of Cambridge. Now it has annexes scattered a few miles out along Route 128.

The trillion-dollar aspect is based on the influence exerted by consulting engineering and scientific firms serving private industry, government and the military. Its discoveries are destiny shapers. Massachusetts alone has 180 independently-operated research laboratories, either commercial or endowed by educational institutions or foundations, plus 142 private industrial laboratories, a total of 322.

Business of Education • Educational institutions, too, are important to the New England market. Every autumn an influx of around 200,000 students arrives from every state and most foreign countries. These students spend one to six or more years on a hundred campuses. They spend an estimated $150 million in the course of a school year for basic campus and personal costs. On top of this the institutions themselves spend $350 million annually in paying faculties and staffs, buying supplies and operating their instruction facilities. Some, such as MIT, have huge grants from government.

Endowments at New England campuses are well over the $800 million mark, according to the U. S. Office of Education. The income, of course, goes to students and campus projects. The value of college real estate and equipment isn't easy to calculate but it will pass $2 billion and is rising rapidly.

Such campus activities as sports are important economic contributors. More students are married than in the past and naturally spend more on housing, food and services than the average single student. Popularity of graduate study is growing.

Where It Began • Higher education got its American start in New England when Harvard was founded in 1636. The region is proud of its campuses; 84% of its young people stay in New England to go to school.

An economic portent from the New England Board of Higher Education: "We can expect college enrollments in New England to double in the next 15 years."

Trillion Dollar Triangle's explosive growth is based on the obvious benefits derived from the concentration of universities in the Boston area—MIT, Harvard, the newer, fast-growing Northeastern U., Boston U. (another fast grower with a $60 million expansion program), Boston College ($30 million campus) and many others.

Scientists, educators and students like one another's company and tend to live in clusters for sociological as well as professional reasons.

First Think Factory • The original Research Row had its beginnings in 1886 when Arthur D. Little Inc. was founded "to improve processes and perfect products." The firm of technical consultants prospered. When MIT moved across the Charles River to Cambridge in 1916, Arthur D. Little Inc. moved next door. Soon it had neighbors who figured this was a smart idea. The biggest boost came in World War II, the most exciting project being an

order to provide melted uranium for the U. of Chicago's stockpile—a modest role in nuclear history but it pushed Research Row into a national role.

Arthur D. Little Inc. comprises 1,000 scientists, engineers and laboratory-office people, according to its board chairman, Dr. Earl P. Stephenson, coiner of the Research Row label. Its scientists and engineers team up with industrial management to solve problems, all sorts of problems—weather forecasting, what's in outer space, how to break up the traffic jam on Main St., cancer cures, broadcast test gear, super-miniature gadgets for rockets, tiny tv transmitters.

The explanation of the phenomenal growth of research is simple. Out of MIT, Harvard and other laboratories come countless thousands of technical papers, mostly pure science. At this point, research consultants span the gap between science and people. They translate scientific findings into useful military and industrial applications.

Industrial Birth • New England, after all, sparked the growth of American industry. Eli Whitney invented mass production by use of interchangeable parts. Samuel Slater, a contemporary, devised factory techniques by which work of skilled craftsman was broken down into simple steps that could be handled by the semi-skilled or unskilled.

Basic research people often haven't the slightest idea what their laboratory findings mean. They improve theoretical understanding of a process or phenomenon.

Dr. Robert Van de Graaff once developed a high-voltage static generator. This was interesting. But its application came about when the late Dr. Karl T. Compton, then MIT president, brought Dr. Van de Graaff to MIT where he joined Dr. John Trump in more research. High Voltage Engineering Corp., backing the development, brought Dr. Denis Robinson from England as its president.

The medical profession showed little interest until the research team had demonstrated that high-voltage static generators offered a forward step in cancer therapy. Now the generator is an accepted device in cancer treatment, nuclear research, sterilization and industrial radiography. Boston is often called the world's top research center.

Similarly the high-vacuum work of National Research Corp. led to the frozen orange juice industry. American Research & Development Corp. and New Enterprises Inc. encouraged development of Tracerlab Inc., an active electronic firm with many facets. Arthur D. Little Inc. set up General Motors' first centralized research department. Automation devices and efficient processes emerge constantly from Trillion Dollar Triangle as its cerebral savants cut the lapse of time between a laboratory advance and its application.

The University Role • MIT plays a multiple part in this scientific environment. Besides training young scientists and engineers, it is active in defense roles. The MIT Radiation Laboratory, as well as the Harvard Countermeasures Laboratory, are critical units in the evolution of the space age.

The Lincoln Laboratory of MIT, operated under contract for the military, is directed mainly towards communications and electronics in the North American defense. MIT designed and developed SAGE (Semi-Automatic Ground Environment) air defense and DEW (Distant Early Warning). In February 1958 radar signals were bounced off Venus, and it recently sent President Eisenhower's voice to the moon and back.

A widely accepted estimate places the cost of operating New England's research facilities at over a half-billion dollars a year. Two-thirds of this comes from private industry, most of the rest from the government. Spread out in the Boston perimeter are dozens of major private laboratories. AVCO is in a new $15 million research center because it wanted to be "in the most highly developed research climate in the United States" and close to Boston's cultural advantages as well as transportation and commerce. RCA, Quartermaster Corps, Raytheon — the names are many.

Harvard research into research showed 42% of the funds go into new products and processes; 50% into improving existing products and processes, and 8% into uncommitted studies.

Into Space • Rockets are going higher and faster, missiles are hitting their targets, monkeys are getting free rides to heaven and back because of the plodding, ingenuity and calculations of New England's scientists and engineers. New defenses against ballistic missiles are being developed. At MIT's electronic laboratory they figure they're five years ahead of the rest of the world, and 70 other laboratories staffed by the school's 6,000 students (half in graduate work) and faculty are making similar contributions to the future.

This cranial concentration is impressive, but New England has no monopoly on scientific skills, according to Georges F. Doriot, president of American Research & Development Co. and marketing professor at Harvard Graduate School of Business Administration. "Boston should dispose of the idea it is the brain center of the world," he said. "California Tech, Rice, Houston, Chicago and many other universities are far advanced in their scientific progress."

"Ten years

of hard labor!" Hard labor to corner the top studios' best feature films. Hard labor to create provocative, headline-making local programming. Hard labor to present more news more dynamically. CONNECTICUT—GROWING FAST

Bridges gap from New York to land of Yankee

The small, factory-dotted state of Connecticut has a multi-faced economy. Southwestern Fairfield County is, to a considerable extent, a dormitory for Metropolitan New York and a spillover from Westchester County, N.Y.

Stamford, Greenwich, Norwalk, Westport and other communities have expressways to Manhattan, and the trip to Madison Avenue will be even faster when some metropolitan bottlenecks are cleaned up. Some 15,000 Connecticut residents commute daily to New York by rail.

At Bridgeport the state begins to take on more of a Yankee aspect. Its metal-working and other industrial plants employ 54,000, but many residents make the daily trip to New York. The commuter belt peters out below New Haven.

The state's economic lifeline bends northward at New Haven, taking in Naugatuck, Waterbury, Meriden, Middletown, Bristol and New Britain before reaching Hartford, 37 miles away. Springfield, Mass., is only 26 miles north of Hartford. The cities have much in common, particularly Windsor Locks and its aeronautical industry.

While the Long Island Sound from Greenwich to New Haven is spotted with industry, the shoreline loses its factory saturation east of New Haven. The Connecticut Turnpike promises to open the shore area to New London and on to Providence, R.I., within a decade. It promises also to speed development eastward to Westerly, R.I.

Insurance Capital • Hartford, state capital and largest city, is also capital of the casualty insurance industry. United Aircraft, which has put nearly $200 million into expanded plants, had 57,400 employes mostly in the Hartford and Bridgeport areas, a late spring report showed. Nationally the aircraft industry is down somewhat, but United hasn't felt the trend as much as most companies, its maximum drop being 4,500 jobs in a year. United's Pratt & Whitney plant powers nine out of ten Boeing and Douglas jets and most military jets.

Hamilton-Standard Propeller at Windsor Locks, another subsidiary, took the transition to jet-powered planes in stride by shifting to jet equipment, fuel controls and other aeronautical items. Two Sikorsky whirlybird subsidiary plants are in the Bridgeport area.

With Travelers and other gigantic insurance empires plus state, federal and city governments, Hartford's daytime population is estimated at 400,000, roughly double the population of the metropolitan area (including East and West Hartford). Business has been good the first half of 1959 and unemployment is down in the trading area, which is estimated to have a population of 500,000.

A $50 million Front-Market development project promises to solve some of the mid-city crowding. The new Statler Hilton Hotel is busy. A discordant note is the hideous, unpainted backside of the New Haven railroad station, luckily hidden from the park area toward the Capitol.

New Britain, 88,000, is 10 miles to the southwest and Bristol (47,000) is 16 miles. New Britain is called the world's hardware center. Windsor Locks is 10 miles north of Hartford.

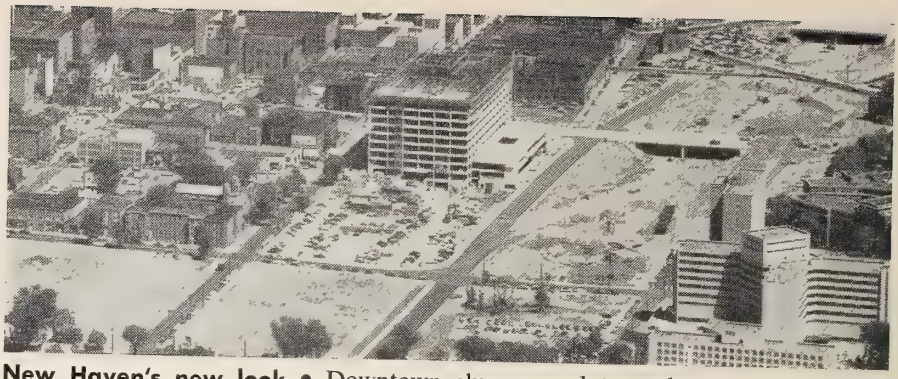
Face Lifting • Old New Haven is deep in a major redevelopment campaign that has attracted national interest. The Oak St. Redevelopment Project is tied to nearby toll highways by the Oak St. Connector, an expressway right through the central area. The College Plaza office building, $13.5 million, was ready for summer occupancy. Southern New England Telephone Co. will move 2,500 employes into its $12 million building in the autumn. Alderman Development will also be opened in the autumn.

The New Haven civic leaders are looking as far ahead as 1990. A 16-story apartment in the Oak St. project is due for winter occupancy. Store and office buildings are projected. While this area is moving ahead, Mayor Richard C. Lee and the Citizens Action Committee have several other development schemes in the works.

Church St. redevelopment is to have a badly needed hotel, operated by Sheraton. Banks, parking, and apartments bring the planned total to $86 million. Then there is Long Wharf Industrial Park, which will house many major industries. Work is due to start in 1960. Wooster Square will include housing, a commercial park, community and civic facilities, industry and a shopping area. It has a 1963 target date. A key factor in the whole development program was strong broadcaster support.

New Haven's 170,000 population figure doesn't reflect the extent of its trading area or its economic impact. Its fortunate location among a nest of expressways and by a deepwater harbor tie the city into New York, the rest of New England and international commerce. Its importance as a wholesaling center is expected to increase. Yale brings culture and economic enrichment to the city.

Metal Working • Bridgeport is heavily industrial, turning out machinery, transportation equipment and fabricated metals of many types. The city is 57 miles from New York. The economy draws support and employes from the maze of nearby communities. Metropolitan population is 170,000. Its State St. redevelopment plans have been approved. While much of the industry is located in old plants, newer structures are appearing every month or so. United Illuminating is getting a $20 million addition to its generating plant. Norwalk and Stamford, on the southwestern side, are industrial cen-



Connecticut at a glance

- Population 2.4 million; fastest-growing New England state; one-third increase since 1940 (U.S. average is 27%).
- Leads all states in U.S. in per capita production of manufactured goods; double the national average.
- The top state in per capita income, $2,825 per year (1959 estimate). This is 38% above national average.
- State has 8% of New England area, 23% of population, 29% of manufacturing employes.
- Tops the U.S. in output of aircraft engines, ball and roller bearings, copper rolling and drawing.
- Employment has risen every year since World War II; factory employment rose 50,000 jobs from 1950 to 1957.
- Dependent on hard goods and metal working; never deeply involved in textiles; no shoe industry.
- Doorway to 14 million population in New York City and Northern New Jersey.
- Second U.S. state in production of machine tools.
- Highest ratio of telephones per person in U.S.

ters and benefit from the trek out of New York City.

New London (40,000), an old fishing center, is getting a business lift out of a modern military weapon, the atomic submarine. Last April 16 the *Skipjack,* 2,830 tons, was commissioned. It's the fastest American submarine ever built, coming out of the Groton yards of General Dynamic's Electric Boat Div. The new *Triton* will be nearly twice the size of the *Skipjack,* and dwarf the yard's earlier atomic subs, *Seawolf, Skate* and *Nautilus.*

Connecticut has seen good days. It's counting on better ones.

New Haven's new look • Downtown slums razed to make way for modern buildings and trough scooped for new expressway. Southern New England Telephone this fall will move 2,500 employes into new plant (center). Several redevelopment projects are in works.

MAINE TAKES FORWARD STEPS

Trees are main industry in largest state

Maine was one of the first areas of the United States settled by the white man—1607 at Popham on the Kennebec River—but it still has more undeveloped territory than any eastern state. Despite its 3½-century history, the state has a vast, untouched wilderness in the northern section. This land, rich in forest and water resources, joins the rest of Maine in offering one of the important industrial potentials of a spreading nation.

Water and trees first attracted civilization to the area. Trees have always formed the basis of the largest employment segment in the state, led by the pulp and paper box industries ($400 million a year). Water and the offshore continental shelf offer unlimited food resources and are the principal tourist lures.

Maine could be the sleeper in the East's industrial expansion. In the southern tip, the coastal city of Portland is becoming an outlying part of the Boston industrial and commercial empire. Eventually this city of 150,000 (population within 12-mile drive) will be the northern terminus of the Linear City metropolitan area extending south to Richmond and Norfolk, Va.

Aroostook Economy • In the northern tip, Aroostook County lies between the coastal province of New Brunswick and an extensive new economy developing down the St. Lawrence where iron ore and commerce are getting a big boost from the newly opened seaway. Larger than Connecticut in area, Aroostook County is adding food-processing industries to take advantage of its enormous potato crop, close to one-seventh of the U.S. total. If a road is cut 125 miles through the primeval woods to the St. Lawrence, Aroostook County believes it can speed up its potatoes to the entire Midwest via the new seaway at a price competitive with other potatoes.

Across the St. Lawrence a million people will have settled within a decade if the Quebec ore development comes up to predictions. An arterial ribbon from Presque Isle to Rivere de Loup, Que., would give northern Maine the east-west outlet it wants and spur the potato industry.

Potatoes actually are an industry in Aroostook County. The incredible soil, a light brown loam of high yield, combined with ample rainfall and the long daylight hours that offset the short growing season, provide an ideal combination for potato growing.

A fifth of the crop is processed for potato flakes (instant mashed), frozen french fries and other cooked items, and starch. Eventually four-fifths of the crop will be processed, some of the growers believe. Such names as Birdseye, A&P and Salada are developing the processing industry. Peas are the only other crop that can be grown in the short Aroostook summers. In nursery fields are super-spuds of the future that will help the potato business. The Aroostook farmers are now chipping in a percentage of receipts to an advertising kitty.

Potato growing is a gambling business. The Aroostook farmers store their crop if the autumn price isn't right and take a chance on later quotations, even if it means driving without a new Cadillac or two for a few months. The Maine broiler industry is called the fastest growing in the U.S.

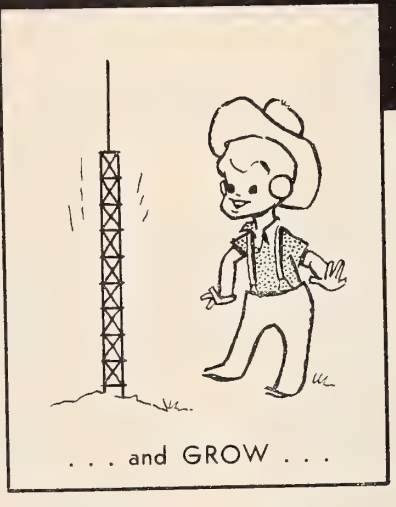
Mineral Movement • Maine's mineral potential is interesting if not well documented. Low-grade manganese abounds, awaiting processing progress. A sudden interest has developed in other ores—copper, nickel, lead, zinc, lithium and diatomite—and mineral claim activity has been increasing.

In its industrial development, Maine has had its share of textile troubles but boasts proudly that no Maine textile mill has ever moved south. The textile output runs $150 million a year. Shoe and leather plants are busy. In the pulp-paper field, Great Northern Paper Co., at Millinocket, has the largest newsprint unit in the nation—2,000 tons a day requiring 2,000 cords of wood. Research work is under way in develop-

Maine at a glance

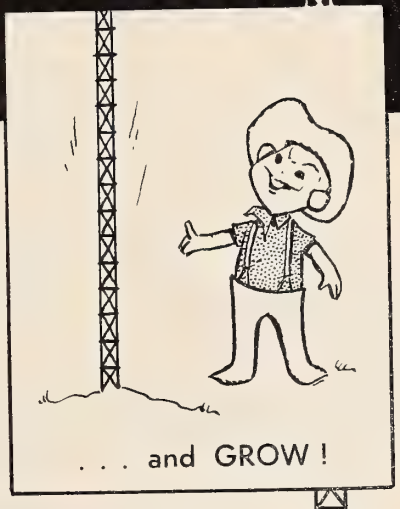
- Lowest population density in New England; half of people live outside cities; total population, 910,000, rising slowly.
- Income rising; $1 billion retail sales.
- As large in area as the other five New England states put together.
- Its coastline, 228 miles airline, runs 2,400 miles in actual length, half the total U.S. Atlantic coastline; 5,000 scenic streams and rivers; over 2,400 gorgeous lakes and ponds; Mt. Katahdin is the highest mountain, 5,267 feet.
- Main industries—trees and processing of wood products, over half-billion dollars not including furniture; shoes and leather; cotton, synthetic and other textiles; metal products and machinery; food; transportation equipment (including Portsmouth Naval shipyard); tourism; fishing (90% of U.S. lobster catch); air and coastal defenses.
- Potato crop was 1.9 million tons (nearly $60 million) in 1958, second only to Idaho. Total 1958 farm income was 37.6% over 1957.

You can reap the harvest . . . .
. . Of one of New England's



Biggest Crops!!

'cause we've just "planted the seed" for the WORLD'S TALLEST TV TOWER, *smack in the*



Portland, Maine Market!!

and this summer it will GROW

. . . and GROW . . .

. . . and GROW !

Now, WGAN TV puts Portland and Southern Maine among the ranks of your most important Television markets.

On May 18th the ground was broken for what soon will be the world's tallest man-made structure . . . the 1619' WGAN TV tower. This is our way of demonstrating implicit faith in the largest market area in northern New England.

NOW is the time to "reap the fall harvest" of Portland's No. 1 Station (ARB Metropolitan Survey, April, 1959) and take full advantage of the accelerated promotional effort which will emphasize the October 1st, tower completion, target date.

ment of new paper products from hard woods.

Maine pioneered the industrial development commission idea, now common practice all over the country. Nine new industries opened in the first quarter of 1959, 31 in 1958, 22 in 1957. New products include plastic heels, boats, prefab houses, stone products, machinery, toys and radar gear. A $20 million revolving fund is maintained.

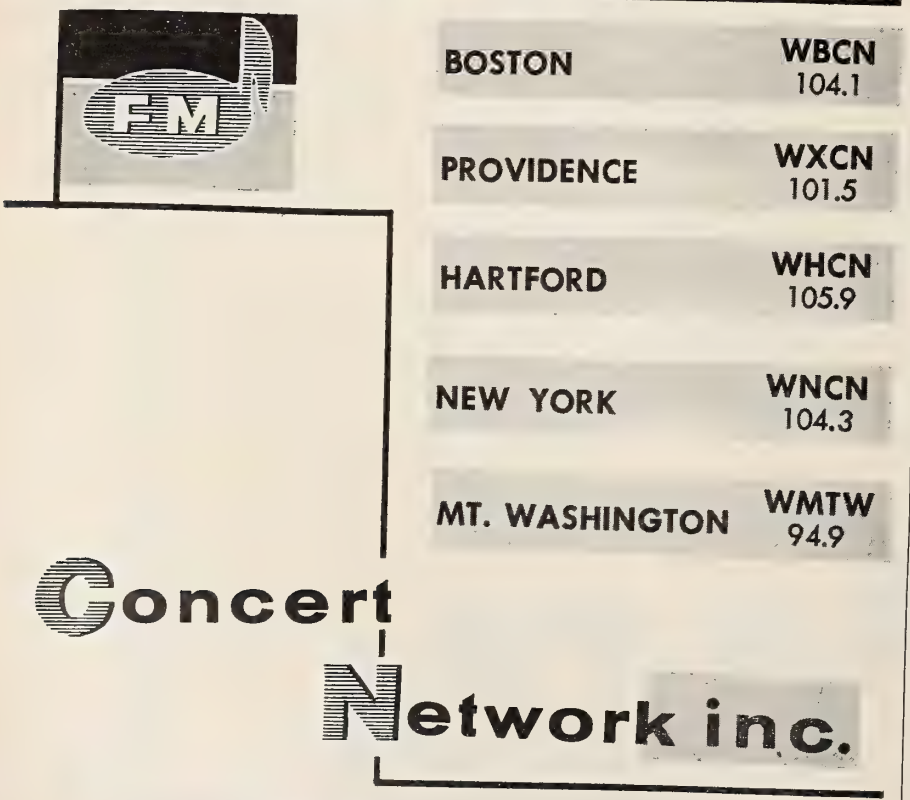
The state's industry consists of 3,000 manufacturing establishments, four-fifths of them small. Automation is increasing, which Maine feels will create new openings for skilled workers as well as increase production and cut costs.

Shellfish produced an estimated $18 million crop last year, with half of it coming from a 20-million lobster haul. Frozen and frozen cooked seafood dinners are helping build the industry.

Tourist Promotion • Maine led the nation in official state promotion of its recreation attractions, and no state has more luscious lakes or inspiring rivers. New ski areas are being added to meet the demands of skiing devotees. Spring salmon fishing, fall hunting (35,000 annual deer kill), fine beaches, cool summer days give Maine more than its share of attractions.

The state's recovery from the 1957-58 recession has been slow but steady. Greater Portland, with over a third of the Maine's population, is feeling the benefits of opened pocketbooks after the dip. Its economy is supported by such paper plants as S. D. Warren Co. at suburban Westbrook (3,500 employes); ocean-borne tanker oil for the pipeline to Montreal (harbor is ice-free all the year); Bancroft & Martin steel mill; medical center; famed Burnham & Morrill Co. baked beans and other food (450 employes); Portland Copper & Tank Works; three shoe factories; Maine turnpike. Portland has some of the old Yankee conservatism but the community is becoming more aggressive as the younger element takes over.

The business section is compact, a common trait in New England cities. Casco Bay has 200 sizable islands.



Other Cities • The Lewiston (45,000)-Auburn (26,000) area is the second largest in Maine, with a total of about 150 manufacturing plants. Industrial development started well before the Civil War as plants took advantage of the Androscoggin River and its series of falls. Bates College is in Lewiston. Products include textiles, wood items, leather and metal. Auburn has 15 shoe plants turning out up to 70,000 pairs a day plus leather and wood processors.

Bangor (they make it sound like Bang-gore) is a distribution point for the northern part of Maine. Its 60,000 population (immediate trading area) includes 6,000 at Dow Air Base, with a $20 million military payroll. The base has fighter interceptors coming from Presque Isle this year, adding 3,000 personnel, and later a Bomarc missile project is due. Retail business started slowly this year but should reach close to $90 million in the city proper, well above last year. Bangor total business runs $160 million a year. The lumber industry has always been a central activity. Pulp, paper, wood products, lumber, building material, machinery and textiles are produced in the city's industries. It hopes to be tied into the Maine Turnpike one of these days. A 125th anniversary is being celebrated.

Waterville (45,000) has large woolen mills, C. F. Hathaway Co. (expensive shirts), lumber products, Colby College, paper mills, pulp and plastics industries. Augusta (32,000) is the state capital and northern end of the Turnpike. It is located at the head of navigation on the Kennebec River. Industries include textiles, paper, pulp, shoes and poultry processing. Brunswick, home of Bowdoin College and a scenic business center, is one of many coastal and inlet cities. Others include Rockland, Bath, Eastport on the north, Biddeford and Kennebunk on the south. Bath has contracts for $80 million to build missile-firing frigates.

North Country • Northern Maine has a triangular cluster—Presque Isle (13,000), Caribou (12,000) and Ft. Fairfield (5,500)—supported by the military, potatoes, peas and lumber. Loring airbase now includes 13,000 military personnel and dependents, according to Col. Norval C. Bonawitz, base comander. It is being revamped into a center of two bomber, one tanker and two fighter squadrons, plus a Snark unit. At present it has an $18 million annual payroll, including contract personnel. The base itself spends $3.4 million a year in the area and contractors spend $2 million. The food bill alone is $2 million a year; clothing $615,000; rent $800,000. Caswell Air Force Base is eight miles away, with 400 people. Presque Isle base has 6,000. Construction projects under way at Loring this year run $7 million, nearly all handled by Maine contractors. Presque Isle and Caribou are celebrating centennials this year. Houlton, to the south, has a new shoe factory and valve plant. Presque Isle has a new industrial park.

Northern Maine gets cold in winter. All the nation hears the sub-zero reports from the Caribou weather station. Like Minnesota and other northern areas, Maine handles this problem in stride. And the summers are wonderful.

MAINE in Top 50 Markets!

(Cast . . . quizzical Quent, agency timebuyer, and Paul Bunyan, Maine-born "Mr. Big")

Quent: Maine in the top 50 markets! Says who?

Bunyan: Me, Paul Bunyan.*

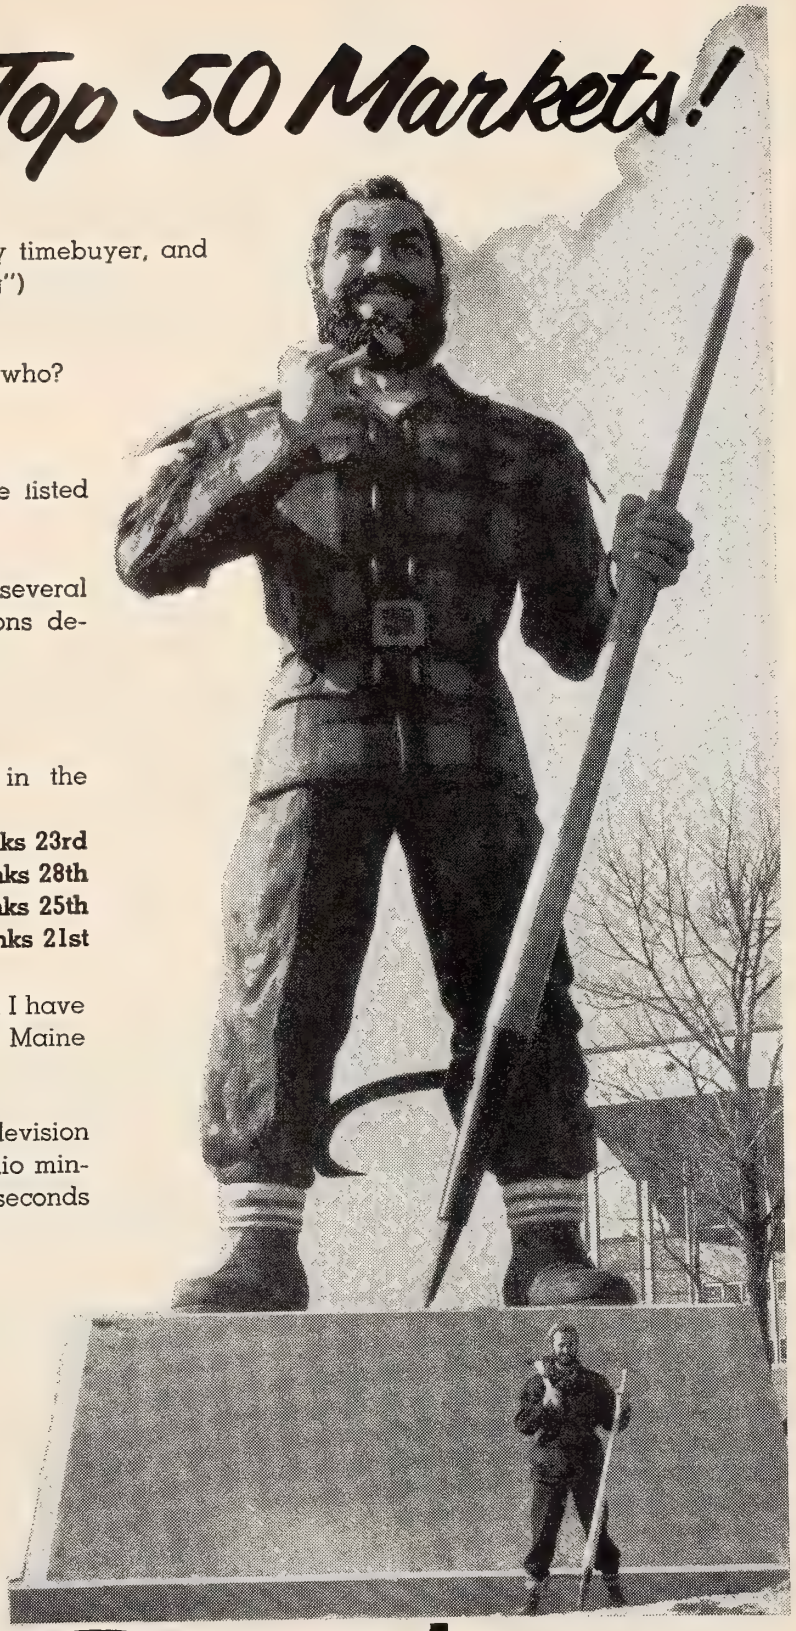
Quent: How come? I've never seen Maine listed in the top 50 markets.

Bunyan: That's because you see Maine as several small markets. The Hildreth Stations deliver Maine as one big market.

Quent: Well, shoot me some figures.

Bunyan: Sure, here's how Maine stands in the National Markets.

Population	**Maine ranks 23rd**
Effective Buying Income	**Maine ranks 28th**
Retail Sales	**Maine ranks 25th**
Food Sales	**Maine ranks 21st**



Quent: Hmmm, interesting . . . but wouldn't I have to buy a lot of stations to cover the Maine market?

Bunyan: Not at all. Hildreth Radio and Television Stations cover Maine. Hildreth Radio minutes cost $16.15. Hildreth TV 20-seconds (AA time) cost $80.

Quent: Where do I get more information?

Bunyan: George P. Hollingbery Co., Nationally, Kettell - Carter, Inc., in New England.

MASSACHUSETTS RANKS AT TOP

Heavy concentration of factories, people

The historic, factory-laden state of Massachusetts is about half of any New England statistic. Roger Johnson, research director of Associated Industries of Massachusetts, says the state's share of many major economic factors in New England will run between 40% and 60%. In electronics and some types of machined products the ratio will run even higher.

Textiles and shoes and leather products once dominated the state's production. Now they're down to third and fourth place, respectively, as contributors to factory output—textiles 10%, shoes-leather 9.5% of manufacturing jobs and roughly the same share of value added. Their places have been taken by electrical machinery and electronics along with scientific items used by industry and the military—more than a fourth of the total production and the ratio keeps increasing.

Manufacturing was split 50-50 between soft and hard goods a few years after the war and in 1950 the state made the transition permanent. The gap continues to widen as scientific industries grow in importance and soft items recede.

Tightly Packed • Massachusetts' industrial and population center is in the eastern end of the state. Nearly half the population of New England is within a 1½-hour drive from mid-Boston. This area also encloses about half the Northeast's industry, including the famed collections of suburban-type scientific plants along Route 128 (see story page 102).

Seventeen Massachusetts cities are in the 50,000-upward class, led, of course, by Boston. Most of them are old, centuries old. And most of them are modernizing their streets, their worn-out blocks and their residential areas to cope with traffic jams and enable many of their residents to work in cities 10 to 50 miles away.

Growth trends conform to the New England pattern, the population and industry showing gradual rather than spectacular overall expansion—the usual trend in mature industrial regions.

Eighty-five percent of the people live in urban areas.

Communities in the 50,000-upward class include Arlington (49,500); Brockton (63,000); Brookline (65,000); Cambridge, near the heart of Boston (125,000); Chicopee (57,000);

Massachusetts at a glance

- Population has passed the 5 million mark.
- Civilian labor force of 2.1 million.
- Manufacturing is over half the $4 billion total payroll.
- Main industries — electronics, electrical and scientific machinery and assemblies; textiles (quarter-billion dollars a year), shoes (100 million pairs a year), textile machinery (50,000 workers, $40 million annual production), transportation equipment, plastics, rubber goods, paper-pulp.
- Top U.S. producer of chocolate candies ($25 million payroll).
- Birthplace of America; hundreds of historic shrines.
- Tourism brings in $350 million a year to Berkshires, Nantucket and Martha's Vineyard, Cape Cod, Cape Ann, North and South Shores.
- Biggest brain factory in nation (see research-education story page 89).
- State Business Development Corp. has added $70 million in payrolls in five years; 140 local and private development units in operation.
- Highly diversified industry and balanced economy.
- Agriculture output runs $200 million yearly—hay, poultry, eggs, dairy products, truck crops. Cranberry crop is $10 million, over half of U.S. total.
- Fishing is the oldest of all industries, $30 million a year. Three people work in processing for each fishery employe.
- High state debt—$109 per capita compared to $22 in Connecticut.
- Over 225,000 employed federal, state and local governments.

Everett (45,000); Fall River (105,000); Haverhill (47,000); Holyoke (56,000); Lawrence (75,000); Lowell (98,000); Lynn (98,000); New Bedford (108,000); the Newtons, a series of interlocked towns (91,000); Pittsfield (58,000); Somerville (96,000); Springfield (170,000), and Worcester, second largest city in the state (212,000). Most of these cities have contiguous or other nearby communities.

Taxes are high in Massachusetts, bringing constant moans from General Electric Co., Raytheon and other major employers (GE has 30,000, Raytheon, the leader, 35,000 employes in the state). Occasionally they throw out hints about moving to states where social welfare levies such as high unemployment benefits are less of a burden on industry. State officials reply that so-called tax incentives of other states tend to attract marginal industries. They remind employers that the state has a skilled and stable labor supply with a low work-stoppage rate.

Story of Worcster • Worcester has some of the heaviest industry in New England, or anywhere else. One of the big closed-die forge presses at the Wyman-Gordon plant in outlying North Grafton exerts a 50,000-ton squeeze that makes huge airplane spars. There's no equal to this squeeze in the world, and there's hardly a big jet operating in civilian or military service without Worcester ribs, wheels and other forgings. It takes an hour to walk around this modern plant and it's so clean you could eat lunch off the floor.

Downtown Worcester is all chopped up pending completion of elevated highways, commercial parks and other projects that will promote its transportation and distribution efficiency. None of this rebuilding will be allowed to soil the old public square and its stately trees. The city has a subnormal complement of office buildings simply because the 625 manufacturing plants have millside offices.

The city of Worcester lost six plants from 1956 to 1958—633 to 627—but suburban plants gained from 132 to 179. Annual payroll is around $350 million, 85% from manufacturing. Four insurance companies have home offices and there are seven colleges and universities.

Norton Co., with 5,000 jobs, is the largest Worcester employer. It makes wheels and abrasives. Graton & Knight is the world's largest producer of industrial leather products. Crompton & Knowles makes textile looms used all over the world. Wyman-Gordon's older plant, inside the city, began to boom as a principal source of crankshafts for the auto industry. Actually, Worcester makes few end products. Naturally it was late feeling the 1957-58 recession, and was late getting over it.

The city has raised about $70,000 for an efficiency study by Arthur D. Little Inc. It is a food distribution center as well as a focal point for trucking and freight car exchange. Many residents work in the Boston area. There's an architectural curiosity—hundreds of three-story, frame box-shaped apartment buildings of old vintage.

Story of Springfield • Springfield, like Worcester, is enjoying the efficient Massachusetts Turnpike. The Linear City concept of an approaching solid metropolis from Washington to Boston moves northward from New Haven and Hartford to Springfield, then moves through Worcester to Boston.

A rail and highway intersection point, Springfield has a new six-lane express route running from Hartford through Windsor Locks. This will speed access to the enormous aviation plants at the two Connecticut cities. Actually, Connecticut bleeds into Springfield's economy. The city has six access points to the Massachusetts turnpike, providing new industrial sites.

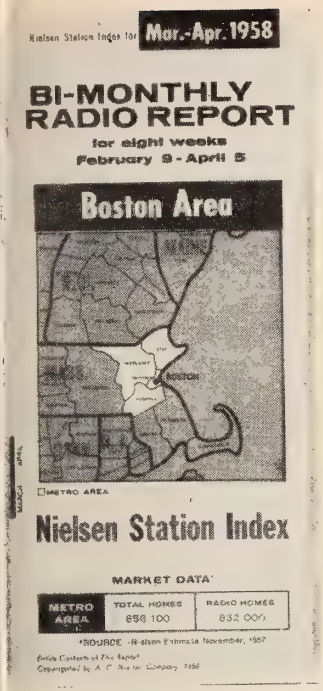
Business and industry are increasing though a shift of a Westinghouse appliance unit to Ohio gave Springfield a 1,500-job jolt.

The Springfield armory was laid out by George Washington as an ammunition dump, instigating the city's famed firearms industry. Westover Field is a Strategic Air Command base with 6,000 military and civilian employes. The city's civic leaders are working on redevelopment projects. Impact from the recent recession wasn't serious. Late spring business was described as much better than 1958. American Bosch Arms Corp. is adding a $1½ million plant.

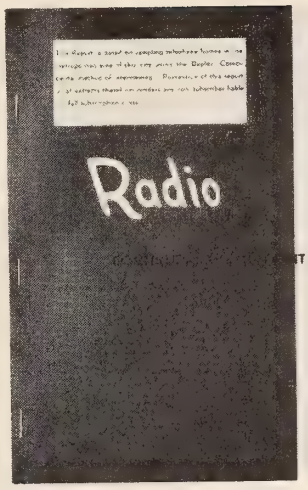
Worcester and Springfield, 38 and 89 miles respectively from Boston, get red-necked at Bostonians who think Massachusetts is bounded on the west by Route 128. Eventually they figure to be the western finger of a built-up metropolitan area reaching westward from the Atlantic.

Other Cities • Within shopping distance of Springfield is the paper city, Holyoke, where the Connecticut River drops 60 feet in 1½ miles. Bank paper, writing paper, skinny paper, thick paper, wrapping paper—name it and Holyoke makes it and has been making it for 1½ centuries, aided by availability of water, water power, textiles and the other ingredients of paper. Chemical, wire, Church toilet seats, pumps, belting and other plants help support the community.

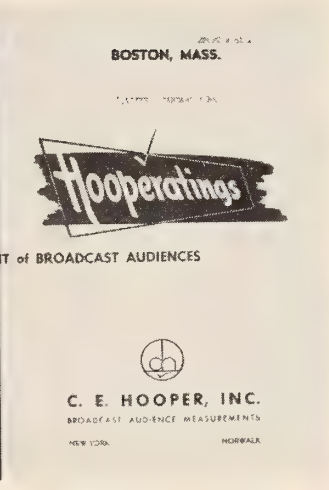
Off by itself in the far western end of Massachusetts, Pittsfield is headquarters for the glamorous Berkshires. One of Pittsfield's papers is fancier than Holyoke's best—the tough, speckled sheets turned out by Crane & Co. at Dalton, a suburb. The annual Crane crop from its Dalton plant is worth $2.5 million f.o.b.; when the U.S. Bureau of Engraving puts pictures on this paper, it's worth $8 billion in currency. Crane uses a 50-50 mix of new linen and cotton at its 157-year-old plant to provide the makings for paper money. A few miles south at Lenox they make wrappings for cigarette makings, another fancy grade of paper.



Pittsfield has a tremendous GE plant (transformers), Berkshire woolens, Wyandotte worsteds, Eaton, and other important industries.



These are some of Massachusetts' cities outside the Boston area. Four textile cities—Lowell, Lawrence, New Bedford and Fall River—are moving ahead despite the textile decline (see story page 82). Brockton, Brookline, Chicopee, Everett, Haverhill, Lynn, the Newtons (Newton Center, East Newton, North Newton and countless other Newtons), Quincy (pronounced Quinzy) and its Bethlehem shipyard, Somerville —these and many others take important roles in the state's economy.



Massachusetts is cashing in on its colonial history, recovering from its textile history, and making scientific history. The Adams, Lowells, Cabots and others built solidly and well.

AROUND A VENERABLE CITY

It's the biggest collection of attractive industrial parks anywhere, New Englanders like to say when they talk about the 65-mile Route 128, a belt-line factory strip that circles the main built-up part of old Boston. Electronic Highway, it's called.

Three decades ago there was no such word as "electronics." Route 128 was a country trail that ambled around the gentle roll of farms and forests but it fed misty dreams of a super-road that would unsnarl Boston's tangled traffic.

Mid-summer 1959 offers living proof that traffic could be unsnarled —in part, at least. It offers too, and this wasn't in the dreams, a high-speed artery lined with new and efficient industrial plants—living proof that factories can be beautiful. Some 120 of the bigger installations along Route 128 are plotted on this map. There are a hundred other establishments in operation.

Circle of science • Route 128 around Boston is dotted with modern, efficient plants where engineering ingenuity and the needs of the space era are being met. This is RCA's Burlington plant, the company's first in New England.

Boston's magic circle route CONTINUED

The chronology of Route 128 runs like this: begun 1936; finished 1951; eight-lane expansion now under way in busiest part. Its commercial and industrial growth is another story. Here are high spots:

1951—Bomac and Sylvania decided to build factories at Beverly and Woburn. New England sensed that a new idea might be in the making—a series of planned industrial parks within range of downtown Boston but outside the central confusion of a multi-million populace.

1955—39 industrial plants built and operating, 14 on the way.

1957—140 plants operating, 18 on the way.

1959 (summer)—250 plants, office buildings, industrial parks, shopping centers, large service facilities operating, under construction or well into the planning stage.

1965—Anybody's guess. It could double by then.

Electronic Highway starts near Gloucester, northeast of Boston, circling counter-clockwise across the path of Paul Revere's midnight ride almost to Hingham on the South Shore.

The circular express road was a good investment. Already it had led directly to $1 billion in buildings, retail business and employment. Investment in new plants siding the strip is $140 million. The new factory-home investment is placed at a half-billion dollars.

Within five-minutes or so drive are 500,000 people, thousands of new homes and new service facilities.

Land worth $400 an acre a few years ago now runs from $1,000 up to $26,000. Total investment in land, plant and equipment averages $77,000 per acre.

Every road on the Eastern Massachusetts map including the new cross-state turnpike runs across 128. Toll and high-speed roads fan out to Buffalo, Cleveland, Philadelphia, Baltimore, Washington, Pittsburgh and on to Chicago. A good driver can make it to Chicago in 17 hours, with a little help at the wheel.

Rail and Air Access • All main-line New Haven trains stop at the only station named after a road, Route 128, with 1,500 passengers a day getting on and off trains. Many use a big parking lot. Boston & Maine and Boston & Albany provide service to plants and communities.

Starting point • Cloverleaf intersections like this on Route 128 are surrounded by more than 100 major electronic and scientific plants and laboratories.

Route 128 has three airports—Beverly, Bedford and Norwood. The landings and takeoffs at Bedford run at least 33,000 a year (6,500 commercial, 23,000 other business, 6,500 military). There's a lot of private-plane traffic; Raytheon alone has a fleet of 12 planes. Helicopter business is increasing, so is air freight.

The Route 2 intersection near Lexington is the site of a new concept in scientific industry—a $12 million office-research park development within musket-fire range of the first battle of the American Revolution.

Cabot, Cabot & Forbes is building the park to meet demands of the growing electronics, nucleonics, avionics, astronomics, computing and precision plants located along Route 128. It will occupy 225 acres, providing the quiet and restful surroundings which are conducive to inspirational thinking and planning.

Raytheon Mfg. Corp. will be the first tenant. Its executive quarters, directing the scientific projects that keep 40,000 men busy, will occupy the first building, with 100,000 square feet of thinking and planning space. Raytheon will move in next year.

Research Row • Already more than 60 research firms line the Electronic Highway. More, many more, are on the way.

The package plan of industrial park development was developed by Cabot, Cabot & Forbes scarcely a decade ago. Two of Boston's Cabot clan and Forbes had started a real estate firm in 1909. They figured it would make sense for one company to supply engineering and architectural services, serve as a com-

WPRO-TV

THE INFLUENTIAL STATION OF SOUTHERN NEW ENGLAND

For the past four years, a sort of "mutual admiration" has been going on between southeastern New Englanders and WPRO-TV.

Beginning at 9:05 A.M. Sunday, March 27, 1955 . . . the years have increased many times over the ties that unite us.

You can see this in all departments at the "pro" station . . . for careful hands serve with the highest measure of creative enthusiasm.

In the community . . . whether it be for one voice or many . . . from a Cub scout circus to a United Fund Drive . . . all interests are served with compassion.

In return for recognized excellence in local news coverage . . . for 9½ hours of creative children's programming . . . the CBS-TV lineup . . . 12 top syndicated half-hours . . . viewers in the concentrated Providence-Fall River-New Bedford market have lent us their eyes and ears and hearts. Look closely at the **May** Nielsen.

And for choice avails, call GENE WILKIN, WPRO-TV or BLAIR-TV.

This is the station that SELLS!

CAPITAL CITIES TELEVISION CORPORATION

WPRO BUILDING • 24 MASON STREET • PROVIDENCE 2, RHODE ISLAND

New in old Boston • This $100 million Prudential Center, now under way, is called largest integrated unit in world.

mercial and construction company, handle real estate details and provide capital. This drastic innovation in industrial development originated in supposedly conservative Boston.

Daniel G. Wheeler, CCB vice president, described the thinking back of the idea—availability of engineering and scientific talent; good transportation; quiet, attractive surroundings; parking space; nearness to research and educational centers; prestige; easy financing; acceptance by adjacent communities.

With all its growth, Route 128 is less than half-built. CCF, with a staff of 600, has 11 industrial parks in Massachusetts alone, most of them on Route 128. R.M. Bradley & Co., Nordblom Co., Neelon Assoc. and others are developing various versions of the industrial-park package idea to meet the needs of industry.

Concededly, 78% of the Route 128 investment comprises relocated plants, as a recent MIT survey points out, with 22% new entries. But many of the relocated industries were once little loft and basement projects in cramped, inefficient Boston quarters.

Electronic Highway is proving that industry can be glamorous, and profitable, too.

Work has begun on a $180 million speedway 15-to-18 miles outside circumferential Route 128.

Metropolitan area includes 54,000 firms with $3¼ billion payroll and 812,000 employes, according to a recent counting.

Boston insurance and investment houses control the destiny of billions of dollars. Boston capitalists helped build the South with Boston money.

It's the U.S.' fifth largest manufacturing center ($1.3 billion payroll).

Greater Boston

They almost had another Boston tea party in May—a 1959 commemoration of the pre-Revolutionary dumping of His Majesty's tea. This time Boston's anger was aimed at the June 1959 *Esquire,* which practically consigned the city to economic oblivion.

Bostonians were piqued when they read the harsh predictions but instead of purloining every available *Esquire* from newsstands and staging a midnight harbor party they decided to take a new look at their resources and prospects.

A professional city appraiser wrote as follows in *Esquire:* "Boston has no future unless it gets great planning and greater luck. Like New Bedford, it's lost out as a port and it's still dependent on two declining and departing industries—textiles and leather."

These gloomy comments fail to stand up under three weeks of on-the-scene observation around Boston.

First, the planning situation, about which *Esquire* was skeptical.

Change of Face • Boston has been dynamiting, bulldozing, tunneling and constructing for years. Old Boston is becoming contemporary. The city teems with planning. Here are some of the in-city developments:

• Prudential Center — $100 million group; 31 acres that once were the Boston & Albany Back Bay yards. Ground was broken last April 3 on a 52-story Prudential Tower.

• Government Center—$78 million, 32-acre project to house federal, state and city offices. Possibly another $50 million of private buildings. Work is slated to start this autumn.

• West End Development—48 acres of tenements cleared for 2,400-apartment center; cost around $50 million.

• *Herald-Traveler* and WHDH-AM-TV center—22 acres built around $11 million media center. Newspaper already has presses running.

Port Activity • Next, *Esquire's* comment on the port must be matched against these figures: Tonnage, April 1959—1.5 million; April 1958—1.44 million. The port has not lost tonnage; rather its percentage share of national shipping has dropped as other areas and ports increased their business.

Dependency on textiles and leather, two declining industries?

Here is a boil-down of the situation: Boston is one of the most diversified regions in the United States and has been right at the top in industrial planning. It depends neither on textiles nor leather. Its dependency, on the other hand, is undergoing a transition from soft to hard goods—metal products, machinery, electrical and electronic goods. Boston's most dramatic development has been the rise of electronic and scientific industries. Its Route 128 is unequaled (see page 102).

And *Esquire's* statement that the first big suburban shopping center in America (Shoppers World, Framingham) was "the first one to go broke" wasn't written by anyone who parked in one of the 6,000 places and looked around the busy dome-shaped Jordan Marsh department stores or any of the 50 other stores and shops. Shoppers World, an innovation, started slowly in 1951. Now it's doing $25 million in retail sales a year and a $1½-million addition is planned.

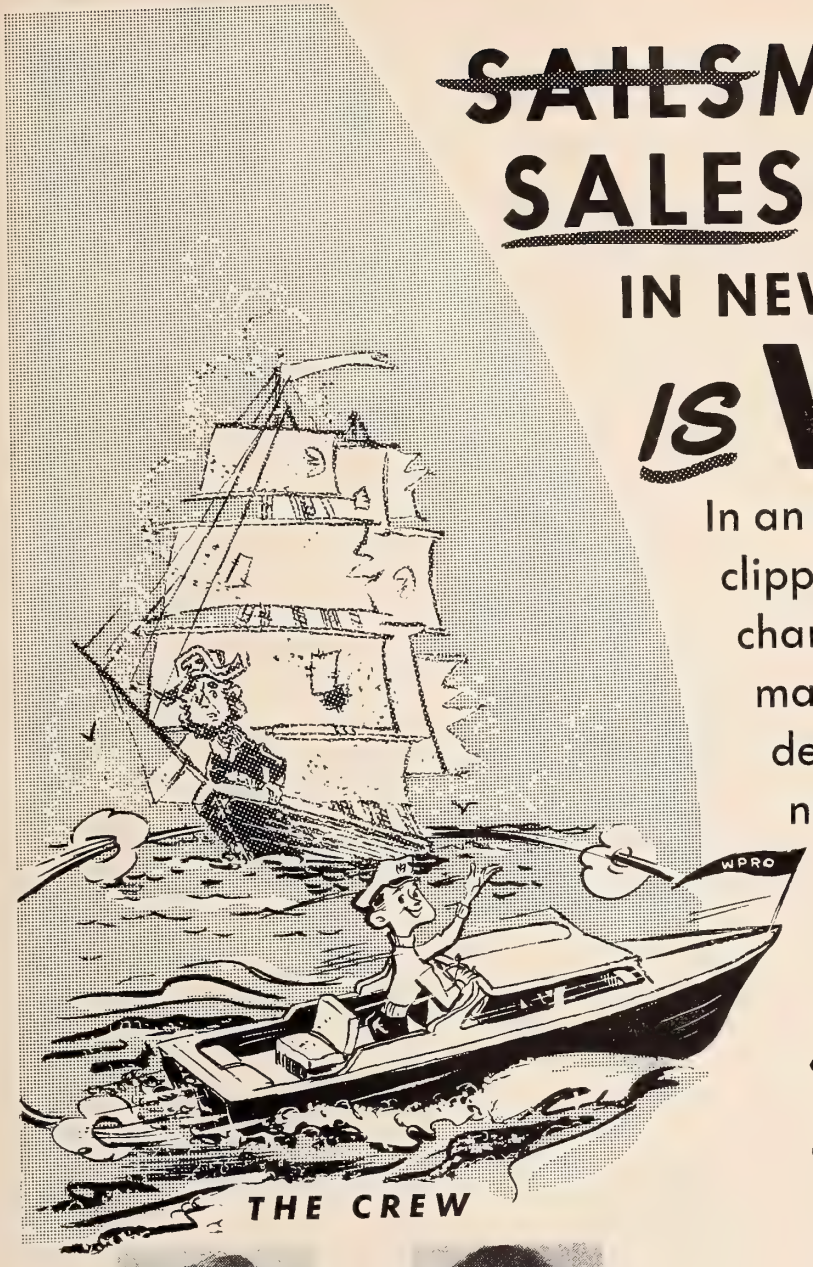
Run-Down on Boston • Here are some pertinent facts about Boston's economy in mid-1959:

Non-agricultural employment: April 1959—983,000; April 1958—973,000.

Factory jobs: April 1959—288,000; April 1958—276,000.

Business is better than last year though there are some soft spots this summer, including wool, shoes and small metal-working plants. Some minor drops occurred in service industries.

Boston has added 100 major new industries in four years.



Eleven home-based insurance companies employ 30,000 Boston people; insurance agencies and brokers another 120,000; financial houses provide many well-paid positions.

Greater Boston, as defined by the Chamber of Commerce, embraces 83 cities and towns with 2.8 million population. This is the sixth largest metropolitan area in the U.S. and fourth largest wholesale center ($6 billion).

It is the wool wholesaling center of the world.

Total labor force of this area—1,200,000.

ASK YOUR BLAIR MAN

DIVERSITY IN NEW HAMPSHIRE

Mills and tourism bring money into state

The triangular state of New Hampshire matches its three-sided geographical pattern with a rising economic trinity—employment, income and population. All three of these factors show steadily soaring tracks on economists' charts.

This rocky area's 3½-century background of tough individualism finds civilization's progress making important changes in its commercial and living habits. Manufacturing is gaining despite the normal New England textile decline, especially in southern Hillsboro County (Manchester and Nashua) where a third of the state's population dwells.

Hillsboro's hills are dotted with factories, many of them new. Shoes and textiles are now sided by electronics, metal products and other types of industries that give the section the variety it needs. Manchester is famed for one of the all-time textile calamities—closing of the Amoskeag mills in 1935, largest textile cluster in the world (see page 82).

Manchester citizens recovered from the blow, and neighboring Nashua overcame a similar catastrophe that followed shutdown of the Textron plant (3,500 employes). The long pull back by both cities is recorded in many accounts of the textile decline.

State Promotion • The success of local cooperative projects led to formation by the state in 1952 of New Hampshire Business Development Corp., second of the sort following Maine's ground-breaking effort. Pooled funds were loaned for business undertakings. In 1955 New Hampshire Industrial Park Authority was set up to find industrial sites of the newer suburban type. The state provided a revolving fund, out of which have come two industrial parks and several new plants.

Outside industry liked the state's tax structure, some plants moving across the line from Massachusetts. Several years ago the state's technical labor supply had dwindled but there's no longer a worrisome lack of technicians and engineers. New Hampshire's unemployment ratio is below the national average.

Summer and winter tourism is developing; spring and autumn are coming along slowly. Tourism, bringing in $225 million annually, is based on breathtaking mountains; 1,300 lakes and ponds; fancy ski tows and other facilities for the skiing set; historic shrines, and several busy beaches on the short shoreline. The state is often called Boston's Playground, but its tourist logs show heavy entries from the eastern half of the nation. Better roads are being built and will be a big help, as will new motels and tourist lodgings. Lake Winnipesaukee has 72 square miles of area. The state claims the greatest concentration of ski areas in the nation.

Agriculture is just about holding its own, though poultry, eggs and dairying are doing well; apples are, too.

Optimism in the Air • Everywhere around Manchester, Nashua and Concord, the capital, there is a feeling that New Hampshire's industrial future is bright. Raytheon and other names that mark the newer economy are familiar around the southern strip. Two-fifths of all income comes from manufacturing, well above the U.S. average. Shoe plants can and do turn out millions of pairs a year. Concord granite is famous. Lumber and wood products are important along with pulp and paper.

Manchester is strong and healthy, its economic developers say with conviction as they look around this modern city of 85,000. They document an increase of 10,000 jobs and doubled payroll since World War II. Unemployment is down—less than the wartime peak—and even textiles are doing better than a year ago. Manchester still has many textile mills, including Chicopee with 750 employes. This year looks better than 1958 and 1958 was better than 1957. The largest metropolis in New Hampshire looks back to Amoskeag and displays this label, "The City That Refused to Die." Jack Tuelon, the city's industrial development agent, is doing a brisk promotion job.

When anybody brings up Nashua's textile collapse, the municipal boosters cite this boxscore: shutdown Textron, 3,500 jobs lost; 19 replacement plants, 3,700 new jobs. Nashua worked hard to fill all that empty floor space after Textron left. Keene, another city in the southern strip, is now diversified with machine tools, metal products, American Optical, Pittsburgh Plate Glass and Pepperidge Farms frozen foods. An industrial park is being built on speculation. Miniature Precision Bearings employes 500. Keene's population is 17,000.

Portsmouth, an ocean port, heard vague rumors about a recession but didn't consider it a matter of much local concern. A historic city of 22,000,

ALONG AMERICA'S APPIAN WAY WITH A SENIOR EDITOR

The map (right) charts the spring itinerary of J. Frank Beatty, BROADCASTING senior editor, who roamed all over New England in search of the facts about the region's recovery. The field trip was preceded by a comprehensive roundup of basic research and reference material on the region.

Hundreds of contacts were made in 2,500 miles of economic foraging—corporation presidents and clerks; industrial leaders and plant workers; bank executives, economists, advertising agency executives, research people and scientists, university professors, chambers of commerce, policemen, cab drivers, civic officials, journalists, fishermen, electronic specialists, real estate and factory development promoters.

it also has military neighbors who feed the civic kitty—Navy shipyard, $3 million monthly payroll; Pease Air Force Base, $2 million. Only commercial harbor in the state, it has oil, coal and gypsum coastwide traffic. At the shipyard a big 5,600-ton submarine now on the ways will cost $100 million and take three years to build. It's twice as big as the renowned *Nautilus* and will toss a Polaris missile 1,500 miles.

Concord, 29,000, has the customary state and federal payrolls that mark a capital city. Its industrial progress was marked recently by the new $2 million laboratory of Nuclear Metals Inc. Other cities are Berlin, 17,000; Dover, 19,000; Laconia, 16,000.

RHODE ISLAND'S TRANSITION

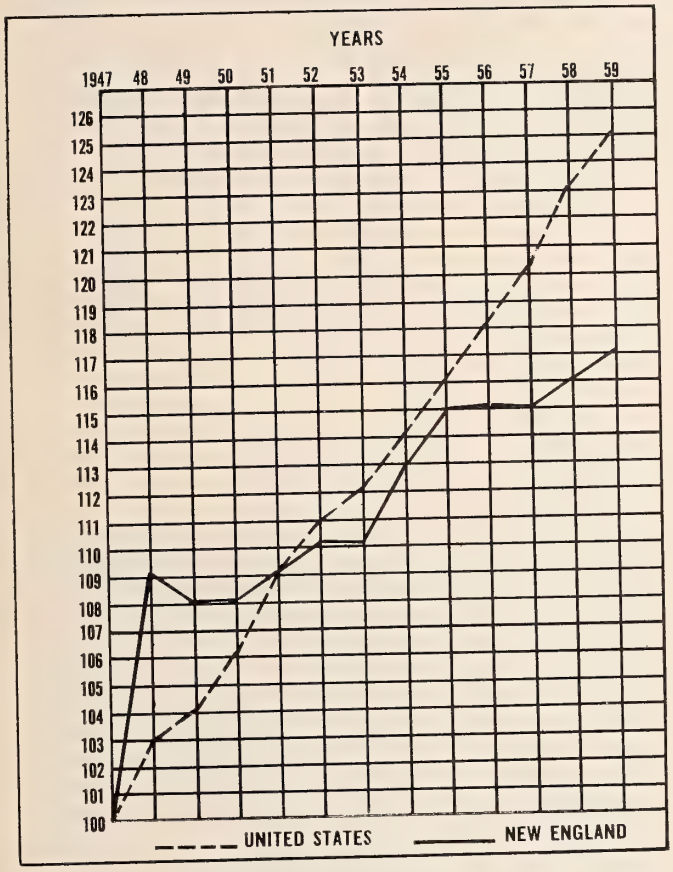
Business climate, industry show progress

Rhode Island is shedding its title of gloom headquarters for New England.

The smallest state in the union is donning the largest economic grin as the early summer business picture shows encouraging signs—the most encouraging in years.

There's a simple reason for this bright posture in a state that has more than its share of industrial miseries: Employment and payrolls are running 10% ahead of spring 1958.

The early spring recovery broadened as summer approached. Jewelry is getting more active in anticipation of the fall season. Textile recovery from the depths of a semi-collapse is continuing. Berkshire-Hathaway, with four of its seven mills in Rhode Island, showed a profit in the first quarter. A profitable textile quarter is big news in Rhode Island.

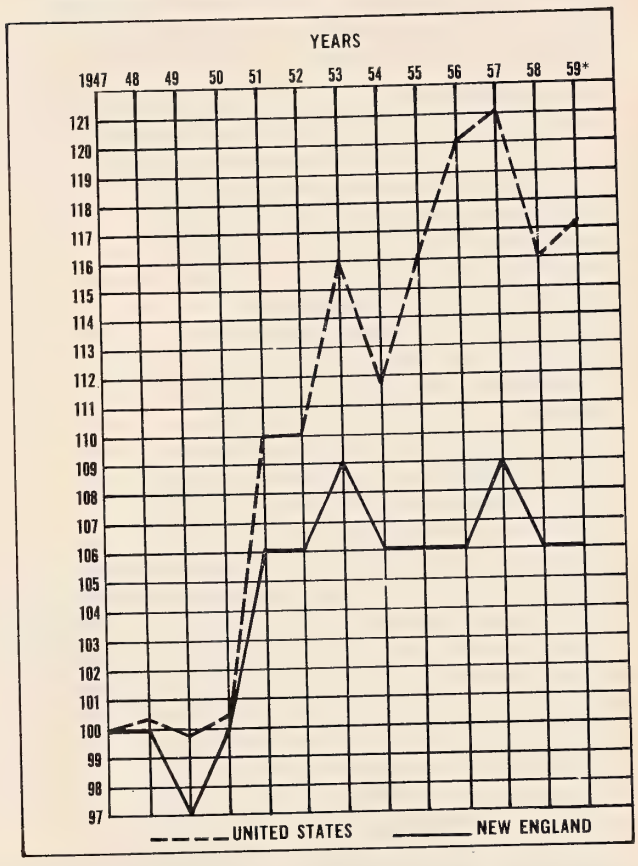


Retail business is steady; consumers are in a spending mood. Summer usually brings a let-down in July and early August, but Providence business indicators pointed to a lesser let-down than usual this season.

Not a Boom • Rhode Island's improved business countenance isn't to be construed as anything of boom proportions. The state has known so much trouble in recent decades that even an easing of a downward trend is welcome. The current year hasn't had an industrial tragedy of major concern, but last year the door-shutting of Nicholson File, throwing nearly 700 out of work, was hard to take.

Nicholson File had been in Rhode Island since 1864. It pulled out because of foreign competition, loss of export business and production problems ascribed variously to the state's unfavorable industrial climate, long mileage to steel mills and the company's more efficient plants in Indiana and Pennsylvania.

This problem of industrial climate—the political attitude toward business and industry—has plagued Rhode Island for years. Company executives have complained that the record unemployment tax, corporate levies and "welfare state" legislation have made corporate life difficult.



REGION'S POPULATION UP 17% BUT TRAILS U.S. AVERAGE

New Hampshire at a glance

- Small, rugged and mountainous; spectacular scenery.
- A northern spur of the Boston industrial complex runs to Manchester.
- Main income sources—manufacturing, tourism and agriculture.
- Population 575,000.
- Civilian labor force 220,000, with 80,000 in manufacturing.
- Leather and leather products employ 21,000, textiles 14,000.
- Five-sixths of state is forested.
- Pioneer in cooperative industrial development projects.
- Tax structure considered favorable to industry.
- Unemployment ratio below national average; wages are low but rising.
- Mount Washington towers 6,288 feet.

Identifying Problems • The crisis came May 12, 1957, when the *Providence Journal* published a "What's Wrong With Rhode Island" section. George H. Arris, the newspaper's financial editor, wrote an extensive wrapup of state problems and the way five New England states were building for the future while the State of Rhode Island and Providence Plantations (official name) legislated industry and jobs away.

Reaction was prompt and intense. A close student of economics, Mr. Arris and the *Journal* easily survived the storm. The state took a frank look at its resources and problems, with business leaders setting up three months later what became known as the Weekapaug Group, named after the inn where they first met. A "Program for the Future" was drawn up in May 1958 and a frank industrial balance sheet was published last autumn.

Industrial Foundation of Rhode Island, a non-profit private venture, was formed, with another unit to join with banks in covering development costs. Rhode Island Industrial Building Authority was set up as political leaders caught the spirit of the movement. A major step was passage of a law designed to shift the uniform 2.7% unemployment tax to a merit basis in 1960 for the benefit of employers with low turnover. This in itself improved the climate tremendously.

The Rhode Island textile slump is told this way—66,700 textile jobs in 1947; 30,600 in 1958. Cotton-synthetic output is becoming more important as the woolen-worsted decline, a nationwide trend, continues. Woolen-worsted jobs dropped from 30,000 in 1947 to 8,700 in 1958.

Electronics Birth • Rhode Island's industrial assets promise a good poten-

The Editors

Rhode Island at a glance

- Tiny in area but a highly concentrated industrial state.
- Population 840,000.
- Factory employment—averaged 118,000 workers in 1957, 118,400 in 1958 and rising slowly.
- Unemployment claims were 30,000 in spring of 1958; 18,818 in 1959.
- Textiles were down in early 1958, picked up and the trend continues; transition from soft to hard goods is progressing, giving state better industrial balance.
- Modernization is helping some textile plants in the state.
- Jewelry, low and medium-priced, has seasonal dips but is now on a pre-autumn upswing; chemical industry is growing fast.
- The political approach to industry, long an employer's gripe, is improving; unemployment tax is 2.7% of payrolls.
- Rhode Island Development Council and related groups are hot after new industry but it's a long pull.
- Agriculture is mostly dairying.

tial for the metal trades, including jewelry, electronics, instruments and computers. Other New England states took the lead in electronics development, but Rhode Island now has 32 plants employing 3,600 persons. The state has a good strike record, a renowned reservoir of highly trained labor and a reputation for quality production. The low-wage structure is a problem and displaced textile workers are hard to fit into the labor market. A sixth of the factory workers, 22,000, are in jewelry.

Resources of the state, with maximum reach of 48 by 37 miles, include 400 miles of coastline, ample water, forests (67% of total area), nine colleges and universities, two race tracks, and tourist attractions.

Using a one-gallon-of-gas motoring yardstick (big car), the perimeters of Providence hold close to 700,000 people, about two-fifths of whose income comes from industry. Like other New England cities, Providence combines attractive and unsightly sections. It is working on a downtown improvement project. A tour through the area around the Sheraton-Biltmore Hotel, the Capitol and the Outlet Co. store reflects the business improvement.

Other Cities • Northward against the Massachusetts border is Woonsocket, with a 53,000 population. The city was one of the most active in the development movement, raising $400,000 to finance new industrial buildings and revamp old ones. Eastern Plastic Materials Inc. has moved into Slatersville Industrial Park. Woonsocket could use some more industries and it's out after them. Its new electronics plants are expanding. General Transistor Corp. is operating in the old Dunn Worsted Mills and plans to expand. Luckily textiles are improving in Woonsocket.

Newport, 40,000, is a tourist spot and has an $80 million Navy payroll. The base also employs several thousand civilians. Business generally is up a little. When the ships are in, business is terrific; when they aren't, it's fair to good this year. Yacht races help; so did President Eisenhower's visit last year.

Other cities are Cranston, Pawtucket, E. Providence, Rumford, Warwick, and others in the Providence trading area: Westerly, 13,000; Bristol, 13,000.

VERMONT EYES THE FUTURE

Industry joins farms, granite, maple syrup

This is Vermont's big tourist year. The state is expecting over a million visitors to help celebrate the 350th anniversary of the discovery of Lake Champlain, once the main artery from Canada to the colonies. The lake's long shoreline and the Green Mountains are picking up tourist business, $120 million yearly, but not as fast as their natural charms warrant.

Vermont has the highest U.S. percentage of farm income from dairying, close to $100 million a year. Most of the dairy products go to Boston, along with the eggs. Vermont boasts of the flavor of its milk and eggs, and its maple syrup, too. Two-fifths of all U.S. maple syrup comes from Vermont buckets. Last spring was a low-producing year but the price is good. The all-time sugar record was $3.2 million in 1957. Vermont is a brown-egg state, like much of New England.

Income and wages are below the national average. Industrial activity is growing along with non-manufacturing employment. Highway, air and rail communications are developing, with great hope for an interstate north-south highway tie-up and a cross-state spur

NBC OWNED · SOLD BY NBC SPOT SALES

Westport's WMMM

WESTPORT, CONNECTICUT

Success...

is a measure of faith in people

Five days a week these bottles — up to 400,000 per day — provide a graphic tribute to one man's dream, to the imagination that conceived it, and to the tenacity that pursued and ultimately achieved it. These bottles are simultaneously a tribute to that man's faith in New England and its people who have made the dream a reality. Every bottle of LESTOIL carries with it a background of research founded on professional integrity that has made this all-purpose liquid detergent an ever-present, ever-growing example of New England industry.

LESTOIL's success is factually represented by over 6,500 TV spots per week on 225 stations, all contracted on a solid, 52-week-a-year basis which utilizes an annual budget of over $10,000,000. *This is faith in the future!*

The success of LESTOIL is synonymous with the promise of New England as a fertile area for all industry that counts imagination and progress among its basic assets.

LESTOIL, INC. **HOLYOKE, MASS.**

A subsidiary of Adell Chemical Co.

Vermont at a glance

- 1,000 factories employing 40,000.
- $115 million farm income, 80% dairy.
- Industrial activity growing, especially in electronics, plastics and metal products.
- Extensive quarrying—granite, marble, slate and asbestos.
- Tourist attractions are outstanding but developing slowly.
- Coast on Lake Champlain.
- Population 375,000.
- Only N.E. state getting St. Lawrence electric power.
- High income tax.

to Montpelier and Burlington.

Vermont's granite is sold all over the country. Rock of Ages Corp. employs 500 at Barre, near Montpelier. The state is the No. 1 asbestos producer and is also high in the mining and processing of colored slate.

Snow Sport • Skiing is helping the tourist business, bringing in around $25 million. The natives recommend a Green Mountain Cocktail to winter sports lovers—rum, maple syrup and hot water. It's said to melt the icicles off numbed toes.

Easily the largest city in the state is Burlington with 38,000 in the main built-up section and a metropolitan population of 67,000. Industries are moving into Burlington. International Business Machines Corp. picked the city out of a list of 200 despite oft-heard talk about high state taxes. The city's living charms were a factor plus transportation facilities, low utilities costs (electric rates were cut when St. Lawrence Seaway energy was fed to the state), manpower availability, cultural climate and civic facilities. The sunset view across Lake Champlain toward the Adirondacks can match anything in the nation.

University of Vermont has 3,000 students and St. Michaels College 950. Ethan Allen Air Force base has the fast F 102 plane with newer models coming. The base payroll is $3 million a year, wth construction underway for Bomarc facilities.

Burlington has a Friendship Fountain lake-front project that will be 250 feet high and visible for miles. A Champlain cutoff project would join the St. Lawrence to Champlain, making Burlington a seaport. Present St. Lawrence traffic is limited to barges that carry newsprint and petroleum to New York. A $3.3 million federal building project is underway.

Canadian Trade • A lot of Canadian shoppers trade in Burlington. Gas stations have Canadian credit card signs. The city is a distribution point for northern New York, New Hampshire and Northern Vermont. It's two-hours by road from Montreal. A development group is building a plant on speculation for a new industry. Broadcast stations carry Montreal accounts. Canadians flock to Burlington on holidays and weekends.

Vermont is a small-town state. Communities include Barre, 12,000; Bennington, 10,000; Montpelier 10,000; Rutland, 17,000; St. Albans, 9,500; St. Johnsbury, 9,000. Montpelier is the capital city. Work is underway on a modern road from Montpelier through rocky hills to Burlington.

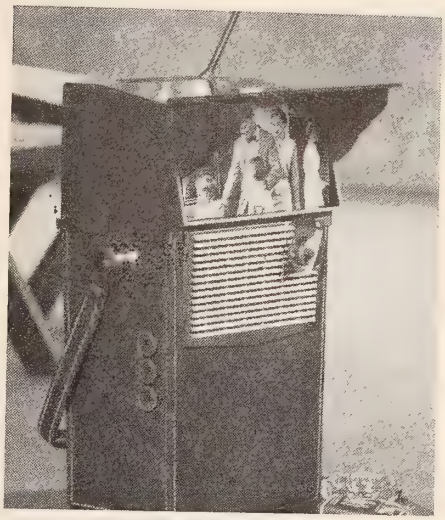
Transistorized tv set introduced by Philco



The transistorized portable tv receiver is here—a commercial reality at Philco and a demonstration piece at Admiral.

Philco, which announced its new battery-operated transistor model earlier this month, showed its new receiver at a press presentation in Chicago's Merchandise Mart June 14 as the summer International Home Furnishings Market got underway. The "Safari" line claims 80 square inches of viewing area—about the same size as a 14-inch picture tube. Embracing the direction-finder concept, Philco uses a two-inch cathode ray tube and magnifies the picture seven times its original size.

Philco plans initial production of 10,000-20,000 units, with the receiver slated to hit the market later this month. The set, weighing 15 pounds and measuring 8⅜ inches wide, 16⅝ inches high and 5⅝ inches deep, comes with a battery good for four hours of viewing. The price: $250 plus $5.25 for battery.

Admiral also demonstrated a transistor, 17-inch tv receiver earlier this month, but is not prepared yet to get into immediate production. It uses 25 transistors instead of tubes. It will be marketed when the cost of the transistors and other components becomes more competitive and "realistic." The company also feels a portable tv set smaller than 17 inches may not find a ready market.

RCA officials reported at their national sales convention in Chicago June 5 that RCA also is working on transistorized tv but questioned whether there is a market for it at this time.

VEST POCKET TV SET

Philco's portable weighs 15 pounds

Collins management forms central council

Collins Radio Co., Cedar Rapids, Iowa, has realigned managerial responsibilities under a central management council.

Headed by its president and board chairman, Arthur A. Collins, the council comprises L.M. Craft, new operations executive vice president with the responsibility of coordinating research, development and product lines; R.S. Gates, finance executive vice president; H.V. Gaskill, planning vice president; J.G. Flynn Jr., sales vice president; R.T. Cox, new Cedar Rapids Div. vice president; L.E. Bessemer, new Texas Div. vice president; M.L. Doelz, Western Div. vice president, and M.W. Burrell, new Alpha Corp. [Dallas] president.

Mr. Burrell also directs operations of Collins Systems Div.

Mr. Flynn is responsible for coordinating the sales activities of Collins' government, commercial and international divisions as well as Collins Radio Co. of Canada Ltd., Collins Radio Co. of England Ltd., and Collins Radio International C.A.

Emerson requests look at books of Webcor

Emerson Radio & Phonograph Corp. wants to take a look at the books of Webcor Inc., in which it purchased 20% of the outstanding common stock for $2.3 million this past May.

Emerson filed suit in Chicago Circuit Court Wednesday, naming Webcor; Titus Haffa, its board chairman, and the First National Bank of Chicago as co-defendants. For damages, it requested the court to penalize Mr. Haffa and the bank 10% of the stock owned by Emerson and Benjamin Abrams, its president.

In its petition, Emerson asked that Webcor's books be opened for inspection so it can determine whether warranties made by Mr. Haffa on its assets, liabilities and operations are "true or false" and whether they may have been breached.

Emerson said it had been advised that Webcor engaged in transactions with Mr. Haffa or his relatives or corporations owned or controlled by them. It seeks to study the deals "as to their validity and propriety." The court also was asked to compel the bank, transfer agent for the stock, to permit examination of the record of Webcor stockholders. Mr. Abrams was represented as holding 4,244 shares of Webcor stock, plus 130,000 shares held by Emerson.

Russian tv display

An exhibit of Russian television techniques and production methods is included in the Soviet Exhibition in New York opening Monday (June 30) for 40 days. About 10,000 displays at the New York Coliseum are designed to tell Americans about the culture and aims of the Soviet Union and its people.

• Technical topics

• Admiral Corp., Chicago has introduced a completely transistorized 17-inch portable tv receiver. The new set uses 25 transistors and etched circuits that are standard in Admiral receivers. The company will not mass produce the model until the cost of transistors comes down.

• Raytheon Co's. Distributor Products Div., Westwood, Mass., has started building new headquarters. The structure will cover 60,000 sq-ft.

Radio-tv production in April up sharply

Production of both radio and tv receivers in April increased substantially over April 1958, according to Electronic Industries Assn.'s regular set count.

Radio set output totaled 1,040,183 sets in April (including 422,346 auto sets) compared to 630,156 radios (including 190,435 auto sets) in April 1958. Cumulative output for four months of 1959 was 4,637,859 radios (including 1,786,168 auto sets) compared to 3,255,838 (including 1,043,470 auto sets) in the same 1958 period. Fm set output totaled 31,425 units in April.

Production of tv sets totaled 389,251 in April (20,501 had uhf tuning) compared to 302,559 (22,296 uhf) in April 1958. Four-month production this year totaled 1,779,801 tv sets (123,132 had uhf tuning) compared to 1,523,858 (143,509 uhf) in the same 1958 months.

Radio sales at retail (excluding auto sets) totaled 2,079,804 in four months of 1959 compared to 1,669,554 in the same 1958 period. Tv set sales at retail totaled 1,639,626 for the first four months of 1959 compared to 1,690,101 unit sales during the comparable 1958 months.

OFFICIAL: RADIO WORLD WIDE INC.

Program service organized but it still lacks target date

Radio World Wide, the projected program service conceived by some of the nation's top broadcast properties as their answer to how to live without conventional networks, has been made official. It's now incorporated, has officers and is starting to get down to cases on building a program structure.

At the helm is an executive committee whose members are Herb Krueger, WTAG Worcester, chairman; Paul (Fritz) Morency, WTIC Hartford, and John Patt, WJR Detroit, vice chairman; Victor A. Sholis, WHAS Louisville; E. R. Vadeboncoeur, WSYR Syracuse, and Henry Clay, KWKH Shreveport.

Irvin Gross, vice president, Henry I. Christal Co., station representatives, is treasurer of Radio World Wide. Mr. Gross appears in the RWW executive structure as a representative of WHAM Rochester, in which the Christal firm has 50% ownership.

Charles Cutler, Washington attorney, has been named temporary president of RWW. A permanent president will be selected once the organization goes into business.

Incorporation papers for Radio World Wide were filed in Delaware June 12.

Principals in the organization met last week in New York. Reportedly they discussed possibilities of making arrangements with one of several existing organizations to provide the backbone of the RWW program service.

The word is that Radio World Wide will not rush into operation immediately. A committee was appointed to investigate initial service encompassing news and public affairs programming plus some exchange programs between affiliates. It was learned that at least two existing radio program service companies have made bids to furnish Radio World Wide's news needs—Radio Press and International Transmissions Inc. Conversations had been held earlier with AP, UPI and ABC Radio.

Radio World Wide is set up as a program service which would not itself sell time, leaving that matter to the individual station members.

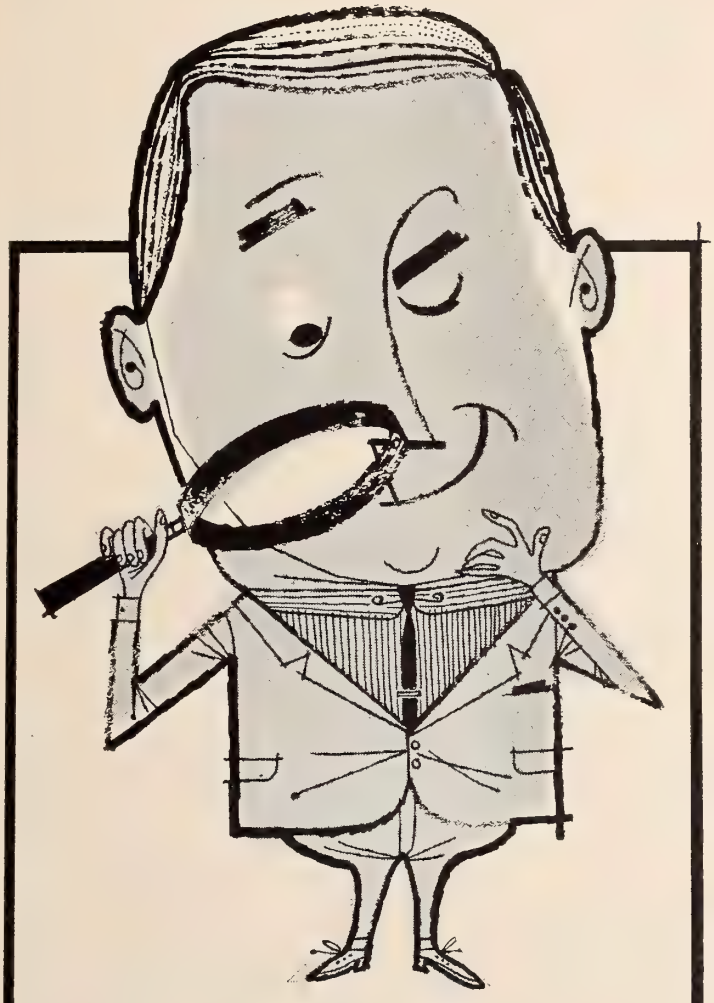
First word of plans for Radio World Wide came in late January (BROADCASTING, Feb. 2), shortly after CBS began its controversial Program Consolidation Plan. It was indicated at the time that 25 stations—all strong stations in major markets—would have to go along with the idea before it became effective. Some 30 stations attended a meeting in Chicago last March to go over those initial plans. It was not learned late Thursday how many had decided to sign. (BROADCASTING reported several weeks ago that 16 stations were definite, with two dozens others possibles [CLOSED CIRCUIT, June 1]).

Promoting tv's image • A special five-man NAB-TV committee drew up a proposed public relations campaign at a June 16 meeting. The planners (l to r): Willard E. Walbridge, KTRK-TV Houston; C. Howard Lane, KOIN-TV Portland, Ore.; Clair R. McCollough, Steinman Stations; G. Richard Shafto, WIS-TV Columbia, S.C.; Dwight W. Martin, WAFB-TV Baton Rouge, La.

TV PUBLIC IMAGE

Information project gets NAB green light

Television's move to acquaint the public with the true story about the medium's service and functions became airborne last Thursday (June 18).



A tv-wide campaign to improve the video industry's image in the public's mind was approved by NAB's Tv Board of Directors. The board adopted a report submitted by Clair R. McCollough, Steinman Stations, chairman of a study committee that has been working out the mechanics of the major public relations operation. The committee has completed its job, which developed out of the NAB March convention (BROADCASTING, March 23).

In essence the project will be backed by $600,000-$700,000 or more a year, depending on how much money can be raised. It will have a New York headquarters but remain under the technical supervision of NAB headquarters. Actual operation of the agency, known as Television Information Program, is expected to be outside routine control of NAB but within its umbrella.

First step will be the appointment of a Television Information Committee of nine members. If all three networks go along with the idea, and the backers hope they will, the committee will consist of one member named each by NBC-TV, ABC-TV and CBS-TV. Three members must be members of

For market data, availabilities and all information, call George P. Hollingbery

the NAB Tv Board. Three others will be named and may include one or more non-NAB members. This committee should be named by NAB President Harold E. Fellows within a fortnight. It is subject to confirmation by the NAB Tv Board and will name its own chairman.

Will Report to NAB • After getting organized, this committee will report to the NAB Tv Board on its policies, research ideas, budget, fund raising and office plans. It will recommend a director who will be located in New York.

The kitty will have $75,000 yearly from the NAB budget plus $65,000 from each of the networks, a total of $270,000—provided all three networks go along with the plan. If they don't, a new deal will be worked out for networks taking part.

Then the committee will start raising money from two types of participants—sponsors (individuals, firms or corporations engaged in operating a tv station or network) and associate sponsors (others who want in on the promotion but aren't eligible to be sponsors). Membership approval is up to the NAB Tv Board.

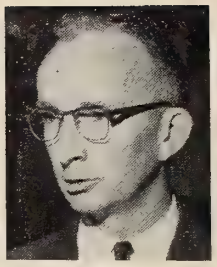
The rate will be the highest published quarter-hour rate as of June 1, 1959 or 40% of the highest one-hour rate. A scale of combination payments for multiple-station groups also will be adopted.

Special Groups Aided • Mr. McCollough said Thursday that his study committee had used information provided by the special group headed by C. Wrede Petersmeyer, Corinthian Stations, for its general guidance. The Petersmeyer group was set up at the NAB Chicago convention when a move developed to find a way of coping with widespread criticism and misunderstanding centering around television's programming and public service.

In other actions Thursday, the NAB Tv Board asked FCC to reconsider its policy to license microwave facilities for transmission of signals to community antenna systems from distant cities (see story, page 62).

William Carlisle, NAB station relations manager, said tv membership has increased from 327 last Jan. 1 to 336. Donald N. Martin, public relations assistant to President Harold E. Fellows, said 231 tv member stations are using NAB film spots promoting the impact of tv.

Attending the NAB Tv Board meeting besides Messrs. McCollough and Petersmeyer, were Chairman G. Richard Shafto, WIS-TV Columbia, S.C.; Payson Hall, Meredith Stations vice chairman; Joseph E. Baudino, Westinghouse Broadcasting Co.; John E. Fetzer, WKZO-TV Kalamazoo, Mich.; C. Howard Lane, KOIN-TV Portland, Ore.; Dwight W. Martin, WAFB-TV Baton Rouge, La.; James D. Russell, KKTV (TV) Colorado Springs; W. D. Rogers, KDUB-TV Lubbock, Tex.; Willard E. Walbridge, KTRK-TV Houston; Alfred Beckman, ABC-TV; William B. Lodge, CBS-TV; David C. Adams, NBC-TV.



NAB RADIO BOARD
Sowell is chairman, Bostic vice chairman

F.C. Sowell, WLAC Nashville, Tenn., was elected chairman of the NAB Radio Board at its Thursday (June 18) meeting in Washington. Thomas C. Bostic, KIMA Yakima, Wash., was elected vice chairman. They succeed J. Frank Jarman, WDNC Durham, N.C., and Robert T. Mason, WMRN Marion, Ohio, respectively.

Mr. Sowell is vice president and general manager of WLAC. He has long been active in NAB affairs. He is president of Tennessee Assn. of Broadcasters. Mr. Bostic, who also has taken part in many industry organizations, is vice president and general manager of Cascade Broadcasting Co. He is mayor of the city of Yakima.

Chairman of the Tv Board is G. Richard Shafto, WIS-TV Columbia, S.C. Vice chairman is Payson Hall, Meredith Stations. Both were elected in March at the NAB convention.

MR. SOWELL

MR. BOSTIC

The Radio Board commended work of the All-Industry Radio Music License Committee and voiced hope it will continue to operate after current ASCAP negotiations have been concluded. A music licensing report was made by Emanuel Dannett, committee counsel.

Radio Month Successful • Donald N. Martin, retiring public relations assistant to President Harold E. Fellows, reported National Radio Month in May was unusually successful and said broadcasters were enthusiastic about a disc of recorded jingles produced for NAB members and used an average of 136.8 times weekly per station during May. He said 188 prints of "Hear and Now," NAB's new film to promote radio, has been sold and 66 copies have been rented by stations.

John F. Meagher, NAB radio vice president, said 607 stations have reported they are taking part in the industry's "Look for a Room With a Radio" campaign. He said stations are broadcasting an average total of 11,389 spot announcements per week in support of the campaign, which is designed to stimulate radio listening among hotel and motel guests.

George Hatch, KALL Salt Lake City, said a subcommittee of the NAB Radio Transmission Tariffs Committee and AT&T representatives had agreed on definite objectives in their rate negotiations. William Carlisle, NAB station relations manager, said radio membership has reached an alltime high—1,517 am stations and 428 fm stations. A. Prose Walker, NAB engineering manager, reported on discussions covering high-voltage power line interference with radio and tv reception. He discussed inter-city relay operations on currently allocated broadcast auxiliary frequencies.

Besides Messrs. Sowell, Bostic and Hatch, other Radio Board members attending the meeting included:

Daniel W. Kops, WAVZ, New Haven, Conn.; Simon Goldman, WJTN Jamestown, N.Y.; John S. Booth, WCHA Chambersburg, Pa.; Jack S. Younts, WEEB Southern Pines, N.C.; Frank Gaither, WSB Atlanta, Ga.; Hugh

O. Potter, WOMI Owensboro, Ky.; J. M. Higgins, WTHI Terre Haute, Ind.; Mig Figi WAUX Waukesha, Wis.; Ben B. Sanders, KICD Spencer, Iowa; Odin S. Ramsland, KDAL Duluth, Minn.; Robert L. Pratt, KGGF Coffeyville, Kan.; A. Boyd Kelley, KTRN Wichita Falls, Tex.; Robert J. McAndrews, KBIG Avalon, Calif.; Harold Hough, WBAP Fort Worth, Tex.; John H. DeWitt Jr., WSM Nashville, Tenn.; Rex Howell, KREX Grand Junction, Col.; Frederick A. Knorr, WKMH Dearborn, Mich,; F. Ernest Lackey, WHOP Hopkinsville, Ky.; J. R. Livesay, WLBH Mattoon, Ill.; Richard H. Mason, WPTF-FM Raleigh, N.C.; Merrill Lindsay, WSOY-FM Decatur, Ill.; E. J. DeGray, ABC; Charles W. Godwin, Mutual; P. A. Sugg, NBC Radio. Arthur Hull Hayes, CBS Radio president, was presented by James M. Seward, CBS Radio.

Changing hands

ANNOUNCED • *The following sales of station interests were announced last week, subject to FCC approval:*

• KITO San Bernardino, Calif.: Sold by Radio Associates to Kenyon Brown for $285,000. Mr. Brown is president and part owner of KCOP-TV Los Angeles, in association with Bing Crosby, George L. Coleman and Joseph A. Thomas, and has been appointed head of the broadcast division of Nafi Corp., purchaser of KPTV (TV) Portland, Ore., subject to FCC approval. He is acquiring KITO as an individual, similar to his purchase of KSON San Diego, which is awaiting FCC approval. KITO is on 1290 kc with 5 kw, directional, and is affiliated with MBS.

• WKKO Cocoa, Fla.: Sold to WKKO Radio Inc. by John B. Cook Jr. for $210,000. WKKO Radio Inc. principals are Marvin L. Rothschild (49%) and Benjamin Rothschild (49%). Marvin Rothschild is sales manager of WHOO Orlando, Fla. This sale has been filed with the FCC. WKKO is on 860 kc with 1 kw, day.

• KMYC-AM-FM Marysville, Calif.: Sold to Carlton Broadcast Corp. by Horace E. Thomas, Georgia L. Thomas and Chastain Freeman for $200,000. Carlton Broadcasting is owned 50% by John Sexton Trust radio-tv production firm and one-sixth each by CBS o&o stations program coordinator Carroll V. Hansen, Ruth O'C. Hansen and William O'Callahan. This sale has been filed with the FCC. KMYC is on 1410 kc with 5 kw, day, 1 kw, night, directional, and is affiliated with MBS. KMYC-FM is on 99.9 mc with 4.9 kw.

APPROVED • *The following transfers of station interests were approved by the FCC last week (for other Commission activities see* FOR THE RECORD, *page 134).*

• KVI Seattle, Wash.: Sold to Gene Autry group by Vernice Irwin and family for $770,000. Autry broadcast interests include KMPC Los Angeles and KSFO San Francisco, both California, and KOOL-AM-TV Phoenix and KOLD-AM-TV Tucson, both Arizona. KVI is on 570 kc with 5 kw and is affiliated with MBS.

• WHRV Ann Arbor, Mich.: Sold to The Zanesville Publishing Co. (WTAP-TV Parkersburg, W.Va. and majority interest in WHIZ-AM-TV Zanesville, Ohio) by Mayne Broadcasting Co. for $300,000. WHRV is on 1600 kc with 1 kw, directional.

• KXII (TV) Ardmore, Okla.: Sold to Texoma Broadcasters Inc. (majority stockholder is KWTX Broadcasting Co., which in turn is owned 29.05% by multiple owner LBJ Co., and owns KWTX-AM-TV Waco and 50% of KBTX-TV Bryan, both Texas) by John E. Riesen, executor of estate of John F. Easley, for $141,666. KXII (TV) is on ch. 12 and is affiliated primarily with NBC-TV. Sale of station to Bill Hoover group (KTEN [TV] Ada, Okla.) was approved by FCC last April but set aside early this month (BROADCASTING, June 8).

• WBUT-AM-FM Butler, Pa.: Sold by J. Patrick Beacom to group including James S. Beattie and Mr. Beacom for $121,500 plus agreement not to compete in radio business within 25 miles of Butler for five years. Mr. Beacom owns WJPB-TV Fairmont, and WVVW Grafton, both West Virginia; Mr. Beattie owns WPTX Lexington Park, Md. WBUT is on 1050 kc with 250 w, day. WBUT-FM is on 97.7 mc with 720 w.

• WFAM-TV Lafayette, Ind.: Sold (license on ch. 59 and construction permit for ch. 18) by Lafayette Broadcasting Inc. to Sarkes Tarzian Inc. (WTTV [TV], WTTS Bloomington, WPTA [TV] Roanoke and a new fm outlet in Fort Wayne, all Indiana) for $65,000. At the same time the Commission granted an extension of completion date to 90 days after consummation of the assignment. WFAM-TV has a secondary affiliation with ABC-TV, CBS-TV and NBC-TV.

Texas **$200,000**

Powerful fulltimer on excellent frequency in top Texas market. Gross can easily exceed purchase price. One of the best buys we have had. 29% down and balance over five years.

Northwest **$175,000**

Successful 5 Kw fulltime operation in one of the best Northwest markets. New equipment and good real estate. 29% down.

Middle Atlantic **$160,000**

Profitable daytimer in one of the top hundred markets. This one will easily pay out with $35,000 down and balance over 7 or 8 years. Won't be around long at this price.

Southern California **$69,500**

1000 Watt daytimer in solid growth area. Liberal terms to qualified buyer. Needs owner-manager.

WHAS DROPS FROM CBS RADIO

But network says PCP is 92% successful

WHAS Louisville quit the CBS Radio network last week—the last of 20 affiliates to leave in disagreement over the network's Program Consolidation Plan.

Victor A. Sholis, WHAS vice president and director, said that he voted against PCP when it was first proposed "out of a conviction it offered no solution to the programming and sales difficulties engulfing the network and thus seriously affecting its affiliates."

Six months of experience with PCP "has confirmed our judgment," he said. The affiliation of WHAS-TV with CBS-TV is not affected.

Arthur Hull Hayes, CBS Radio president, said the departure of WHAS "is not a surprise." PCP, said Mr. Hayes, has been accepted by 90% of the stations which were affiliates at the time PCP was ratified at an affiliates convention last October.

Box Score • When PCP was announced CBS Radio had 195 stations; it will have 189 as of July 5, the deadline date for affiliates to put up or pull out of the network. WHAS was the last holdout. Official CBS tabulations show that 19 of the pre-PCP stations, four of them bonus stations, left the network. They accounted for 12% of the pre-PCP lineup. 176 stations (87%) accepted the plan, and 13 others joined under PCP terms, bringing the current list to 92% of the pre-PCP total.

As four of the 19 who left the network were bonus stations, CBS feels that its major losses were in 15 markets. It has made new affiliation agreements in four of them, leaving 11 pre-PCP markets now open.

The four replacements: WCAY for WMSC Columbia, S.C.; WKMH Dearborn for WJR Detroit; WRNL for WRVA Richmond; KRMG for KTUL Tulsa.

The 12 not replaced as yet: WSAN Allentown, Pa.; WABI Bangor, Me.; KSIX Corpus Christi, Tex.; WJQS Jackson, Miss.; WKNE Keene, N.H.; KTHS Little Rock, Ark.; WGIR Manchester, N.H.; KTOK Oklahoma City; KWKH Shreveport; WTAG Worcester, Mass., and WHAS Louisville.

Several of the stations which have left CBS Radio have been identified with efforts to organize Radio World Wide, a program service. They include WJR Detroit, WHAS Louisville, KWKH Shreveport and WTAG Worcester (see story, page 116).

Pulse on WKFM (FM)

Dr. Sydney Roslow, president, The Pulse Inc., New York, last week made this statement about the WKFM (FM) Chicago suit against the company (AT DEADLINE, June 8).

"The suit of WKFM is wholly without basis. There is not one iota of truth in the claims made. The foundation of such action is wholly obscure to us. Pulse intends to fight this unjust claim to the limit and has no doubt whatsoever that it will be wholly vindicated at the trial."

(The suit claims $192,300 damages for alleged discriminatory practices in conducting radio surveys.)

TTC names Petry

The appointment of Edward Petry & Co., New York, as national sales representative for all stations owned by Transcontinent Television Corp., New York, was announced last week by David C. Moore, TTC president. The appointment is effective July 1. (CLOSED CIRCUIT, June 15).

Trancontinent currently owns and operates WGR-AM-TV Buffalo, WROC-TV Rochester, WNEP-TV Scranton-Wilkes-Barre, Pa. (60% ownership) and WSVA - AM - TV Harrisonburg, Va. (50% ownership). Mr. Moore noted that on May 13, FCC approved a transaction which will put under TTC ownership three West Coast stations owned by Marietta Broadcasting Inc.—KFMB-AM-TV San Diego and KERO-TV Bakersfield, Calif. He added that the signing of the contract to complete the Transcontinent-Marietta transaction is scheduled for some time during the next two weeks.

Marietta is owned 63.64% by Jack Wrather and 36.34% by Edward Petry & Co. Under the TTC-Marietta agreement, Mr. Wrather will own 22.15% of Transcontinent and the Petry organization 12.66% (BROADCASTING, May 18).

Consolidated Sun Ray acquires WSAI, WALT

Fast-growing Consolidated Sun Ray Inc. (WPEN-AM-FM Philadelphia, Pa.) last week formally took possession of two newly-purchased radio properties, WSAI-AM-FM Cincinnati, Ohio, and WALT Tampa, Fla. (BROADCASTING, May 25). The total purchase price for both stations was well over $2 million.

New officers of WSAI and WALT, according to Consolidated Sun Ray President William H. Sylk, include: William B. Caskey, executive vice president of WPEN, president of WSAI; Howard Eicher, vice president and general manager under former WSAI owner Sherwood R. Gordon, continues in the same job, and Sidney Goldstein, WPEN secretary-treasurer, adds same position at WSAI. Mr. Caskey will also be president of WALT and Mr. Goldstein will be secretary-treasurer. Frank Knorr Jr., former president of WPKM Tampa, will be vice president and general manager of WALT. The boards of both WALT and WSAI will be the same, it was announced, and will consist of Harry and William Sylk and Messrs. Caskey and Goldstein.

• Rep appointments

• The six Negro-programmed properties of Rounsaville Radio Stations, Atlanta, are to be represented by the John E. Pearson Co., N.Y., effective July 1. The stations: WCIN Cincinnati, WLOU Louisville, WMBM Miami Beach, WVOL Nashville, WYLD New Orleans and WTMP Tampa-St. Petersburg.

• KXYZ Houston names H-R Representatives Inc., N.Y., effective Aug. 10.

• WHAT Philadelphia appoints John E. Pearson Co.

• WGST Atlanta to the Branham Co., N.Y.

The Rising Sun Ray • It was a happy group that gathered to close the multi-million dollar purchase of WSAI-AM-FM Cincinnati and WALT Tampa, Fla., by WPEN-AM-FM Philadelphia owner Consolidated Sun Ray Inc. William B. Caskey, new president of WSAI and WALT (1) shakes hands with Sherwood Gordon, WSAI seller, as Gordon attorney Vincent A. Pepper (1) and Howard Eicher, WSAI vice president and general manager under both old and new owners, look on.

INTERNATIONAL

TRANSATLANTIC TV SUCCESS

Cable, film process is tested by BBC

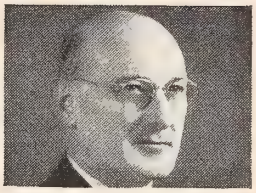
A new potential for television was opened last week with a successful transatlantic telecast over phone cable of 2 minutes 5 seconds of 16mm film.

Its effect is to chop at least 5½ hours off the tv distance between London and New York. Long-range observers see in it a first step in the direction of wide-world tv.

NBC, which has an existing newsfilm swap arrangement with the British Broadcasting Corp., reportedly brims with plans. News authorities at the network talked in terms of acquiring a transmitting - sending machine from BBC and of making a "film collection point" at London. The June 18 telecast was carried by NBC-TV 10:15-10:30 a.m.

The film seen in the U.S. was in two sequences. The first consisted of coverage of Queen Elizabeth leaving Buckingham Palace for London Airport, preparations and scenes at London Airport just before her arrival there from the Palace and before takeoff to Canada on her royal visit. The other was a news sequence showing the royal party arriving at London Airport and boarding the plane.

Significance • The main immediate import: it is now technically feasible to transmit very short portions of news film by transatlantic telephone cable using the cable's narrow, 5 kc sound bandwidth with a process pattern after telephoto.



The film at BBC in London was placed on the slow-speed flying spot scanner developed by the British. Frame by frame it was translated into electrical impulses. Similar equipment brought recently by BBC to Canada translated the impulses to exposed film and then the film was developed. The finished film then was shown as part of a 15-minute program on the Canadian Broadcasting Corp. in Canada and on NBC in the U.S.

Features of the royal party — the Queen Mother, Queen Elizabeth, Prince Philip and Princess Margaret — were easily distinguishable. Definition was acceptable, the picture resembling "hot film" (that is, kinescope). Some flare was detected. NBC-TV engineering executives watching monitors in New York studios could not explain the infrequent flare but attributed it to possible "line transmission trouble."

The British have named the product "wire film." A half minute of film can be transmitted in less than 50 minutes and reproduced on tv as soon as the film is developed, 15 minutes later.

Technique Involved • The British development is not new in the sense that the system uses known principles. What is different, however, is the balance of three essentials which are basic

REN
EWE
D

says Louis Wasmer, Pres.

KREM-TV

SPOKANE, WASH.

"Renewed" is the big word in our business and yours and that's the good word we get from Louis Wasmer!

"Warner Bros. cartoons have been rating over 20 ARB consistently. They've been so successful that we've just renewed our contract for both Warner Bros. cartoons and Popeye and we're sure our sponsors will do the same. From past performance, we're confident that ratings and sponsorship will remain at the same high levels for years to come."

KREM-TV's experience with Warner Bros. cartoons is "par for the course." Whenever these great laugh-getters are shown, a loyal following of viewers and sponsors springs up. We suggest you try Warner Bros. cartoons in a highly competitive spot and watch how they come out on top.

to a practical or working system: (1) the time used in transmittal, (2) the bandwidth and (3) the degree of definition.

To reduce the time consumed, only every other frame is scanned. Each frame transmitted is printed twice on the receiving end. This would tend to lose a bit of the motion (but not resolution). In the Thursday demonstration, however, a loss of motion was not perceptible to the viewer. The British, in fact, say reproduction is satisfactory using the alternate-frame process except where movement is rapid, and hinted that in such a case each frame would be printed even though transmission time would be lengthened.

As early as 1957, BBC, as did United Press Movietone, experimented with similar systems. UP transmitted film in October of that year to the British (15 seconds) showing arrival of Queen Elizabeth in New York. The film was routed from New York through Montreal to London (same route as the current telecast used). Movietone also experimented more than a year before that by sending a similar strip to San Francisco and back via a telephoto network. But observers noted a difference in the BBC and Movietone systems. It was claimed that the Movietone system employed strips of film (or frames) which were sent as a still photo, then reprinted in strips. Engineers in New York claimed last week that this process was "crude compared to the delicately balanced system used by the British."

ROYAL FAMILY AT AIRPORT

Slow-scan film makes tv history

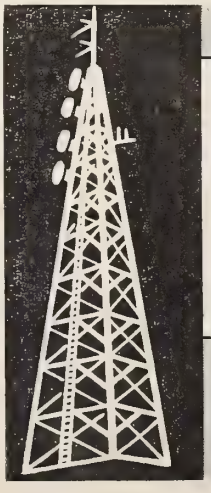
Most engineers see the eventuality of tv signals bounced off satellites anchored in space as the ultimate answer The cable as it now exists cannot handle live tv. A transoceanic cable conceivably could be built to handle live tv but it is not economically practical. A new cable to be laid between Clarenville in Newfoundland and Penmarch in France will cost some $40 million. Work gets underway this summer. Amplifiers or repeaters—58 of them in each of the twin cables—will act as boosters. These two-way repeaters which now are placed at 20-mile intervals would need to be boosted five times or one every four or five miles. This pushes up the cost factor and increase technical difficulty all along the line.

PAY-TV SET FOR CANADIAN START

Telemeter plans wire system in Toronto suburb, broadcast later

The first International Telemeter Co. closed circuit pay-tv installation will be in operation by mid-December in Etobicoke, western Toronto suburban area, with a minimum of 500 subscribers, J.J. Fitzgibbons, president and managing director of Famous Players Canadian Corp., stated at Toronto Wednesday (June 17).

Trans-Canada Telemeter Ltd., a division of the Famous Players theatre chain, is now installing with Bell Telephone of Canada 70 miles of tv cable for a coverage potential of 13,000 homes in the Etobicoke area. Mr. Fitzgibbons estimated 5,000 Telemeter installations in operation within year.



Famous Players is owned 51% by Paramount Pictures Corp. International Telemeter Co. is a wholly-owned Paramount subsidiary. Telemeter executives in the U.S., meanwhile, related other details of pay-tv plans, including the possibility of "free" programs on the system supported by paid commercials (see below).

Mr. Fitzgibbons explained that "the Etobicoke area was picked because it is the fastest growing Toronto suburban area, has high population density and has the highest per-capita income of any Canadian area. We have high hopes that the operation will spread to other areas in metropolitan Toronto and trigger the expansion of Telemeter throughout Canada."

Highly Competitive Area • The Toronto metropolitan area was picked for the test because of heavy competition not only from five television stations but also many other attractions. This was felt to be a better test than a captive one-station market or area receiving no local television. The Etobicoke installation will include a central studio serving roughly a five-mile radius area. Subscribers will pay only $5 installation charge and pay cash for all programs.

The Telemeter unit has three control knobs. The first control connects the subscriber with the studio to hear what programs are being offered and at what charge. This is free service. The same control also will bring the subscriber, through a loudspeaker in the unit, free local public events and local news, it is claimed, including sponsored shopping news. The second control has a choice of three positions for unsponsored programs available on payment basis. This control is operative only after the third control has been put into the Telemeter position and the required amount of money is deposited in box.

The money box has a recording tape which lists every transaction made on the machine. The subscriber can place more than the required amount of money in the box and a cash register dial will show the credit amount. All of this is also recorded on tape. The money box will be collected monthly and re-

placed with a new box. It was noted that an accurate survey on viewing patterns will be available from the money box tapes monthly.

The telemeter box will be joined to the television receiver through the antenna connection, eliminating the need to go into the television receiver. The third knob on the box gives choice of free television or pay television.

The Exclusive Lure • Mr. Fitzgibbons stated that the Telemeter system will provide varying prices for different programs, basic feature in selling entertainment. The subscriber will see first run motion pictures immediately after they have been shown in first run downtown Toronto theatres. They also will be able to see sporting events, concerts and other entertainment not televised on regular tv, he said.

Famous Players Canadian Corp. estimates its investment in the Etobicoke installation with five thousand sets at about $1.25 million. Each box will cost about $100 installed. The company plans no extra financing to cover the initial installation.

"Surveys made in recent weeks show greater interest than we expected," Mr. Fitzgibbons said. "We feel that pay tv will reach the lost theatre audience and will develop a totally new audience. We expect to capture more of the amusement dollar than through the theatres."

Expansion through Franchise • Famous Players will organize companies in various parts of Canada for local Telemeter franchises, will lease franchises to community antenna operators, broadcasting stations and newspapers, providing they meet engineering specifications to give a good picture, he explained.

The first equipment for the Canadian operation is being imported from the U.S., with Guardian Electronics Co., Chicago, making the Telemeter boxes and Jerrold Electronics, Philadelphia, making the studio and other equipment. It is expected that equipment will be made in Canada when the system is successful.

Famous Players operates 376 motion picture theatres in Canada and has substantial interests in CKCO-TV Kitchener, Ont., and CFCM-TV and CKMI-TV French and English language stations in Quebec City, Que.

At a news conference in Hollywood Tuesday, Louis A. Novins, president of International Telemeter Co., reported that the coin box units for the Telemeter system have been in production since October by Guardian Electric. Production is just beginning, he said, estimating that within a month the daily output will be between 75 and 100 units with "at least 10,000 boxes" produced by the end of the year.

Lots of Facilities • "Initial Telemeter systems will be on closed circuit cable facilities," Mr. Novins stated, noting that such facilities are now in wide use in more than 500 community antenna systems in the U.S. and about 200 in Canada, serving "well over a half-million homes." Asked whether this means that Telemeter is planning to begin its pay-tv service in communities presently served by community antenna hookups, Mr. Novins replied that "this is a logical deduction, but is not necessarily correct." There are other factors to be considered, he said.

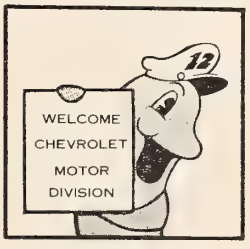
Paul MacNamara, Telemeter vice president, pointed out that in many cities large apartment buildings have their own master antenna systems which in effect are "vertical community antennas" and could be adapted readily for pay-tv.

Both Telemeter executives stressed that local programs, such as high school sports, local meetings and other civic affairs, will form an important part of pay-tv activities. These will be provided to subscribers without charge, it was stated.

Commercials on Pay-Tv System • Also, Mr. MacNamara pointed to the possibility that during the daytime hours the pay-tv wire systems may operate on a commercial basis, like community tv stations, providing local programs without charge to subscribers, accompanied by advertising from local merchants. National advertisers are interested, too, he said, as the fixed sample of pay-tv families, whose incomes and other pertinent statistics can be readily obtained, makes them a good test market for both products and commercials.

Telemeter itself will make no investments in pay-tv installations in individual communities, Mr. Novins said. Telemeter's function is to manufacture the coin-box equipment, which it will lease to local franchise holders on a royalty basis. In the U.S. this will amount to about 6% of the monies collected in the coin-boxes, he said. In foreign countries, the pattern varies from country to country. He wouldn't disclose the Canadian set-up beyond saying that Famous Players has the rights to all Canada, not Toronto alone.

Mr. Novins explained Telemeter believes that "under prevailing conditions, the economics of a wire pay tv system offering three channels are much more favorable than a broadcast pay tv system on one channel—certainly during the initial growth stage.



'Time Charges Wasteful' • "On broadcast pay television the system must buy time from a station. Station rates are related to the number of sets in the market. Since only a fraction of these sets can be equipped with pay tv devices in the early stages, time charges are wasteful and prohibitive. On the other hand, with a wire system, cable facilities can be expanded as homes are equipped with pay tv devices."

In addition, he said, the economics of a wire system "permit the continuous rerunning of a program—like a motion picture feature—several times during the day and evening to suit the convenience of the customer. The time charges for broadcasting over the air on this basis would be prohibitive." He continued: "Our analysis of the economic factors indicates that the 'break-even' point on a wire system is substantially below that of a broadcast system. However, at a certain point of saturation in a large market, the economics of a broadcast system can be more favorable. Telemeter's broadcast system is prepared for that eventuality."

Mr. Novins said there is a "permanent place for wire systems in hundreds of communities, regardless of the ultimate advent of broadcast pay television in major markets. The integration of wire with broadcast pay television is a simple matter technically when broadcast pay tv becomes practical."

No Air Test Soon • How soon a broadcast pay-tv test? "We do not

CHEVROLET PICKS JACKSONVILLE

Chevrolet Motor Division of General Motors Corporation has picked Jacksonville for a new distribution and sales facility—its parts warehouse and zone offices will service Florida and Southern Georgia. Jacksonville is proud of the faith that Chevrolet has shown in the State of Florida's Gateway City and its citizens enthusiastically welcome this addition to their rapidly expanding North Florida economy.

presently contemplate taking advantage of the authority recently granted by the FCC to conduct 'tests' over the air," Mr. Novins stated. "Instead, we are actually going into business on wire. We plan to expand the very first situation as rapidly as conditions permit." He declined to amplify that statement or to discuss specific localities beyond admitting that the decision as to the first U.S. communities for Telemeter pay tv installations will be made before the end of this year.

Mr. Novins said that Telemeter will help in securing national programming material for its franchise holders at first, as a "pump-priming" operation. Later, he anticipates that the local pay-tv operators, individually or collectively, will buy their national programs from program sources much as theatre operators do today.

He emphasized that local programming is as necessary as national and felt that one of the chief reasons for the failure of the Bartlesville experiment was its dependence entirely on feature motion pictures for programming. "Block booking," with subscribers paying monthly fees in place of per-program admissions and the right to choose what they wanted to see by paying for it, was another chief cause of the collapse of the Bartlesville project, which he said "we never believed was really pay-tv."

A third major fault, he noted, was that the Bartlesville method of operating did not permit any measurement of program audience size. This, he said, is essential to provide incentive for the producer of program material.

Exhibitors May Join • Despite the opposition of many theatre owners and theatre-owning groups to pay-tv, Mr. Novins expressed the belief that theatre operators will become the pay-tv franchisers in many communities. He also stated that the antagonism of motion picture producers toward pay-tv has changed to a favorable attitude, along with the changed economic climate of the picture business in the past five years. He said he has no doubt that an ample supply of feature picture pictures will be available for subscription television.

FATES & FORTUNES

Advertisers

• J. H. PICOU, director of marketing research of Atlantic Refining Co., Phila., appointed head of newly-created department of advertising and sales promotion. RICHARD BORDEN named manager of advertising division and E. R. COX JR., sales promotion manager.

• JOHN BRICKER, formerly executive vp of Outdoor Adv., N.Y., joins Colgate-Palmolive Co., that city, as vp of marketing planning.

• LYNDALL F. CARTER, executive vp, William Carter Co. (underclothing), Needham Heights, Mass., elected president, succeeding his father, late HORACE A. CARTER, who died May 2. Other Carter appointments: DAVID FINNIGAN, vp, treasurer, and MANSON H. CARTER, merchandise manager, toddlers' division, named clerk.

• MONROE W. GILL, advertising manager, Mohawk Carpet Mills, N.Y., named manager, public relations, at parent company, Mohasco Industries, Amsterdam, N.Y. WILLIAM C. MCCLUMPHA succeeds him.

• DAVID C. MELNICOFF, business analyst and manager of economic analysis of Pennsylvania Railroad Co., Phila., named director of planning of Fels & Co., that city, effective July 1. Mr. Melnicoff remains director of Fels and member of its finance committee.

• TERRY R. SPEIGHTS resigns as program director-sales of WBKH Hattiesburg, Miss., effective July 1, to become area manager of Curtis Industries, Cleveland (key maker).

Agencies

• WILLIAM T. KAMMERER, assistant to media director, WILLIAM J. KENNEDY, assistant vp and manager, media department, WINSTON W. KIRCHERT and MARTIN J. MURPHY, assistant vps and media group supervisors, elected vps and associate media directors of Ted Bates & Co., N.Y. NORMAN A. CHESTER and BRUCE L. SMALL named assistant vps and media supervisors.

• WILLIAM D. FISHER, formerly vp and radio-tv director, Doherty, Clifford, Steers & Shenfield, N.Y., to Gardner Adv., St. Louis, as vp and broadcast programming director, effective July 15.

MR. CANEVER

• VICTOR W. CANEVER, account executive of D.P. Brother & Co., Detroit, appointed senior vp and member of executive committee. Agency promotions in AC Spark Plug account: Mr. Canever, supervisor; JOHN H. OWEN, creative supervisor; W. NEIL LEWTON, account executive for advertising, and IAN W. BEATON, account executive for merchandising.

• JOHN BOYD, CLIFFORD DILLON, EMILE FRISARD, MURIEL HAYNES, GABRIEL ONDECK and OTTO PROCHAZKA, all vps and assistant creative directors at Compton Adv., N.Y., named creative directors.

• JAMES N. HARVEY, formerly creative group head of McCann-Erickson, N.Y., for Coca-Cola, Oasis cigarettes and Vaseline hair tonic accounts, to Richard K. Manoff, N.Y., as creative director and vp.

Columbia U., named director of university's radio-tv office, effective July 1. He succeeds LEON LEVINE, who organized office in 1953, and has resigned to devote himself to non-university commitments.

• FLOYD D. YOUNG, 68, whose nightly broadcasts of frost warnings for fruit growers made his voice one of best known on Pacific coast, died June 16 of cancer in La Jolla, Calif.

• CAROL WALKER, formerly model for Hartford Agency in Paris and Rome, named administrative assistant, charge of promotion, in agency's New York office.

Government

• WILLIAM H. WATKINS, who joined FCC in 1946 and most recently served as engineering assistant to Comr. T.A.M. Craven, named assistant chief engineer in charge of frequency allocation and treaty division, office of Commission chief engineer, succeeding ALBERT L. MCINTOSH, retired. GEORGE K. ASHENDEN JR., with FCC since 1941, most recently as reviewing engineer in office of opinions and review, appointed engineering assistant to Comr. Craven.

International

• ROBERT M. CAMPBELL, formerly general manager of J. Walter Thompson Co., Toronto, Ont., to director of advertising for Rembrandt-Rothman Group of Companies, Toronto (cigarettes), branch of British firm.

• C. W. MCQUILLIN, formerly radio-tv director of Cockfield, Brown & Co. Ltd., Toronto, Ont., to executive vp and chairman of agency's Toronto marketing plan board. MURRAY TURNER, vp in charge of Winnipeg, Man., office, to vp and manager of Toronto office.

• E. E. FITZGIBBONS, general manager of CKCO-TV Kitchener, Ont., to executive director. W. D. MCGREGOR, operations manager, becomes general manager.

PLAYBACK QUOTES WORTH REPEATING

Constructive criticism

When accepting the Dr. Lee de Forest Award of the National Assn. for Better Radio and Television (BROADCASTING, *May 25*) *Clark B. George, general manager, KNXT (TV) Los Angeles, called for public support of quality programming:*

Television today is one of the most written-about and analyzed segments of our society. No thoughtful person within our industry would have it any other way. We welcome constructive criticism and respond to it. For along with audience surveys and letters, criticism by and in the press provides a useful guide on how the image of television can be shaped to better serve the interests of its audience . . .

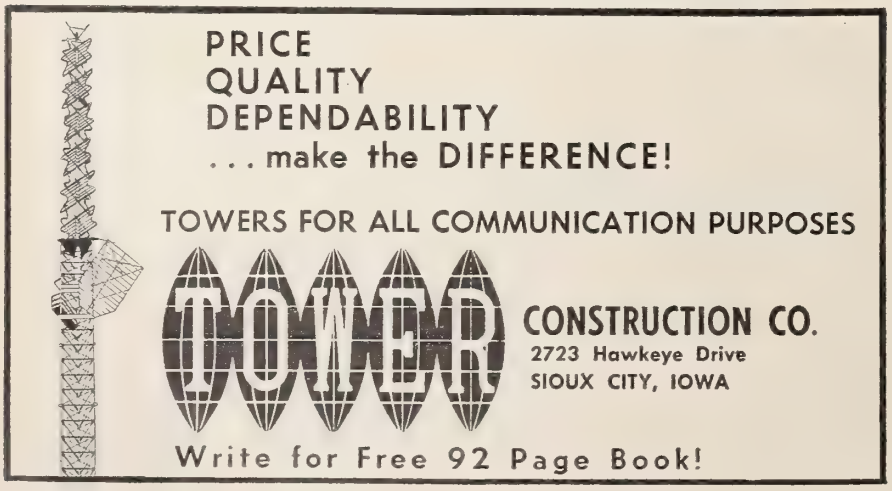
Although the average person watches television two-and-a-half hours a day, the seven Los Angeles television stations are on the air for a combined total of 114 hours a day. This means the average viewer actually sees less than 2% of the 114 hours that are available to him. It appears obvious then, that such a volume of programs would permit the individual viewer absolute freedom of choice. Indeed, the endless variety from which to choose provides something of a challenge to the individual viewer.

And yet, this very fact is the cause for our concern. Since the average viewer misses 98% of the programs aired on television, his general attitude toward the medium is molded to a great extent by what he reads. Therefore, I believe the television industry would be aided in its work to improve itself if the critics of our medium would spend more time and space reminding viewers about the thousands of hours of news, cultural and informational programs telecast every week of the year. Thus, by devoting more effort to telling people of the good programming, and encouraging people to view our Hamlets, our Bernstein musicals and the like, the ratings for such shows would be higher which, in turn, would mean more advertisers could afford to sponsor this high type of programming.

For despite the high cost of television and the problems of making financial ends meet that are far, far greater than press or viewers could possibly appreciate, we produce far more unsponsored public affairs programs than could possibly be justified by their ratings. Why? Because we feel it is the medium's responsibility. Because such shows are essential to balanced programming. Because television is a mass communications medium and thus must provide programs for every taste.

Down on the farm

In an address at the third annual Potts Woodbury Radio-Tv Farm Clinic in Kansas City,, William J. Brewer, executive of the Kansas City agency, had several suggestions on how stations could realize more advertising revenue from their farm programming:



. . . Too often the station rep arms himself too lightly with the type of specific information which helps us best in evaluating stations, programs and station personnel. Therefore, as a suggestion to all those who have the responsibility of selling advertisers and agencies, I would recommend serious consideration of the following points:

1. Develop comprehensive information, thoroughly detailing the aim and the content of each individual farm program on each station.

2. If a farm director is a key part of farm programming, give us full details on his background, his experience, commercial, as well as community activities.

3. If a market broadcast is involved, tell us specifically what markets are being covered. . . . Are they livestock markets, are they commodity markets, are they poultry markets? This is particularly important because many times the advertiser is interested in reaching those who are interested in a specific market . . . So you can see when a salesman writes or calls and says the availability is adjacent to markets we must know specifically *what* markets.

You are going to hear a great deal on the subject of research as it relates to the farm market, and the necessity of wider acceptable studies in this field. . . . The industry must do more in this specific field if we are to continue to be successful in bringing new farm advertising money into broadcast media.

Timepushing—Rockefeller style

More than 800 New York agency and broadcasting executives were treated to a blow-out in Rockefeller Center's famed skating rink last Tuesday evening (June 16) by the new Westinghouse-owned tv and radio station representative firms—TvAR (Television Advertising Representatives) and Am Radio Sales. Countless natives and tourists viewed the proceedings from vantages along Rockefeller Plaza sidewalks above.

The gala began at 5 p.m.; the last stragglers were shooed out at 11:30. In the meantime they had consumed 250 bottles of booze (5,000 drinks by the caterer's standard) 8,000 hors d'oeuvres, come away with or busted 2,000 balloons, and mingled with such celebrities as Lisa Kirk, Tina Louise, Johnny Carson, Alan Dale, Connie Francis, Gretchen Wyler, Eddie Hodges—and an occasional TvAR-Am Radio salesman. Some of the music was supplied by Madison Avenue's Many-Splendored Stompers, headed by Grey Adv.'s Hal Davis. (At right, Grey's assistant to the president teams with Marie Janis, casting director for Cunningham & Walsh, to interpret an original composition on timebuying.)

As a peace offering to wives at home, each departing guest was given a bottle of D'Orsay Cologne, accompanied by a note beginning, "No matter when I get home tonight, please be kind. It was for a good cause. . . ." It closed with a P.S. listing the eight WBC markets as a memory-refresher for husbands who would "tell you more about it in the morning."

Westinghouse's morning-after bill: something over $6,000. And cheap at that, say the rep firms—they figure it costs $17 per sales call to reach buyers individually.

TOURIST'S-EYE VIEW OF THE NEW YORK AGENCY CROWD

Mass wining and dining cheaper than sales calls: Westinghouse

TIMEBUYING BLUES

Hal Davis-Marie Janis duet

• Drumbeats

• The *Pittsburgh Album,* commemorating the city's bicentennial, has gone into a second printing. The picture book is co-sponsored by the *Pittsburgh Post-Gazette* and its radio station WWSW, with WIIC (TV) (partly owned by the *Post-Gazette)* and the Herbick & Held Printing Co. Proceeds from the book's sale go to the Historical Society of Western Pennsylvania.

• Michael Wynne-Willson has booked overflow sponsors from his daily noontime *Music and Michael* program over WESX Salem, Mass., into an English music hall show. One of the listener promotions is a printed theatre-type program. Sponsors are credited as in a playbill, *e.g.,* "jewelry by Daniel Low, chocolates by Stowaway Sweets, champagne by S.S. Pierce, etc." The *Music Hall* flyers go to motels, hotels, restaurants and other public places on the North Shore.

• KOOL-TV Phoenix, Ariz., telecast an appeal to 170 mile-away Blythe, Calif., for viewers there to take advantage of free polio shots. On June 3, 353 shots were given. On June 4, the day of KOOL-TV's appeal, 1,142 polio shots were administered.

• Paramount Pictures Corp. is using heavy radio promotion of the "Matinee Teen-Preem party to be staged June 30, when "The Five Pennies" movie opens at Los Angeles' Fox Wilshire Theatre. KMPC will move Ira Cook's entire 10 a.m.-2 p.m. disc jockey program to the lobby of the theatre that day; KPOP's Art Laboe will broadcast the daytime premiere at 1-1:30 p.m. following broadcast interviews and album selections from the picture's score; KLAC's Biff Colly has also scheduled a two-hour program of the Teen-Preem, at which about 100 teenage stars and favorite performers will make personal appearances. Radio coverage was arranged by Sherman & Pam, Hollywood.

• WHAS-AM-TV Louisville, Ky., sprang a surprise on a schoolteacher visiting the studios with her class. She was clocked in as the millionth visitor since 1949. The stations occupied present quarters in 1949. Her reward: an 11-day trip for two to Mexico City. Radio and tv audiences sent in 30,378 guesses as to when the millionth guest would arrive. The winner got a dollar for each of WHAS' 840 kilocycles. Eleven others (WHAS-TV is on ch. 11)

Winner in WOODland • This 1908 Pierce-Arrow automobile was one of 96 of early vintage in the fifth annual WOOD-AM-TV Grand Rapids, Mich., antique auto tour. Willard Schroeder, president-general manager, is pictured giving the car's owners, Mr. and Mrs. Carl Sellner, a portable radio for finishing the 160-mile, two-day tour. Weston C. Pullen Jr., executive vice president of TLF Broadcasters Inc. (stations' owner), looks on.

got portable tv sets as their prizes.

• When KYW-TV Cleveland premiered its *Eye Witness News* pictorial concept, the station set up a giant telescope in the city's Public Square. Peeking pedestrians got a look at a promotional slide placed inside the scope.

• The Junior Achievement (commercial training for teenagers) program of WOOD-TV Grand Rapids, Mich., has won a national Junior Achievement Cos. award. JATV Productions was organized by the teenagers, using WOOD-TV facilities. They produced *Here's Youth,* 20 weekly programs of high school news, activities and interviews. JA members handled all facets of production except technical and sold the product to 43 sponsors.

• Seasonal sales slogan of WAMS Wilmington, Del.: "Sell 'Em While They're Hot."

• WTAC Flint, Mich., is helping students find summer employment by broadcasting free announcements naming youngsters who need work. Each day the station selects a different student to receive on-the-air plugs.

• "Lucky WCKR [Miami] Stop Signs" are placed daily under regular stop signs. The first person who telephones the station after 6 p.m. informing WCKR of the stop sign's location wins $6.10 (610 kc is WCKR's frequency). The traffic safety promotion was instrumental in winning the Greater Miami Insurance Board (one of the contest's sponsors) a statewide award. WCKR receives 30-40 calls daily in connection with the promotion.

Facilities at work

KNX Los Angeles believes in keeping its premises as well as its personnel busy to inform and entertain the citizenry. For two weeks this spring an ice rink occupied space in the plaza of Columbia Square (KNX is a CBS-owned radio station). Each afternoon Bob Crane, early morning personality at the station, conducted a skating contest whose winners joined him in a special appearance at the Ice Capades during its stay in L.A.

Meanwhile, back in the lobby of the building, KNX was holding a Youth Science Fair, comprising a score or more of exhibits constructed by students of Southern California high schools and junior highs, four of whom received U.S. Savings Bonds from the station for outstanding displays. The KNX science project got high commendation from military and academic quarters.

Both lobby and plaza were idle for a week. Then they were filled with a spectacular display of missiles, space ships and satellites for the station's second Armed Forces Week observance, May 9-17. Why should a radio station spend time and money on visual promotions? KNX regards such use of its quarters as part of its community obligation.

EZY way out

• KEZY Anaheim, Calif., placed "Ezy Street" signs on local signposts to remind listeners of its debut May 17.

Feet beat to 39 doors

A total of 39 sponsors have signed to participate in a traffic-builder promotion plan offered by WJQS Jackson, Miss., according to Lew Heilbroner, station general manager. Total gross for the eight-week package amounts to $7,800. The sponsors' customers may register daily, at no charge, for WJQS' "Dream Vacation," core of the traffic-building plan. One winner at the conclusion of the contest on July 30 will receive all the prizes, including a 1959 Chevrolet station wagon, a 14-foot boat and trailer with an 18-hp Evinrude motor, a week's vacation for two at a resort on the Gulf Coast and $200 in cash. WJQS negotiated trade deal for the boat, trailer, motor and resort accommodations.

Beasts assume promotion burden

It's hard to tell station promoter from zookeeper or gamehunter these days, as broadcasters celebrate the return of fine weather. Elephants, camels, horses and bears, both dead and alive, all have figured in June promotions around the country.

WEOL-AM-FM Elyria-Lorain, Ohio, equipped an elephant for a remote broadcast. Disc jockey Dick Conrad donned a turban and rode the beast in the rain downtown, broadcasting his regular show and promoting his station's "Big Sound."

Jean Loach of WXYZ-TV Detroit also mounted a pachyderm one day to do her 15-minute show, *Jean's Notebook*. They performed on the studio grounds.

Tulsa's radio and tv stations took advantage of the city's annual Horse Show to stage a camel race for charity. The winner: Johnny Ryan, program director of KVOO, on a dromedary named Margaret Truman.

After the sheriff of King County, Washington, caught and skinned an outlaw bear of Carkeek Park, KOMO Seattle staged a big bear-burger party. The station broadcast ceremonies turning over the bearskin to the British government for Buckingham Palace guards' Busby hats and KOMO disc jockeys served up more than 600 bear-burgers.

Another more fortunate bear is getting a ride to Washington, D.C., courtesy of a Capital station. The U.S. Fish & Wildlife Service found a three-month-old Polar cub in Alaska for the Washington National Zoo, but Uncle Sam couldn't pay the freight. WMAL Washington stepped in and paid the air fare.

"Helldorado" in Las Vegas is an annual excuse to put on western duds and celebrate. For Vegas station KENO it was an excuse to attract attention by covering the celebration on horseback. Bob Salter and Glen Bryan each did a three-hour stint in the saddle, sending the signal from horse to mobile broadcast unit to station.

CBC decides to try jingles

For the first time the Canadian Broadcasting Corp. has commissioned promotion jingles for use on its 30-station Trans-Canada radio network. The jingles will promote the new *Tommy Hunter Show*, half-hour early afternoon Monday-Friday show. CBC will expand use of jingles if they are found successful. Bobby Gimby, Toronto musician, was commissioned to do the jingles.

100,000 enter WLOL contest

Entries in the WLOL Minneapolis "Hold That Hit" contest approached 100,000 in its third week, the station reports. Contestants submit their names to the station which by phone each day ask 10 to name the tune being broadcast. A correct reply wins a merchandise certificate courtesy of Red Owl, a local supermarket. The listener is then eligible to guess at WLOL's "Mystery Tune" for the grand prize of a new automobile. The contest is credited with increasing traffic in the supermarkets.

Wear 'n' wash on WICS (TV)

When Warren King, commercial manager of WICS (TV) Springfield, Ill., advised the B&F Toggery Co. to take a plunge into tv, the co-owners of the clothing firm took him literally.

Store owners Ted Budberg and Larry Fisherkeller decided to dramatize a new line of wash suits by being telecast live hopping into a thousand-gallon tank of water. "The people still kid us about getting into the swim," Mr. Budberg reported, but the commercial sold "a lot of suits."

Trailer out in front

WITH Baltimore used its big studio trailer to swing a long-term contract in the tough-to-negotiate department store field. Last Saturday (June 20) the mobile unit made its first all-day stand at one of the shopping center locations of Hochschild, Kohn & Co. Each succeeding Saturday the studio will be parked at a different Hochschild's branch, broadcasting live from 10 a.m. to 8 p.m. The 35-ft. trailer has a marquee and display space.

Hearing Cases

FINAL DECISIONS

By order, Commission made effective immediately May 19 initial decision and granted applications of (1) Orange County Bcstg. Corp. to increase power of WGNY Newburgh, N.Y., from 1 kw to 5 kw and install DA, continuing operation on 1220 kc, D, with effective date of grant to be stayed, pursuant to Commission's Public Notice of June 18, 1957, pending ratification of Agreement between United States and Mexico with respect to operation on Mexican Clear Channels with 5 kw power during daytime hours and (2) Vincent De Laurentis for new station to operate on 1220 kc, 1 kw, DA, D, in Hamden, Conn.; engineering and other conditions. Comr. Fred Ford abstained from voting. Ann. June 17.

By order, Commission affirmed Sept. 23, 1958, initial decision, as modified by Commission, and granted application of Birch Bay Bcstg. Co. for new am station to operate on 550 kc, 500 w, D, in Blaine, Wash., and, in so doing, it denied motion of Birch Bay to strike exceptions of Puget Sound Bcstg. Co. (KVI), Seattle, denied exceptions of KVI, and granted exceptions of Broadcast Bureau. Ann. June 17.

By decision, Commission granted application of Westbrook Bcstg. Inc., for new am station to operate on 1440 kc, 5 kw, D, in Westbrook, Me., and denied competing application of Sherwood J. Tarlow for new station on same frequency with 500 w, D, in Saco, Me. May 12, 1958, initial decision looked toward this action. Ann. June 17.

INITIAL DECISION

Hearing Examiner H. Gifford Irion issued initial decision looking toward granting application of Booth Bcstg. Co. to increase daytime power of WBBC Flint, Mich., from 1 kw to 5 kw and make changes in DA-D pattern, continuing operation on 1330 kc with 1 kw-N, DA-2; engineering condition. Ann. June 11.

STAFF INSTRUCTIONS

Commission on June 17 directed preparation of document looking toward denying petition by The Young People's Church of the Air Inc., to deny or dismiss competing application of WJMJ Bcstg. Corp. for new class B fm station to operate on 104.5 mc in Philadelphia, Pa. May 27 initial decision looked toward granting Young People application and denying WJMJ.

Commission on June 17 directed preparation of document looking toward granting application of Star Bcstg. Corp. for new am station to operate on 1350 kc, 500 w, D, in Fredericksburg, Va., and denying competing application of Historyland Radio. Oct. 7, 1958 initial decision looking toward granting application of Historyland and denying Star.

OTHER ACTIONS

By memorandum opinion and order, Commission denied petition by Joseph M. Ripley Inc., for reconsideration of April 8 memorandum opinion and order which, on motion by Dan Richardson, struck exceptions of Ripley to Aug. 19, 1958 initial decision looking toward granting Richardson application for new am station to operate on 550 kc, 1 kw, D, in Orange Park, Fla., and denying Ripley application for same facilities in Jacksonville. Ann. June 17.

By memorandum opinion and order, Commission granted petition by Valley Bcstg. Co., Lehighton, Pa., to extent of deleting aeronautical hazard issue but denied that petition insofar as it requested enlargement of issues in proceeding on its application and that of Miners Bcstg. Service Inc., Kingston, Pa., for new am stations. Ann. June 17.

By memorandum opinion and order, Commission (1) reversed ruling by hearing examiner which denied petition of M.V.W. Radio Corp., San Fernando, and Wilson Bcstg. Co., Oxnard, Calif., for additional time to file engineering exchange exhibits in proceeding on their am applications which are in consolidated hearing with applications of KGB Inc. (KGB), San Diego, Calif., and Robert S. Marshall, Newhall; and (2) set aside May 25 initial decision, reopened record, and remanded matter to examiner for further proceedings. Comr. John Cross dissented.

By memorandum opinion and order, Commission denied motion by Interstate Bcstg. Inc. (WQXR), New York, N.Y., to remove E. Weaks McKinney-Smith (WDXR), Paducah, Ky., as party to proceeding on applications of WQXR, Walter L. Follmer, Hamilton, Ohio, and Booth Bcstg. Co. (WTOD), Toledo, Ohio, involving use of 1560 kc, and dismissed as moot WQXR's motion as to Washita Valley Bcstg. Co. (KWCO), Chickasha, Okla., which is no longer a party (Dockets 12787, et al.). Comr. Robert E. Lee dissented.

By memorandum opinion and order, Commission denied petitions by Florida Gulf-

Equipping a Radio Station?

New RCA 5000-Watt AM Transmitter

Type BTA-5R/5R1

A true high quality transmitter, requires less floor space than previous 5 KW transmitters, and it has been designed to provide years of outstanding performance. Available with conventional tube rectifiers or with the all new silicon high voltage rectifiers the BTA-5R/5R1 assures low operating costs and long life. There is easy access from the front to the vertical chassis containing tubes, feedback ladders and overload relays. It is also available with color doors to match studio decor . . . Whatever your equipment requirement see your nearest RCA Broadcast representative first!

Or write for descriptive literature to RCA, Dept. UD-22, Building 15-1, Camden, N.J.

RADIO CORPORATION of AMERICA

RCA Tmk(s) ®

coast Bcstrs. Inc., and Suncoast Cities Bcstg. Corp. to enlarge issues with respect to legal and financial qualifications of City of St. Petersburg, Fla. (WSUN-TV), in Largo, Fla., tv ch. 10 comparative proceedings. Ann. June 17.

Commission rescheduled oral argument for July 2 in proceedings on applications of Palm Springs Translator Station Inc., Palm Springs, Calif. Ann. July 17.

By memorandum opinion and order, Commission granted protest and petition for reconsideration by Telegraph Herald (KDTH), Dubuque, Iowa, to extent of designating for hearing application of Laird Bcstg. Inc., for new am station (KHAK) to operate on 1360 kc, 1 kw, DA, D, in Cedar Rapids, Iowa; postponed effective date of April 22 grant pending hearing; and made KDTH party to proceeding.

By memorandum opinion and order, Commission (1) denied petitions by WYTI Inc. (WYTI), Rocky Mount, Va., to designate for hearing and revoke the cp of Radio Franklin Inc., for new am station (WKWS) to operate on 1290 kc, 1 kw, D, in Rocky Mount, and (2) granted latter's application for extension of time to Nov. 27 to construct WKWS.

KSOO-TV Sioux Falls, S.D. — Designated for hearing applications for additional time to construct station and to increase vis. ERP from 28.9 kw to 316 kw and ant. height from 540 ft. to 1060 ft., move trans. site from 9 miles east of Sioux Falls to about 33 miles northeast of that city, and change type trans.-ant., etc. (BMPCT-5168); made Midcontinent Bcstg. Co. (KELO-AM-TV), Sioux Falls, who petitioned to designate modification application for hearing, party to proceeding. Ann. June 17.

WMAX Grand Rapids, Mich.—Designated for hearing application to increase power from 1 kw to 5 kw, continuing operation on 1480 kc, D; made WIOS Tawas City, Mich., and WRSW Warsaw, Ind., parties to proceeding. Ann. June 17.

Rev. Stuart P. Noordyk, Fremont, Mich.; Air Capitol Inc., Madison, Wis.; Des Plaines-Arlington Bcstg. Co., Des Plaines, Ill.—Designated for hearing applications for new am stations to operate on 1550 kc, D—Noordyk with 1 kw, Air Capitol with 5 kw, DA, and Des Plaines with 10 kw, in consolidated proceeding with more than 20 am applications; order supplements March 4 hearing order; made WBEE Harvey, Ill., party to proceeding. Ann. June 17.

Routine Roundup

By interpretive opinion, Commission denied various pleadings seeking reconsideration of its February 19 interpretations of applicability of Sec. 315 (political broadcast provision) of Communications Act to certain news film clips shown by Chicago tv stations during local primaries.

In so doing, Commission opinion reviewed intent and purposes of Sec. 315; legislative history of Radio Act of 1927 and Communications Act of 1934; views of members of Congress with respect to proposed related legislation, both past and present; testimony of interested parties to such proposed legislation; Commission's comments on proposed legislation; role of tv in political campaigning; precise wording of Sec. 315 and absence of any exceptions thereto; interpretation of term "use" in that section of law; Commission's past interpretations of Sec. 315; related court proceedings; and current pleadings.

Particular current pleadings and briefs considered were those of CBS Inc., licensee of WBBM-TV Chicago; NBC, licensee of WNBQ-TV Chicago; Westinghouse Broadcasting Co., Attorney General of United States, and replies thereto.

Chairman John Doerfer and Comr. T.A.M. Craven dissented (former with statement); Comr. Rosel Hyde had concurring statement, and Comr. John Cross dissented in part and concurred in part with statement.

With Chmn. Doerfer not participating, Commission denied "motion" by Lar Daly that Chmn. Doerfer be disqualified from participating in reconsideration.

Case grew out of request by Lar Daly, legally qualified candidate for mayor in both Democratic and Republican primaries in Chicago, for time equal to that afforded by four Chicago commercial tv stations in news film clips to Mayor Richard J. Daley and Timothy P. Sheehan, Democratic and Republican opponents, respectively. By unanimous vote of all seven Commissioners in February, Commission held that those film clips showing Mayor Daley and candidate Sheehan filing their political petitions, accepting formal political indorsements, and certain political interviews, constituted Sec. 315 use entitling Lar Daly to equal time. At same time, by 4-3 vote (Chmn. Doerfer and Comrs. Craven and Cross dissenting), it held that film clips showing Mayor Daley greeting President of Argentina on latter's Chicago visit, and Mayor Daley's appeal for contributions to March of Dimes campaign also constituted Sec. 315 use. Ann. June 16.

BROADCAST ACTIONS

By Broadcast Bureau

Actions of June 12

KLYD-AM-FM Bakersfield, Calif.—Granted assignment of license and cp to **Edward E. Urner**, et al., d/b **Urner Bcstg. Co.**

WJMJ Philadelphia, Pa.—Granted mod. of cp to make changes in DA pattern.

WBIC Islip, N.Y.—Granted extension of completion date to Nov. 30.

Actions of June 11

WKBW-TV Buffalo, N.Y.—Granted license for tv station; ERP vis. 70.8 kw. aur. 42.7 kw, ant. 1420 ft.

WKWK-FM Wheeling, W.Va. — Granted cp to replace expired cp which authorized decrease of ERP from 16 kw to 10 kw.

WGAT Gate City, Va.—Granted mod. of cp to move ant.-trans. location 1200 ft. east of present location (same site); condition.

WANN-FM Annapolis, Md.—Granted mod. of cp to increase ERP to 20 kw and change type trans.; ant. 205 ft.; remote control permitted; condition.

WDLP-FM Panama City, Fla.—Granted request for cancellation of license; call letters deleted.

KWG Stockton, Calif.—Granted request for cancellation of license for auxiliary trans.

WSAJ Grove City, Pa.—Granted authority to remain silent for period beginning June 6 and ending Sept. 19.

WDCR Hanover, N.H.—Granted authority to remain silent for period beginning midnight, Sun., May 31 until 6:30 a.m., Wed., Sept. 16.

WKRZ Oil City, Pa.—Granted authority to remain on air from 7:15 to 8:45 p.m. on Tuesday and from 7:30 to 8:30 p.m. on Thursdays for period beginning June 6 and ending Sept. 19 during period WSAJ Grove City, Pa. is silent.

KDSN Denison, Iowa—Granted authority to sign-off at 7:30 p.m., CST, for period ending July 31, except for special events when station may operate to licensed sign-off time.

Following stations were granted extensions of completion dates as shown: WNBQ (TV) Chicago, Ill. (aux. trans.) to July 12; WYFE New Orleans, La., to Aug. 30; WKNA (FM) Charleston, W.Va., to Oct. 1, and WDRC-FM Hartford, Conn., to Oct. 5.

Actions of June 10

KHIL Brighton, Colo.—Granted involuntary assignment of license from estate of John Babcock to Edward A. Brown, administrator.

YOU'D NEVER KNOW HE HAD A CORONARY . . .

Some facts and fallacies about HEART ATTACKS

☑ The chances of surviving a heart attack are now steadily increasing.

TRUE—Not long ago, most people felt that a heart attack or a "coronary" usually meant sudden or early death—or a life of invalidism.

Now we know that most victims of this disease—about 80 percent—recover from their first attack, and many of them recover fully enough to enjoy many useful years.

☑ After recovery, most coronary patients can go back to their work.

TRUE—Recent studies show that the patient who has made a good recovery is not handicapped when he works under proper conditions. Placed in a job which does not unduly tax his heart, and given proper medical supervision, he can engage in daily work without harm. Indeed, most doctors encourage their patients to return to work.

☒ Heart attacks are brought on by strenuous physical activity.

FALSE—Most heart specialists now believe that physical exertion has little, if anything, to do with a coronary attack. In fact, attacks often occur during sleep or rest.

Many factors—including age, sex, occupation and diet—are believed to play a part in the development of coronary disease.

☑ Recovered coronary patients should keep their weight down.

TRUE—Next to good medical care, nothing is more important for people who have had heart disease than to keep their weight at a desirable level.

It is just as much of a burden on the heart to carry around ten pounds of extra and unneeded weight all day as it would be to carry around a ten-pound bundle constantly.

☒ A person who has had one heart attack will certainly have another.

FALSE—The recovered patient should not live in fear that he will have another attack. He may—or he may not.

By sticking to their doctor's recommendations about diet, weight control, work, sleep and rest, more and more patients who have had heart attacks are living comfortably without further trouble.

☑ Medical science is forging new weapons against heart trouble.

TRUE—Greater progress against coronary disease will almost surely come with new methods of prevention and treatment. There is also hope that coronary attacks may be *prevented* by the use of anti-coagulants, or blood-thinning drugs.

Research is also shedding new light on the role of diet, exercise, stress and heredity in relation to coronary attacks.

1 MADISON AVENUE, NEW YORK 10, N Y

OUR RESPECTS TO . . .

Albert Lant Capstaff

At 18, Al Capstaff was understandably disappointed that the depression reduced the number of staff personnel chosen to accompany Adm. Richard E. Byrd's expedition to the South Pole in 1930. Mr. Capstaff's job as combination radio operator-dog sled driver was eliminated, but in subsequent years, particularly as producer of the *Bob Hope Show* (1943-54) the deposed dogsledder hopped to many parts of the world—but never by dog sled.

Today Mr. Capstaff is largely a stay-at-homer, overseeing the programming activities of NBC Radio as vice president in charge of network programs. With benefit of hindsight, he credits his South Pole misadventure with assisting his career in radio ("I really became interested in a broadcasting career after the Byrd assignment went blooey").

Energetic but Calm • Mr. Capstaff is a tall, heavy-set man with balding light brown hair, who speaks softly and exudes a quiet geniality. His colleagues unanimously regard Mr. Capstaff as "a real professional," who rose through the ranks and is versed in all phases of production, including engineering. A casual acquaintance may receive the impression that Mr. Capstaff is a placid individual but his coworkers say this is a faulty evaluation: actually, he is an energetic and quick-thinking man, who rarely is ruffled in times of emergency and perhaps, therefore, projects a picture of diffidence.

Mr. Capstaff's alliance with radio dates back to 1922, when he noticed an early crystal set in a store window. He persuaded his father to buy a set, and two years later, he became, at 12, one of the youngest licensed ham operators in the country (W2CDQ).

Albert Lant Capstaff was born in Barrow-on-Furness, England, on Oct. 10, 1912, and was brought to the U.S. by his parents when he was six months old. The family settled in Ho-ho-kus, N.J., and young Al attended Ridgewood (N.J.) High School and Union College, Schenectady, N.Y., where he studied electrical engineering.

Into Commercial Radio • His early fascination for radio led him to obtain a first class commercial radio license and a job with WODA Paterson, N.J., as a disc jockey-engineer in 1928. When family circumstances forced him to give up college after two years, Mr. Capstaff obtained employment with High Grade Sylvania (now Sylvania Electric Products) in Clifton, N.J., where he helped build transmitters. The following year, in 1934, Mr. Capstaff and Max Weiner (now chief engineer of WNEW New York) built WNEW's original 5 kw transmitter at Secaucus, N.J.

He joined NBC as an engineer in 1935 and remained in that capacity for eight years, headquartering in Hollywood from 1937 and thereafter. In 1943 he accepted an offer from Foote, Cone & Belding, Hollywood to produce *Kay Kyser's College of Musical Knowledge*. The following year he was appointed director of radio-tv production for the agency's Hollywood office.

His most ambitious assignment from 1943-54 was producing the *Bob Hope Show*, with Mr. Capstaff switching from FC&B to Young & Rubicam and BBDO as Mr. Hope changed sponsors. He estimates he travelled more than half a million miles in the 11 years as the program originated in Hawaii, England, France, Germany, Japan, Korea, Guam, Okinawa, and other countries. He numbers many entertainment personalities as friends, including Frank Sinatra, Jack Paar, Jack Benny, Tony Martin, Dinah Shore, Bing Crosby (and, of course, Mr. Hope), since he had worked with many of them on various programs.

A Fling at Ownership • When he decided to leave Bob Hope, to whom he was under contract, in 1954, it was because he wanted to translate into action the ideas he had been developing about radio. He bought a 250-w station, KVAS Astoria, Ore., and initiated what he calls a "razzle-dazzle operation" of music, news and sports. He operated the station with substantial success for six months, he says, but then sold it. Why?

NBC Radio's Al Capstaff
He quietly thrives on excitement

"I found it was all too quiet for me," he explains. "And I got tired of a lot of hunting and fishing."

Mr. Capstaff returned to New York and NBC Radio in April 1955 and was assigned to the original staff of the network's *Monitor* programming service as manager of entertainment and talent. The following January he was promoted to executive producer of *Monitor* and last February he was elevated to his present post.

The task of supervising *Monitor's* activities, he says, was "a back-breaking-job, but I enjoyed every minute of it." Colleagues mention that he used to keep two secretaries busy with memos and phone calls linking him to the program's 100 stringers throughout the world. He supervised six production units and a *Monitor* staff of 27 and a *Nightline* staff of 12.

The Nickname • "Through it all," his co-workers add with envy, "Al would get everything done, all the while with one of his king-sized cigars protruding from his mouth." (This habit prompted Bob Hope to call Mr. Capstaff "Fuse Face," and the nickname has stuck.)

Mr. Capstaff has the utmost confidence in network radio as implemented by NBC. He points to such programming ventures as *Monitor* ("we provide 42 hours of programming on the weekend, which has increased business and provided a needed service"), *Star Dust* ("these are glamour segments presenting such personalities as Bob Hope, Marlene Dietrich, Madeleine Carroll, Ernie Kovacs, Fibber McGee and Molly and Archie Gardner") and the *Image* series. He is particularly proud of the latter series, which was initiated earlier this year, and observes: "We are convinced that a meaningful documentary on a significant subject cannot be covered in a half-hour or an hour. Our *Image Russia* series covered 27 hours; our *Image Minorities* broadcasts, now being presented, will run to at least 25 hours. Later this year, we plan *Image American Frontier.*"

Mr. Capstaff married the former Margaret Waters of New York City in 1945. They live in Darien, Conn., with their four children (some by previous marriages) — Marnette, 23; Marilou, 20; Judy, 19, and James, 13.

He is a member of the Radio & Television Executives Society, the Lambs Club, and the Darien Country Club. He enjoys skeet and golf.

"Though I still enjoy travelling," he remarks, "the travelling I enjoy most of all these days is on my 34-foot cruiser, *The Caprice*, on Long Island Sound."

A winning fight begins

IT is not unrealistic to hope for a major repair job on the political broadcasting law at this session of Congress.

The law will not be repealed, although repeal must be the ultimate objective, but it will be corrected in significant respects—if broadcasters maintain the momentum of their campaign against it.

Last week hearings began before the Communications Subcommittee of the Senate Commerce Committee. Before the hearings end, in another week or two, a mass of persuasive testimony will have been accumulated. On June 29 the Communications Subcommittee of the House Commerce Committee will begin covering the same ground. Never before have two such inviting opportunities been extended to broadcasters.

At both the Senate and House subcommittee hearings, it now appears that the weight of broadcaster testimony will acknowledge the desirability of eventual repeal of Sec. 315 but will favor the immediate adoption of the Hartke Bill which would cure several of the most glaring defects of the law. We questioned the soundness of the tactical decision to fight for the Hartke amendments now and for repeal some time in the future, but it is too late at this stage to reverse that decision. Since the main effort is now committed, it must be pursued along the same line until the Hartke amendments are enacted.

An imposing list of broadcasting representatives is scheduled for the Senate hearings. An equally imposing list must be arranged for the House. Even then, the campaign will not be over. Missionary work must be carried on among all members of both houses to make certain the legislation does not die on the floor.

Federal spectrum authority?

WHATEVER the ultimate result, the two-day panel before the House Commerce Subcommittee on radio spectrum use already has proved of substantial benefit. It underscored the need for full-scale revision of the archaic method of government management of allocations which inevitably has resulted in hoarding of valuable frequencies and inefficient and wasteful use.

The sessions convened by Chairman Oren Harris (D-Ark.) for the first time in memory placed on the public record the government and military views on spectrum use. Heretofore the military has kept its own counsel on allocations made by Presidential decree without regard to the requirements of private users who must look to the FCC. And the military heretofore has maintained secrecy on security grounds.

The need for radical surgery on spectrum management was generally conceded. Several panel members urged creation of a super FCC to coordinate allocations. Spokesmen for broadcasting wanted a prior study of spectrum utilization. These alternatives seem to constitute a distinction without a difference. The important point is the conclusion that some kind of federal spectrum authority should be named, whether it comes before or after a spectrum analysis.

Broadcasters have a big stake in allocations. It wasn't too long ago that the military openly implied that it would need more vhf spectrum space—presumably to be wrested from television and fm. It was only because of constant pressure and publicity (principally in this journal) that Congress two years ago took cognizance of the plight in which broadcasters might find themselves if any vhf or fm space were summarily pre-empted.

In the past few months the crisis seems to have passed, and even the military has publicly stated it has no designs on space occupied by broadcasters. This came only after the White House had taken note of the controversy and the President advocated appointment of a special commission to study spectrum utilization.

Rather than relinquish space, television is in dire need of additional vhf spectrum room so that full, national, competitive service can be provided. Conversations are under way between the FCC and the military authorities, looking toward an exchange of uhf for additional vhf space, but it is yet too early to assess the outcome.

What is of paramount importance is the creation of a permanent authority to govern allocations for government as well as non-government use. The Harris subcommittee panel took a step in that direction.

We still favor a joint Congressional Committee on Spectrum Utilization and Allocation to control policy relating to this great natural resource. Such policy control belongs to Congress. But if Congress, in its wisdom, decides that a Federal Spectrum Authority is the answer, this concededly would be a great forward stride. If this decision is reached it is to be hoped that members of such an agency would be named by the President with the advice and consent of the Senate, to insure against its being stacked in favor of either government or non-government users.

Yankee surge

THE oldest section of the United States is one of the most maligned and least understood. The New England states, all six of them, are constantly portrayed as starving survivors of a once-glorious textile past.

In this issue BROADCASTING presents a 44-page section devoted to the true story of the New England market. It tells what most New England media portrayals ignore—the story of reconstruction based on a 2,500-mile itinerary that covered over 90% of the populace.

New England is living well. It took the recession in stride. Its charts are heading upward—wages, employment, production, sales. The scientific industries are transforming New England into a land ready to take a leading place in the technological and nuclear future.

From time to time, BROADCASTING has conducted depth studies of misunderstood markets, from Georgia across the South and up the West Coast, in an effort to present these markets in proper perspective for those who do business in marketing and advertising. The extensively researched analysis of New England in this issue is offered in the hope it will show the area in its true light.

One Station Reaching The Booming Upper Ohio Valley

No. 12 IN A SERIES: ALLOYS

Vital companion to the rich Ohio Valley's steel, aluminum and chemical industries is the Powhatan plant of the Ohio Ferro-Alloys Corporation located at Powhatan Point, Ohio, which produces essential silicon metal and high grade silicon alloys used by this trio of industries. This $4 million plant consumes an amazing 240 million kilowatts of locally produced electrical energy annually.

Important also to those who have things for sale is the $1 million annual payroll of this Ohio Ferro-Alloys Powhatan plant. This is just one more reason why the WTRF-TV area is a super market for alert advertisers . . . a 39-county market where 2 million people have a spendable income of $2½ billion annually.

The Ohio Ferro-Alloys Corporation operates other plants at Brilliant, Ohio, and Philo, Ohio (both in the WTRF-TV area) and at Tacoma, Washington.

For availabilities, call Bob Ferguson, VP and Gen. Mgr., or Needham Smith, Sales Manager, at CEdar 2-7777.

CLOSED CIRCUIT®

Study in red • Although Mutual network, now in process of being sold again (see page 76), is still in red, figures aren't as scarlet as they were. Since taking over in March, Malcolm Smith group claims to have reduced monthly operating deficits from $110,000 to $50,000. They've been trying to reduce network's back debts by getting creditors to settle for less than full dollar value.

Buckley building • Deal now pends for purchase of third radio station in New England area by Richard D. Buckley Assoc. in which Mr. Buckley and John B. Jaeger, both former WNEW New York executives, are principals. They already operate WHIM Providence, bought second outlet, WDRC Hartford, June 19 for $815,000 (see story page 74). Plans are to operate headquarters office in New York.

Drop-ins • There'll be special meeting of FCC within week to consider vhf drop-in policy in markets having less than three vhfs, with report due from engineers on "costs" involving 21 major markets (BROADCASTING, June 8). FCC hopes to have proceedings in mill prior to its month long August recess. "Cost" factor is applied in broad sense, entailing shifts of existing stations, checker-boarding of assignments, and plus-minus factors in tv homes served.

Another allocations problem which FCC hopes to dispose of in advance of recess involves daytimers and their pleas for fixed hours (6 a.m. to 6 p.m.) in lieu of sunrise to sunset. FCC instructed staff at last week's meeting to prepare data on daytime skywave interference throughout standard broadcast band, which has bearing on daytimer operations. Whole matter comes to head before Special Senate Foreign Relations Subcommittee hearing to consider NARBA and Mexican allocations treaties, set for July 9.

Special progress • Now that deluge of advance orders for network nighttime periods in fall is about over for regular series, how about specials? Though not sold out, NBC-TV's Friday slot reserved for specials at 8:30-9:30 p.m. —already is near that point as 31 of 39 are said to be committed and five of remaining eight "reserved" for Chrysler. Sunday night specials *(Sunday Showcase* at 8-9 p.m.) reportedly are 67% sold (26 shows out of 39) despite fact peddling for this period got off to late start.

Catv tactics • Community television operators do not expect to block legitimization of vhf boosters, but they hope to encourage standards so stringent that boosters will cease to be threat to catv's growth. Cable operators feel they might not be able to lick booster adherents in Senate, but they exude confidence on outcome in House.

Examiners' status • Suggestion by FCC Chief Hearing Examiner James Cunningham, before House Legislative Oversight Subcommittee seminar that hearing examiners be called "hearing commissioners" and that their rulings be final and beyond review unless findings of facts are not supported by evidence, won no favor with Commission itself. Statement, approved by all commissioners disputing chief examiner's views, was authorized last Wednesday.

FCC members, to last man, felt Examiner Cunningham's proposals would, in effect, relegate commissioners to position of review court. Actually, they thought his proposal would mean that examiners would become policy makers and supersede FCC. FCC statement presumably will be incorporated in House Legislative Oversight Committee record.

New face • RCA and subsidiary functions in Washington, now scattered, may be centralized at single downtown location within next few months. Pinckney B. Reed, vice president in charge of all Washington activities, is seeking new location. His headquarters now are in Commonwealth Building, 1625 K Street, but it's inadequate and no additional space can be procured there.

Mr. and Mrs. Reed were introduced to Washington communications officialdom last Thursday at reception at which RCA President John L. Burns, Chairman of Board Executive Committee Frank M. Folsom, Senior Executive Vice President Elmer W. Engstrom and Executive Vice President T. A. Smith were hosts.

Effect of Sec. 315 • Because of FCC's re-examination of applicability of Sec. 315 to news programs, Campbell Arnoux, president of WTAR-AM-TV Norfolk, has ordered his stations to desist from covering activities of current political candidates for election to state legislature and other offices. Hot campaign issues could precipitate unconscionable demands for time and wreck normal news reporting, he said.

Travelers • Leonard H. Goldenson, president of AB-PT, and Ollie Treyz, president of ABC-TV, plan to spend August in Pacific in interest of network syndication, Am-Par records and other AB-PT properties. Organization owns minority interest in Australian broadcast enterprise (News Limited) and will explore prospects of extending basic overseas operations.

Long run • International shortwave allocations will be one of key problems at upcoming International Telecommunications Conference in Geneva to begin August 17 and run perhaps to Christmas. While American delegation hasn't yet been named, it's unofficial secret that Comr. T.A.M. Craven will head group of about 40 government delegates, plus 30-40 industry representatives who will serve as advisers.

Trenton switch • It's understood that by mutual agreement, NBC Radio and WTTM Trenton, N.J., are ending their affiliation, effective in August. Reports are that WTTM may become MBS affiliate.

Favorable climate • There's growing sentiment on Capitol Hill in favor of making significant repairs in Sec. 315, political broadcasting law, at this session. At very least news and public affairs shows will probably be exempted from equal-time provisions of law, it's believed, and with more hard work by broadcasters, even more extensive corrections are thought possible.

Farewell notes • Whatever *Voice of Firestone's* ratings on air, as 1959-60 casualty it's getting public attention. Dropping of 30-year-old show from ABC-TV's fall schedule (BROADCASTING, April 20) reportedly has drawn some 3,000 complaining letters to network, no small protest for a program casualty. Unlike "Dear Sir, you cur" letters that networks are accustomed to get on many occasions, most of those from *Firestone's* friends are said to be literate and rational—but still unhappy.

Tax bite • Ohio telecasters, through their state association, are vigorously opposing bill which would impose 3% tax on purchase or rental of motion picture film. Measure, endorsed by Ohio's Governor Mike Di Salle, would impose similar tax on motion picture theatres. While newspapers would pay tax on presses and other equipment, newsprint would be exempt.

PEOPLE WHO KNOW ATLANTA TV KNOW WAGA·TV IS THE BUY!

Another key advertiser who's up-to-date on Atlanta —and buying WAGA-TV of course—is the aggressive WINN-DIXIE food chain, now sponsoring the popular FLIGHT program every Tuesday at 8 PM.

WINN-DIXIE is one of a swelling roster of informed advertisers who've found from actual results that *live Channel 5* is *the* buy in Atlanta. It'll pay *you* to ask your KATZ man about the Early Show — Theatre 5 — and other powerful programming that delivers a big family audience at remarkably low cost on WAGA-TV.

WEEK IN BRIEF

MR DELLINGER

Not limited to consumers • Radio-tv may break into new field by inducing makers of non-consumer goods to use these mass media, according to Bob Dellinger, of Grant Adv., Hollywood. Two companies, Marquardt Corp. and Ciba, are now spreading their messages by broadcasting. Ciba believed to have set precedent in promoting prescription products on television. Mr. Dellinger tells about it in MONDAY MEMO. Page **19.**

New push for color tv • Triangle Stations assemble some of nation's top broadcasters for closed-door session in New York to catch up on state of color tv art, hear let's-talk-money analyses of how new dimension can boost profits. Page **27.**

Billing brawn in network television • In April it's the Ford car topping the brands and Procter & Gamble contributes $4.6 million in gross. Trend item for four-month period: 25% increase in daytime billings. Page **32.**

Getting ahead of the numbers • Atlanta agency develops streamlined way to adapt NCS No. 3 coverage data for its daily tv use. Page **35.**

Ready to fight • Booster adherents, community tv proponents and broadcasters prepare for Washington hearing before Senate Commerce Committee. Booster operators fearful of their future. Catv operators to attack boosters and at same time defend themselves against attacks by broadcasters. Broadcasters like boosters, plump for catv regulation. Page **40.**

House takes up Sec. 315 • Senate equal-time hearings end but House takes up question in sessions beginning today. Sen. Pastore promises early action by his subcommittee on some form of relief for broadcasters, indicating he favors reporting only one section of Hartke bill. Page **46.**

Vhf and fm want to stay put • FCC told by industry witnesses their spectrum space should not be disturbed. Commission continues depth study of non-government services in 25-890 mc band. Page **58.**

Voiced news merger • Two services, Radio Press Inc. and International Transmissions Inc., blend facilities and personnel. George Hamilton Combs will be chairman, Sumner J. Glimcher president. Page **62.**

Tv's most underrated service • News telecasts have "much stronger" impact on public than generally believed, according to Dr. Phillips Eisenberg, analyzing results of survey conducted for Corinthian Broadcasting Corp. Page **64.**

Without their papers • Kansas City and St. Louis retailers find promotional outlets in broadcast stations as newspapers are shut down. Sales of stores holding up fairly well. Page **72.**

Tv stations' "imagery" • CBS Television Stations Division unveils new media study tracking the image and influences on viewer confidence in advertising. Surveyed are New York and Los Angeles. Page **75.**

FCC SETS AGENCY WITNESSES

Top-drawer advertising agency executives were ordered to appear at FCC's inquiry into tv network programming practices for July 7 in U. S. Courthouse, Foley Square, New York (BROADCASTING, June 22). Order issued Friday by Chief Hearing Examiner James D. Cunningham who also is presiding at inquiry—which involves charges of tie-in practices by networks.

Hearings on programming study began last month with network legal aides testifying on documents and reports submitted to network study staff. New York hearings will cover function of advertising agencies in relation to production and selection of programs and schedules. Agencies and their representatives ordered to appear follow:

McCann-Erickson (C. Terence Clyne), BBDO (Robert L. Foreman and James Schule), J. Walter Thompson Co. (Dan Seymour and John F. Devine), Young & Rubicam (Peter G. Levathes and David Miller), Ted Bates & Co. (Richard A. R. Pinkham and Harold J. Saz), SSCB (Philip H. Cohen), B&B (Thomas J. McDermott —who joined Four Star Films last week, see page 10), Compton Advertising (Lewis H. Titterton), Cunningham & Walsh (John B. Cunningham) and Lennen & Mitchell (Nicholas E. Keesely).

Some of these witnesses will be appearing under subpoena.

Sec. 315 measure offered by Harris

Rep. Oren Harris (D-Ark.), chairman of House Communications Subcommittee which begins hearings today (Monday) on revisions of Sec. 315 of Communications Act, Friday (June 26) introduced his own equal time amendment (HR 7985). It exempts newscasts, commentary, panel shows, political conventions and similar shows from Sec. 315—but does not include an exemption for debates.

New measure is similar to bill sponsored by Rep. Harris in 1956, which was subject of lengthy hearings. It also is very similar to three other bills to be considered in this week's hearings and to S 1585, introduced by Sen. Strom Thurmond (D-S.C.).

Also last Friday, Rep. Harris announced witness list for three days of hearings scheduled this week (see earlier story page 46. Rep. Glenn Cunningham (R-Neb.), sponsor of one bill (HR 5389) under consideration, which would amend equal time law, will be first witness at 10 a.m. today in Rm. 1334 of New House Office Bldg. He will be followed by other members of Congress, FCC Chairman John C. Doerfer, Comr. Frederick W. Ford and NBC Board Chairman Robert Sarnoff.

Witnesses tomorrow (Tuesday) will include Rep. Joseph W. Barr (D-Ind.), sponsor of HR 7122, Asst. Attorney General Robert Bicks from Justice Dept., CBS President Frank Stanton, NAB President Harold Fellows, Francis Littlejohn, ABC director of news and unnamed spokesman for United Independent Socialist Committee.

Wednesday witnesses will be Paul Butler, chairman of Democratic National Committee; Westinghouse Broadcasting Co. President Donald McGannon; Lar Daly; Edward Gans of Berkeley, Calif., and Joseph Schafer, unsuccessful candidate for Republican nomination for Philadelphia mayor. Committee has invited several other prospective witnesses but confirmation of their appearance had not been received late Friday.

Major agencies in N.Y. merge

Merger announced today (June 29) of Fletcher Richards, Calkins & Holden, N.Y., with Bryan Houston, that city, creates agency with some $35-40 million in annual billing. Former name will be retained. Bryan Houston, board chairman of his agency, becomes vice chairman of board in new organization.

Bryan Houston Inc. ranked 31st among top 50 radio-tv agencies last year, has lost near $5 million spot tv advertiser, Dristan, Whitehall's second ranking product in volume.

Top officers continue: Bradley Walker, board chairman; Mr. Richards, president and chief executive officer; Paul Smith, vice chairman; J. Sherwood Smith, chairman of executive committee, while Joseph Scheidler, executive vice president of Bryan Houston, becomes executive in package goods marketing and merchandising. Headquarters stay at Richards' N.Y. office, 10 Rockefeller Plaza. Other offices are in Chicago, Los Angeles, San Francisco, Seattle, Toronto and Montreal. Larger radio-tv accounts include Chemway, Eastern Air Lines, J.A. Folger, Gulf Oil, Heublein Inc. Food Div., Litton Industries (electronics), McFadden Publications, Simplicity Pattern Co., J.P. Stevens and U.S. Rubber Co. among others.

Guild honors CBS-TV

CBS-TV's *Playhouse 90* series (Thurs., 9:30-11 p.m.) was honored with Page One Award for radio and television last Friday (June 26) for "consistent, original, often experimental and always provocative drama." Award was presented by Newspaper Guild of New York.

Roger Clipp, Triangle Publications' radio-tv vice president, and John L. Murphy, Crosley Broadcasting Co. vice president, gave run down on their individual markets. Mr. Murphy said WLWT (TV) Cincinnati currently programs average 17 hours of color each week and "if other markets in U.S. would program on the same basis, color tv would make last gains." Said Mr. Clipp, for color to be salable medium in Philadelphia operating sets would have to go up from some 40,000 now in use to at least 100,000.

Tall Corn opposes Sec. 315 ruling

Resolution asking Congress to hold FCC "in error" in its interpretation of equal-time provisions of law governing political broadcasting adopted by Iowa Tall Corn Network during annual meeting at Lake Okoboji, June 22-25, but without taking sides on full repeal or specific issue of newscasts. Group also asked BMI to reinstitute series of radio programming clinics.

Robert W. Erickson, KOKX Keokuk, elected president of network succeeding Glen Stanley, KBOE Oskaloosa. Other officers elected were Leo R. Mayr, KCIM Carroll, and Ed Breen, KQTV (TV) and KVFD Fort Dodge, both vice presidents, and E. M. Horning, KSIB Creston, secretary.

Tall Corn members set up structure for series of quarterly meetings with agency participation in key cities, probably starting in September. Members

CONTINUES *on page 10*

AT DEADLINE

CONTINUED *from page 9*

discussed one rate card concept, which it adopted some months ago, and agreed unofficially to go along with it for at least another year. It also was felt 15% should be retained, with advertiser (rather than station) paying agency.

Among key speakers were Edward Fitzgerald, chief timebuyer, J. Walter Thompson Co., Chicago, and L. M. Booton, managing partner, Bruce B. Brewer & Co., Minneapolis. Mr. Fitzgerald urged stations to redouble efforts to provide sufficient station data (program logs, ratings, etc.) to enable agencies to make "intelligent" buys. Same subject was explored by Mr. Booton from vantagepoint of farm broadcasting.

Justice revision

Rep. James Roosevelt (D-Calif.) announced in House Friday (June 26) that Justice Dept. had filed proposed amended ASCAP consent decree with Judge Sylvester Ryan of New York District Court seven days earlier. Judge has not accepted agreement, Rep. Roosevelt said, but is holding it in abeyance at request of Justice to allow small publishers and songwriters to make known their views. Terms of consent decree have not been made public. New agreement is result of disclosures of ASCAP policies made in hearing over year ago by House Small Business Subcommittee headed by Rep. Roosevelt, Congressman said.

WXIX (TV) to return

WXIX (TV) Milwaukee, which went off air April 1 after CBS relinquished channel and which later was purchased by attorney Gene Posner, now president and general manager of WXIX Inc., will resume broadcasting at 4 p.m. July 20, according to Lawrence Turet, director of operations. Uhf station on ch. 18 will be on air daily from 4 p.m. to midnight.

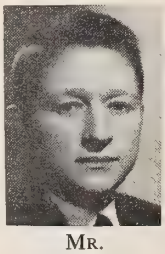
CBS signs two

CBS Radio announced Friday (June 26) signing of WGPA Bethlehem, Pa., and KFIR North Bend, Ore., as affiliates, both effective July 5.

RCA color move

RCA acted swiftly Friday (June 26) to support independent move underway to promote color tv at local station level. Charles R. Denny, RCA product planning vice president, after closed meeting at New York's Waldorf-Astoria, attended also by NBC-TV and about 20 executives from top color-casting stations (see story, page 27), announced that starting July 1, RCA will send color tv representatives to stations for talks on individual plans because programming varies from one station to another.

CBS-TV news boost



CBS-TV is giving news programming new status. Appointment announced today (June 29) of Irvin Gitlin, director of public affairs, CBS News, to newly-created post of program executive for creative projects at CBS News. Mr. Gitlin takes over in new position Aug. 1 and will be responsible for creation and development of new and "sponsorable" series for CBS News, while continuing executive program supervision.

WEEK'S HEADLINERS

MR. DEGRAY

EDWARD J. DEGRAY, vp in charge of ABC Radio since March 1958, elected network president. He joined ABC Radio in 1955, in 1957 was advanced to vp in charge of station relations. Mr. DeGray began his broadcasting career with accounting department of CBS in 1937. He was appointed office manager of WBT Charlotte, N.C., in 1940, and had advanced to assistant general manager by 1948 when he returned to CBS, N.Y., as executive assistant in charge of station administration, spot sales, co-op program sales and Housewives Protective League programs. He remained with CBS in various sales and station relations posts until early 1955 when he became director of station relations for Vitapix Guild Films, N.Y., organization established to sell tv films on national basis.

MR. MCDERMOTT

THOMAS J. MCDERMOTT, senior vp in charge of tv-radio, Benton & Bowles, joins Four Star Films, independent tv film production company, Hollywood, as executive vp and board member (CLOSED CIRCUIT, June 22). At Four Star Films (principals are actors Dick Powell, David Niven and Charles Boyer) Mr. McDermott will supervise production on seven series slated for network showing in fall and create new programming for future seasons. Four Star's upcoming network shows are *Zane Gray Theatre, Detectives, June Allyson Show, Wanted Dead or Alive, Riflman, Black Saddle* and *Johnny Ringo*. Mr. McDermott entered programming as radio director in 1939, in 1942 began his career at Benton & Bowles. He became vp in charge of radio tv in 1953, senior vp earlier this year and member of B&B's board last year.

MR. OMMERLE

MR. COHEN

HARRY G. OMMERLE, formerly vp in charge of network programs, CBS-TV, N.Y., named senior vp and board member of Sullivan, Stauffer, Colwell & Bayles, that city, where he will be responsible for clients' tv relations. PHILLIP H. COHEN, vp and radio-tv director, has also been elected to board of directors of SSC&B.

In 1935 Mr. Ommerle left N.W. Ayer & Son, Phila., where he was vp in charge of radio, to become producer with CBS. He subsequently held positions with William Morris agency, N.Y., and Ruthrauff & Ryan, that city, in 1948 operated his own talent agency and package-producing office. He rejoined CBS as program director in 1950 and was promoted to vp in 1955. Mr. Cohen has headed broadcast department since agency's founding in 1946, was elected vp in 1948. He was previously head of daytime radio department of Ruthrauff & Ryan.

FOR OTHER NEWS OF PEOPLE SEE FATES & FORTUNES

You don't have to run this up the flagpole to see who salutes. Not in Western Michigan you don't. Everybody is a WOOD-watcher. Chicago's *liveliest* station— *WGN-TV*

WGN-TV originates more live local television programming than all other Chicago stations combined! Live programs are audience-building programs. They interest more viewers, cement viewer loyalty, and create the quality audiences that pay off at the cash register for you as a WGN-TV advertiser.

Live programming is just one of the many reasons why our "Serving all Chicagoland" programs bring the best in TV to Chicago audiences.

Typical live telecasts on WGN-TV include:

Midnight Ticker—comparable to any network variety show. Fridays—11:45 P.M. to 1:15 A.M.

Paul Fogarty—Chicago's *only* exercise program. Daily—8:30 to 9:00 A.M.

Garfield Goose—Chicago's favorite puppet show. Daily—5:00 to 5:45 P.M.

Polka Party—Orchestra, dancing, studio audience. Saturdays—7:00 to 7:30 P.M.

plus many special telecasts, newscasts and on-the-spot events.

Having a 47-county Oklahoma Community Coverage poses a responsibility to KWTV in the field of public service.

Every other Wednesday, J. Howard Edmondson, Oklahoma's youthful Governor spends a Class A half-hour with KWTV's News Director, Bruce Palmer, in reporting to the KWTV Community. At times, the Governor has asked for letters and telegrams in expression of the people's views on an issue. Literally thousands of replies have opened the eyes of many Oklahoma legislators to the feelings of the people.

Powerful proof of KWTV's 47-county Oklahoma *community* coverage, service and AUDIENCE!

in TV and Radio...

IT'S BROADCASTING YEARBOOK!

Make no bones about it. Among medical men, Gray's simple-titled "Anatomy" is **THE** factual authority in its field. And among the busy people who spend money in broadcast advertising, there's no substitute for **BROADCASTING YEARBOOK** — the annual compendium of television and radio information compiled by the business-wise editors of **BROADCASTING** Magazine. Here, within a single set of covers, are all **THE** authoritative facts, analyses, studies and directories that TV-&-radio decision-makers will consult again and again for a full year. The 1959 edition of **BROADCASTING YEARBOOK** comes off the press in August—more comprehensive, more indispensable than ever. Among its 16,000 **paid** subscribers will be (as usual) the most important people in broadcast advertising... men and women who **must have facts** (and know where to find them). In short, it's a perfect place to tell **your** facts. **Deadline for proofs,** July 1; **final deadline,** July 15. Regular rates prevail. Reserve **NOW** and be sure of a front-row seat! **Call or wire collect!**

BROADCASTING
THE BUSINESSWEEKLY OF TELEVISION AND RADIO
1735 DeSales Street, N. W., Washington 6, D. C.

A CALENDAR OF MEETINGS AND EVENTS IN BROADCASTING AND RELATED FIELDS

(*Indicates first or revised listing)

JUNE

June 27-July 1—Advertising Assn. of the West, annual convention, Tahoe Tavern, Tahoe, Calif. Speakers include Nelson Carter, AAW president and vice-president-manager, Foote, Cone & Belding, Los Angeles; George Gribbin, president, Young & Rubicam, N.Y.; Robert B. Murray Jr., executive vice president, Pan American World Airways; James S. Fish, vice president, General Mills; Paul Willis, vice president, Carnation Co., Los Angeles; Franklin Graf, vice president, A.C. Nielsen Co., Chicago.

June 28-July 4—National Advertising Agency Network, management conference, Del Monte Lodge, Pebble Beach, Calif.

June 29-July 1—Military electronics convention sponsored by Professional Group on Military Electronics of Institute of Radio Engineers, Sheraton Park Hotel, Washington. Space propulsion, space electronics, radar, missile guidance, computers and related topics will be discussed.

*June 29, 30, July 1—House Communications Subcommittee hearings on seven bills amending Sec. 315 (equal time provision) of the Communications Act.

*June 30—Senate Communications Subcommittee hearings begin on several pending bills relating to CATV and booster stations.

JULY

July 5-11—Advertising Federation of America management seminar in advertising and marketing, Harvard Business School, Cambridge, Mass. Emerson Foote, McCann-Erickson senior vice president, is in charge.

July 5-17—NAB Management Development Seminar, Harvard Graduate School of Business Adm., Cambridge, Mass. Designed to give station management principles and analytic techniques involved in the executive job. Dr. J. Sterling Livingston, professor of business administration, Harvard, and president of Harbridge House, is academic director. William P. Gormbly Jr., assistant dean and director of Harvard advanced management program, is administrative director. Sixty broadcasters were accepted for enrollment by university.

*July 7—Resumption of FCC inquiry into tv network program practices, with advertising agency executives to be chief witnesses before FCC Chief Hearing Examiner James D. Cunningham. 10 a.m., U.S. Courthouse, Foley Sq., New York. Docket 12,782.

*July 7-9—Canadian Board of Broadcast Governors, public hearing on applications for am, fm, tv stations, Union Station, Ottawa, Ont.

June 10—Hearing on NARBA and Mexican broadcast treaty before special Senate Foreign Relations Subcommittee, headed by Sen. Wayne Morse (D-Ore.). Rm. 4221, New Senate Office Bldg., 10 a.m.

Just can't keep KOBY's Pulse down!

KOBY delivers the audience in San Francisco—because it's got a Pulse that just won't quit. Look at this January-February report: *Koby, the highest average share of audience seven days a week—6 A.M.—Midnight—15.0.*

And that 15.0 share gives KOBY the in-home and out-of-home listeners that are ready to spend money.

So if you've got a product or service you want to put across in San Francisco, KOBY's your best buy!

SEE PETRY for the top share of audience on **KOBY,** San Francisco—and start *your* sales pulse beating faster.

10% discount when buying **KOBY**—and **KOSI,** *Denver.*

(Speaking of Denver, after July, when in the Mile High City, stay at the Imperial Motel, 1728 Sherman, downtown.)

KOBY / *10,000 Watts in San Francisco*

For *Greenville, Mississippi* — **WGVM**

MID-AMERICA BROADCASTING COMPANY

*July 12-18—Public Relations Institute, U. of Wisconsin campus, Madison, sponsored by Public Relations Society of America.

July 14-15—Idaho Broadcasters Assn., Shore Lodge, McCall.

July 16-17—Air Traffic Control Symposium co-sponsored by Radio Technical Commission for Aeronautics and Los Angeles section of Institute of Radio Engineers. FCC Comr. Robert E. Lee and James T. Pyle, deputy administrator of Federal Aviation Agency, will speak.

July 16-19—American Federation of Television & Radio Artists, annual convention, Chase Hotel, St. Louis.

AUGUST

Aug. 3—Comments due on FCC proposal to revise television network rules including cutting down on option time, counting straddle programs as option time entirely, etc. Commission requests that comments also refer to same revisions in radio network rules. Docket 12,859. Postponed from June 22.

Aug. 16-18—Georgia Assn. of Broadcasters, summer meeting, Jekyll Island.

*Aug. 18-21 — National Assn. of Educational Broadcasters, seminar for radio station managers, U. of Wisconsin, Madison.

*Aug. 18-21—Western Electronic Show & Convention (Wescon), Cow Palace, San Francisco. Dr. Herbert F. York, Defense Dept. director of research and engineering, will speak Aug. 21 at luncheon to be held at Fairmont Hotel.

Aug. 21-23—Arkansas Broadcasters Assn., Hot Springs.

Aug. 23-24—UPI Broadcasters of Connecticut, Massachusetts and Rhode Island aboard aircraft carrier Wasp, at sea; board destroyer at Quonset, R. I., for transfer to Wasp 100 miles out; return to Boston.

Aug. 24-28—American Bar Assn., annual meeting, The Americana, Miami Beach, Fla.

Aug. 28-30—West Virginia Broadcasters Assn., Greenbrier, White Sulphur Springs. FCC Comr. Frederick W. Ford will speak.

Aug. 29—Oklahoma Broadcasters Assn. summer meeting, Lake Murray Lodge, Ardmore. Judge John Brett, presiding judge of Oklahoma Criminal Court of Appeals whose court rendered decision in favor of court broadcasting, will address luncheon. Ben Sanders, KICD Spencer, Iowa, will conduct sales clinic.

SEPTEMBER

Sept. 4-5—Texas AP Broadcasters, 1959 convention, Rice Hotel, Houston.

Sept. 10 — Advertising Research Foundation seminar in operations research, on 13 consecutive Thursdays starting this date. Further information from ARF.

Sept. 12—AP Broadcasters of Ohio, Columbus.

Sept. 16-18—Michigan Assn. of Broadcasters, fall convention, Hidden Valley, Gaylord.

Sept. 17-19 — Mutual Adv. Agency Network, second in series of three-day workshop-business sessions under new format calling for three (instead of four) annual meetings, Bismarck Hotel, Chicago.

*Sept. 18-20—United Press International Broadcasters Assn. of Minnesota, Sawbill Lodge, Tofte.

Sept. 21-22—Louisiana Assn. of Broadcasters, Francis Hotel, Monroe.

Sept. 21-23 — Westinghouse Broadcasting Co. Third Industrywide Public Service Programming Conference, Stanford U., Palo Alto, Calif.

*Sept. 23-24—CBS Radio Affiliates Convention, Waldorf-Astoria, New York.

Sept. 25—Advertising Research Foundation, fifth annual conference, Waldorf-Astoria, New York.

Sept. 29-Oct. 3 — Affiliated Advertising Agencies Network international convention, Somerset Hotel, Boston.

OCTOBER

Oct. 6-7—Electronic Industries Assn., value engineering symposium, U. of Pennsylvania. Virgil M. Graham, associate director; R. S. Mandelkorn, Lansdale Tube Co., general chairman.

Oct. 7-9—Canadian Section, Institute of Radio Engineers, annual convention, Automotive Bldg., Canadian National Exhibition, Toronto, Ont.

Oct. 12-14 — National Electronics Conference, 15th annual meeting and exhibit at Hotel Sherman, Chicago, with expectancy of 10,000 attendance and some 266 display booths. Sessions will be held on antennas and propagation, audio, circuit theory, communications systems, computers, microwaves, space electronics, television, transistors, and communication and navigation, among other topics.

Oct. 14-17—Radio-Television News Directors Assn., 14th international convention, St. Charles Hotel, New Orleans. Among speakers will be FCC Chairman John C. Doerfer and Rep. John E. Moss (D-Calif.), who will discuss broadcast news and freedom of information, respectively.

Oct. 18-21—Western Regional Convention, American Assn. of Advertising Agencies, Biltmore and Miramar Hotels, Santa Barbara, Calif. Agenda includes day of closed sessions for member agency management delegates and day-and-a-half of open sessions.

Oct. 22-23—Audit Bureau of Circulations, annual meeting, Drake Hotel, Chicago.

Oct. 26-30—National Assn. of Educational Broadcasters convention at Sheraton-Cadillac Hotel, Detroit.

Oct. 29-30—Electronic devices meetings sponsored by Professional Group on Electronic Devices, Institute of Radio Engineers, Shoreham Hotel, Washington.

Oct. 29-31—New Jersey Broadcasters Assn., fall meeting, Nassau Inn, Princeton.

NOVEMBER

*Nov. 2-4—Broadcasters Promotion Assn. convention, Warwick Hotel, Philadelphia. Robert W. Sarnoff, NBC board chairman, will be keynote speaker. Other speakers: H. Preston Peters, Peters, Griffin & Woodward; Adam J. Young, Adam Young Inc., and James T. Quirk, Tv Guide. Jim Kiss, WPEN Philadelphia, program chairman, said agenda will provide maximum exchange of ideas. Panels will be restricted to two participants.

Nov. 8-9—Fall meeting, Texas Assn. of Broadcasters, Texas Hotel, Fort Worth.

Nov. 9-10—Institute of Radio Engineers, radio fall meeting, Syracuse Hotel, Syracuse, N.Y.

Nov. 18-20—Television Bureau of Advertising, annual meeting, Sheraton Hotel, Chicago.

Dec. 11—Comments due to the FCC on stereophonic multiplexing rules as part of FCC's inquiry into possible wider use for fm subsidiary communications authorizations.

NAB REGIONAL MEETINGS

Oct. 15-16—Mayflower Hotel, Washington.
Oct. 19-20—Sheraton Hotel, Chicago.
Oct. 22-23—Somerset Hotel, Boston.
Oct. 29-30—Dinkler-Plaza Hotel, Atlanta.
Nov. 10-11—Texas Hotel, Fort Worth.
Nov. 12-13—Brown Palace Hotel, Denver.
Nov. 16-17—Ambassador Hotel, Los Angeles.
Nov. 19-20—Olympic Hotel, Seattle.

MONDAY MEMO

from **ROBERT L. DELLINGER,** *vice president, Grant Adv., Hollywood*

Radio-tv sell non-consumer lines too

Two highly technical companies dealing in non-consumer products made a decision in recent weeks which might have far-reaching effects on the broadcasting and telecasting industry.

On the basis of advertising philosophy alone, the events may crack open the doors to radio and television for manufacturers of non-consumer goods who until now have not felt that these mass media could bring them results warranting large outlays of money.

However, two companies, Marquardt Corp., Van Nuys, Calif., and Ciba Pharmaceutical Products, New York, have decided that radio and television are the right places for them to present their messages.

News for the Engineer • The Marquardt Corp., a client of Grant Adv., has authorized a new 52-week contract for its *Engineering Report*. The daily five-minute radio program (6:55 a.m.) reports the latest science-engineering news, written from an engineer's frame of reference. The program has already passed the 500-broadcast mark and is aimed specifically at the thousands of engineers and scientists in the Los Angeles area via KFI there.

Meanwhile, in New York, Ciba has announced a tv test program *This Week in Medicine* running on stations in Miami, Dallas, Kansas City and Binghamton, N.Y. This 15-minute program, also being presented in early morning hours, consists of a roundup of medical news and is slanted completely to doctors. The general public is not invited to tune in and Ciba hopes the highly technical language it uses on the program will discourage all but doctors from watching.

The Ciba effort is believed to mark the first time in the history of pharmaceutical advertising that a prescription product will have been promoted on tv. It may, in fact, be the first time a prescription product has ever been promoted in any consumer medium.

Ciba feels its new approach will break the log jam in advertiser-to-doctor communications. With doctors inundated with direct mail, Ciba is attempting to reach them via its special tv effort.

Keen Competition • The Marquardt Corp. is a youthful and highly specialized research and development company in the aircraft-missiles field. Founded 15 years ago, it quickly established a reputation for engineering competence. The rapid success of the organization, however, created problems. As engineering achievements were made, the company received new and more involved defense contracts, requiring it to expand its engineering and scientific staff. As new projects were undertaken, the company found itself in an urgent need for large numbers of high quality professional engineers and scientists which were, and are, in extremely short supply.

Compounding Marquardt's problem even further was the fact that these critical engineers and scientists were also being sought by companies with well known reputations and war-time records of achievements. Engineers tended to join the well known companies.

The problem appeared to be how to establish among the target audience "Marquardt's engineering and scientific achievements, quickly, and on a level with their major competitors." And the next question: How to do it with a limited advertising budget?

Finding the Market • Research supplied the first key to the answer. It was learned that the Los Angeles area with its $23 million weekly aircraft payroll held approximately 31.6% of the aviation and missile industry's engineers and scientists.

Knowing something about the characteristics of the prospects, and having pinpointed their location, the problem then was to reach them. Our primary budget went into trade journals because of their proven ability to deliver a vertical audience on a low cost per thousand basis. However, since the engineering market in Los Angeles is so highly concentrated, a test radio campaign seemed like a good idea.

The second and most important key to the problem was then discovered. With some 50 engineering and scientific categories—each with its trade journals, society meetings, pamphlets and direct mail—we learned that it is extremely difficult for engineers to keep up-to-date with the rapidly advancing technology. Why not then an engineering-science news digest which the engineers and scientists could listen to while driving to work.

The program philosophy was that it would be designed for engineers and scientists only. It would be written by technical editors, in technical language and presented by an authoritative, "engineer"-sounding announcer.

Hitting the Target • Perhaps the significance of the Marquardt success and the current Ciba test can be summed up by Jack Anderson, Marquardt manager of advertising and public relations, "In today's rapidly expanding economy with its myriad of sales and communication literature, radio and tv offer the industrial and technical advertiser an isolated billboard away from his competitors. In essence, programs such as Ciba's and our's provide the customer and prospect with a service similar to that of a trade journal. However, instead of sharing honors for the editorial information with 100 other advertisers, you receive the individual recognition and appreciation of the interested audience."

Twenty-nine-year-old Bob Dellinger is vice president and chairman of Grant Adv.'s Hollywood plans board. Prior to his current assignment, he was vice president and manager of Grant-Dallas. He joined Grant three years ago as public relations director, Hollywood. Before joining Grant, he was with Brown-Forman Distillers, Louisville, and General Electric Co., Los Angeles. A graduate of Indiana U., Mr. Dellinger was a member of the 1951 All-Big-Ten track team and is holder of numerous mile and two-mile run records. After college he served in the Korean War as Air Force first lieutenant. He is active in professional and civic organizations in Los Angeles and is a former director of the Los Angeles Advertising Club.

New England study

EDITOR:

Well done on your New England study. The "comeback" you write about is no news to me since many of our clients have been registering unusual sales gains in this important region.

Peter Bardach
Senior Media Buyer
Foote, Cone & Belding
New York

EDITOR:

I found the article on New England absorbing, surprising and well developed.

Allan Sacks
Media Buyer
J. Walter Thompson Co.
New York

EDITOR:

Please send us 10 reprints . . .

Harriet E. Benton
Radio-Tv Director
Ray Barron Inc. Adv., Boston

EDITOR:

I was most pleased to read your special report on New England. Capt. Thomas Tibbals came to Boston in 1635 and founded Milford, Conn., in 1639. Since then New Englanders have survived Indians, Red Coats, depressions, panics, world wars and industrial, labor, financial and economic crises perhaps better than any other area of our country. Their fault is in "hiding their light under a bushel" and it is high time somebody really spoke up and gave us the facts.

Congratulations on a fine article.

Walter A. Tibbals
Vice President
Norman, Craig & Kummel
New York

EDITOR:

I congratulate you on what I consider to be a first-rate job. In fact, I enjoyed it so much that I took the liberty of inserting a portion of this special section in the *Congressional Record* yesterday.

Sen. Norris Cotton (R.-N.H.)

EDITOR:

. . . you may be sure that it will be of use to my staff as well as myself.

Rep. James C. Oliver (D-Me.)

EDITOR:

. . . it appears to be a spendid effort in acquainting the public with the opportunities and the progress being made in the New England area.

Sen. Styles Bridges (R-N.H.)

EDITOR:

Your special report . . . is the kind of comprehensive reporting for which you are famous. . . . New England for too long has been misunderstood. . . .

Arthur H. McCoy
John Blair & Co.
New York

EDITOR:

May I add my congratulations . . . Would it be possible to get reprints of this story for local distribution?

George H. Jaspert
WCCM Lawrence, Mass.

EDITOR:

. . . I am happy to see BROADCASTING putting the facts in perspective. . . .

Rep. Emilio Q. Daddario
(D-Conn.)

EDITOR:

Congratulations on a very fine piece —comprehensive, factual, well written. . . .

George H. Arris
Financial Editor
Providence Journal and Evening Bulletin
Providence, R.I.

EDITOR:

. . . This report should give a much needed boost to the broadcast media here in New England which has not, heretofore, received its proper share of the broadcast dollar from the national advertisers.

Please send me 10 copies. . . .

George C. Bingham
Vice President and New England Sales Manager
Walker-Rawalt Co.
Boston

[EDITOR'S NOTE: Reprints of "What's Really Happening in New England" are available at 20 cents each.]

EDITOR:

Congratulations on your remarkably analytical story on New England. I, for one, would like to see additional articles of the same sort on other sections of the country. I feel your New England story is very helpful and be-

'Fm can sell' reprints

EDITOR:

I am writing to ask if you would be so kind as to send me a reprint of your study of fm radio ("Have audience, can sell—fm") published Feb. 9.

M.O. Ross, President
Butler U., Indianapolis

EDITOR'S NOTE: Reprints are available, 15¢ each.

KAYS-TV and the tornado

EDITOR:

After 10 years of trade press study, I'm sure the most interesting, best-handled story I have read appeared in your June 8 issue, page 74 ("Tornado warner becomes twister victim"). . . .

It might be interesting to you to know also that your article has evidently created substantial curiosity about our weather operation from stations pretty much all over.

This is a rather unexpected by-product of losing a tower, but a welcome one both from the standpoint of publicity (which we do not find embarrassing—only different) and the broader fact that we honestly believe in our public responsibility in this matter and think we have an idea of value to pass along.

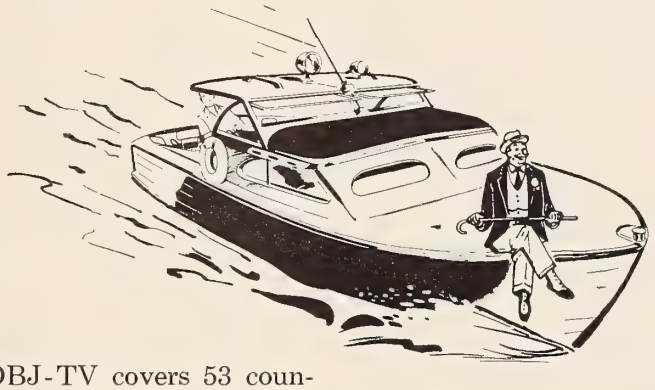
John Q. Quigley
Operations Mgr.
KAYS-TV Hays, Kan.

Civic spirit runs high

EDITOR:

Four mayors, two chamber of commerce presidents and two legislators are radio broadcasters in Washington state. As BROADCASTING reported June 8, Yakima has unique status—the president of the Chamber of Commerce is Jack Goetz, KIT, and Tom Bostic, KIMA, is mayor.

KPQ Wenatchee has had two presidents of the Chamber of Commerce in the past nine years. Currently it's Pat O'Halloran, vice president of KPQ. Other mayors besides Mr. Bostic are John Condon, KTAC Tacoma, mayor of Puyallup, and Allan Miller, KWSC Pullman.



Any other state radio men so community minded?

James W. Wallace
KPQ Wenatchee, Wash.

[EDITOR'S NOTE: State legislators are Joe Chytil, KELA Centralia-Chehalis, and Pat Nicholson, KBRO Bremerton.]

Ask the man who gets around...

WDBJ is one of the best buys in television . . . anywhere!

WDBJ-TV covers 53 counties . . . where there are over 400,000 television homes, $2 billion in retail sales. You can buy into this rich market economically and effectively, for WDBJ-TV furnishes highly rated shows at comparatively low cost to you.

For example, TOP O' THE MORNIN' (music, news, weather, fun) most popular early morning viewing in the area, delivers viewers for only 74 cents per M on a 5 Plan; 58 cents per M on a 10 Plan.* A powerful "live" boost for your product; powerful, sales-producing merchandising support provided, too!

It will pay you to take a closer look at TOP O' THE MORNIN' and other "best buys" offered by WDBJ-TV.

NEW PUSH FOR COLOR TELEVISION

- **Get-behind-color meeting draws score of leading broadcasters**
- **RCA picks up significant support in its long, lonely campaign**
- **Point of meeting: color can be used to boost television billing**

Esthetics be damned. There's money to be made in color tv, and now's the time to go after it.

Distilled, that was the message given representatives of some of the country's leading television stations last Friday (June 26) in New York. They were brought there by the invitation of Triangle stations' Roger Clipp to hear (1) status reports on where color is today and (2) what they should do about it. What they should do about it is sell it, said Mr. Clipp, "in our own selfish interests."

The closed-door session in the Waldorf-Astoria was made significant by the fact that the prime mover in this instance was not RCA, which until now has been a lonely champion of color, but an independent broadcasting group. It was also significant in its audience, all top-drawer broadcasting executives who went out of their way to hear the dollars-and-cents presentations.

This is what they heard:

• From TvB's Pete Cash—Color is tv's "ace in the hole" in the competition for more advertising dollars.

• From Mr. Clipp—While blame for the lack of color acceptance until now cannot be laid to stations, a push now by 400 or 500 stations would undoubtedly increase set sales. What's needed: A $200 set.

• From RCA's Charles Denny—Color can fulfill its promise and already has in six "significant" areas.

• From NBC's Tom Coffin—The addition of a color dimension can increase a show's audience by as much as 80%.

• From Mort Farr, a distributor-retailer from Upper Darby, Pa.—A recounting of how much color sales can mean to the appliance merchant, and reasons why the public *will* pay a premium for color.

• From NBC-TV's Don Durgin, vice president for network sales—A recap of the network's color plans for the 1959-60 season, highlighted by 250 hours of color in this year's fourth quarter (up 30% over last year), expansion of color studio facilities and continuation of seven-day-a-week color programming.

The play-by-play on the color tv presentation follows below. See AT DEADLINE for report on participant reaction.

Norman E. (Pete) Cash, president of the Television Bureau of Advertising, developing the thesis that color is tv's "ace in the hole," offered an analysis of television business in the immediate future: Cost will continue to rise; profit margins will shrink unless rate increases can be justified. The "ace", he said, could be color tv because research by both Crosley and NBC have shown that color can increase substantially the ratings of a program. Increased circulation, Mr. Cash stressed, can mean justifiable rate increases.

The most pressing immediate need, he said, is the promotion and the selling of color sets.

(Mr. Cash claimed there is an additional $70 million for tv in the advertising marketplace—if color programming were more widespread. He enumerated, one by one, the expenditures by the top 100 national advertisers for "color advertising" in other media and estimated a percentage from each medium that could accrue to tv—provided color tv could be made available and attractive to advertisers. He suggested these inroads were possible:

• From magazine's total of $145 million in color advertising, color tv could garner $29 million.

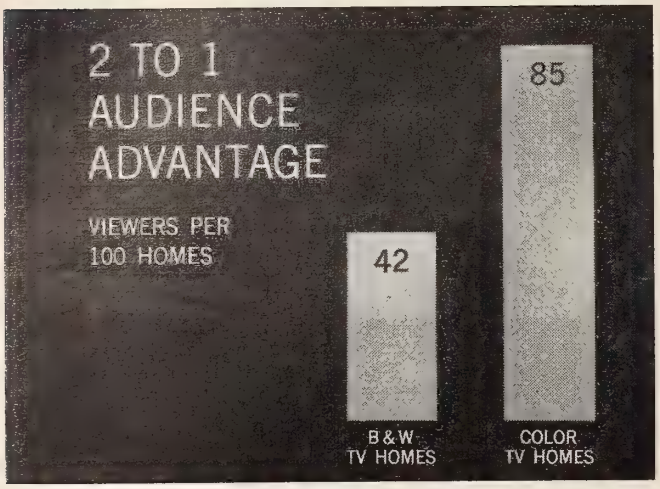
• From billboards' $63 million, color tv could capture $12.6 million.

TRIANGLE'S CLIPP
He called the color meeting

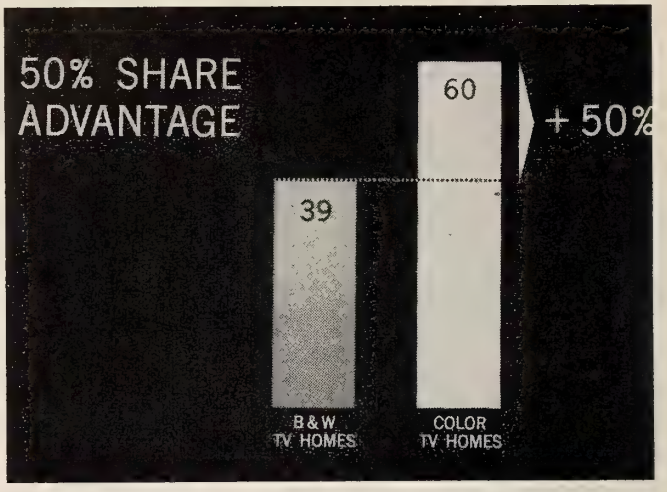
• From newspapers' $122 million color tv could lure away $25 million.

Mr. Cash urged the industry to compete more aggressively with the printed media for the "color franchise," and added:

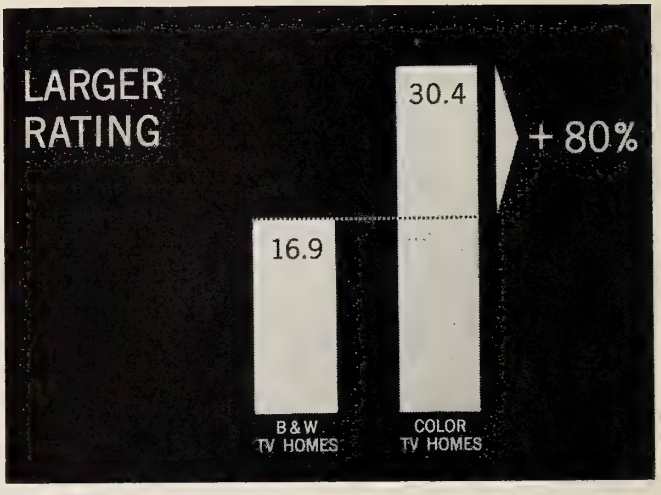
"We must improve our medium now rather than coast on the highest levels of billings our industry has ever imagined."



Clipp's Views • Roger W. Clipp, vice president and general manager of the Triangle Radio and Tv Station Division, expressed the view that the core of color tv's problem is "price" and added:



"A $200 color set would sell like hotcakes."



(RCA, however, feels there is little likelihood of a reduction in the selling price of color receivers in the immediate future since there are no new developments on the horizon that would substantially lower production costs. The lowest-priced model now retails for $495.)

Mr. Clipp conceded that the price of color receivers cannot come down to "mass buying levels" until a

HOW COLOR BEEFS UP AUDIENCE

What does color do for your audience standing? More sets are turned on. A higher share of audience watches. There are more viewers at each color set than at black and white sets.

These answers are the crux of a color tv progress report handed down by NBC last week, first on Wednesday at a network-sponsored presentation and again Friday before the Triangle-assembled broadcasters. The network had commissioned Trendex to conduct a special study of viewing in color tv homes in Boston, Omaha, Chicago, Milwaukee and Philadelphia. The sample: 8,000 interviews conducted by standard telephone coincidental.

Dr. Thomas E. Coffin, director of research, NBC, disclosed these survey highlights:

• Color tv's overall audience advantage is 2 to 1. That is, twice as many people watch the color programs in color homes as in black-and-white homes. One factor: 50% of color homes had their sets in use, compared to only 43% of the control black-and-white homes.

• Color programs enjoyed a 50% advantage in share-of-audience among color owners. Color shows got 60% of the audience in color homes, compared to 39% in black-and-white homes.

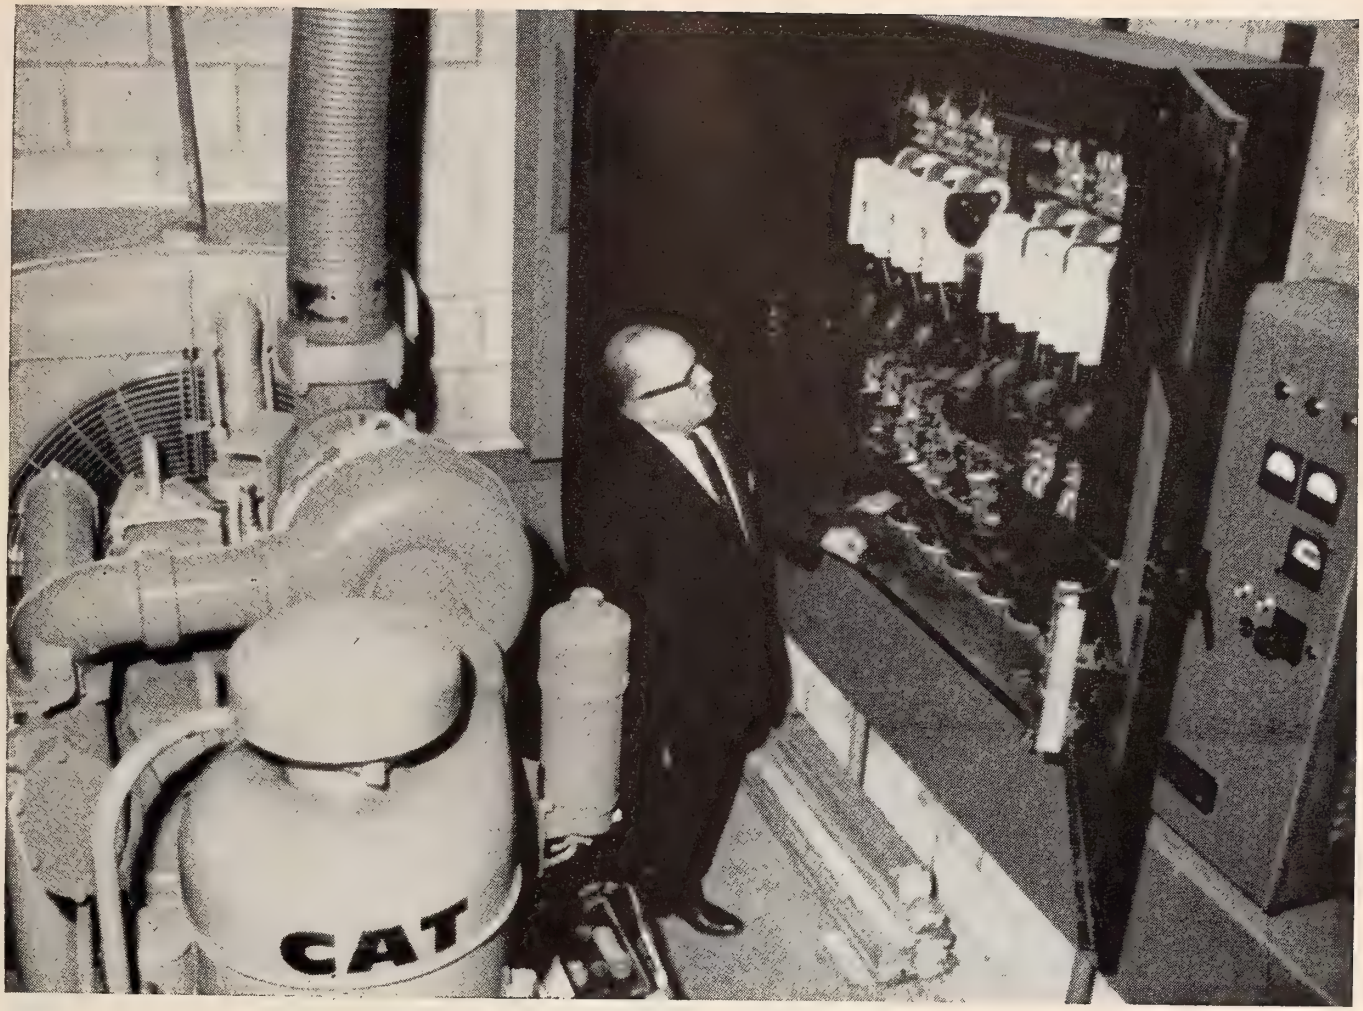
• With higher sets-in-use levels and greater share of audience, the rating of the color programs was 80% higher in color homes—averaging 30.4 in color homes vs. 16.9 in black-and-white homes.

• On the average, the number of viewers watching tv was 12% greater in color homes. Sidelight: Color programs reach 24% more men per set.

Interviews were divided equally between color homes and black-and-white homes. In order to match these two samples as closely as possible, the next-door neighbors of color set owners were interviewed. Four NBC-TV programs were picked for investigation. They were *Steve Allen, Dinah Shore, Arthur Murray Party* and *Perry Como.* Patterns of audience gains held true for each show, Dr. Coffin said. Consistency of results also held up in each of the individual markets.

---

sufficiency of programming and a guarantee of quality reception are provided.



"When these two elements are achieved," Mr. Clipp declared, "we will then be on the road to the third and final phase of color development, which is true circulation."

Mr. Clipp contended that "The lack of development of color is not due to lack of promotion on the part of stations," but added, "on the other hand, if 400 or 500 stations got solidly behind color promotion and saturated their schedules daily with color messages, of course more tv sets would be sold."

Set Sales • Mort Farr, appliance retailer-distributor in Upper Darby, Pa., and recent Brand Names Foundation retailer of the year award winner, called color tv "the hope of television merchandising." He noted that the set owner today has no compelling reason to trade in his set—except to buy a color receiver. His recommendation: broadcasters should step up their color programming and promote their color shows aggressively.

He insisted that price is not "the controlling factor" in hindering the sale of color tv sets. Mr. Farr indicated that with a hard-hitting promotional effort by the manufacturer and broadcaster and specialty selling by the wholesaler and retailer, color sets can be moved. He observed that in 1958 the sale of color tv sets accounted for 16% of his business and he predicted that his 1959 color sales will be double those of last year. To buttress his contention that price need not be a deterrent to sales, Mr. Farr pointed out most cars are sold with a full complement of extras that run between $700 and $800 and high-priced stereophonic equipment sales are soaring.

RCA's Forecast • Charles R. Denny, vice president, products planning, RCA, who noted that color will affect every phase of the tv industry, underscored color's impact on tv's future growth

Robert J. Sinnett, Director of Engineering for WHBF Radio and TV, checks emergency power supply automatic switching panel at WHBF-TV transmitter.

His Responsibility: Reliable Service to WHBF Radio and WHBF-TV Audiences--and to our Advertisers, Also

Bob Sinnett has been a part of the Quad-City radio industry longer than anyone else. Now completing his 28th year at WHBF, his job is to keep several million dollars worth of broadcasting equipment running smoothly. Bob is a registered professional engineer, a senior member of the Institute of Radio Engineers and has served on the NAB Engineering Committee.

With this background as a guide, Bob has installed at WHBF, Radio and TV, emergency equipment to cut program interruptions to an irreduceable minimum. Both WHBF Radio and TV have stand-by transmitters and antennae. WHBF-TV has an emergency generator, pictured above, that automatically takes over when central station power fails. There's a stand-by microwave link between our studios and TV transmitter. Our 1000-foot tower has an elevator to speed maintenance.

Throughout WHBF engineering facilities there is duplicate and stand-by equipment to take over if primary equipment should fail. In addition, Bob's crew follows a rigorous preventive maintenance program.

All this adds up to fewer outages and fewer commercials missed; less need for make-goods or credits and the extra work this entails; virtual elimination of audience annoyance at program interruptions. It assures audience and advertisers alike of constant, reliable service from WHBF, prestige Radio and TV.

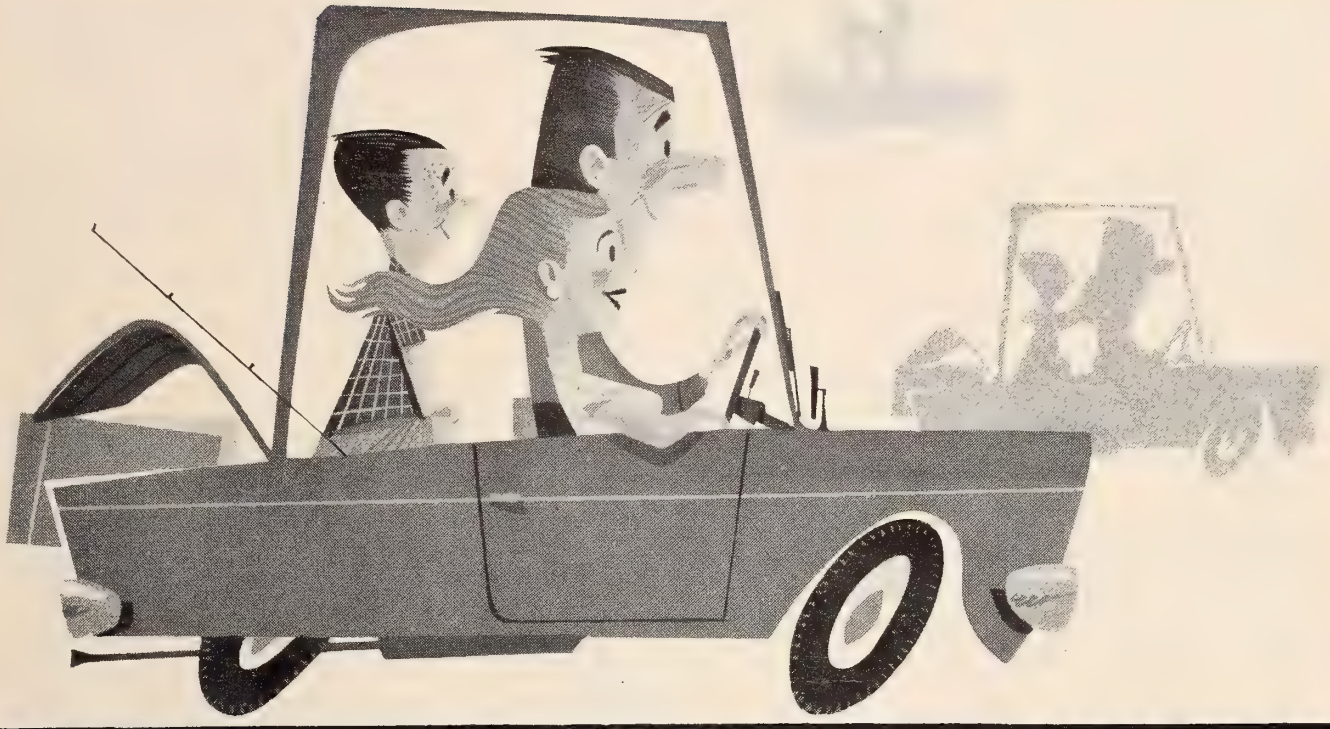
and prosperity by remarking:

"If color tv did not exist today we'd have a crash program to invent it."

He predicted that color tv's growth will be a "spiraling development." It will parallel the nurturing of black-and-white tv, Mr. Denny said, with increase in sets resulting in more color-equipped stations and more color programs. He stated that color is beginning to "mesh" and results are evident. He made this suggestion:

"Now it is up to those of us who are aware of color's great future to beat the drums for color. It is in their own self-interest that broadcasters join with manufacturers and retailers in making color television an integral part of family living."



He listed these six "significant developments" in color: during the recession, color achieved "new record gains" and is still climbing; NBC is expanding its color programming; RCA's dealer-distributor operation shows increasing color profitability; Admiral is entering the color receiver field; a growing number of stations are increasing color programming, and top tv critics are enthusiastic about color shows.

These were the broadcasters due to attend the get-behind-color meeting in New York last Friday:

Thomas E. Howard, vice president, WBTV (TV) Charlotte, N.C.; Brent O. Gunts, manager, WBAL-TV Baltimore; Jesse H. Cripe, vice president-general manager, WFGA-TV Jacksonville, Fla.; Ole G. Morby, broadcast operations coordinator, Time Inc. (T-L-F Stations); C. Wrede Petersmeyer, president, Corinthian Broadcasting Corp.; John T. Murphy, tv vice president, Crosley Broadcasting Corp. and general manager, WLWT (TV) Cincinnati.

James Schiavone, manager, WWJ-TV Detroit; Harold Grams, general manager, KSD-TV St. Louis; Howard W. Maschmeier, general manager, WNHC-TV New Haven; Fred W. Thrower, vice president-general manager, Lecitt J. Pope, operations vice president, and Otis Freeman, chief engineer, all of WPIX (TV) New York; William B. McGrath, vice president-managing director, WHDH-TV Boston; William N. Davidson, vice president-general manager, WRCA-TV New York.

Harold C. Lund, vice president for Pittsburgh area, Westinghouse Broadcasting Co., Alexander Field, program manager, WGN-TV Chicago; Donald Davis, president, KMBC-TV Kansas City; George Comte, vice president-general manager, WTMJ-TV Milwaukee; Harold P. See, general manager, KRON-TV San Francisco; John Scheuer, director of public relations and programming, Radio-Tv Div., Triangle Publications.

FORD LEADING NETWORK TV

P&G still biggest multi-product spender

The spring sales drive for Ford passenger cars has shown up in the record of network tv time purchases. Ford Motor Co.'s Ford Div. allocated $738,988 gross billing for the cars in April alone.

The Ford investment is revealed in Television Bureau of Advertising's supplementary report of gross time charges for network tv covering the period from January through April this year. Compilations were made by Leading National Advertisers and Broadcast Advertiser Reports.

Ford's heavy concentration moved the passenger car to the top of the April list of the leading 15 brands in network.

Other outstanding items revealed in the report:

• Network tv daytime billings in the first four months of the year increased 25.8% compared to the same period of 1958. The figures: $70.6 million-plus this year compared to $56.1 million-plus last year.

• Procter & Gamble, No. 1 national advertiser and unquestionably tv's national leader, registered over $4.6 million gross billing in network tv in the month of April. This is more than the combined investment for General Motors and Ford Motor in network that month, and more than the combined billing of the four cigarette companies appearing in the top 15 list for April (R.J. Reynolds, P. Lorillard, Liggett & Myers and American Tobacco).

• The constant climb of the food category continues at a rapid rate. On the basis of the January-April period, food billings have shot ahead of last year by at least $4.3 million and are outstripping the nearest contending category (toiletries and toilet goods advertisers) by some $6.3 million.

LNA-BAR: Gross time costs only

AD COMMANDMENT

Hutchinson off hook with lecture by FTC

A phony demonstration on tv—whether or not the claim is true—is misleading advertising.

This was the finding last week by the Federal Trade Commission in the Hutchinson's Waterproof Wax Case. The FTC made the point that a gimmicked demonstration of a product in a tv commercial—which falsely indicates or implies certain qualities or performances—is a violation of the law whether or not accompanying claims for the product are false or true.

The FTC, in an opinion by Comr. Sigurd Anderson, last week upheld this position taken by FTC counsel in their appeal from an FTC hearing examiner's ruling recommending dismissal of charges against Hutchinson Chemical Corp., Chicago. But the FTC dismissed the case against Hutchinson anyway on grounds FTC counsel failed to disprove the implications made in the demonstration.

Charles Sweeney, director of the FTC's radio-tv monitoring service, said that although the case was dismissed, the FTC holding against phony tv demonstrations was its most important decision in tv since the Rolaids case in which the FTC obtained a consent decree in its move against "white smock" and other visual misrepresentations.

At issue were FTC charges made against Hutchinson May 7, 1958, that the firm's "flaming-automobile" tv commercial violated the FTC Act. In the tv demonstration, the product was applied to the metal surface of a car, an inflammable liquid was poured on, set afire, allowed to burn 12 seconds and then extinguished with water. The audio claim was made that the fire and water (heat and cold extremes) did not damage the auto's surface.

The FTC did not make charges against the audio claims but against the tv demonstration's implied claims. The examiner held the proof or disproof contained in the demonstration was immaterial since the audio claims were not challenged; that the demonstration alone thus was not a violation of the act. He recommended dismissal.

The FTC opinion held the language of the applicable section of the FTC Act was "deliberately couched in generalities" so the FTC and courts may

Who could sell them anything now... except **RADIO**

The "Companion Medium" is more Potent than ever... but there's an Important Difference between Stations!

Radio's strength is its ability to reach people *where they are.* Wherever people are awake radio reaches into their minds . . . persuasively and repeatedly. And it can do this most economically. This is the basic advantage of all radio. But there is an important difference between *ordinary* and *great* radio stations. The great station maintains the highest standards of programming, backed by substantial investment in top facilities and personnel. Its responsible management permits no carnival gimmicks, shoddy giveaways or questionable advertising. It attracts large audiences exceptionally loyal to both the station and its advertisers. Numerically, these great stations are not many. Those listed here are the great stations in 18 important markets . . . and you need add only 30 out of the more than 3,000 now broadcasting to achieve effective nation-wide reach. This total of 48 represents "The Nation's Voice." The strategy of concentrating on these leadership stations is the way to realize the full power of "the companion medium" . . . the way to put all of radio's vitality to work on your sales problems. For complete information, including data developed by Alfred Politz research, call any Christal office.

decide in each instance whether a particular practice is unfair. The FTC added that purchasers may be led to buy a product after seeing what they believe is a valid test or demonstration and if such advertising is untrue it would mislead purchasers into buying it. "The law is well settled that the public is entitled to buy what it thinks it is buying," the FTC said.

The FTC said the record fails to establish, however, that the demonstration does not prove the product is resistant to both heat and cold. An expert had testified that no damage would occur from flaming gasoline and the water for a period of five seconds, even without wax. But he did not testify whether damage would occur over the specific time of the fire-water demonstration in the commercial, 12 seconds. He said he didn't believe gasoline would burn long enough to cause damage.

L&M heads 1st quarter radio spot advertisers

It's a smoke trail in spot radio. Five tobacco giants are among spot radio's first-quarter leaders and one firm, Liggett & Myers Tobacco, leads the pack.

According to Radio Advertising Bureau, spot radio's second best customer in the first quarter of this year was Thomas Leeming & Co. (Pacquins, Ben-Gay, Silk 'n Satin).

Here are the top 10 advertisers in spot radio: 1, Liggett & Myers Tobacco; 2, Thomas Leeming & Co.; 3, R.J. Reynolds Tobacco; 4, Ford Motor; 5, P. Lorillard; 6, American Tobacco; 7, Pharmaco Inc.; 8, Campbell Soup; 9, Beneficial Finance; 10, Philip Morris.

The second 10: 11, The Borden Co.; 12, Plough Inc.; 13, Bristol-Myers; 14, Sinclair Oil; 15, B.C. Remedy Co.; 16, Chattanooga Medicine Co.; 17, Miles Labs; 18, Tetley Tea Co.; 19, Standard Oil of New Jersey; 20, Sterling Drug.

Brand Advertisers in Thousands • RAB notes that in compiling the top 20 ranking, it drew from more than 1,100 brand advertisers using spot radio during the first quarter and based the sample on sources accounting for about half of all spot radio sales.

A month ago, RAB had revealed actual first-quarter estimates of spot radio expenditures by leading tobacco firms (BROADCASTING, May 18). The billing figures came from a study conducted for the bureau by executives Radio Research Bureau. That study, measuring activity in the top 100 markets, placed Liggett & Myers' mark at $1.4 million; R.J. Reynolds at $900,000; P. Lorillard at $660,000; American Tobacco at $600,000 and Philip Morris at $400,000.

NIELSEN MADE EASY VIA MAP

Atlanta agency invents chart technique for 'instantaneous picture' of NCS No. 3

An Atlanta-based agency has devised a way to portray visually the marketing route of a tv campaign.

Liller, Neal, Battle & Lindsey, which also operates out of offices in Richmond and New York, has put together a novel adaptation of Nielsen Coverage Survey No. 3 (county-by-county data on tv station coverage). To quickly chart its path through the thicket of tv coverage statistics, the agency utilizes the following tools:

• A base map, mounted on cardboard that shows the outline of counties in clear type.

• Three-color acetate transparent cut-outs, each showing a station's county coverage.

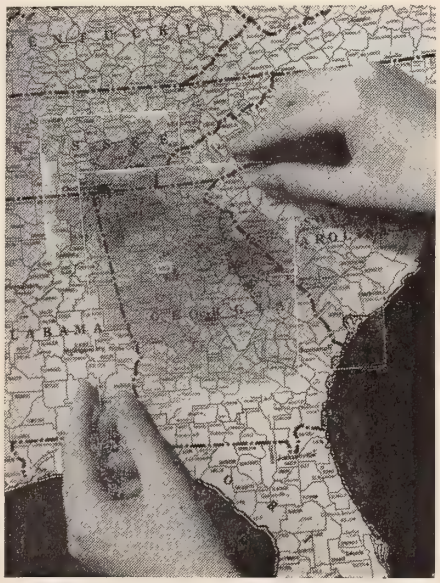
• A color key for each of the cut-outs: yellow, blue and red. Each color represents a percentage of total homes in a county covered—yellow is 25-50%, blue is 51-75% and red is 76% or above.

• Each of the individual plastics is prepared for every station in the area for which the agency has NCS No. 3 and for other subscribing stations willing to send the agency necessary data. The total of stations so mapped is over 125.

The cut-outs are placed overlay on the map. The 25% cut off, according to the agency, is "arbitrary" and certainly not an important detail. What's wanted is a "quick, visual presentation of the voluminous data in NCS No. 3."

Pamela Tabberer, media director of the agency, explained the background of the quickie method: "We call it our 'NCS instant coverage kit'," she says, adding that there are "no fancy formulas, just straight NCS data out of the book. From the county listings, we've made up three-color acetate cut-outs, one for each station.

"When we have a coverage question we just pull cut-outs from a file and thumbtack them to a base map on the wall. It shows us any station's coverage area at a glance."



No Substitute • "It's not a substitute for the NCS report books. But it gives us a quick look at a station or a station lineup without having to go back to the books again and again for the data we've looked up before."

Miss Tabberer adds, however, that when the agency becomes involved in detail comparisons of station coverage, its media people go to the Nielsen figures. The map, she says, "enables us to give anyone an instantaneous picture of television coverage in any market or group of markets."

These are some of the uses Liller, Neal, Battle & Lindsey has found for the technique:

For direct comparison of competitive stations in the same market, overlap and duplication of adjacent markets; to enable the agency to ascertain quickly during a tv campaign's planning the coverage of a group of markets—"see where the gaps are, or suggest adding stations where we need extra coverage"; and to permit clients to have a speedy picture of coverage they can receive for any particular campaign.

Brock Campaign • Liller, Neal Battle & Lindsey has used the coverage map to chart out its tv campaign for Brock candy (Brock Candy Co., Chattanooga, Tenn.). As seen on the map, the various colors and overlay appear in the southern area of the U.S., concentrating mainly on western North Carolina, most of South Carolina, into Georgia, Florida, Alabama, Mississippi, Kentucky and eastern Tennessee.

lion Rent-A-Car account from Campbell-Ewald Co. Its car and truck lease service account, handled by Needham, Louis & Brorby, is not involved. Hertz currently is active in spot tv over 13 stations in 11 key markets through August.

Oscar Mayer (meat products) reported it is not likely to announce a new agency for a fortnight. It is moving its $1.5 million account (about half in broadcast media) from Wherry, Baker & Tilden in September or October. (The agency becomes Baker, Tilden, Bolgard & Barger July 15.)

FALL SCHEDULE
Networks' evenings nearly all sold out

With the networks' fall nighttime schedules near the sell-out point, the "open" areas in which Johnny-come-lately national advertisers could maneuver are becoming more limited.

Some new signings, however, were reported at each of the networks. ABC-TV and NBC-TV still have time available, but each has narrowed the openings. CBS-TV was 45 minutes per week away from saturation. Per network:

CBS-TV—Technically, as of Thursday (June 25), a national advertiser could find only this limited "availability" remaining. A half of *Space*, a Ziv production slotted for Wednesday, 8:30-9, and a third of *Lineup*, a 60-minute show that starts at 7:30 that night.

Newly-committed for *Lineup* are Vicks Chemical (vapor rub) and Peter Paul Mounds (candy), each picking up a third of the show.

ABC-TV—A new programming decision reportedly will place *Colt 45* into the 7-7:30 period on Sunday, thus advancing the start of network service a half hour that night. NBC-TV already has plans to open its Sunday night period at 7 o'clock with *Riverboat*, an hour-long production. Next up that night at 7:30 on ABC-TV is *Maverick*.

ABC-TV also picked up Ludens Inc., via J.M. Mathes, for part sponsorship of *Alaskans, Adventures in Paradise, Untouchables* and *Bronco*, and set *You Asked For It* for the Thursday, 7:30-8 p.m. period, for which Skippy peanut butter (Best Foods via Guild, Bascom & Bonfigli) is said to be signed.

NBC-TV—Advertisers for the fall continued to assemble. Among them: Bulova Watch, through McCann-Erickson, for *People Are Funny* at Friday, 7:30-8 p.m. Alternate sponsor on that show is Greyhound, via Grey. Still others were being signed for specials which will fill a large part of the NBC-TV schedule.

A summer job • That's the prize given to Howard Williams (c), Southern Methodist U. student, for winning the annual Clarke, Dunagan & Huffhines Inc., Dallas, advertising fellowship competition. He was also presented with a plaque by agency principals (1) Devane Clarke and C.C. Huffhines.

Guild, Bascom agency realigns staff, policy

Realignment of staff personnel and responsibilities at Guild, Bascom & Bonfigli, San Francisco, was announced last week by Walter Guild, GB&B president. Changes involved cover the media, creative and account service areas.

The major shuffle was in the media department. Heretofore, media buying for accounts serviced in the various GB&B branch offices was centralized in San Francisco, but under the change, the New York and Seattle offices will handle buying for their accounts. Frank Gianatassio, formerly a media buyer for Ogilvy, Benson & Mather, New York, has been named media director of GB&B's New York office. In Seattle, Collen Mattice, media director, will supervise buying for Carling and Heidelberg beers.

Creative activities on all accounts will continue to be centered in San Francisco headquarters. William Franklin, formerly coordinating account executive on Ralston Purina, has been appointed creative administrator on all accounts. Richard Tyler, previously administrative head of the media department, succeeds Mr. Franklin as coordinating account executive on Ralston, and he, in turn, is replaced as administrative head of the media department in San Francisco by Lyn Gross, previously media director there.

In Hollywood, George Allen, tv business manager, assumes additional responsibilities as coordinator of all activities there. Karl Gruener will be in charge of all tv program procurement and Dave Fulmer will head tv commercial production.

New York ad folk elect new officers

The Assn. of Advertising Men & Women, New York, last Tuesday (June 23) installed Stanley H. Rubin, account representative, Elite Letter Co., as president. G. James Proud, president of Advertising Federation of America administered the oath of office. The group's annual member award for significant contributions to the organization during the year, the Australian Cup, was presented to Stanley Linden of D.H. Terwilliger & Co., who also was installed as a vice president.

Other new officers are: Alan Jacobson, copy consultant, vice president; Dorothy Nixon, Lever Bros., secretary, Shirley Reed, Bureau of Advertising, assistant secretary, and Fred Matase, Pronto Addressing & Mailing Service, treasurer.

Labor Dept. booklet

Wage-earners, with a workweek shortened by 15 to 20 hours since 1900, have more leisure time for hobbies, sports, education, and travel *and* a greater margin of funds to use for these pursuits, according to a study by the U.S. Labor Dept. The study traces changes in American city workers' buying habits since 1875.

RURAL SERVICE: CATV, BOOSTERS?

Senate Commerce subcommittee to begin hearings on issue of who will feed remote areas and how it will be done.

The dual-pronged battle between community antenna systems and western broadcasters—and between catv operators and booster adherents—will be joined tomorrow before the U.S. Senate.

A Senate Commerce Committee subcommittee will begin taking testimony from booster advocates, catv proponents, broadcasters and the FCC on the subject of distribution systems that have brought tv signals into hamlets and inaccessible areas of the country.

Booster boosters, led by the venerable Ed Johnson, longtime Senator from Colorado (and long-time chairman of the Senate Commerce Committee) and former Governor of Colorado, will testify on the FCC's recommendations that the Communications Act be amended to permit proper federal supervision of on-channel and off-channel vhf repeater stations.

Broadcasters will testify in favor of booster operation and, vigorously, against unregulated catv operations.

The catv operators will appear in force to turn back this tide. They will oppose the FCC's recommendations regarding legislation to require them to secure the permission of the station whose signals they pick up and to the requirement that they carry the local station if so requested—and to plump for their own version of legislation bringing them under FCC regulation.

The Washington meeting comes one week after the eighth annual convention of the Nation Community Assn. in Philadelphia, which saw more than 500 catv operators in attendance.

The Capitol Hill hearings also came one week after the FCC postponed five microwave relay grants which proposed to bring distant-city tv signals to cable companies.

Hearing Schedule • The hearing, before the Senate Commerce Committee communications subcommittee — with Sen. John Pastore (D-R.I.) presiding— will hear the following witnesses, according to the scheduled lineup as of last week:

June 30—Former Sen. and Colorado Gov. Ed. Johnson and group representing boosters.

July 1—Sen. Frank E. Moss (D-Utah), George Hatch, KUTV (TV) Salt Lake City, Utah; Ed Craney, KXLF-TV Butte, Mont.; Rex G. Howell, KREX-TV Grand Junction, Colo.; Marshall H. Pengra, KLTV (TV) Tyler, Tex.; Forrest E. Cooper, Lakeview, Ore.; Frank Reardon, KGEZ-TV Kalispell, Mont.; Bill Grove, KFBC-TV Cheyenne, Wyo.

July 7—Harold E. Fellows, NAB; Barclay Craighead, Walter H. Marshall, KXLJ-TV Helena, Mont.; Fred Weber, WSTV-TV Steubenville, Ohio; David Gentling, KROC-TV Rochester, Minn.; Lawrence Berger, KTWO-TV Casper, Wyo.

July 9—Rep. E.Y. Berry (R-S.D.), Tex Olsen, Richfield, Utah; Clifton Collins, Charles Clements, Ephrata, Wash.; Ben Adler, Adler Electronics Inc.; Rep. Keith Thomson (R-Wyo.), A.J. Malin, Laconia, N.H.; E. Stratford Smith, general counsel, NCTA; Henry Griffing, Oklahoma City, Okla.; A. Earl Cullum Jr., Dallas, Tex.; Archer Taylor, Missoula, Mont.; Robert Murphy, Casper,

WHAT THE SHOUTING IS ABOUT

What are community antenna systems, boosters and translators and how did the present dispute over their futures come about?

When the FCC instituted its tv freeze in 1948—the action that put television application processing on ice for four years—it didn't realize it was going to be godfather to a host of secondary tv problems that one day would engage the attention of the Congress of the United States.

Because tv was "frozen" for four years, many homes that were outside the range of the then existing 108 tv stations went to extraordinary lengths to pick up tv signals. Not unusual were 100-ft. towers bearing dipoles in the backyards of country estates and farm homes 50 or even 100 miles away from big city tv outlets. Many similar receiving installations cropped up in communities located in valleys whose surrounding mountains constituted an iron curtain against the entry of tv signals.

Community Antennas • It was then, in 1950, that there appeared in several small Pennsylvania communities the phenomenon now known as community antenna tv systems. Unable to receive tv signals because of the mountainous terrain of central and western Pennsylvania, groups of local businessmen banded together to put up on the nearest and highest mountain a custom-engineered receiving antenna which could capture the tv programs winging overhead. These signals via coaxial cable were carried down the mountain top and to the homes of subscribers. Naturally there was a fee, and since the early 1950's, these systems have burgeoned and become successful throughout the United States.

In recent years, catv operators have not been content to just reach up for tv signals; they have begun to reach out for them. Through the medium of microwave relays many cable companies have brought their customers more big city programs from farther and farther away, or have improved immeasurably the calibre of their pictures through this ability to bring in a stronger picture signal.

There are now about 700 community antenna systems serving about 500,000 customers—with about 50 microwave relay systems serving over 100 local cable companies.

Boosters • In the Far West—par-

PORTLAND GOES ABC-TV WHEREVER ABC-TV GOES!

Until recently, the ABC-TV affiliate in Portland, Ore., was KGW-TV. Late in April, ABC switched affiliates with another network, replacing KGW with KPTV.

Here's what happened, according to the May Nielsen:

KGW, minus its ABC affiliation, saw its share of audience drop in one short month from 43.0 to 24.8 — a loss of almost 50%!

KPTV, bolstered by its new ABC affiliation, increased its share of audience from 25.2 to 34.4 — an increase in audience of 37%.

Before the switch, KGW beat KPTV in 60 out of the 84 quarter-hour time periods measured by Nielsen. After the switch, the situation was almost exactly reversed — ABC's new affiliate beat its former one in 56 of those 84 time slots.

If you can't beat 'em, join 'em.

Rural service: CATV, boosters? CONTINUED

Wyo.; Glenn Flinn, Tyler, Tex.; Robert J. Tarleton, Lansford, Pa.; Sanford Randolph, Clarksburg, W.Va., and Milton J. Shapp, Jerrold Electronics Corp.

The FCC will be heard following the testimony of these witnesses.

The Senate hearings are a repeat of last year's sessions which heard many of the same witnesses on behalf of much the same positions.

In a report issued early in 1959, Kenneth Cox, special tv counsel to the Senate Committee, urged that the FCC take jurisdiction over boosters and put some restraints on the unregulated cable companies (BROADCASTING, Jan. 12).

Key to the hearings is the FCC's report last April in which the Commission decided to accept jurisdiction over booster—after twice in the same number of years refusing to agree that it had this authority or should exercise it —and although ruling it had no power over the wired antenna companies recommended that Congress pass two pieces of legislation—to require catv systems to secure the permission of the station whose signals they carry and to require catv operations to carry the local tv station if they are requested to do so.

In accepting jurisdiction over boosters, the Commission asked Congress to revise the Communications Act to waive two sections—the one forbidding the issuance of permits to an applicant who has built before permission was granted, and the one requiring the presence of an operator at a broadcast station.

Legislation No. 1 • The legislation picture was the most important item on the agenda at the NCTA meeting in Philadelphia.

Community television operators agreed to a two-pronged attack at the Senate hearings: Oppose the boosters and the FCC's recommendations on catv.

They agreed on one affirmative action: To urge the passage of a bill which would place them under the jurisdiction of the FCC as a broadcast service.

NCTA sponsored a full-scale engineering study of boosters and will make the outcome of that research available to the Congress, the NCTA members were told. The engineering study was

What the shouting is about CONTINUED

ticularly in the northwestern states —a different approach to the lack of tv was taken. Here and there in the valley cities and towns of the Cascade Mountains, self-attended, low powered boosters sprang up. These ingenious and simple transceivers were arranged so they picked up a big-city tv signal, amplified it and broadcast it down into the valley to the few dozen or more homes there. This was definitely off-the-air transmission—but without benefit of FCC authority.

In fact, as Commission monitors began to detect these unlicensed signals and to locate them, U.S. marshals began padlocking the little huts in which the equipment was housed.

The booster people were enraged. Almost like Tennessee moonshiners playing hide and seek with "revenooers," the northwesterners pried the padlocks off the housings and resumed booster operation. They also began to pepper their Congressmen in Washington with outraged attacks on "bureaucracy."

The FCC stood fast. It issued a cease and desist order against one booster in the state of Washington. After a lengthy period, the U.S. Court of Appeals ruled that the Commission was right in its authority, but wrong in its approach.

Meanwhile the pressures from back home on Senators and Congressmen mounted—and were transferred down Pennsylvania Ave. to the FCC.

Translators • The Commission in 1956 bowed to the pressures—but took an oblique tack. It set up a new service, translators, which it offered to the booster advocates. But there was this kicker: whereas boosters operated on the vhf frequencies with all the benefits of that part of the spectrum (actually most of them received a vhf signal and boosted it along on the same vhf frequency), the translator took the vhf signal and was required to "translate" it to a uhf channel—specifically to the top 13 uhf channels (chs. 70-83).

Naturally, translators were more expensive—and also required viewers to adopt their receivers for uhf.

Thus boosters continued in operation—a nettle in the bosom of the FCC.

There is no authenticated report on the number of boosters, but they have been estimated to run to 1,000 or more. There are more than 200 translators operating in 125-odd communities. Boosters serve mostly small communities running from several dozen to a thousand or so tv homes; translators serve from several hundred to, in several instances, up to 50,000 tv homes.

In 1957 and again in 1958 the FCC issued orders for boosters to go out of business. In April of this year, succumbing to the pressures of practicality (as well as of Congressional delegations, state administrations and outraged citizens) it issued a final report which accepted jurisdiction over the on-channel booster—but only under strict technical restrictions.

The legal problems • But certain legislation is required to put into practice this unwilling authority. The Commission recommended to Congress that two sections of the Communications Act be revised to permit the booster business to be properly controlled. A law forbidding a grant to an applicant which has already constructed a station would have to be changed to legalize the existing 1,000-odd boosters, and the law requiring an operator to be in attendance would have to be amended to permit unattended operation.

As to community antenna systems the FCC in its report last April reiterated for the third time that it has no jurisdiction over what is ostensibly an intra-state wired service. It did recommend, however, that Congress tack on a couple of new provisions to the Communications Act. One was that catv systems must receive the permission of the stations whose signals it wished to pick up and deliver to its subscribers. The other was that the local catv operation must carry the local tv station when so requested.

As might be expected the solutions pleased no one. The booster protagonists are worried that the Commission's technical standards will be so stringent they will have won the battle but lost the war. The catv people—who hate booster operators —are out to make sure the booster advocates are hemmed in by operating regulations and also to fight against the two recommendations that touch their own operations.

These are the issues in the hearings beginning tomorrow before Sen. John Pastore (D-R.I.) and his communications subcommittee.

undertaken by A. Earl Cullum, Dallas, Tex., consulting engineer, and included a number of engineers associated with the cable industry.

In an effort to win telecasters to their side, NCTA hired William T. Stubblefield, broadcast consultant, to interview small town telecasters.

For guidance on Capitol Hill, NCTA has hired the Washington law firm of Weaver & Glassie.

A slashing attack on the forces that are attacking community television systems was delivered to the membership by E. Stratford Smith, Washington attorney and general counsel of the association.

Mr. Smith sketched the strategy of the NCTA in its appearance before the Senate committee and held out hope that the organization would be able to prove that boosters interfere with other services and that they should be strictly controlled.

He also lashed out at the FCC's recommendations for legislation affecting catv systems. He termed both the proposals unconstitutional and against the public interest. He said that the requirement that cable companies get permission from the stations whose signals they carry might very well lead to a conspiracy and monopoly.

Mr. Smith also told the group that the organization would fight the two broadcaster lawsuits, one in Montana in which Ed Craney has filed a copyright complaint, and the other in Idaho where two Salt Lake City stations have asserted property rights in the signals which are being picked up and delivered to a catv system.

The NCTA membership heard its president, Lloyd A. Calhoun of Hobbs, N.M., report that the organization has grown to 365 members—a gain of 59 over the number last year.

The NCTA board also approved the establishment of a full-scale public relations program.

Elected president of the organization for 1959-60 was A.J. Malin, owner-operator of the 1,500 subscriber catv operation in Laconia, N.H. Mr. Malin also owns WWNH Rochester, N.H.

They also heard Sen. Jennings Randolph (D-W.Va.) speak on public and civic relations; Pennsylvania Gov. David L. Lawrence; and panels and round tables on technical and management problems.

Postpone Grants • The FCC last week postponed the effective dates of these microwave systems following the granting of protests by television stations:

• Montana Microwave, extension of its service from Missoula to Helena, Mont., feeding Spokane tv signals. The action was taken following remand by the U. S. Court of Appeals after the Commission denied a protest filed by KXLJ-TV Helena. The Commission set July 24 for oral argument.

• Mesa Microwave Inc., feeding San Antonio, Tex., tv signals to Laredo, Tex. Protested by KGNS-TV Laredo.

• Mesa Microwave Inc., feeding Jacksonville, Fla., tv signals to Tallahassee, Fla. Protested by WCTV (TV) Thomasville, Ga.

• Carter Mountain Transmission Corp., feeding Casper, Wyo., tv signals to Riverton, Lander and Thermopolis, Wyo. Protested by KWRB-TV Riverton.

• East Texas Transmission Corp., feeding Dallas-Fort Worth tv signals to Tyler and Jacksonville, Tex. Protested by KLTV (TV) Tyler, Tex.

The protests, all generally similar, maintained that the distribution of distant big city tv signals would only serve to put them out of business, or in effect force them to degrade their services to the extent the public would suffer. The broadcasters also charged that these moves would upet the Commission's table of tv allocations.

Microwave systems

One of the most significant areas in the cable antenna field in recent years has been the growth of microwave relay circuits to bring in more distant tv stations and to improve the calibre of the local catv picture. Some bring tv signals more than 300 miles to small towns.

It is the particular target of many broadcasters who feel the FCC in authorizing these radio relay systems is helping to destroy local tv stations—also licensed by the Commission.

Here are the specialized common-carrier systems using microwave links and the cable companies they serve:

Antenna Service Co.—Feeds Phoenix, Ariz., tv signals to Winslow and Page, Ariz.

Antennavision Service Co.—Feeds Phoenix, Ariz., tv signals to Clifton, Morenci, Safford, Winslow, Holbrook, Springerville, St. Johns, Snowflake and McNary, all Ariz., and Silver City, N.M.

Arizona Microwave System Co.—Feeds Tucson, Ariz., tv signals to Douglas, Ariz.

Blackhills Video Co.—Feeds Denver tv signals to Rapid City, S.D.; San Antonio tv signals to Victoria, Tex.; Nashville and Jackson, Tenn., tv signals to Paducah, Ky.; St. Louis tv signals to Poplar Bluffs and Dexter, Mo., and to Paducah, Ky.; Lubbock, Tex., tv signals to Clovis, N.M.; Memphis, Tenn., tv signals to Greenville, Miss.

Cerracchi & Co.—Feeds Buffalo, N.Y., and Scranton, Pa., tv signals to Ithaca, N.Y.

Carter Mountain Transmission Corp.—Feeds Idaho Falls, Idaho, tv signals to Cody, Basin, Greybull, Lander, Powell, Riverton and Worland, all Wyoming; Idaho Falls and Casper, Wyo., tv signals to Thermopolis and Riverton and Lander, all Wyo.; Billings, Mont. tv signals to Miles City, Mont.; Casper, Wyo., tv signals, to Powell, and Cody, Wyo.

Collier Electric Co.—Feeds Denver tv signals to Sterling, Colo.; Sidney, Kimball, Alliance and Scottsbluff, Nebraska.

Columbia Basin Microwave—Feeds Spokane, Wash., tv signals to Moses Lake, Wash.

Dakota Microwave Co.—Feeds Sioux City, Iowa, tv signals to Mitchell, S.D.

East Texas Transmission Co.—Feeds Dallas-Ft. Worth tv signals to Tyler and Jacksonville, Tex.

Great Plains Microwave Co.—Feeds Amarillo, Tex., tv signals to Perrytown, Tex.

Idaho Microwave Inc.—Feeds Salt Lake City tv signals to Twin Falls, Idaho.

Inland Microwave Co.—Feeds Spokane, Wash., tv signals to Richland, Wenatchee, Cashmere and Kennewick, Wash., and to Pendleton, Ore.; Cedar Rapids, Davenport, Waterloo, Iowa, and Rock Island, Rockford, Ill., tv signals to Dubuque, Iowa.

Intermountain Microwave — Feeds Spokane, Wash.; Kalispell and Great Falls, Mont., and Lethbridge, Canada tv signals to Cut Bank, Havre and Shelby, Mont.

Major Electronics—Feeds one Portland, Ore., tv signal to Coquille, Ore.

Mesa Microwave Inc.—Feeds Oklahoma City tv signals to Altus and Magnum, Okla.; Jacksonville, Fla., tv signals to Tallahassee, Fla.; Amarillo, Tex. tv signals to Memphis, Childress and Wellington, Tex., San Antonio tv signals to Laredo, Tex.; Fort Worth tv signal to Ardmore, Okla.

Micro-Wave Inc.—Feeds Amarillo tv signals to Liberal, Kan.

Microwave Service Co.—Feeds Memphis, Tenn., tv signals to Amory, Miss.

Midwest Microwave Inc.—Feeds Chicago tv signals to Peru, Ill.

Montana Idaho Microwave Inc.— Feeds Idaho Falls tv signals to Bozeman, Mont.

Montana Microwave—Feeds Spokane tv signals to Kalispell and Missoula, Mont.; Spokane and Butte, Mont., tv signals to Helena, Mont.

New York Penn Microwave Corp.—Feeds Rochester and Buffalo, N.Y., and Scranton, Pa., tv signals to Corning, N.Y.

Penn Microwave Co.—Feeds two New York City tv signals to Hazelton, Pa.

Potomac Valley Telecasting Corp.—Feeds Washington, D. C., tv signals to Cumberland, Md.

Service Electric Co.—Feeds one New York tv signal to Milton, Lewisburg, Watsontown, Danville, Mahanoy City, Berwick and Pottsville, all Pennsylvania.

Shirley Basin Transmission Co.— Feeds Albuquerque, N.M., tv signals to Farmington and Aztec, N.M.

Southwest Texas Transmission Co.—Feeds San Antonio tv signals to Eagle Pass and Del Rio, Tex.

Superior Communications Co.—Feeds Duluth, Minn., tv signals to International Falls, Mont.

Telecommunications Inc. — Feeds Spokane, Wash., tv signals to Baker, LeGrande and Union, Oregon.

Teleview Networks—Feeds Billings, Mont., and Casper, Wyo., tv signals to Sheridan and Buffalo, Wyo.

Television Microwave Inc.—Feeds Salt Lake City tv signals to Elko, Nev.

Thunder May Microwave Co.—Feeds Cadillac, Flint, Bay City and Traverse City, Michigan, tv signals to Alpena, Mich.

Valley Microwave Corp.—Feeds Birmingham, Ala., tv signals to Florence, Sheffield and Tuscumbia, all Ala.

Western Communication Service—Feeds Abilene and Sweetwater, Tex., tv signals to San Angelo, Tex.

Western Tv Relay Inc.—Feeds Oklahoma City tv signals to Elk City, Okla.

There are also three Bell System telephone companies which are serving catv systems. These are:

Bell System of Nevada—Feeds San Francisco tv signals to Reno, Nev.

Mountain States Tel. & Tel. Co.—Feeds Denver and Cheyenne tv signals to Casper, Wyo.; Cheyenne tv signal to Rawlings, Wyo.

Southern Bell Tel. & Tel.—Feeds Miami, Fla., tv signals to Key West, Fla.

SEC. 315 GETS LUMPS IN HEARING

Pastore offers compromise on requested curb; House turn today

Hearings on Sec. 315 of the Communications Act were closed in the Senate Thursday (June 25) following a five day run, with the debate scheduled to re-open today (Monday) some 600 yards away in the House.

And, the Senate Commerce Communications Subcommittee will report out a limited amendment to the equal time broadcasting headache — but Chairman John Pastore (D-R.I.) has made it clear that the approved measure will not be outright repeal—or even the exemptions of Sen. Vance Hartke's (D-Ind.) S 1858.

Sen. Pastore's approach: correct the Lar Daly decision on newscasts and "then go as far beyond that as we can without getting into controversy."

He has repeatedly stressed that any amendment reported out must be a simple one that will not run into opposition on the Senate floor.

Hartke's Approach Different • Sen. Hartke has taken a different tack. He says that the committee should report out a strong bill and let any cutting be done on the Senate floor.

A week ago, Sen. Pastore had favored an amendment proposed by Comr. Frederick W. Ford (BROADCASTING, June 22), but he was dissatisfied with the commissioner's detailed explanation last week (see box, page 54).

The subcommittee is considering four bills amending Sec. 315. S 1858 is by far the most desired by broadcasters. It would exempt newscasts, panels, debates and similar shows from Sec. 315, exempts broadcasters from libel and defines eligible candidates for public office. S. 1585, by Sen. Strom Thurmond (D-S.C.) exempts newscasts, panels, discussion and similar programs (it is identical to one section of the Hartke bill). S 1604, by Sen. Gordon Allott (R-Colo.), and S 1929, by Sen. Spessard Holland (D-Fla.), exempt newscasts only from equal time provisions of the Communications Act.

Witnesses Advocate Repeal • In the face of this obvious feeling of the majority of the committee members, many of last week's witnesses urged above all outright repeal of Sec. 315. Failing this, they said, approval of the entire Hartke bill is the minimum measure that would protect their abilities to cover the 1960 campaigns.

However, Sens. Pastore and Thurmond repeatedly pointed out that this session of Congress is nearing its end and that the only hope for action by both houses is a simple, direct, non-argumentative measure.

Following adjournment of the hearings Thursday, Sen. Pastore said his subcommittee will meet with the FCC and others after the official record is finally closed tomorrow (Tuesday) to draft an amendment to submit to the full Senate. This meeting probably will take place this week, he said, and the resulting bill then could be placed before the full Commerce Committee at its next meeting, July 8.

The chairman said that he had leaned toward language similar to the Thurmond bill and the corresponding section of the Hartke bill, but he now is afraid that even this proposal will not receive Senate approval.

Political Angle in House • The Communications Subcommittee of the House Commerce Committee begins three days of hearings today on seven bills amending Sec. 315. These hearings were scheduled by Rep. Oren Harris (D-Ark.), chairman, following charges that the Justice Dept. had intervened in the Lar Daly case at the FCC improperly and had exerted pressures on the FCC.

This charge was made in a partisan

One complete remedy • NAB President Harold Fellows sees repeal of Sec. 315 as the only remedy to "the unrealistic situation in which we find ourselves."

RTNDA hits "censorship" • News Directors John F. Lewis (l) (of WBAL-AM-TV Baltimore) and Ralph Renick (WTVJ [TV] Miami), speaking for the Radio and Television News Directors Assn., accuse the FCC of censorship through Sec. 315 and urge law's repeal. Mr. Renick, also an outspoken advocate and practitioner of broadcast editorializing, is RTNDA president.

AN EDITORIAL

A WORKABLE CURE FOR SEC. 315

Let's cut out the doubletalk and write an intelligible bill

IN the past 10 days a score of broadcasters have argued tellingly before the Senate Communications Subcommittee for corrections in the idiotic law governing political broadcasting.

At least as many are ready to make equally vigorous proposals to the House Communications Subcommittee which begins hearings today.

If the records of the two hearings could be confined to the presentations of broadcasters who actively seek the full responsibilities of managing vital media of journalism, major repairs in the law would be assured. Unhappily, distractions are being introduced by bureaucrats and little-minded lawyers. There is a danger that central issues will be obscured by nit-picking arguments over legal wording. No great idea has yet been expressed by "to wit" or "whereas."

In the testimony of a few of the broadcasters who have appeared at the Senate hearings, the debilitating advice of the tut-tut type of lawyer has been evident. This is not the kind of advice that makes Peter Zengers or Joseph Pulitzers. The more of this advice that creeps into the present proceedings, the less chance there is for broadcasting to attain emancipation.

It is not important to examine the motives of the lawyers in private practice who are recommending a cautious approach to the modification of Sec. 315. As resourceful men they could undoubtedly find a replacement for the income they have historically enjoyed from the necessarily illogical applications of an illogical law. It *is* appropriate, however, to look into the reasons for the bureaucratic advice the Senate subcommittee has been given by the majority of the members of the FCC.

A document submitted to the subcommittee last week by the FCC majority was a striking demonstration of (1) the futility of trying to write a law which will subsitute for experienced editorial judgment and (2) the inherent disinclination of a government bureau to relinquish power.

The document was a "clarification" of the single paragraph which the FCC majority, a week before, had proposed as an amendment to Sec. 315. The paragraph would exempt from equal time requirements newscasts and "special events such as political conventions." It contained this phrase: "But this proviso shall not except licensees who broadcast such news and special events from an objective presentation thereof in the public interest."

Last week's "clarification" struggled for 818 words to define "newscast." "special events" and "objective presentation" without succeeding in defining any of them. It did succeed, however, in making clear that if the Commission's amendment were adopted, there would be infinitely more work for lawyers and less freedom for broadcasters. Anyone who is in sympathy with the First Amendment must be appalled by the idea that the FCC would be required by law to examine regularly each station's record for "objective presentation" of news.

There have been suggestions by witnesses other than the FCC for changes in the language of the bills now before the Senate. The more we examine these proposals the more convinced we are that tinkering with the present law by adding a subsection here or inserting a proviso there will lead only to the creation of new difficulties.

As we have said from the beginning, the outright repeal of Sec. 315 is the only action which makes complete sense. But repeal is not to be had at this session of Congress. The next best thing is to throw out the whole of Sec. 315 as it now exists and replace it with a law so simply worded it will be universally understandable without the incessant (and expensive) interpretation of lawyers.

IF we were asked to draft a law which had a chance of passage and would eliminate the most undesirable features of the present Sec. 315, it would, in essence, go like this:

"The original Sec. 315 and its amendments to date are repealed.

"Here is the new Sec. 315:

"If a broadcast licensee allows a

---

vote by the House Legislative Oversight Subcommittee, also chaired by Rep. Harris and which has many common members with the Communications Subcommittee. Rep. John Bennett (R-Mich.), ranking minority member of both committees, loudly accused the Democratic majority of pressure.

Following a directive from the White House, Attorney General William Rogers asked that the Justice Dept. be allowed to participate in the FCC's reconsideration of the Lar Daly case and recommended that the Commission reverse its February decision. Two weeks ago, the FCC reaffiirmed the Lar Daly ruling. Assistant Attorney General Robert Bicks is scheduled to testify before the Harris committee tomorrow (June 30).

Other witnesses at the House hearing will include the FCC and NBC Board Chairman Robert Sarnoff today, Mr. Bicks, CBS President Frank Stanton and NAB President Harold Fellows tomorrow and Democratic National Chairman Paul Butler and Westinghouse Broadcasting Co. President Donald McGannon Wednesday (July 1). Several other witnesses also have been invited, including Sen. Thruston B. Morton (R-Ky.), chairman of the Republican National Committee.

Bills to be considered by the House subcommittee include HR 7122, by Rep. Joseph Barr (D-Ind.), HR 7180, by Rep. Wayne Aspinall (D-Colo.), HR 7602, by Rep. J. Edgar Chenoweth (R-Colo.), HR 7206, by Rep. Byron Rogers (D-Colo.), HR 5389, by Rep. Glenn Cunningham (R-Neb.), HR 6326, by Rep. Paul Rogers (D-Fla.), and HR 5675, by Rep. J. Arthur Younger (R-Calif.). The first four measures are identical to the Hartke bill while the remainder exempt only newscasts from equal time. The pros and cons of last week's testimony before the Senate committee:

• **Victor A. Sholis** (president of WHAS-AM-TV Louisville): "Repeal of the entire section is a course I urge upon you most vigorously," Mr. Sholis told the Pastore subcommittee in a prepared statement. "Should your eventual recommendation stop short of this, then I would suggest that . . . S 1858 becomes a minimum imperative."

The WHAS executive said: The importance to the people of radio and tv as sources of news and information justifies removal of any restrictions that compromise or inhibit broadcasting efforts toward serving them in this field. As reporters we should be given the same freedom and responsibility for ed-

political candidate to make a broadcast in time which is paid for by the candidate, his party or his supporters, the licensee must make equally desirable time available to all other candidates for the same office under the same commercial conditions.

"No charge shall be made for the appearance of a candidate which exceeds the charge that would be made for the same time period if bought by a commercial advertiser.

"End of law."

This ought to have some attraction for politicians. It would assure equal opportunity for all paid appearances by candidates. As a practical matter, paid appearances are all that would be left for application of Sec. 315 if any of the amendments now pending were adopted. Eliminate from the equal time rule the appearances of candidates on news and public affairs shows and you have no appearances to deal with except those which are paid.

This simplified version of Sec. 315 also would have the virtue of correcting the splinter candidate problem in news and public affairs shows without referring to splinter candidates or trying the impossible job of defining what a splinter candidate is. For all candidates, no matter how bleak their political futures, it would provide equal opportunity in paid time, a feature missing from Sen. Hartke's bill.

There is no prohibition in this version against a broadcaster's editing a candidate's speech. We have never understood how the Congress, with any logic, could forbid broadcasters to touch a candidate's speech while insisting that he is responsible for every other kind of transmission.

Let a broadcaster knowingly allow any person other than a candidate to make a libelous or obscene remark on the air, and the broadcaster is immediately—and properly—a target for legal recourse. It is the broadcaster's responsibility to see that Chevrolet does not libel Ford in a commercial or that one party chairman, when not a candidate, does not libel another. Why should it not be his responsibility to keep libel of Candidate A off the air?

No candidate in his right mind would expect a newspaper to publish his paid ad or report his speech if either contained clear indications of libel. Does the public interest, convenience and necessity require the broadcaster to carry the libelous copy which the newspaper is free to reject?

If the broadcaster may screen actionable material from candidates' speeches, he has no reason to be immunized from libel, as Sen. Hartke's bill would do. To immunize broadcasters from libel would exact a terrible price in exchange for the trivial indulgence of letting a candidate say anything he pleased. Better give the broadcaster a degree of responsibility for what the candidate says and leave undisturbed the great tradition of full libel protection.

IF there is an outstanding virtue in the revised Sec. 315 suggested here, it is its simplicity. Not even the most addled FCC could create more than momentary confusion in interpreting so uncomplicated a law.

For candidates, the proposal offers a considerable assurance of access to the air. It guarantees, by law, equal opportunity for exposure in paid time. By eliminating present restrictions which severely limit broadcasters in the presentation of candidates in news, panel, public affairs and debate programs, it immeasurably adds to the total amount of such time which radio and television would open to coverage of candidates. If the Congress worries about maintaining a reasonable degree of fairness in the non-paid presentations of candidates, it should be consoled by the knowledge that other sections of the law require broadcasters to function in the public interest. Those sections would be violated by an extreme case of political partiality.

What a good many members of Congress seem to ignore is that the present Sec. 315 is operable during only relatively brief interludes in the career of any political figure. With few exceptions, politicians acquire public identification during long periods in their lives when Sec. 315 does not apply.

An incumbent U.S. Senator holds office for six years during which Sec. 315 has no meaning for him whatsoever. Assume he runs for re-election. For the few months of his candidacy he is covered by Sec. 315. The day he is re-elected, Sec. 315 might as well be repealed until he next becomes a candidate six years later. Yet in those intervals between campaigns he must cement his position with the electorate without benefit of Sec. 315. The fact that this is possible suggests that politicians have put more faith in Sec. 315 than it deserves.

The less rigid Sec. 315 is made, the more access reputable candidates will have to radio and television. The simpler the amended law is made, the less apprehension broadcasters will have about engaging in political broadcasting and the more the voters will see and hear their elected leaders and those who aspire to election.

---

itorial judgment as is enjoyed by the press . . ."

• **Sen. Kenneth Keating (R-N.Y.)** strongly advocated that it is Congress' duty to correct the FCC's Lar Daly decision, but at the same time he urged the committee to protect the rights of minority candidates to equal time.

"Let me state emphatically that I do not think the Commission's ruling was in accordance either with the language of the statute or its legislative history," Sen. Keating said. "It is a classic case of logic gone wild." He said many of the criticisms leveled against Sec. 315 are justified, "although I am skeptical about the sagacity of attempting in one full sweep to correct more than the problem of equal time on newscasts at this time."

• **Donald H. McGannon** (president, Westinghouse Broadcasting Co.). Broadcasters endeavor to operate in the "public interest, convenience and necessity" in all areas except one, Mr. McGannon said. "This is the instance pertaining to the appearance of legally qualified candidates for public office. . . . In this instance, all of the abundant opportunity that he has in other areas to exercise his judgment has been in turn reduced to a rigid formula."

The WBC president pointed out that there is "currently no effective technique known to the American broadcaster that will permit him to give equal and comparable opportunity to all of the candidates for public office. . . . It is my opinion that the ability of American broadcasting to best serve the public in this area could only be achieved through the outright repeal of Sec. 315."

• **Harold Fellows** (NAB president): "Sec. 315 shoud be repealed in its entirety . . . because [it is] the only way to completely remedy the unrealistic situation in which we find ourselves," NAB President Fellows told the committee. "Sec. 315, even before the recent ruling by the FCC, operated to the detriment of the listening and voting public. It especially denies to broadcasting the responsibility which should be accorded to all free media of communications."

He pointed out that Sec. 315 does not apply to supporters of a candidate and that Congress has been content to allow the industry to determine how fairly to treat this issue of campaigns. "The record clearly demonstrates that broadcaster have not abused this trust," Mr. Fellows emphasized.

• **Robert D. Swezey** (executive vice president of WDSU-AM-TV New Or-

leans and chairman of the NAB Freedom of Information Committee) first testified on behalf of the NAB committee, which recommended only passage of the bills sponsored by Sens. Allott and Holland. Then, speaking for himself, the WDSU executive advocated repeal of Sec. 315.

"It is and always has been my own opinion that Sec. 315 is an anomaly in the Communications Act," Mr. Swezey said. "I have never felt that it protects the citizenry as a whole as much as it does a very limited class of citizen—the political candidate. It was initially conceived and adopted at a time when shortage of communications facilities and possibility of their monopoly were of understandable concern to the Congress. Subsequent developments in the industry have very largely removed the cause for that concern."

• **Rex G. Howell** (president KREX-AM-FM-TV Grand Junction, Colo.) described Sec. 315 as "the galling yoke which historically has prevented broadcasting from attaining equal status with the press."

The possibility of any candidate getting a monopoly on the use of broadcast facilities is too remote to permit the public interest to be subjected to the restraints of an informed electorate, Mr. Howell said. "I believe that Sec. 315 has outlived its usefulness and should be repealed at once.

"Let's bury it deeply, gentlemen," Mr. Howell concluded.

• **Dean Edward Barrett** (Graduate School of Journalism, Columbia U.). In urging committee approval of the Hartke bill, Dean Barrett said that "no slide rule or mathematical formula can effectively be applied to news broadcasts." If a broadcaster were intent upon distortion of the news, he could so select quotations, comments and film shots while at the same time giving candidates identical coverage, Mr. Barrett pointed out.

"News broadcasts will not be true news vehicles unless the responsible broadcasters are given full freedom to select, edit and transmit the news according to their best judgment. . . ." he said.

• **Tom Chauncey** (president, KOOL-AM-TV Phoenix and KOLD-AM-TV Tucson) told the subcommittee that there is "no issue more important to the full maturity of the broadcasting business and the nation's political life," in urging approval of the Hartke bill.

He said the FCC correctly interpreted the Communications Act in the Lar Daly decision and the issue now is squarely before Congress. "And you, the distinguished members of Congress, are the individuals most directly affected by the FCC's ruling," he stressed. "It will be your faces that will disappear from the television screens unless the law is changed. You can easily relate this to what it will mean in your own states."

• **F. Van Konynenburg** (executive vice president, WCCO-AM-TV Minneapolis). In a statement entered into the hearing record, Mr. Van Konynenburg stated that enactment of the Hartke bill would result in "substantial and far-reaching public gains."

• **Walter J. Brown** (president, WSPA-AM-FM-TV Spartanburg, S.C.) said that any law which attempts to require a station to put together a newscast on the basis of equal time for all candidates, rather than the news generated by the candidates, "would make a mockery of radio and tv coverage of a political campaign."

The current interpretation of Sec. 315 would invite publicity seekers of all kinds and in all numbers to become candidates and thus create an impossible situation, Mr. Brown maintained.

• **Robert B. McConnell** (vice president-general manager, WISH-AM-TV Indianapolis). Mr. McConnell urged the committee to pass the Hartke bill in a statement filed in the hearing record. In his testimony, he cited several problems faced by WISH-AM-TV in the current Indianapolis mayoral election.

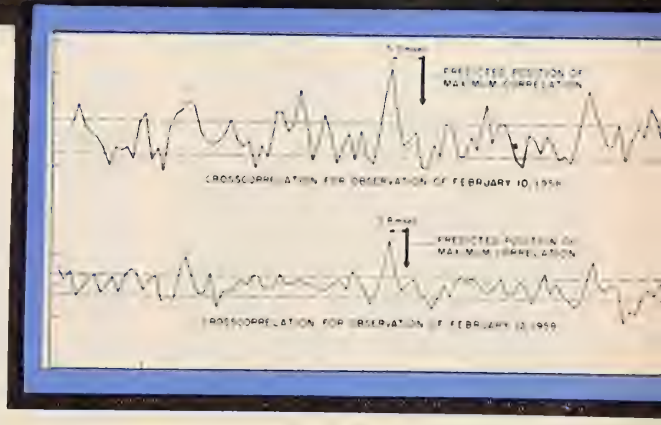
The primary was held in May, with the incumbent mayor winning his party's nomination, while the general election will not be held until November. This, Mr. McConnell said, has resulted in WISH-AM-TV having to cancel one program featuring the mayor and to curtail a second program highlighting various departments of the city government.

• **Ralph Renick and John F. Lewis** (Radio-Tv News Directors Assn.). Mr. Renick, vice president in charge of news for WTVJ (TV) Miami, said that

In public's interest • Repeal Sec. 315, Westinghouse Broadcasting President Donald H. McGannon states, if broadcasters are to operate in the "public interest, convenience and necessity."

Two hats for Swezey • Robert Swezey, WDSU-AM-TV New Orleans, speaking for himself, advocates Sec. 315 repeal but gives much milder recommendation on behalf of NAB committee he heads.

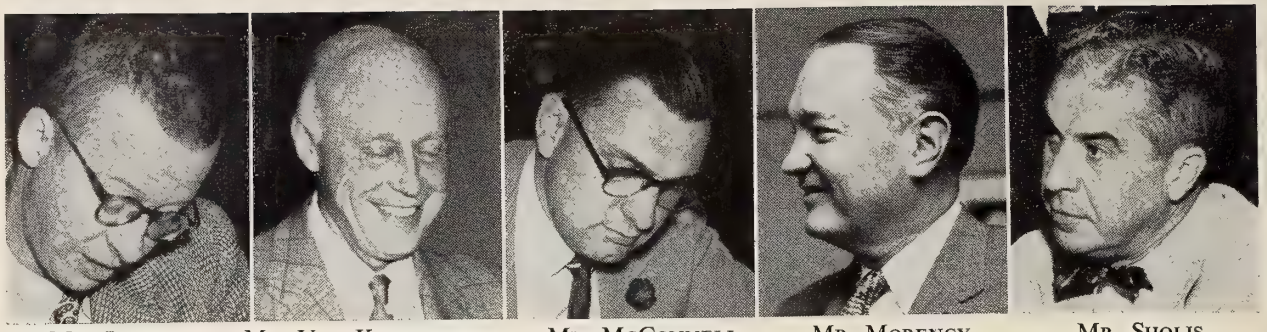
Radio-tv mockery • That would be the result of any law tying newscasts into equal time, Walter J. Brown of WSPA-AM-FM-TV Spartanburg, S.C. tells the committee.



Radar Echoes from Venus . . .

Continental Electronics' giant transmitter at M.I.T. Lincoln Laboratory is the most powerful on earth. With it, man has made his first contact with another planet – by bouncing a radar signal off Venus for a space round trip of 56,000,000 miles.

This is a significant forward step since it means we have pushed our radio signals a hundred times further than ever before. It means we can measure space distances with amazing new accuracy. The powerful pulses from this transmitter were beamed into space from a huge antenna 84 feet from rim to rim. It is the same radar used to sight and track earth satellites and for other space probe programs.



Continental Electronics is proud indeed to be part of this 56 million mile broadcast.

Correlation curves showing radar returns from Venus. The central peaks indicate the exact time of the radar waves from Earth to Venus and back (about five minutes). Each peak is the result of elaborate calculations by a high-speed digital computer on many thousands of tiny echoes originally beamed by Continental Electronics' transmitter

Another Continental Electronics Contribution in Super Power Radio

MR. JOHNSON MR. VAN KONYNENBURG MR. MCCONNELL MR. MORENCY MR. SHOLIS

Strong stands in absentia • These broadcasters did not testify in person but each filed statements supporting repeal and/or revisions in Sec. 315. John B. Johnson, president of WWNY-WCNY (TV) Watertown, N.Y., hit the equal time provision as a drawback in electronic news coverage. F. Van Konynenburg, executive vice president of WCCO-AM-TV Minneapolis said passage of the Hartke bill would be a step forward in the dissemination of political news. Robert B. McConnell, vice president-general manager of WISH-AM-TV Indianapolis, urged approval of S. 1858 to "alleviate a very difficult situation." Paul W. Morency, president of WTIC-AM-FM-TV Hartford, also favored the Hartke bill, and Victor Sholis, vice president of WHAS-AM-TV Louisville, urged repeal of Sec. 315 "most vigorously." For details of their testimony, see main story.

newsmen prefer repeal of Sec. 315 rather than modification.

He was accompanied by Mr. Lewis, WBAL-AM-TV Baltimore, who heads RTNDA's freedom of information unit.

• **Lamar A. Newcomb** (owner, WFAX Falls Church, Va.). Mr. Newcomb said that as a small station operator he approaches each political campaign with the attitude that the income from sale of political time will not justify the work and effort expended. Verifying a candidate's representative, trying to guard against libel and slander and justifying this procedure to the candidate's representative makes a broadcaster's position most uncomfortable, he said.

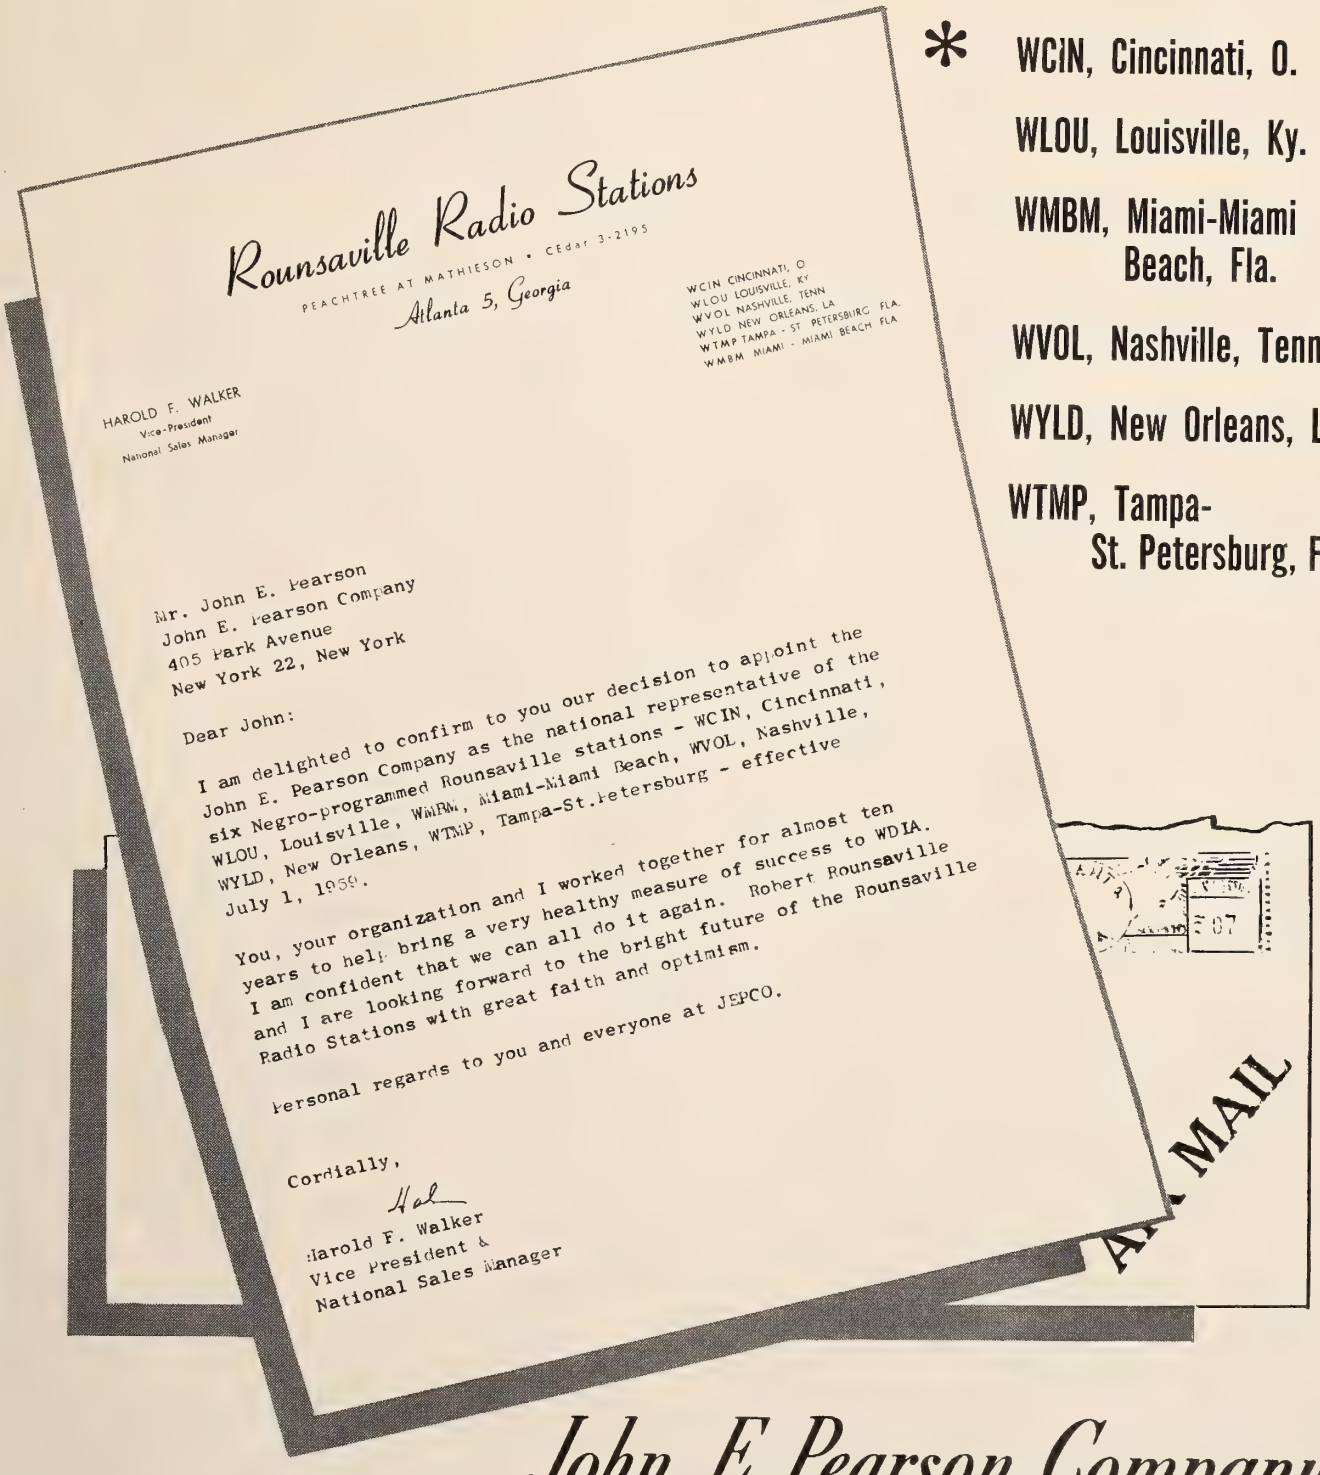
• **Bishop Homer A. Tomlinson** (General Overseer of The Church of God and its nominee for President in the 1960 elections). Bishop Tomlinson said he approves the Senate bills. He realizes, he said, that the bills would make it "a little more difficult" for such parties as his own, but said he himself is depending on "miracles" to get elected in 1960.

Bishop Tomlinson, who said he will be on the ballot in 19 states, elaborated a little on this plan. He will, he said, bring about his victory in 1960 through "arousement" of the population.

• John B. Johnson (owner of WWNY-WCNY [TV] Watertown, N.Y. and published of the *Watertown Daily Times)* based his support for equal time relief by telling the Senators how the section could affect them personally. "As a newspaper editor writing daily I support the Hartke bill to make clear what should be considered fair and equal time for candidates."

• **Nathan Karp** (Socialist Labor

No. 1 issue • Tom Chauncey, KOOL-AM-TV Phoenix, tells senators their faces will disappear from tv screens if broadcasting's top problem in reaching maturity is not solved.



Remove the yoke • Rex G. Howell of KREX-AM-FM-TV Grand Junction, Colo., urges the senators in appealing for repeal of the "bewildering conditions" in political broadcasting.

Slide rule no answer • Dean Edward Barrett of Columbia U. urges committee to report Hartke bill because mathematical formula cannot be applied to newscasts.

Some problems in definitions

Ten days ago, Comr. Frederick W. Ford submitted a suggested amendment of Sec. 315 to the Senate Commerce Communications Subcommittee (BROADCASTING, June 22). Last week, at the request of Sen. John Pastore (D-R.I.) and with the approval of four other commissioners, he defined just what the proposal would do. Text of the amendment:

"Provided, that newscasts and special events such as political conventions shall not be considered a use within the meaning of this section, but this proviso shall not except licensees who broadcast such news and special events from an objective presentation thereof in the public interest.

Comr. Ford defined "newscast" as a straight, factual report of the news. "News commentary" is distinguished from newscast by announcing to the public that it is receiving the opinion of a commentator or an interpretation rather than a factual account, he said.

"Such as a political convention," as used in the amendment, "was not intended as a limitation but as an example of the political type of special event included."

He said the term "objective" was substituted for "fair and impartial" as contained in the original draft to avoid the contention that fair and impartial in effect meant equal time. "The suggested language is an attempt to free broadcast licensees from the provisions of Sec. 315 and to give them freedom to exercise their judgment in the handling of news programs and special events . . . despite the fact that a legally qualified candidate may appear or be heard on such a broadcast . . .," Comr. Ford said. "Such an event may be the result of a candidate's official position or of a political nature . . ."

Endorsement • Comrs. John C. Doerfer, Rosel Hyde, Robert E. Lee and John Cross endorsed the Ford recommendation, with Comrs. Robert T. Bartley and T.A.M. Craven dissenting. Comr. Bartley said the amendment goes too far in that it includes the "indefiniteness" of special events and would result in different treatment in separate situations.

Comr. Craven doesn't want the Commission to tell broadcasters what they should put on the air.

He proposed last year that the FCC get out of the programming field entirely. This was in the consideration of the revised programming section in application forms. He maintained then that any interest in programming ran afoul the no-censorship provisions of the Communications Act. (BROADCASTING, Dec. 1, 1958.)

He was one of the commissioners who voted against the majority in the Lar Daly case.

In the first place, he objected to exempting newscasts and special events from Sec. 315 as unnecessarily complicating the administration of the equal time provisions of the Communications Act. What he fears, he said last week, was that the Commission would begin to be called on to determine what kinds of programs are news and which are not. He also asserted, once more, that the present Sec. 315 gives the Commission plenty of latitude already. The problem, he said, is one of administering it properly.

He was particularly vigorous in his opposition to the proposal that the law be amended in such a way as to specifically require broadcasters to maintain an "objective presentation." This, he feared, would saddle broadcasters almost irrevocably with what he believes is tantamount to censorship.

As it is now, he explained, the fair and equal requirement is a Commission policy. "Someday we may be able to get rid of that relic of the Blue Book," he said, "but we never will if it becomes part of the law."

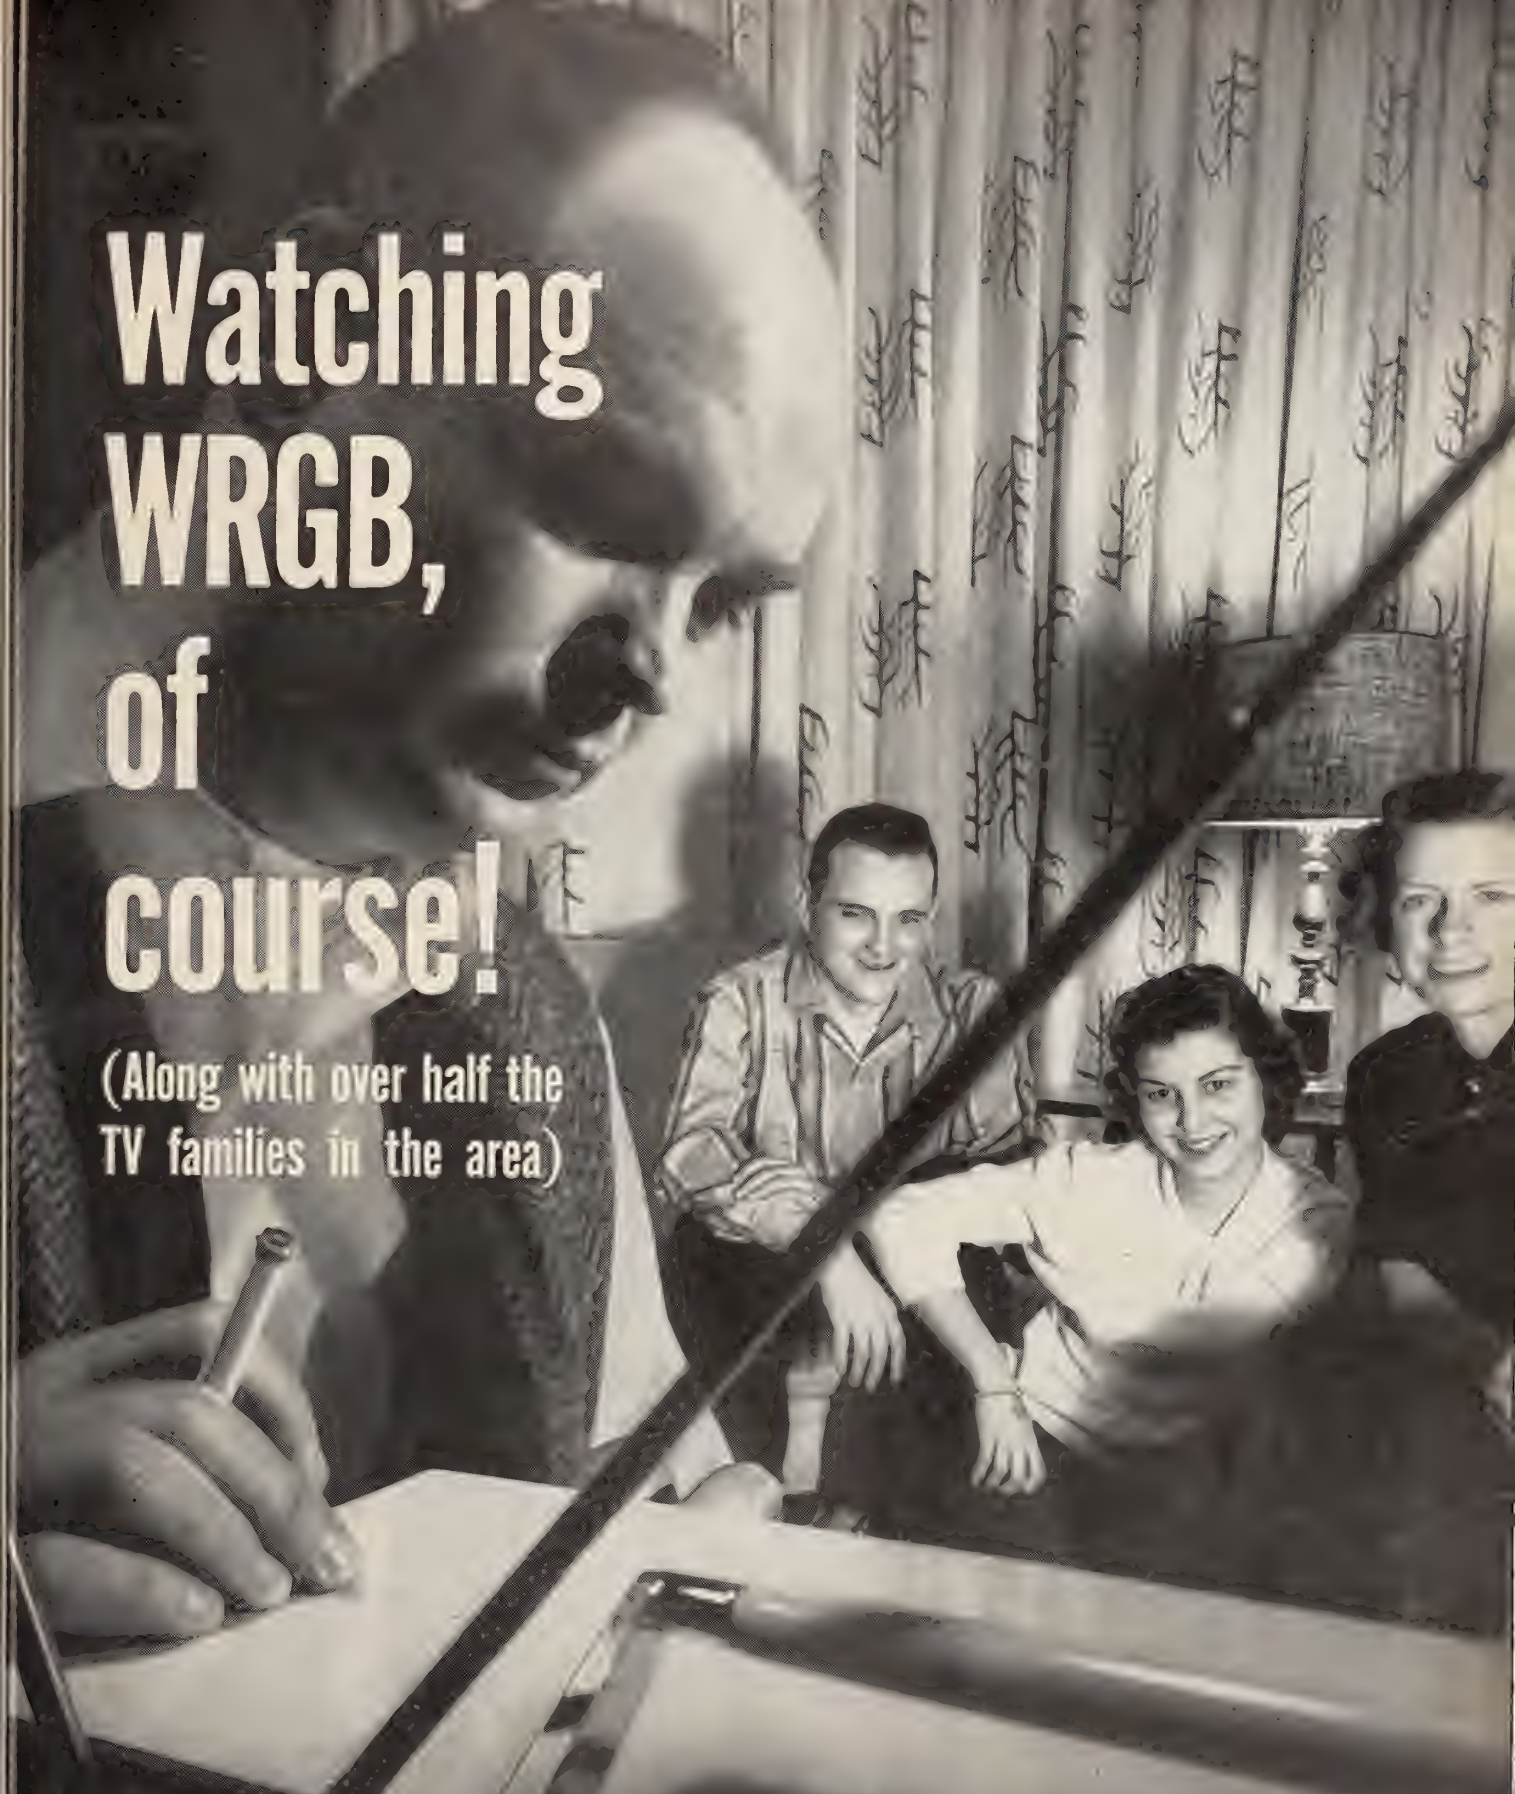
Party). Mr. Karp charged that the renewed clamor to amend Sec. 315 "is based on a desire to reduce, or eliminate entirely, the participation of minority party candidates in free radio and television time . . . and thereby confer upon the two major political parties what amounts to a monopoly on the use of the air waves. . . ."

• **Joseph A. Schafer.** A candidate for the Republican nomination for mayor of Philadelphia last month, Mr. Schafer told the senators that equal time requirements not only should be left as is for broadcasters but should be extended to newspapers as well.

This principle is necessary, he said, if "we are to practice democracy in our national, state and local politics." Mr. Schafer said that, because of Sec. 315, he received fair treatment from radio and tv in his recent losing campaign. "Otherwise, I would not have received as much time as I did on the air . . .," he said.

• **V. Lane Knight** (attorney for Lewis Food Co., Los Angeles) testified against all the proposals to amend Sec. 315 which, he said, would "increase the privilege of the licensee to engage in censorship." He maintained that the provisions of the section should be expanded, rather than relaxed.

• **William Price** (executive secretary, United Independent-Socialist Committee, New York) said the bills would "eliminate the voice of dissent from the political arena in the U.S."



Mr. Price charged the Hartke bill would "define any existing minority party out of the arena of free debate." As for news broadcasts, he said, the Daly decision recognizes that an appearance on radio or tv by a political candidate, even if not related to his candidacy, is a "publicity factor of importance."

It is with "somewhat ill grace" that broadcasters "now cry of *de facto* FCC censorship when in fact they have practiced their own brand of censorship against minor parties for years," Mr. Price said. He charged a radio-tv "blackout of silence" against his party in the New York gubernatorial campaign last year.

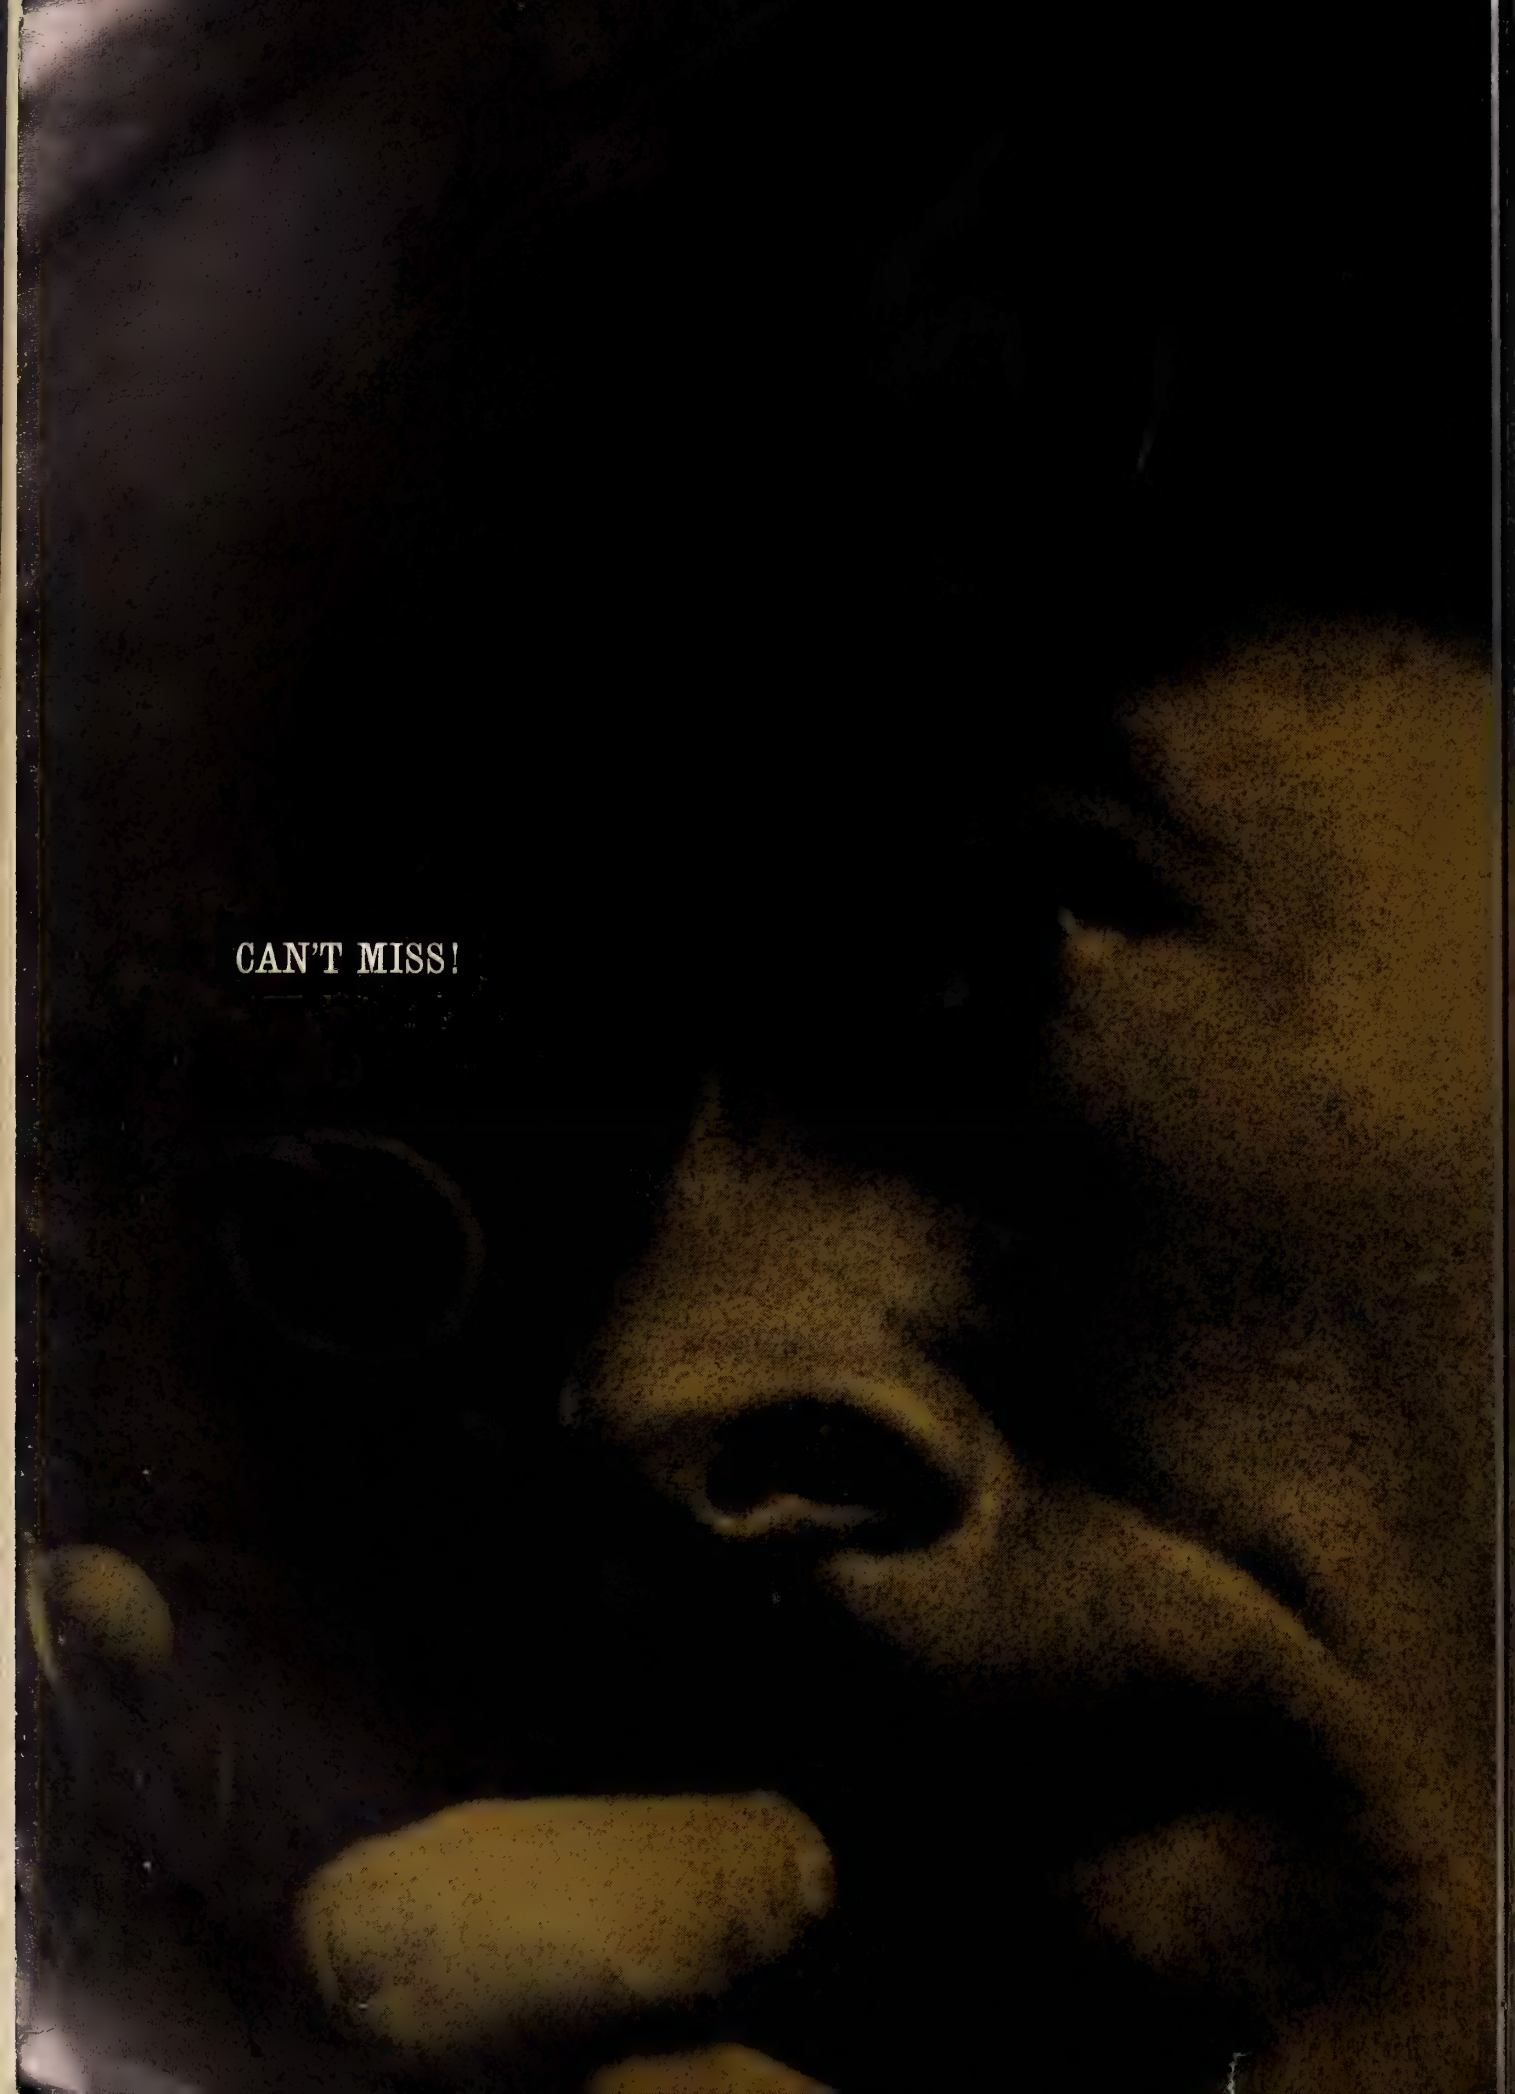
Broadcasters, he said, are threatening to refuse to carry political news next year if newscasts are not made exempt from Sec. 315. This is an "arrogant threat" to scare Congress into acting with "unseemly haste," he said. adding that Congress has always lived to regret legislation pushed through hastily under pressure of "some special interest."

Since radio and tv have largely superseded the press and minimized the effect of street meetings, debates and forums, a monopoly of radio-tv amounts to a monopoly of all election effort, the Socialist-Independent official said. He charged CBS President Stanton with making a "candid plea for political conformity" and elimination of dissent by holding that the Hartke bill recognizes "the political reality that normally ours is a two-party system."

At the close of the hearings last Thursday, Sen. Pastore announced that the record would be kept open until tomorrow (Tuesday) and that statements will be accepted until that date.

Watching WRGB, of course!

(Along with over half the TV families in the area)



Better than half the viewing families—52.6%—watch WRGB. The May, 1959 ARB total area survey shows Channel 6 delivers more homes than the other two stations combined in the Northeastern New York and Western New England market. Contact your NBC Spot Sales representative for the complete story.

CAN'T MISS!

TRACKDOWN

One of network television's most famous Westerns has just become available for syndicated sales... and it's a sure-fire hit. Because:

...TRACKDOWN is the biggest, most important Western ever to enter first-run syndication, at a time when Westerns are at the very peak of audience popularity;

...TRACKDOWN is produced on location by Dick Powell's famous Four Star Productions, and has a well-known star, Robert Culp;

...TRACKDOWN is based on case histories taken from the files of the fabulous Texas Rangers, and is the only television show ever to win official endorsement from the Rangers and the state of Texas;

...And TRACKDOWN has proven a huge audience-winner, averaging a 23.0 total Nielsen rating in its run on the CBS Television Network (October 1957—April 1959), against the stiffest competition.

Tired of long shots? TRACKDOWN (71 crack half-hours) can't miss!

VHF, FM WANT TO STAY PUT

Don't disturb us, industry groups ask FCC

Spectrum space allotted to vhf television and fm should not be disturbed, the FCC was told last week in its month-long depth study of non-government services in the 25-890 mc band [BROADCASTING, April 27, *et seq.*].

Testifying June 25 before the Commission *en banc* (minus Chmn. John Doerfer, who was appearing before a Congressional inquiry, see story page 46), NAB President Harold E. Fellows declared it "essential" that chs. 2 through 12 "in which the public has invested so heavily in receivers," be retained as the foundation of any allocations plan. He said the greatest area for expansion lies in the addition of frequencies adjoining ch. 13.

In testimony prepared for delivery Friday (June 26), Lester W. Lindow, executive director of the Assn. of Maximum Service Telecasters Inc., outlined the approach of his organization toward the spectrum situation. He emphasized the inviolability of the 12 existing vhf channels, the addition of further vhf frequencies between chs. 6 and 7 or above ch. 13 in exchange for some of the existing uhf spectrum space, and maintenance of the "present high technical standards."

Speaking on behalf of Fm Broadcasters Inc. on Thursday, Ben Strouse, WWDC-FM Washington, told the FCC that the present 88-108 mc fm band must remain intact and that neither transfer of the fm band to another portion of the spectrum nor diminishing the width of the band would be in the public interest. In his testimony Mr. Strouse outlined the recent remarkable growth of fm as a high-quality entertainment medium, a factor in national defense, and a swiftly developing medium.

Another Fm Opinion • Elliott M. Sanger, executive vice president and general manager of WQXR-AM-FM New York, was scheduled to appear before the Commission on Friday with testimony which supported Mr. Strouse. Mr. Sanger urged the FCC to take prompt action making it clear "that fm broadcasting will remain in the band 88 to 108 mc and that the width of an fm channel will continue to be 200 kc."

Also scheduled to appear Friday was David C. Stewart, assistant director of the Joint Council on Education Television, who intended to discuss the growth of etv and urge the Commission to give educational interests high priority "when adjustments in the spectrum are considered."

The current FCC inquiry into the 25-890 mc band is part of a continuing study of the spectrum which this spring saw Congress also take a hand with a probe by a House subcommittee (BROADCASTING, June 15). The FCC has been considering a 50-channel extended vhf television band with frequencies to come from military allocations. This concept has initiated discussions with the Office of Civilian & Defense Mobilization.

An essential corollary to the issue of an extended contiguous vhf band has been the feasibility of an all-channel tv receiver. Motorola President Robert W. Galvin told the FCC earlier in the 25-890 mc proceedings (AT DEADLINE, June 8) that his firm would "enthusiastically" support the manufacture of a 30-channel set and could market it for "essentially" the same price as the present 12-channel-only receivers. NAB President Fellows, in replying to a question on such all-channel receivers last week, said that NAB has yet to develop a policy on the expanded sets.

Engineering View • Scheduled to appear before the FCC on Friday along with AMST director Lindow was Howard Head, consulting engineer (A.D. Ring & Assoc.), who quoted from the Tv Allocations Study Organization report (BROADCASTING, March 6) in support of existing tv allocations. He said that chs. 2-6 provide, according to TASO, the most extensive television of "consistently good quality." Chs. 7-13 are also "good," while chs. 14-83 provide such service over much smaller areas than the vhf channels. TASO made it clear, stated Mr. Head, that the present 12 vhf channels are indispensable.

Non-broadcast witnesses have included mobile service groups and associations. One was the State of California, whose representatives asked reservation of the vhf band for mobile services and a move of tv to uhf.

WKIS asks high court for ruling on ch. 9

WKIS Orlando, Fla., last week continued its fight to have the ch. 9 case resolved by someone outside the FCC. The Orlando station, denied in its petition for a rehearing *en banc* by the U.S. Court of Appeals in Washington, asked the U.S. Supreme Court to issue a writ of *mandamus* requiring the nine members of the lower court to state the "precise reasons" for that court's order setting aside a 1957 FCC decision awarding ch. 9 to WLOF Orlando.

The lower court's decision of May 21 setting aside the FCC grant (made in compliance with the Supreme Court's October 1958 reversal of an earlier decision by the lower court which upheld the FCC grant to WLOF) also ordered the FCC to hold another hearing with the aid of a special hearing examiner. WKIS then requested a rehearing *en banc* by the appeals court, holding the FCC shouldn't be allowed to investigate itself (on the issue of whether a member of the FCC who voted in the 1957 award should have been disqualified) and asking instead that the lower court appoint its own hearing master to make recommendations for the award to the appeals court itself. The lower court on June 5 refused to review the case *en banc*, giving no reason for denial.

WKIS in its petition to the Supreme Court last week said that under the Administrative Procedure Act the lower court, in its May 21 reversal of the FCC, should have made a finding to support its order vacating the FCC action. Instead, WKIS said, the lower court "merely stated the purpose or objective, namely to enable the Commission to determine certain things that 'might be thought' to reflect upon individual commissioners and/or upon their original decision, or upon either of the applicants." The court, WKIS said, should have stated that if "certain facts were found to be true, disqualification of the guilty parties (commissioner and/or applicant) would be required." The court's "indefinite, indecisive" attitude leaves the remand proceeding open to "vague findings and 'white-wash' tactics," WKIS charged.

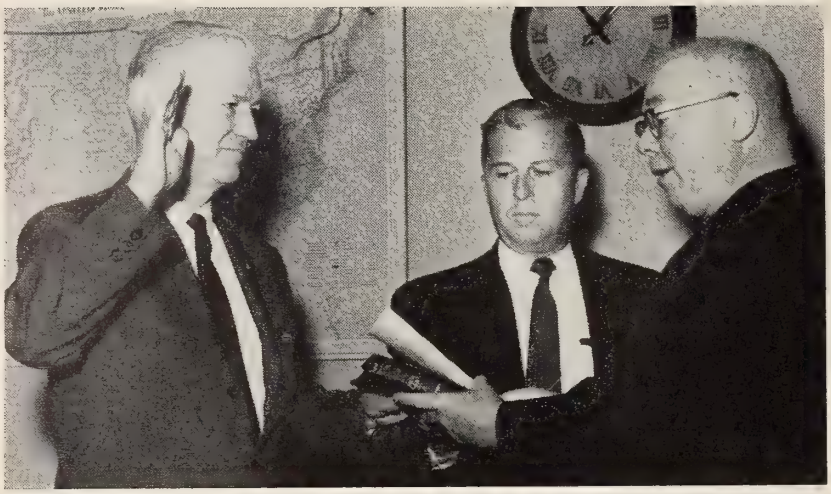
The Supreme Court remanded the case to the lower court in October 1958 to look into allegations that WLOF had engaged in *ex parte* activities during FCC adjudication of the case.

THE MACK TRIAL

Counsel summations prepared for jury

The Mack-Whiteside case probably will go to the jury this week following closing arguments by prosecution and defense counsel scheduled to begin today (June 29) in Federal District Court in Washington. Both sides rested their cases last week, the 12th week of the trial, after two defense witnesses were heard.

Defense counsel appeared heartened Thursday when Judge Burnita S. Matthews denied a defense move for a directed verdict of acquittal, but reserved the right to reverse the jury after the verdict if it finds either of the defendants guilty. Nicholas P.



According to ARB, that's how highly the Jack Paar personality scores with Chicago viewers. WNBQ's rating averages well over twice that of the feature film fare or anything else in the 10:15 p.m. to midnight time period, Monday through Friday. And on WNBQ, Jack delivers audiences at a cost per thousand homes as low as $1.15! Choose the favorite sport of Chicago viewers—Jack Paar—on Chicago's quality television station.

Hyde starts third • Oath for his third term as a member of the FCC is taken by Comr. Rosel H. Hyde (l) in short ceremonies Tuesday (June 23). With him here are FCC Chairman John C. Doerfer (c) and Judge John A. Danaher of the U.S. Court of Appeals for the District of Columbia, administering the oath. Comr. Hyde was first appointed in April 1946 to fill the unexpired term of the late William H. Wills, who served less than a year before his death. In government service since 1925, Mr. Hyde's initial appointment to the FCC climaxed 18 years with the FCC and predecessor Federal Radio Commission in various positions ending with general counsel. He served as FCC chairman for the first year of the first Eisenhower Administration (April 1953-April 1954), having been vice chairman from March 1952. He was renominated last April 17 and unanimously confirmed by the Senate June 4.

Chase, attorney for former FCC Comr. Richard A. Mack, said he had never had this happen during his court experience and said he took it as a sign Judge Matthews may believe the defendants are innocent.

Scheduled to be argued last Friday were 36 prayers entered by Mr. Chase asking Judge Matthews to instruct the jury on various points of law. Arthur Hilland, counsel for Thurman A. Whiteside, was to present similar prayers last Friday.

Mr. Mack was not present Thursday and Mr. Chase explained he was too ill to be at court that day. Neither Mr. Mack nor Mr. Whiteside was put on the stand during the trial.

The witnesses last week were Mrs. Elizabeth Grisillo, Mr. Whiteside's secretary, and Thomas A. O'Neil, Washington accountant, who testified on financial transactions between the two defendants.

Earlier in the week, defense counsel had introduced evidence that Mr. Mack received money from the G.C. Stembler Insurance Agency, owned by Mr. Whiteside, as early as January 1953, months before Mr. Mack joined FCC.

The defendants are charged with conspiring to obtain award of ch. 10 in Miami for Public Service Tv Inc., a subsidiary of National Airlines. The FCC made the grant in 1957 and Mr. Mack resigned from the FCC early in 1958.

STATE TAXATION
Interstate threat studied in Congress

Chairman Emanuel Celler (D-N.Y.) of the House Judiciary Committee last week set up a special subcommittee to study implications of the U.S. Supreme Court's decision last February that a state has the right to tax that portion of the income of companies operating in interstate commerce which is derived from that individual state (BROADCASTING, March 2).

Meanwhile, Sen. Prescott Bush (R-Conn.) last week introduced a bill in the Senate which would prohibit a state from collecting taxes from companies which sell their goods or services in that state unless the company maintains a "stock of goods, plant, office, warehouse or other place of business within the state." The bill is similar to one introduced the week before by Rep. William M. McCulloch (R-Ohio) (BROADCASTING, June 22). and which will be considered by the new House subcommittee.

Heading the House unit will be Rep. Edwin E. Willis (D-La.). Other members are Reps. Byron G. Rogers (D-Colo.), Jack Brooks (D-Tex.), William E. Miller (R-N.Y.) and Richard H. Poff (R-Va.).

State-line Study • Rep. Celler said a study "must be made" to find whether there has been a departure from the "traditions that have kept interstate commerce from the burden of multiple state taxation," and, if there is any necessity of "legislation that will protect the national as well as the state interest." He said the House unit is for inquiry, not legislation, and will make its recommendations to the parent Judiciary Committee.

Sen. Bush said the Supreme Court interpretation opens up a "Pandora's box" of difficulties and harassment for all businesses, especially smaller ones," and he feels the bill is of "sufficient urgency" that the Senate should make a special effort to bring it to a vote this session of Congress.

The bill is not a total solution, he said, but would give relief to companies in interstate commerce whose only activity in other states is seeking sales.

Such interstate solicitation, of course, is obvious in the case of broadcasting.

FEDERAL BUDGETS
FCC, other funds reach final hurdle

The Senate last week restored $300,000 of a $600,000 cut by the House in FCC appropriations for fiscal 1960, approving a total of $10.7 million for the agency, $300,000 less than the $11 million Budget Bureau recommendation.

The Independent Offices Appropriations Bill (HR 7040) was passed by a Senate vote of 89-1. The measure now will go to a joint Senate-House conference committee to iron out differences caused by Senate increases of over $100 million to the $6.45 billion version passed by the House on May 11.

The Senate also raised the ante $190,000 over the $6,745,000 House appropriation for the Federal Trade Commission. The How figure represented a $230,000 cut from the Budget Bureau recommendation of $6,975,000. The Senate version: $6,935,000.

The Senate also increased by $200,000 the amount the House approved May 21 for the U.S. Information Agency, parent agency of the Voice of America. The total Senate figure for USIA was $101,757,300 which is still $4,354,700 less than the Budget Bureau request. This bill (HR 7343) also is scheduled for conference by a Senate-House group.

In debate before Senate approval of the Independent Offices Bill, Chairman John A. Carroll (D-Colo.) of the Senate Judiciary Committee's Administrative Practice & Procedure Subcommittee, expressed concern that members of some regulatory agencies at times have acted as if they were a part of the Executive rather than of Congress. He

Summer Sales

for you in Detroit and Southeastern Michigan

Salesmakers all! That describes the sprightly line-up of local summer fare on WWJ-TV. These are programs you can depend on for genuine viewer interest, for depth impact that moves merchandise. These are shows that people really look forward to, really sit down to watch, really follow with enthusiasm.

Check the list—then call your PGW Colonel and place your summer schedules on WWJ-TV, Detroit's Believability Station.

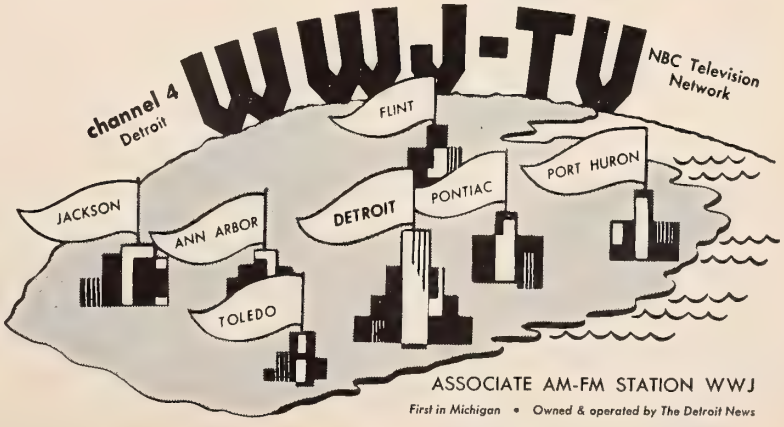
"Mr. Adams and Eve"
9:30 A.M.
Monday through Friday

First run off network, this delightful series stars Hollywood's Ida Lupino and Howard Duff—catches Mrs. Detroit just before her morning shopping trip.

"It's a Great Life"
1:00 P.M.
Monday through Friday

Always a big Detroit favorite. "It's a Great Life" provides 30 minutes of midday fun and buying inspiration for thousands.

"I Married Joan"
1:30 P.M.
Monday through Friday



Lovable, laughable Joan Davis is winning still more friends in her new summer time slot preceding NBC's "Queen for a Day."

"The Life of Riley"
6:15 P.M.
Monday through Friday

With its impressive track record, "The Life of Riley" is perfect for family-seeking advertisers. It follows WWJ-TV's popular "Six O'Clock News-Weather" strip.

Salesmaking coverage, too! Northward to Flint and beyond, southward to Toledo and beyond, Detroit's WWJ-TV covers one of America's largest and wealthiest centers of population

National Representatives: Peters, Griffin, Woodward, Inc.

indicated his subcommittee might question "some" of them "most closely" when they appear before his group. He also expressed concern over the backlog of some agencies.

Fellow Democrat Warren G. Magnuson (Wash.), chairman of the Senate Commerce Committee and of the Senate Independent Offices Appropriations Subcommittee, generally agreed with Sen. Carroll in a discussion on the Senate floor. Sen. Magnuson said the FCC has a great backlog of cases, but is "catching up fairly well."

FCC program review explained by Doerfer

The FCC's consideration of programming in its various licensing functions must be looked at more in the light of a selection process than "any overt attempt to usurp an ungranted power," FCC Chairman John C. Doerfer said last Thursday (June 25) in an address to a symposium on the issues of broadcasting at the School of Speech, Northwestern U., Evanston, Ill.

The FCC chairman said any station licensee who is aware of the needs of his community or area should know or develop a sense of understanding of that which ranges from the mildly controversial to that which is "highly debatable or hotly discussed," and should develop a sense of perspective.

He should be particularly zealous to provide fair presentation of matters in which he may have a personal financial interest, bias or prejudice, Chairman Doerfer said. He added that there is no all-inclusive formula for this and the FCC has developed precedents which afford more definite guides only in the "crucible of experience over the years."

No FCC dispensation

The FCC last week refused to waive its rules to allow WIP Philadelphia to originate most of its programs during the last two weeks of July from Atlantic City, N.J. But the station, upon learning of the FCC's decision of Thursday (June 25), announced that it would originate as many programs as FCC rules allow from Atlantic City, anyway, during the period.

NARBA, Mexico treaty hearings set July 9

Hearings on the North American Regional Broadcasting Agreement (NARBA) and a separate U.S. treaty with Mexico on broadcasting will be held July 9 by a special *ad hoc* subcommittee of the Senate Foreign Relations Committee headed by Sen. Wayne Morse (D-Ore.) (BROADCASTING, June 22).

The subcommittee has invited interested witnesses to testify. Among those who will appear are Comrs. Rosel H. Hyde and John S. Cross of the FCC and W.T.M. Beal, deputy assistant Secretary of State for economic affairs. Comr. Hyde has represented the FCC at various international conferences involving broadcasting.

PROGRAMMING

TWO VOICED NEWS FIRMS MERGE

Radio Press and International Transmissions combine facilities

Two voiced radio news services—Radio Press Inc., and International Transmissions Inc., both New York—have merged to form Radio Press International, effective today (Monday).

Announcement of the consolidation is being made jointly today (June 29) by George Hamilton Combs, president of Radio Press, and Sumner J. Glimcher, president of ITI. They said the move is subject to stockholder approval but pointed out that principal stockholders already have given their assent.

Under the change-over, Mr. Combs becomes board chairman and Mr. Glimcher president. Other officers are Donald Hirst, chairman of the executive committee; Noel Bernard, vice president for foreign news; Thomas M. Heyman, vice president, and Lloyd Garrison, assistant vice president.

The newly-organized RPI has obtained financing to enlarge its operations, according to Mr. Combs. Contemplated for the future are two or more classes of service to meet the requirements of particular stations—a comprehensive report, a skeletal report, a foreign report, Washington and national news report.

Will Fulfill Contracts • Radio Press had 54 stations on its client list and ITI had 18. Several stations currently are subscribers of both ITI and Radio Press and these outlets will continue to receive both schedules until the contracts are fulfilled. Mr. Combs noted that about 10% of the Radio Press client list and 20% of ITI's subscribers are network-affiliated stations.

RPI will have three 20-minute transmissions per day on weekdays and one 20-minute transmission on Saturday and Sunday. ITI used telephone lines and Radio Press utilized leased lines to transmit their voiced news recordings to stations. They indicated that both methods will be used, depending on the desire of the client. The subscriber pays the costs of transmission in any case, plus a fee to the news service.

Radio Press International will have 46 fully-accredited foreign correspondents on duty in at least 35 countries, officials said, plus 387 stringers throughout the U.S. Foreign news is provided by stringers, except in London where RPI will have a fulltime bureau of two news correspondents. Six foreign correspondents are on a retainer basis, they added.

Messrs. Combs and Glimcher said they undertook the merger in order to present "greater strength" if competition should develop from such "giant" news services as the Associated Press and United Press International.

Radio Press' emphasis has been on national news and ITI on international coverage. For the present, two transmissions per day will be largely national news and the third, international news.

Yesterday?

Starting in September, NBC-TV's *Today* series (Mon.-Fri. 7-9 a.m. NYT) will be taped late in the afternoon prior to each day's telecast, it was announced last week by Jerry A. Danzig, vice president, NBC participating programs. The only live coverage to be retained will be for up-to-the-minute news, Mr. Danzig said.

Reasons given for the change from the all live format: greater flexibility; use of pick-ups from areas in the news; more emphasis on prominent figures in entertainment, arts and sports; more convenient times can be arranged for guest appearances, and for west coast coverage which was unavailable for live participation. The program will experiment during the summer with special video tape features in preparation for the new season, it was reported.

The WeeReBeL *discusses "sales campaign ribbons" with Bert Mulligan, Broadcast Supervisor, Compton Advertising, New York.*

Have you heard what the WeeReBeL said to Compton Advertising?

"We're rich in Columbus."

Average family income in the metropolitan trading area of Columbus, Georgia, is higher than that of New York, Chicago or Detroit. In fact, only 24 other cities in the U. S. beat it!

Over 83% of these better-than-average families own TV sets and WRBL-TV is the only VHF in the market. WRBL Radio is the station most listened to, with the lowest cost-per-thousand and the best availabilities because WRBL offers the soundest program format. Call HOLLINGBERY and get Columbus on your schedule, now.

WHY NEWS IS TV'S HIDDEN ASSET

The audience thinks more of tv news than tv broadcasters do

Tv news is much more powerful than generally believed.

It's the most underrated of all video program types.

This new concept of the place of television news in the media field was announced last week by Dr. Phillip Eisenberg, president of Motivation Analysis Inc. The research firm has completed a study of audience reaction to tv for Corinthian Broadcasting Corp.

Dr. Eisenberg upset traditional values in newscasting after analyzing results of field work done in Houston, where Corinthian operates KHOU-TV.

The study yielded viewer reaction to news, weather shows, movies and other forms of programming, using a sample of 200 men, women and teenagers, all tv set owners. The semi-structured depth interview technique was employed.

Explaining that television news has a "much stronger" impact on the public than has been believed, Dr. Eisenberg said:

"A decade ago people were saying that tv news would always be limited because it could never be as fast or up-to-the-minute as radio and because of the inherent limitations of visual electronic journalism.

"However, I cannot help but be terribly impressed by both the size of the audience to television news and by the intensity of the interest in it. It impressed me more than anything else in the Houston study."

Asked why news receives only slight mention in a list of most popular programs, Dr. Eisenberg told BROADCASTING viewers usually take news and weather for granted and do not list them as favorite types despite their interest in such programming.

Why News Is Strong • Tv news was found in the survey to have its main strength in the sense of reality achieved. These news factors were cited in the study:

Tv is faster than newspapers and easier to grasp than other media; half the people want more tv news than they are now getting, a third are satisfied with three newscasts a day, 18% want fewer newscasts; two-thirds prefer a short (15 minutes) to a long newscast; people want both world and local news without disproportionate emphasis on either and with facts put in perspective but minus personal opinions of the newscaster; they desire as much "visualization" as possible; three-fourths deem tv news "very important" or at least "moderately important"; three-fourths like special local events.

Strong local news coverage gives viewers a feeling the station is interested in the welfare of the community, according to Dr. Eisenberg. He said this applies to local sports and special events, school sports, school board meetings and the like, adding "you are much more likely to know some of the individuals involved than individuals in a national story."

The effort made to learn about specific programs evidences the intense public interest in tv, he said. "When people are interested in the subject they will go so far as to read a catalog with all its detail and fine print. The viewer studies the small print in the newspaper or magazine listings of tv programs and then makes his viewing decisions." He felt this shows the importance of giving the viewer specific information showing details as well as the kind of show and its probable quality.

As to weather, four-fifths like the reports; viewers prefer local weather tied to the national weather picture; they want visualization; the personality is important.

Dr. Eisenberg said the Corinthian study confirms a former depth study he did for Television Bureau of Advertising. This showed tv's strongest asset as an advertising medium and communications force is its unequaled ability to create the sense of reality itself. He said, "The tv news experience is the most real in comparison with any other medium, if it is presented properly. It is the closest thing to the actual experience itself. . . . Tv has learned to be pretty fast in reporting the news.

"One of the medium's great strengths is its ability to expose us directly to the personalities in the news. We see them and form opinions of them as people. The names in the news are no longer just names, they take on an immediate reality."

Dr. Eisenberg reminded that "radio still remains No. 1 for speed; the newspaper provides important details and comprehensive coverage; magazines offer valuable background and interpretation."

Visualization • He said the tv newscast is most effective "when it is delivered with the greatest amount of visualization, such as motion picture clips, clear explanatory maps, diagrams, animated treatments and the like."

Here are breakdowns on the key news questions in the Motivation Analysis study (many tables do not add to 100% because of duplicate and miscellaneous replies):

How important to you is the news on tv?

Very important	56%
Moderately important	17
Not very important	15
Very unimportant	12

What do you get from news on tv that you do not get from news on radio or in newspapers (three main reasons)?

Up-to-minute news bulletins; quicker	28%
Visual perception; news more real; can remember longer	27
Like to see where news is being made	25

Which do you prefer—long or short news shows? Why?

SHORT	56%
Just gives main facts, to-the-point	19
Don't have time to sit too long; it takes less time	12
Like 15-minute news	7
Doesn't bore me	7
Doesn't take too much time way from programs	6
LONG	32%

A SEPARATION OF ACTIVITIES
TO BETTER SERVE OUR CLIENTS

Two completely independent firms will handle completely independent media.

Edwin Tornberg & Company, Inc., has entered the field of negotiating the purchase and sale of broadcasting stations, Radio-TV shows and entertainment properties.

Allen Kander and Company will continue to specialize in the purchase and sale of daily newspapers for important clients, and also serve as special consultants in the broadcasting industry.

Mr. Tornberg, president of the new company and formerly vice-president of the Kander organization, will have Edward Wetter and Douglas Kahle associated with him in eastern and west coast offices.

Mr. Kander will continue to maintain present offices and staffs in Washington and New York.

AFM INCOME DOWN
Air media employment, revenue dip in 1958

Employment of musicians on radio and television in 1958 declined substantially in 1958 from 1957 levels as total revenue of American Federation of Musicians members in the air media slipped to $14,992,752 from $21,088,173 in 1957.

This picture of AFM's down-beat in radio-television emerged from a comparison of the Federation's annual report, issued at the conclusion of the 62nd annual convention in Seattle on June 19, with the union's 1958 report, which covered 1957 activity. A spokesman for AFM told BROADCASTING that the figures reflect a trend over the years of the use of "canned music" on radio-tv, but pointed out that "one redeeming feature is that this year, the Federation has signed a lot more contracts with tv production companies for use of live music in series."

The sharpest cut for AFM members was in the "steady staff employment" in television category. Whereas in 1957, 834 musicians were employed for varying periods of time and earned $8,406,625, in 1958 the number of staff musicians fell to 409 and earnings to $2,955,535. On radio, staff employment in 1957 covered 647 musicians with earnings of $4,548,894; in 1958, 432 staffers grossed $3,056,973.

Down and Down • Another area that showed marked reduced activity for AFM members was single engagement commercial tv employment. The number of such telecasts dipped from 3,415 to 2,884 and gross salaries from $2,796,250 to $1,804,756.

As a whole, employment on television was sharply curtailed, while on radio the reduction was less pronounced. Total tv income from all sources dropped in 1958 to $9,287,383 from $14,325,643 in 1957; total radio income from all sources fell by about $1 million—to $5,705,359 from $6,702,529 in 1957.

Incumbent officers of the Federation were re-elected to serve another one-year term. They are Herman Kenin, president; William J. Harris, vice president; Stanley Ballard, secretary and George V. Clancy, treasurer.

Kenin Blasts FCC • Herman D. Kenin, president of the AFM, sharply criticized the FCC for "glaring indifference to the true public interest" and "dollar domination programming." He emphasized during his talk that the "lack of live music" on radio-tv works contrary to the public interest.

Mr. Kenin told delegates that the federation would attempt to secure support from other trade unions operating in broadcasting for a project aimed at placing at least one union worker in the industry on the Commission. He predicted: "It won't be for long that the broadcasters will be able to get away with such vulgarities as silencing the cultivated musical *Voice of Firestone* because Madison Ave. moguls arbitrarily decided that cops and robbers for the moment will sell more soap."

The convention passed a resolution instructing the AFM to make every effort to induce the FCC to deny license renewals to broadcasters who fail to present live talent programming and another imposing a tax of 2% on funds received by musicians as re-use payments for work on kinescopes, video tape or other similar tv recordings.

Redhead to return

Arthur Godfrey will return to the air next fall on *Arthur Godfrey Time* (CBS Radio, Mon.-Fri., 9:05-10 a.m.) and will appear on a maximum of four one-hour specials on CBS-TV, it was announced Wednesday (June 24) by CBS and the entertainer. Mr. Godfrey, who is recovering from an operation for lung cancer, was on the air for eight hours a week this past season. As previously announced, he will not replace Edward R. Murrow on CBS-TV's *Person To Person*. A network spokesman said the series will return in the fall with a host to be announced soon. The *Sam Levenson Show* (CBS-TV, Tues., 9-9:30 p.m.), which was set up to substitute for the *Arthur Godfrey Time* tv show, will continue in the same time period.

COLORCASTING

Here are the next 10 days of network color shows (all times are EDT).

NBC-TV

June 29-July 3, July 6, 8 (4-4:30 p.m.) **Truth or Consequences**, participating sponsors.

June 29, July 6 (10-10:30 p.m.) **Arthur Murray**, P. Lorillard through Lennen & Newell and Pharmaceuticals through Parkson Adv.

June 30, July 7 (8:30-9 p.m.) **Jimmie Rodgers Show**, Liggett & Myers through McCann-Erickson.

July 1, 8 (8:30-9 p.m.) **Price Is Right**, Lever through J. Walter Thompson.

July 1, 8 (9-9:30 p.m.) **Kraft Music Hall Presents Dave King**, Kraft through J. Walter Thompson.

July 2 (10:30-11 p.m.) **Masquerade Party**, P. Lorillard through Lennen & Newell.

July 3 (7:30-8 p.m.) **Northwest Passage**, sust.

July 3 (8-9 p.m.) **Ellery Queen**, sust.

July 4 (10-10:30 a.m.) **Howdy Doody**, Continental Baking through Ted Bates.

July 4 (10:30-11 a.m.) **Ruff and Reddy Show**, Borden through Benton & Bowles and Mars through Knox-Reeves.

July 4 (8-9 p.m.) **Perry Presents**, RCA Whirlpool through Kenyon & Eckhardt and American Dairy through Campbell-Mithun.

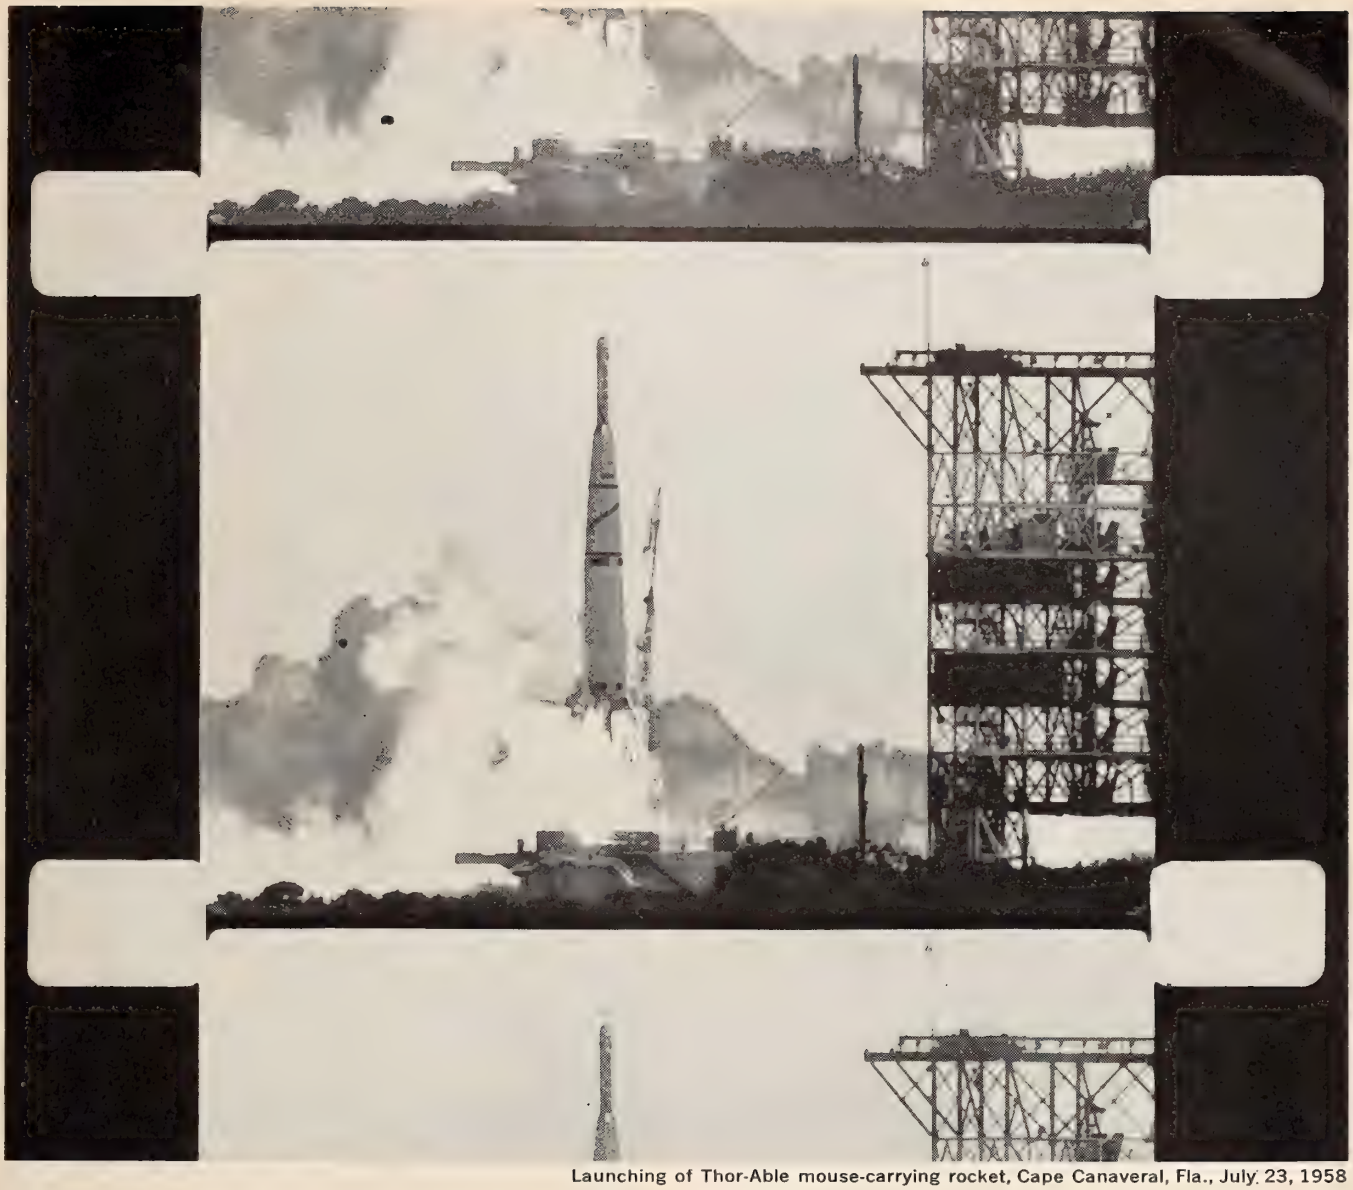
July 5 (7-7:30 p.m.) **Midwestern Hayride**, local, co-operative sponsorship.

July 5 (9-10 p.m.) **Chevy Show**, Chevrolet through Campbell-Ewald.

De Met taping majors for post-season sale

Plans to produce one-hour taped programs of 1959 major league baseball games for distribution at the conclusion of the season within the U.S. and abroad were announced last week by Peter De Met, president of Peter De Met Productions, Chicago, and Warren Giles and Joe Cronin, presidents of the National League and American League respectively.

Mr. De Met said that his company had received exclusive rights to videotape this season's remaining games in both leagues. The price paid was not disclosed.



A spokesman for the De Met organization reported that almost 100 games will be taped and 26 will be selected for distribution, starting after the World Series. The tapes will be marketed under the title of *The Best 26 Games*, edited to one hour programs spotlighting action and omitting time-consuming delays.

The games will be taped by stations with recording installations in the various major league cities. They will be edited by the De Met staff, which will tape-produce in its studios segments featuring interviews with well-known personalities for inclusion in each program. A separate sound track will be inserted. Jack Brickhouse will provide the narration. The De Met spokesman said that contracts have been signed with 16 stations to assume tape assignments.

The program will be distributed by Universal Television Distributors, New York. An official of De Met acknowledged that the foreign market for taped programs is not substantial at this time because of the scarcity of equipment, but pointed out that the series will still have value in the future when tape installations become more widespread.

Catholic association salutes broadcasters

WHEN-TV Syracuse, N.Y., and KMOX St. Louis, Mo., received awards for outstanding public service from the Catholic Broadcasters Assn. at its June 18 annual meeting in Detroit. WHEN-TV was cited for ". . . devotion over many years to the television interests of the diocese which it serves." KMOX was saluted for ". . . imaginative contributions to the Catholic community."

Launching of Thor-Able mouse-carrying rocket, Cape Canaveral, Fla., July 23, 1958

"FOR THOSE ONE-TIME-ONLY SHOTS, WE COUNT ON 930 AND 931 FILM"

That's what Jay Weand, Chief Photographer, WCKT-TV, Miami, tells us

"Our photographers have to have a film they can depend on. That's why we use nothing but Du Pont Type 930 and 931 Rapid Reversal Films, from the North Pole to the South Pole—and still come up with a good news picture.

"But there's a good deal more to newsreels for TV than just getting a good shot on film," he continued. "The most important thing is to get a *consistent* picture that will show well on the TV screen. The wide latitude of Du Pont film helps us get pictures that consistently come up to the high standards we've set."

There's a Du Pont Motion Picture Film to meet your high standards, too. For more information about Du Pont's fine films, write Du Pont, 2432A Nemours Building, Wilmington 98, Delaware. In Canada: Du Pont of Canada Limited, Toronto.

More Soviet ballet bought for television

The Russian ballet-on-tv bandwagon had another occupant last week when Art Theatre of the Air Inc., New York, announced that it had purchased the U.S. tv rights to three hours and 40 minutes of color and black-and-white films dealing with the Bolshoi, Georgian and Moscow Ballets, plus the Moiseyev Dancers and the Red Army Ensemble (CLOSED CIRCUIT, June 22).

Officials of Art Theatre of the Air declined to reveal how much they had paid the Russian government for the rights but Sig Shore, vice president of the company, commented: "We paid less than Matty Fox did." This was a reference to Mr. Fox's well-publicized Bolshoi Ballet project, in which Mr. Fox has invested a reported $900,000 for production of four one-hour tapes of the ballet and for U.S. rights.

The films which Art Theatre has acquired were produced during 1956, 1957 and 1958 in motion picture studios and on location, rather than on stage. A company executive said that the films thereby were given "scope in scenery and design never before afforded ballet films."

Red Films • The properties included in the arrangement with the Russian government are a 35-minute version of *Swan Lake* starring Galina Ulanova, prima ballerina of the Bolshoi Ballet; a 25-minute version of *The Fountain,* a ballet based on the Pushkin story, which also stars Ulanova; an 18-minute Bolshoi Ballet production titled *Flames of Paris;* a 12-minute Bolshoi version of *Raymonde,* a well-known Spanish ballet; films of the Moiseyev Dancers performing *The Strollers, Quadrille, Kazaki* and *The Spinner.*

Also: the Moscow Ballet Co., performing *Gayanne,* which contains the Sabre Dance; Georgian Ballet films of *Laurencia* and *Sanatle;* the Red Army Ensemble, featured briefly on Bob Hope's Moscow telecast last season, in its version of *During a Halt in the March* and a 40-minute production, *When the Spirit Soars in Flight,* depicting outstanding Russian youngsters performing ballet and singing folk songs.

Joseph Harris, president of Art Theatre of the Air, said no decision has been made on whether the films will be released for network telecast or sold on a syndicated basis. He indicated a decision would be made shortly. Mr. Harris reported that he plans to engage a well-known choreographer who will supply background comment for the various films.

Possible Effect • He declined to speculate whether or not the tv exposures of the properties he has acquired will hurt the sale of the taped Bolshoi Ballet programs. By coincidence, Mr. Harris is a former associate of Mr. Fox and is credited with having brought Mr. Fox into the television field. Mr. Harris commented: "I don't think Matty will deny that. I wish him all the luck with his tapes."

Art Theatre of the Air Inc. was formed two years ago "to bring the finest in foreign films to television." Among the films it has imported and subsequently sold to tv have been *Rififi, Bitter Rice, Anna, Mr. Hulot's Holiday* and *Wages of Fear.*

Mr. Harris is described as a millionaire-industrialist with diversified holdings. He has been active in tv for more than a decade as a large investor and active official in such companies as Flamingo Films, New York, and Motion Pictures for Television, New York, in association with Matty Fox in the latter company.

He's got a secret • What he plans to do with his near-million dollar investment in original Bolshoi Ballet video tapes, Skiatron head Matty Fox (l) has yet to reveal, despite tv competition from new Art Theatre of the Air acquisition (see story this page). Here he talks to crew on huge stage at KTLA (TV) Hollywood where tapes were produced several weeks ago in what is considered the major production venture in video tape to date. With him are (l to r) Natasha Bumstock, Russian interpreter; Leonid Lavrosky, chief choreographer for the Bolshoi and show director, and impresario Sol Hurok, who brought group to U.S.

WGAY federal format pushes up sales 42%

A new music and news format slanted at the Washington, D.C., area's large audience of government employes by WGAY in suburban Silver Spring, Md., has put 42% more business "on the books" in its first four weeks of operation, Connie B. Gay, president and board chairman of WGAY, reported last week.

Mr. Gay, country music impresario and producer and in the past few years a broadcast station operator (OUR RESPECTS, Feb. 2), said WGAY's new approach concentrates on "sensible sound" (standard pops) music and news of interest to Washington's government employes. It began June 1 after Mr. Gay took over the station. The station began its new programming the first day with $12,500 worth of promotion, including 7,500 pieces of mail containing reprints from page ads in local newspapers and trade papers. Mr. Gay changed the call letters of the former WGAY-FM to WSHO (FM) and this 20-kw outlet is programming completely independent of WGAY. The fm station's entire schedule is country music—or "town and country" as Mr. Gay calls it.

Radio preachers urged to use modern format

Religious broadcasters, meeting in Lake Geneva, Wis., last week were urged to adopt an overall strategy in their radio-tv efforts. Rev. Charles Brackbill Jr., president of the Council Broadcasters' Fellowship (representing state and local councils of churches), told the Protestant group, "Religious broadcasting in this country is without form." It has not changed in 30 years, he said, continuing:

"During the 'soap' era we preached. All through the heyday of radio's 'great productions' we preached, mostly. Now that radio has found its new life in drastic changes, we still preach. We haven't moved backward, we just

SUCCESS STORIES

One of a series of salutes to successful Radio and TV stations across the nation ...and to the Northwest School graduates who have contributed to their success.

CHANNEL 10 IN AMARILLO — KFDA-TV

SALUTE TO KFDA-TV—"Station of the Stars" Channel 10—Amarillo, Texas.

Ed Moore, General Manager

Dick Knerr (Northwest Graduate)
Film Director of KFDA-TV

KFDA-TV has been on the air since April 4, 1953, and is a CBS-TV affiliate. This station has an enviable record of: FIRST television station in the country to do weather direct from the U. S. Weather Bureau on a permanent basis; FIRST television station in the Texas panhandle to buy major film package—(MGM, Columbia and 20th Century Fox); and many other "firsts" in its area.

This was Mr. Ed Moore's comment regarding Northwest graduate Dick Knerr: "Dick Knerr has been our film director since September 1955. He handles the entire film operation of the station and does some daytime directing. We consider Dick a most valuable member of the KFDA-TV staff. He continues to progress daily."

haven't moved." He concluded that in many cases, religious broadcasters deserve the fringe times and extremities of schedules they now have.

In an "attempt to lift the standards, and to work toward a mastery strategy" the Fellowship adopted a set of principles for local Protestant religious broadcasting. One calls for producing programs compatible with current broadcasting trends "as to length and format."

Clifford J. Barborka Jr., vice president of John Blair & Co. challenged the religious broadcasters to be just as creative as commercial radio producers.

A series of one- and two-minute programs was auditioned, illustrating one way to adopt religious broadcasting to current formats.

POST-48 MOVIES
Exhibitors plan move to keep them off tv

The recently-formed American Congress of Exhibitors is discussing with Dept. of Justice officials a plan whereby ACE would set up a corporation to buy post-48 films and release them theatrically. The purpose of the ACE-Justice Department talks is to determine whether this maneuver, which, in effect, would prevent release of post-1948 films to tv, is legally sound.

An ACE spokesman in New York said last Thursday that all discussions with the Justice Department have been exploratory and the organization has not asked for a ruling. A crucial issue of the plan of this organization of theatrical exhibitors is whether it would violate the anti-trust law on the grounds that the proposal is designed to prevent films from flowing to tv.

It is understood that ACE assured the Justice Dept. that its sole objective is to obtain more exploitable product for theatres. The effect of this gambit, however, would be to reduce the availability of the estimated 2,500 post-48 films to tv.

Another consideration facing ACE is devise a way to procure post-48 films for theatrical re-issue without violating the Paramount decree. None of the judicially-divorced theatre circuits may be a party to purchase of the post-48 film product for theatrical re-issue as this would place them in the business of distribution in violation of the Paramount decree.

An ACE spokesman said the entire project was in an embryonic stage but details could be developed rapidly so that a presentation could be made to the Justice Dept. Under ACE's proposed plan, it would purchase "the best" of the post-48 films and release them periodically to theatres.

ACE was formed in January 1959. It consists of theatre operators throughout the country, some of whom belong to other groups, such as Theatre Owners of America, Independent Theatre Owners of America and others. ACE consists of various committees aimed at advancing theatre interests, including toll television, post-48 films, producer-exhibitor-distributor relations and industry research.

Merlin Lewis is executive secretary of ACE. S. H. Fabian of Stanley-Warner Corp., New York, is board chairman and Max Cohen of Cinema Circuit, New York, is treasurer.

Modest sponsors

Local sponsorship of Mutual's *Game of the Day* series ordinarily would demand repeated advertiser identification during the broadcasts, but at WJZM Clarksville, Tenn., the "sponsors" are anonymous. Play-by-play activities of the major league teams are interspersed only with "go to church" announcements. No other "commercial" messages are allowed, reports Parry Sheftall, station manager. Cooperating with WJZM in the daily broadcasts are 48 businessmen and eight service organizations, all of whom work with a group known as the Clarksville Area Radio Religious Committee. They provide the funds for the talent fees, broadcast rights, payments to the baseball clubs and for twice yearly advertisements in the local daily newspaper. The newspaper ads identify the "sponsors" by business and club name, the only recognition they seek, it was reported. The "go to church" messages are alternated with appeals in behalf of Sunday schools, weekly prayer meetings and various church social activities. Churches of all denominations are included.

Sterling stock sold

Sterling Television Co., New York, reported last week that 200,000 shares of the company's Class A stock was offered to the public at $1 a share on June 2 and the entire issue was oversubscribed on the first day of the offering. The underwriter for the stock issue was R.A. Holman & Co., New York.

Saul J. Turrell, Sterling president, said that the approximate $154,000 that will accrue to the company after all expenses are deducted will be used to develop and complete various new film series for tv; to expand the company's sales promotion activities and to expand the company's working capital. Sterling currently distributes the *Abbott and Costello* series, *Bowling Time, Bowling Stars, Wonders of the Sea, The Ray Forrest Show* and various other programs, including cartoons and short subjects.

The company's prospectus reveals that Sterling had a net income of $21,564 for the nine month period ending Dec. 31, 1958. For the year ending March 31, 1958, net income was reported at $47,359 and for the year ending March 31, 1957 at $13,736.

• Program notes

• Associated TeleVision Ltd. of England, which with Jack Wrather owns Independent Television Corp., New York, last week changed the name of its production and distribution subsidiary from Incorporated Television Programme Co. Ltd. (ITP) to Incorporated Television Co. Ltd. (ITC).

• Aura Recording Inc., N.Y., has acquired the facilities of Coastal Recording Co., N.Y., at 136 W. 52nd St., N.Y. The group in control of Aura consists of Herbert Kaplan, Heinz Kubicka, Allan Merchin and Benjamin Stein. Company officials report that much of the recorded commercials and musical jingle work of Coastal has been assumed by Aura.

• Programatic Broadcasting Service, N.Y., which provides a combination of automatic broadcasting equipment and exclusive music programming, last week announced the following stations will initiate the service on July 1: KCMO Kansas City, WMBR Jacksonville, KRKD Los Angeles, KRMG Tulsa, KPHO Phoenix, KOLD Tucson and KGNC Amarillo. Programatic offers 18 eight-hour tapes of music every 36 days to its station subscribers.

• The American Society of Composers, Authors and Publishers, N.Y., is mailing to "good music" radio stations a new 375-page catalog of symphonic and concert music in ASCAP's repertory. The volume lists composers and works, instrumentation of each work, length of performance and source where the material may be obtained.

• Screen Directors International Guild, N.Y., last week issued its *Directory of Directors* for 1959-60, a listing of Guild members and their credits, plus articles on tv film production in the East. The 80-page booklet is being distributed to film producers, agency executives and motion picture sponsors in the East.

• The Screen Actors Guild's executive committee and working conditions committee, N.Y., have unanimously voted to reject collective bargaining counter proposals by tv and motion picture producers for extra players' rates and conditions. The proposal also has been rejected by SAG in Hollywood. The negotiations are being conducted with the Assn. of Motion Picture Producers and the Alliance of Television Film Producers.

• Lanark Films has obtained the rights to produce a tv series based on files of the Las Vegas police and sheriff's office. Lanark President Phil Cutler says production of 39 half-hour segments is slated to start about Oct 1.

• *Tightrope!* is the new title of Screen Gems' adventure series set for Sept. 1 debut on CBS-TV (Tues. 9-9:30 p.m. EDT). Formerly called *Undercover Man*, the new series starring Mike Connors will be sponsored by Pharmaceuticals Inc. through Parkson Adv., N.Y.

• WWCA Gary and WLOI La Porte, both Indiana, covered the complete Senate Racket Committee's hearings in Lake County live. Two hours of taped highlights also were telecast in the evening.

• WNTA-AM-FM Newark, N.J., last Thursday (June 25) started live coverage of the Senate Rackets Committee hearings on labor-management racketeering in the New York metropolitan and northern New Jersey areas, the stations announced. During the seven scheduled days of hearings, broadcasts begin at 2 p.m. and continue through to conclusion. Remaining dates of the hearings are today (June 29) through Wednesday and July 6-7.

• Herts-Lion International has been formed by Kenyon Brown, president-stockholder of KCOP (TV) Los Angeles and other stations, to produce tv and theatrical films. Ken Herts is president. Other officers: Corinne Griffith, Zsa Zsa Gabor and Leo Guild. H-LI is planning production of *13 Demon St.* and *My Most Frightening Moment* tv series. The company now is shooting *The Victim*, 26 half-hours based on cases from the Los Angeles coroner's office. Address: 840 N. Seward Ave., Hollywood 28, Calif. Telephone: Hollywood 4-7225.

• CBS-TV has scheduled *The Joseph Cotten Show*, an anthology of half-hour dramas, as the summer replacement for *The Ann Sothern Show* beginning July 6 (9:30-10 p.m. EDT). Actor Cotten is host for the repeat series and stars in several of the weekly episodes. General Foods Corp., through Benton & Bowles Inc., N.Y., has signed for sponsorship.

• Headquarters of Paramount's pay tv subsidiary, International Telemeter Co., has moved from California to New York. Louis Novins, Telemaster president, and Will Baltin, his general assistant on marketing, occupy offices in the Paramount Building at 1501 Broadway.

• ABC Films Inc., N.Y., has sold its "One Step Beyond" series on supernatural phenomena, currently seen on *Alcoa Presents* (ABC-TV, Tues. 10-10:30 p.m.), to the Canadian Broadcasting Co. (English network). The series began in Canada June 23 (8-8:30 p.m.).

• Screen Gems Inc., N.Y., announces that *Manhunt*, a half-hour tv film series dealing with activities of the San Diego, Calif., police force, will be made available for syndication to stations and advertisers. The series stars Victor Jory. Screen Gems also reports that renewals on the second year of the *Rescue 8* series include purchases by Miles Labs of California, L.A., through Wade Adv., L.A., in Seattle, Spokane, Portland, San Francisco, Los Angeles, Sacramento and Stockton, Calif., and the West End Brewing Co., Utica, through Doyle Dane Bernbach, N.Y., in New York state markets, covering Buffalo, Albany, Syracuse, Binghamton, Carthage, Rochester and Utica.

• CBS Radio is moving the origin of two network programs, *Suspense* and *Johnny Dollar*, from Hollywood to New York. The change is due to a greater manpower supply in the East, Lucian Davis, executive producer of network programs, Hollywood, explained. Virtually all the people employed on these programs are being relocated on other jobs at either CBS Radio or CBS Television, he said. Writers of both series, William N. Robson of *Suspense*, and Jack Johnstone of *Johnny Dollar*, will continue in Hollywood, sending the scripts East for production.

• A KTTV (TV) Los Angeles interview with an American soldier who chose to live in Red China has been sent to WJAR-TV Providence, R.I. (the soldier's home town), for telecasting. The ex-GI has been missing since his appearance on KTTV.

STORES HARDLY MISS NEWSPAPERS

Kansas City, St. Louis business appears normal despite strikes

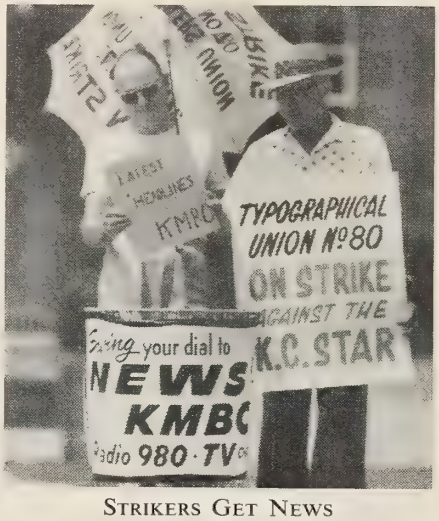
Newspaper strikes in two Missouri cities—St. Louis and Kansas City—have afforded radio-tv stations there new opportunities to reaffirm their effectiveness as advertising and information media, reports from stations and advertisers showed last week.

Store traffic in Kansas City, where the newspaper strike continues, appears generally normal and in some cases higher, retail executives said, although some few downward fluctuations were cited. The same pattern appeared to hold true in St. Louis, where the strike was settled last week.

A strike paralyzed daily newspapers in St. Louis earlier this month but radio and television stations expanded operations to satisfy citizens seeking news and advertisers seeking sales. Kansas City papers have also been stricken by a labor dispute and stations there are responding strongly to the emergency.

Similar strikes in New York last year (BROADCASTING, Dec. 22, 1958 *et seq*) and in Grand Rapids, Mich., earlier this year (BROADCASTING, Jan. 19) had little effect on retail sales. In fact, New York department store sales in December 1958 were 7% higher than the previous year. And department store and food chain businessmen in Grand Rapids were nearly unanimous in agreement that the 43-day strike of the city's two dailies did not hurt sales volume.

It's too early for full data on the business levels in the two Missouri cities, but broadcast media billings jumped sharply and advertisers were reported to be content.



Await Full Reports • The 15-day St. Louis strike ended last Wednesday (June 24) when Stereotypers Union Local 8 voted to accept the proposal of the afternoon *Post-Dispatch* and the morning *Globe-Democrat*. In Kansas City the International Typographical Union Local 80 walked out June 19 and was still out last Thursday night (June 25). The strike there affects the *Star* and the *Kansas City* (Kan.) *Kansan*.

In Kansas City, radio and tv stations are meeting their suddenly expanded civic and economic roles.

Don Davis, president of KMBC, reported that a survey in downtown stores showed business was steady June 19-23 (Friday, Saturday, Monday, Tuesday). Department store executives told him that business has been at normal or higher-than-normal pace since the newspaper strike started.

A Peck's store official said that newspaper dependence has been reflected in some special sale promotional items but that regular business "is moving at a normal pace." A similar view was expressed by a Macy's executive.

Radio-Tv Impact • Peck's added that increased customer traffic in the store is the result of intensive radio-tv advertising. Sears, Roebuck reported normal sales volume. An Emery, Bird Thayer official commented that store sales were up the first two days and off somewhat the third. The general merchandise manager of Jones store said that the "overall effect of the strike might not be apparent for some time but that so far sales are up."

STRIKERS GET NEWS
. . . from KMBC Radio bulletins

Tom E. Beal, general manager of KBKC, located in Mission right outside Kansas City, stated that the station is printing daily news bulletins for restaurants and other retail stores and has sold advertising to a theater chain to cover the printing expense.

Most sales are weekly packages of 50-100 spots coming from entertainment sources, clothing stores, real estate and employment agencies, Mr. Beal said.

Doubling the Effort • WHB increased its newscasts from its usual 18 to 39 per day for the duration of the newspaper strike. Service features include obituaries, movie news, weather coverage, stock quotations and sports information.

Though the station carries regular schedules of most large retail outlets, Donald A. Loughnane, production-promotion manager, reported that the strike has produced additional spots for supermarkets, department appliance and furniture stores and car dealers, with an emphasis on item rather than institutional advertising.

Ed Charles, general manager of KCKN, said that drive-ins and theatres, usually heavy newspaper users, are buying "saturation schedules." The Automobile Dealers Assn. as well as individual buyers are spending "heavy," he added with chain drug stores emphasizing specials on their spots.

Much the same pattern is reported by WDAF-AM-TV. Jay Barrington, assistant to the general manager, said that "virtually" all major department stores are using both radio and tv. Also automobile dealers, theatres, appliances and retail food stores are buying saturation schedules. Mr. Barrington added that brokerage houses and financial firms are purchasing "greatly augmented" news shows as well as regularly scheduled programs for obituaries, market reports and society news.

The St. Louis Story • How did St. Louis stations rise to the occasion?

At WIL, John F. Box Jr., executive vice president and managing director, reported that department stores "immediately purchased all available newscasts." Within 24 hours after the strike was called, he said, the station was "sold-out" and established a waiting list for availabilities. "While we had the biggest billing in the station's 38 year history," Mr. Box explained, "the primary emphasis was on news and public service."

KMOX-TV set up a news display in the front window of Famous-Barr department store downtown. The window display featured a TelePrompTer machine with up-to-the-minute news furnished by KMOX-TV. Famous-Barr ran a heavy spot schedule on KMOX-TV promoting its "jubilee sales."

Another department store, Stix, Baer & Fuller, signed a half-hour Sunday news show.

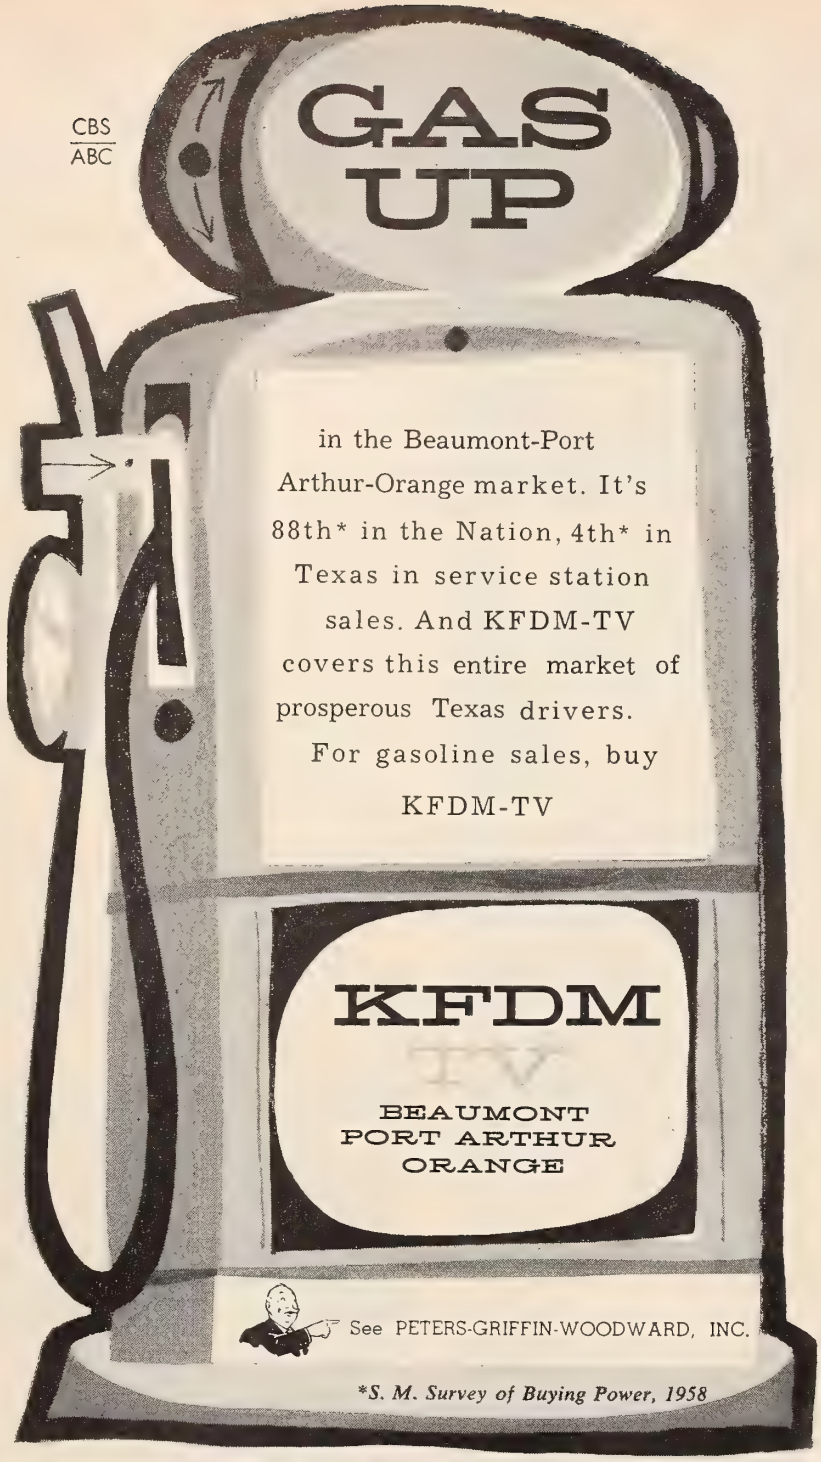
KMOX estimated that radio time

sales increase attributable to the strike was approximately 20%.

General Manager Harold Grams of KSD-AM-TV reported that there was a "considerable volume" of new business including the city's major department stores. Both stations, Mr. Grams said, experienced an influx of additional business in many categories including auto manufacturers and dealers, national and local retail food chains, home developers and individual food products. KSD Radio also added new business from banks and savings-loan.

WEW carried a heavy schedule of announcements for department stores, said Bruce Barrington, general manager. One furniture store reported to WEW that it had increased sales at its suburban branches with no loss downtown. One side light: a woman called in to say that she had not listened to radio for two years and thanked WEW for her rediscovery of "a wonderful medium" and promised to spread the word of its "delightful entertainment and unique service."

A twice daily obituary over KXOK resulted in many favorable calls and letters. KXOK doubled its news output, increased its stock market reports.



KWK expanded its news coverage to include 5-minute news summaries every half-hour with news headlines on the quarter and three-quarter hour marks 24 hours a day. W.L. Jones, general manager, said all "major and secondary retailers utilized our facilities on the basis of strike sales and radio specials."

Local business "boomed" on KTVI (TV), according to Don B. Curran, promotion manager. The station geared its traffic and continuity department to provide sales service to those advertisers not "ordinarily acquainted with the broadcast medium—especially department stores and food chains," he said.

NBC sells WNBC (TV) to Scheftel group

NBC sold its remaining uhf tv outlet, WNBC (TV) New Britain, Conn., last week to a group composed of owners of six other uhf stations. At the same time, in another top Connecticut sale, 1922-founded WDRC Hartford was sold by its original owners.

WNBC (TV) and radio affiliate WKNB were sold to Connecticut Television Inc., (Herbert Scheftel, president) for $1.04 million. Connecticut Television is two-thirds owned by ch. 20 WICS (TV) Springfield, Ill., and one-third by ch. 22 WWLP (TV) Springfield, Mass. NBC gave up its other uhf station, ch. 17 WBUF (TV) Buffalo, N.Y., last fall and the facility is now

WCKY

IS CINCINNATI'S No. 1 NEWS STATION

Here's proof, straight from the Jan.-Feb. '59 Nielsen, that WCKY has the largest news audience in Cincinnati:

Station	Rating
WCKY	11.15 avg for 70 newscasts per wk
Sta A — Ind	5.9 avg for 60 newscasts per wk
Sta B — Net	9.8 avg for 70 newscasts per wk
Sta C — Net	9.3 avg for 50 newscasts per wk
Sta D — Ind	5.0 avg for 80 newscasts per wk

(5 day cumulative rating Metro Area)

The reasons for WCKY's News Leadership:

1. Large news staff of veteran experienced reporters and newscasters.
2. Scoops — WCKY consistently scoops the town on most local news stories.
3. On-The-Spot-Reports — WCKY's mobile unit is on the scene reporting big local stories when they happen or moments after they happen.
4. News tapes—the people who make the news tell the news to WCKY's audience via news tapes. WCKY has them on the air first.
5. Background—WCKY's newsmen present the reasons behind the news so that WCKY listeners receive a more complete understanding of the news.

REMEMBER — WCKY News is No. 1 in Cincinnati and has earned its reputation for prestige, because Cincinnatians know they get the news first, fast and accurately on WCKY. Smart advertisers know they get the prestige of WCKY's news plus a large responsive audience when they sponsor news on WCKY.

Ask Tom Welstead to tell you about WCKY news operation — in New York at ELdorado 5-1127; ask AM Radio Sales in Chicago and on the West Coast.

WCKY
50,000 WATTS OF SELLING POWER

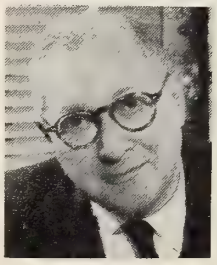
educational WNED-TV. Ch. 30 WNBC (TV) will continue its NBC-TV affiliation under its new owners.



WICS (TV) is owned 50% each by Transcontinental Properties Inc. and H. & E. Balaban Corp. Transcontinental (Herbert Scheftel and Alfred Burger, each 44.8%) owns ch. 38 WFTV (TV) Duluth, Minn. and 50% of ch. 33 WCHU (TV) Champaign, Ill. H. & E. Balaban Corp. (Harry and Elmer Balaban) has extensive broadcast interests including 50% each of WCHU (TV), ch. 23 WMCN (TV) Grand Rapids, Mich., and ch. 39 WTVO (TV) Rockford, Ill.

WWLP (TV) Springfield is a William L. Putnam station, which group has two uhf outlets: ch. 32 WRLP (TV) Greenfield, Mass., and ch. 14 WWOR-TV Worcester, Mass.

WDRC Hartford was sold by The Connecticut Broadcasting Co. (Franklin M. Doolittle, president) to Richard D. Buckley and John B. Jaeger, who operate WHIM Providence, R.I., for $815,000. Mr. Buckley is former vice president of Metropolitan Broadcasting Co.

Kander radio-tv goes to Tornberg in split

A split in the newspaper and broadcast brokerage activities of Allen Kander & Co. was announced last week. Edwin Tornberg & Co. has been incorporated to handle sales of radio and

MR. KANDER

MR. TORNBERG

tv stations and also will negotiate the purchase and sale of radio and tv shows and filmed entertainment. Kander will devote full time as negotiator for the purchase and sale of daily newspapers, as property evaluator and as consultant in the broadcast industry.

The new firm is headed by Edwin Tornberg, for the past six years Kander vice president in charge of the radio and tv department. Allen Kander continues as head of the Kander firm. Effective July 1, the two firms each will maintain separate offices at 60 E. 42nd St., New York, and at 1625 I St., N.W., Washington, D.C.

In a joint statement, Messrs. Kander and Tornberg said last week: "We are ending our business association in complete harmony. We feel each of us can be more effective in specialized fields."

Edward Wetter will join the Tornberg firm in New York to handle the eastern territory and Douglas Kahle will join that organization to handle the western region, with offices at 915 N. Commerce St., Stockton, Calif. George J. Cooper will remain with Kander in New York and John Alden Grimes, specialist in evaluations, and Don Hogate will remain in Kander's Washington office.

Tv code office

NAB's west coast office for its Tv Code Affairs Dept. will be opened in Hollywood July 6 with Frank Morris, writer-producer, in charge, announces Donald H. McGannon of Westinghouse Broadcasting Co, Tv Code Review Board chairman. Mr. McGannon said the office will operate as advisor for the tv film industry. He explained that more than 40% of all material seen on tv is supplied by Hollywood film producers. Mr. Morris has been senior editor at CBS-TV in Hollywood since 1957 and previously was with ABC. Edward H. Bronson, NAB tv code director, has gone to Hollywood to set up the new office.

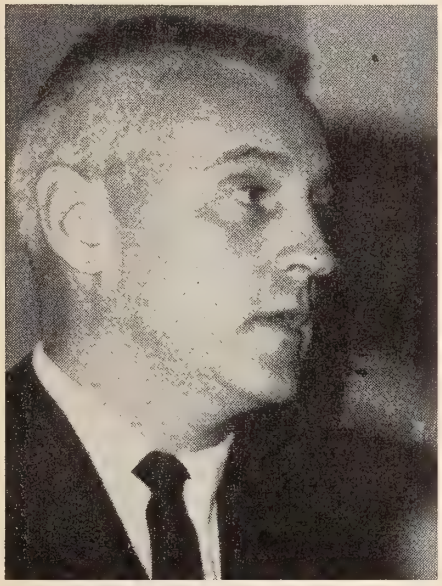
NTI IN CABLE TV
No master media plan in Williamsport buy

There is no gimmick in National Theatres' over-$1 million purchase of one of the country's largest community television systems, Charles L. Glett, National Theatres Inc. vice president in charge of broadcast activities, says.

National Theatres bought the seven-year-old Williamsport Tv Cable Corp., serving 8,500 subscribers in that north central Pennsylvania city. The system, one of three in that city, feeds its customers tv signals from WGAL-TV Lancaster, WBRE-TV Wilkes-Barre, WDAU-TV and WNEP-TV Scranton, WFBG-TV Altoona, all Pennsylvania, and WNBF-TV Binghamton, N.Y. Williamsport is said to have a potential of 15,000 customers.

"Over the years," Mr. Glett said last week, "we have been hosts to the public in our theatres. When we acquired our radio and tv properties we became guests in the public's home. The cable acquisition is just an extension of our broadcast operations."

Williamsport Cable was owned by Clive Runnels and associates.



National Theatres owns a chain of 350 movie theatres. It also owns 100% of WDAF-AM-TV Kansas City and 90% of National Telefilm Assoc., WNTA-AM-FM-TV Newark, N.J., and KMSP-TV Minneapolis, Minn.

TV TAKES A PERSONALITY TEST

CBS study shows N.Y. and L.A. station images in public's eye

Media buyers are often cautioned: There's more to a tv "buy" than numbers and costs, important as these may be.

Last week, CBS Television Stations Division offered buyers a new media study called "More than Meets the Eye" that makes no mention of coverage or cost. Measured is a station's "image" and its influence on viewer reaction to a station's advertising. The research is concentrated on two markets, New York

KNXT (TV)'s CLARK GEORGE
Image: Los Angeles

and Los Angeles, which are served by CBS-owned stations WCBS-TV and KNXT (TV).

Kickoff of the CBS presentations was at New York's Roosevelt Hotel on Tuesday (June 23,) followed by a Chicago unveiling on Thursday and Detroit on Friday. It is to be seen June 30 in Los Angeles and July 1 in San Francisco.

Here is the CBS Television Station Division media platform set before the buying specialist:

There is such a thing as a station's image and it is different for various stations in a given market.

The image has direct influence on how the viewer regards or reacts to commercials on the station.

Measuring an Image • How do you go about finding out what viewers think of tv stations?

CBS decided New York and Los Angeles provided the toughest competitive sites for the project since each network owns a tv outlet in each city and the network stations face competition from four non-network channels.

CBS also wanted to know about response to brand and product information in its search for a viewer image.

Institute for Motivational Research and Market Planning Corp., McCann-Erickson subsidiary, handled the job. The institute directed the general approach, drafted the questionnaire, established techniques and conducted actual field work in the final stage of the study.

Channel numbers were used rather than call letters and the name of the study sponsor was never revealed to any interviewer. Most of the field work was done the last week in March.

The Tests • Five "projective tests" were used by the interviewers:

1—The interviewee was handed a photo of a family watching tv. A series of questions was asked, with the interviewee requested to guess on the basis of separate comments which channel they are "most likely" talking about and which "next most likely."

The opening statement was, "They have more worthwhile programs which I really look forward to, and watch with interest." Others dealt with half-watched programs, news, selection of programs, just something to pass the television time, good-taste commercials, latest products, programs for the whole family, confidence in advertised products, dull programs, few new programs and more pograms that really make an impression ("the ones you talk about the next day with your friends").

2—Three suggested newspaper tv review comments were listed, with a "most likely" answer requested. The comments covered the station's appreciation of the average family's desire for a balanced variety of programs; programs that are time-killers, imitative, dull, not really worth watching, and progams "you actually look forward to . . . tv at its best."

3—Descriptions of different types of people and families were read. Interviewees were asked to guess the tv station each person is likely to watch more often than the average person does, with choice for "most likely" station. First example was, "George is the kind of man whose opinion you tend to value and respect. He generally knows what he is talking about." Lois likes better-known brands, Mary wants bargains rather than brands, and John only half-watches the screen.

4—Descriptions were given of tv sponsors. Interviewees were asked to guess which station they are "most likely" and "least likely" to use. Company A makes a fine product, effectively advertised, and has a good reputation for honesty and reliability; Company C (there's no B) is progressive and research minded as well as interested about informing the public about new and improved products; Company D

WCBS-TV's FRANK SHAKESPEARE
Image: New York

has been slipping in sales and is fighting to regain its position by loud, big promises.

5—Again the interviewee is handed a photo of a family watching tv. A commercial has just appeared on the screen. In the first section, father says "That is a fine product, made by a reliable company" and mother adds, "I'd like to try it next time." The question, "What channel are they watching?"

CBS executives participating in the New York preview were the division's president Merle S. Jones, and vice president, Craig Lawrence; Robert F. Davis, director of research at CBS Television Spot Sales, and Frank Shakespeare and Clark George, vice presidents-general managers respectively of WCBS-TV and KNXT (TV).

The CBS brochure on the subject, arty and deep pocket-size, reflects the network's pleasure at the way the figures turned out.

MUTUAL UP FOR GRABS AGAIN

After three months Smith group wants out

Mutual's latest set of owners have had enough. They've put the network on the block.

Malcolm Smith Jr., Richard Davimos and the others associated with them in the Harrison Home Products *et al.* combine which took over Mutual only three months ago (BROADCASTING, March 30) were back in the lawyers' offices last week, this time on the other side of the table. Their chief prospect

MR. GRANIK

SEN. CAPEHART

Will they undertake a salvage?

was an alliance of Sen. Homer Capehart and broadcaster Theodore Granik, who hold an option on the network good until Tuesday (June 30). Sen. Capehart's position: "I am not trying to buy the network. They're trying to sell it to me."

Second-ranked prospect was businessman Albert Gregory McCarthy (CLOSED CIRCUIT, June 22). Mutual spokesman maintained he might yet buy the network if the Capehart-Granik deal falls through.

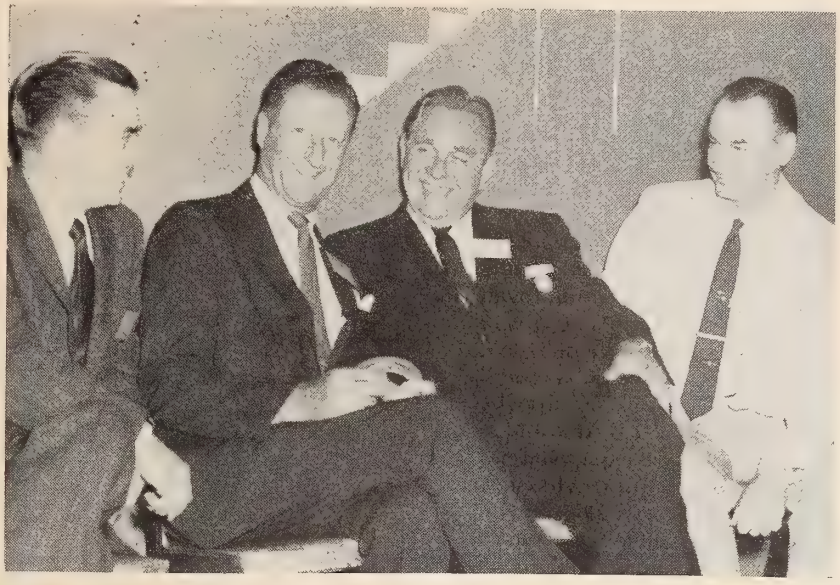
Again performing as chief go-between was Mutual's Washington-based vice chairman and senior vice president, Bob Hurleigh, who had sold the network to the Smith group after taking it on an option basis from former president Hal Roach Jr.

The Smith group took over the debt-laden network after securing a six-month moratorium from major creditors (including AT&T to whom Mutual is in hock for some $400,000) and promising to keep current on operational costs. Their major outlay since March has been a weekly $35,000 payment to AT&T. No check went to the phone company last week, and it's not anticipated that any more will go out over the Smith signature. AT&T had begun notifying Mutual affiliates early last week that service might be discontinued, but then agreed to go along pending outcome of negotiations with the Capehart-Granik interests.

The network meanwhile announced that 19 independent stations have become affiliates since March, including WABR, Orlando, Fla., which joins today (June 29), and WOHO Toledo, which joins July 4.

Set formula

The Pulse Inc., New York, last week released a study which shows that in homes with more than one television set, tv viewing is 11.2% higher than in one-set homes. The Pulse survey, conducted in January 1959 throughout metropolitan New York, notes that the largest spread between the one-set and two-set homes occurs between 3 and 6 p.m. Pulse officials predict "substantially higher levels of viewing" as families switch increasingly to two-set homes because of the growing need for replacement tv receivers and manufacturers' development of improved portable sets.



NABET picks Gorsuch, G.T. Byrne resigns

The appointment of Clifford Gorsuch as executive vice president of the National Assn. of Broadcast Employes & Technicians has been announced by George W. Smith, international president of the AFL-CIO-CLC (Canadian Labor Congress) union—as a step toward resolving its "internal problems."

The appointment, approved by NABET's international executive council, was reported in a letter from Mr. Smith to all local officers and staff. Mr. Gorsuch will continue as director of network affairs at ABC and NBC (BROADCASTING, June 8).

Mr. Gorsuch succeeds G. Tyler Byrne, whose conduct of the 19-day walkout at NBC drew censure in some NABET quarters (BROADCASTING, May 25). Mr. Byrne announced his resignation June 15 at a meeting of NABET's international executive council on the West Coast and will announce his future plans shortly.

Mr. Gorsuch will assume full charge of the NABET staff in all regions, working on any problems involving officers and the staff. Mr. Smith expressed confidence that with the application of established policy within NABET "and a cooperative effort by all officers we

"Cover news-sports more broadly" • This is the advice Harry Renfro, (second from r) radio-tv director of D'Arcy Adv., gave the Florida Assn. of Broadcasters in Miami. News coverage and engaging in civic activities makes broadcasters a more integral part of their community, Mr. Renfro emphasized. With him (l to r) after the business session: Charles Fernandez, WKXY Sarasota, Lee Ruwitch, WTJV (TV) Miami, and Larry Rollins, WSIR Winter Haven.

can quickly resolve internal problems and devote our full time to building NABET into a bigger and better union."

Mr. Smith also lauded Mr. Gorsuch, senior member of the NABET staff with which he has been associated since 1946, for passing muster on previous "difficult" assignments. He was credited with negotiating successful contracts with WCKT (TV) and WCKR Miami, Fla., and an "excellent agreement" for the staffing of NBC's "automated" radio-tv operations in Washington, D.C.

Transcontinent closes Marietta stock buy

Formal stock transferral of the Marietta Broadcasting Inc. (KFMB-AM-TV San Diego and KERO-TV Bakersfield, Calif.) was completed in New York last week by Marietta and Transcontinent Television Corp.

Transcontinent in effect now adds the Marietta stations to its holdings of WGR-AM-TV Buffalo, WROC-TV Rochester, WNEP-TV Scranton-Wilkes-Barre, Pa. (60% ownership) and WSVA-AM-TV Harrisonburg, Va. (50%). FCC approved the transaction on May 13.

At the same time, four new directors and a vice president were elected by the TTC board of directors at a meeting held Thursday (June 25). Jack Wrather, president of the Jack Wrather Organization, who formerly owned 63.64% of Marietta and now owns 22.15% of TTC, was elected a board member as was Monte Livingston, executive vice president of JWO; Edward E. Voynow, president of Edward Petry & Co., and Walter Walz, associate of Carl M. Loeb, Rhoades & Co., New York, investment bankers.

George Whitney, vice president of Marietta, was elected a vice president of TTC. Edward Petry & Co., which formerly owned 36.34% of Marietta now owns 12.66% of Transcontinent and also becomes national sales representative for all TCC stations as of July 1 (BROADCASTING, June 22). The board now has 13 members.

Tape for etv, funds for radio from Ford

The Ford Foundation has made a grant of $2,706,000 to the National Educational Television & Radio Center, New York, to equip its affiliated television stations with video tape recorders, it was announced last Thursday (June 25) by John F. White, president of the center.

Mr. White discussed the grant at a two-day meeting of station managers of 43 non-commercial stations at the Statler-Hilton Hotel, St. Louis. He called the grant "the most significant

MIL EAG E

says Wally McGough, Gen. Mgr.

WTVN-TV

COLUMBUS, O.

Warner Bros. features are amazing. They never wear out with either audiences or sponsors. According to Wally McGough:

"From 9:30 in the morning to well past midnight, there's no hour that we can't program Warner Bros. features and get top results. They've given us fantastic mileage in the three years we've been showing them. Believe me, they pay off!"

Consistently high ratings and enthusiastic sponsor backing have made Warner Bros. features a "hot item" year after year in TV markets everywhere. With big stars in well-known post '48 films, these features offer you an opportunity to fatten ratings and profits. Why not call us right now for information?

advance in educational tv since the first station began operations in 1953."

The grant permits the center to underwrite the cost of video tape recording equipment for qualified educational tv stations now on the air, Mr. White said. He added that the Ford Foundation also will provide funds to acquire adequate tape for an initial year of operation.

The center also has granted nine radio stations a total $35,000 to produce programs in its "American in the 20th Century" project. Among the stations: KDPS-FM Des Moines, Iowa; WDET-FM Detroit; WHA Madison, Wis.; KFJM Grand Forks, N.D.; WBAA Lafayette, Ind., and WKAR East Lansing, Mich.

Bellamy sees pay tv as No. 1 U.S. industry

Pay tv could eventually become the No. 1 industry in the U.S., topping steel and all others, actor Ralph Bellamy told the National Press Club in Washington, D.C., last week. He charged that networks are not offering viewers what they want to see and that "valueless" ratings only indicate what people are watching—not what they would prefer to watch.

"Pay tv would introduce a variety of programs and the cash register would be the yardstick," the actor said. The controversial tv system would result in many more stations going on the air and would put present stations operating at a loss in the profit column, Mr. Bellamy maintained. "This is on the basis of nickels and dimes [per program] rather than dollars as the opposition claims," he said.

Today's networks and advertisers all want the same kinds of programs and "feed on themselves," he charged, regardless of what the public wants.

Two more 'Tv Guides'

Tv Guide starts two new regional editions this summer. An Arizona-New Mexico edition beginning Sept. 5 will cover KTVK (TV), KPHO-TV and KOOL-TV, all Phoenix; KVAR (TV) Phoenix - Mesa, KVOA - TV, KUAT (TV), KGUN-TV and KOLD-TV, all Tucson; KOB-TV, KNME-TV, KOAT-TV and KGGM-TV, all Albuquerque, and KIVA (TV) Yuma.

Stations covered by a new Arkansas *Tv Guide* edition: KARK-TV, KTHV (TV), both Little Rock; KATV (TV) Little Rock-Pine Bluff; KTVE (TV) Eldorado, all Arkansas; KTBS-TV, KSLA-TV, both Shreveport; KLSE (TV) Monroe, KNOE-TV Monroe-West Monroe, all Louisiana, and KCMC-TV Texarkana, Tex.

It may be movies' best year in decade

The fact that pre-1948 films released to tv are reaching saturation is one of the reasons that attendance at movies "may be in for its best summer performance in a decade," Sindlinger & Co., Ridley Park, Pa., reports.

Data, gathered daily by the business analyst, show that film attendance is up over last year's. This reverses a 10-year downward trend. The sharpest attendance increase was the week of May 9 when 19.9% more moviegoers purchased tickets than in the same period last year. Another reason advanced for the upward trend: more movies contain feminine appeal and attract more women to them.

The new forecast follows a special Sindlinger report that movies lost $71.3 in three years because theatrical product was released to tv (BOADCASTING, June 15).

Army missile school cites tv class aid

"A saving of several million dollars' worth of equipment is achieved by using closed-circuit television to avoid duplication of skilled [ballistic missile] instructors . . . and equipment," Col. H.S. Newhall, commandant of the U.S. Army Ordnance Guided Missile School, Redstone Arsenal, Ala., has said.

He made the statement in announcing that the school is extending its round-the-clock large screen (12x15 ft.), closed-circuit tv classes into 1960. (The missile school presents a course

Tv boosts books

Tv has proved a stimulus to children's reading habits, rather than the sedative librarians had feared 10 years ago, according to Mrs. Frances Lander Spain, president-elect of the American Library Assn. Children soon become accustomed to tv and learn to "take it or leave it," she said at the association's Washington convention. She added that youngsters now come to libraries more than ever before, often to learn more about something to which television introduced them. Books about frontier heroes, glorified in tv series, are always in demand, and there has been a growing interest in science among juveniles, she observes.

WLOK's new look • Completion of WLOK Memphis studios gives a fresh face to Memphis' South Second St. The station took occupancy of the building June 1.

of 25 two-hour classes to about 7,500 missile technicians a year.)

Video tape is used so that canned classes may be updated to keep pace with changes in missile technology. Cueing devices, audio-visual aids and other techniques of commercial telecasters are employed to help instructors and give students a quicker grasp of complex details, Col. Newhall, says.

"Results obtained . . . in experimental studies show that we can save 26% of training time in conference and lecture-type instruction . . . raise student grades by 5% and increase retention by almost 7%," the colonel adds.

WAVY-TV to NBC-TV

WAVY-TV Norfolk-Portsmouth, Va., will join NBC-TV as a primary affiliate commencing with autumn programming, according to J. Glen Taylor, president (CLOSED CIRCUIT, June 22). The station replaces WVEC-TV Norfolk-Hampton, headed by Thomas P. Chisman. Mr. Taylor said WAVY-TV will continue indefinitely some of the more popular ABC-TV programs it has been carrying as an affiliate of that network. WVEC-TV operates on uhf ch. 15 but ch. 13 in the vhf band is earmarked for its use.

TvAR Chicago office

Television Advertising Representatives Inc. (Westinghouse Broadcasting Co. stations) has opened a Chicago office at 400 N. Michigan Ave. (Wrigley Bldg., South) under Lamont L. Thompson, midwest sales manager. Account executives are Patrick Devlin, formerly with WNBQ (TV) Chicago and Adam Young Inc., Edward Adams, with George Hollingbery Co. and NBC Film Sales; Bill Condon, the Katz Agency and Geoffrey Wade Adv., and Ken McDonald, formerly in merchandising at WBKB (TV) Chicago. Telephone number: Whitehall 4-4567.

Four join ABC Radio

The affiliation of four stations with ABC Radio has been announced by Earl Mullin, manager of station relations for the network. They are: WOLF Syracuse, N.Y.; WTKO Ithaca, N.Y.; KEDO Longview, Wash., and KUMA Pendleton, Ore.

WOLF, which operates with 250 w on 1490 kc, is owned and operated by Civic Broadcasting Corp., of which Ellis E. Erdman is president and John G. Wolf is vice president and manager. WTKO is owned by Radio Ithaca Inc. and operates with 1 kw on 1470 kc. Mr. Erdman is president and Joel Fleming is manager.

KEDO, which operates with 250 w on 1400 kc, is owned by Triad Broadcasting Corp., of which William E. Boeing is president and Donald L. Veith is manager. KUMA is owned and operated by Pendleton Broadcasting Corp. and operates with 5 kw on 1290 kc. Ted A. Smith is vice president and general manager.

week earlier, the station opened Cape Cod studios in Hyannis and upped its power from 1 kw to 5 kw. Participants in ribbon cutting ceremonies included John Bromfield, tv's *U.S. Marshal* and Massachusetts State Senate President John E. Powers. WPLM operates on 1390 kc, daytime.

'Climbing' profits

May was the first profitable month for WICC-TV Bridgeport, Conn., in five years of operation. It's a uhf outlet in a market of nine vhf stations.

Business Manager John Metts climbed 250 ft. up WICC-TV's 500 ft. tower to mark the month's $250 profit. He stuck a dollar bill on the tower at the 250 ft. mark and hopes soon to climb all the way.

Changing hands

ANNOUNCED • *The following sales of station interests were announced last week, subject to FCC approval:*

• WNBC (TV), WKNB New Britain, Conn.: Sold by NBC to Connecticut Television Inc. for $1.04 million (see story, p. 73). WNBC (TV) is on ch. 30. WKNB is on 840 kc with 1 kw, day.

• WDRC Hartford, Conn.: Sold by The Connecticut Broadcasting Co. (Franklin M. Doolittle, president) to Richard D. Buckley and John B. Jaeger (WHIM Providence, R.I.) for $815,000 (see story, page 74). WDRC is on 1360 kc with 5 kw, directional, and is affiliated with CBS.

• KRUX Glendale, Ariz.: Sold to Leland Bisbee Broadcasting Co. (Leland Bisbee Jr. and Margaret C. Bisbee, each 42.85%, George E. Bisbee, 14.30%) by Don and Otilie Owsley for $347,000. The sale was handled by Jack L. Stoll & Assoc. KRUX is on 1360 kc with 5 kw, day, 500 w, night, directional.

• KOLE Port Arthur, Tex.: Sold to John Hicks Jr. and Edward L. Francis by Socs Vratis and Mary A. Petru for $175,000. Mr. Hicks is Dallas manager, Paul H. Raymer Co., and Mr. Francis is attorney. Sale handled by Hamilton-Landis & Assoc. KOLE is on 1340 kc with 250 w.

• KREL Baytown, Tex.: Sold by E.O. Roden and associates to Robert H. and N.J. Walker, for $126,825. Bob Walker, now commercial manager, KFDX-TV Wichita Falls, Tex., is known for his Humble Oil football broadcasts. Sale was handled by Hamilton-Landis & Assoc. KREL is 1 kw on 1360 kc. Roden group also owns WBIP Booneville, WGCM Gulfport, WTUP Tupelo, all Miss., and WBOP Pensacola, Fla.

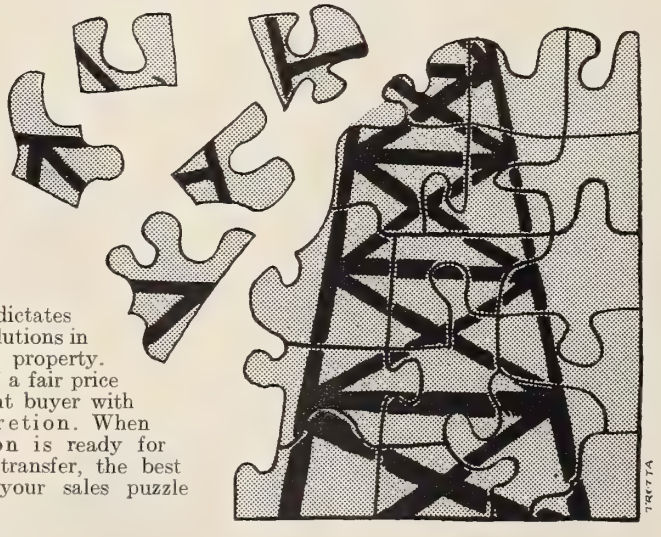
• KASI Ames, Iowa: Sold to William Ray, news manager of NBC Central Div., by William M. Evans, owner and general and commercial manager, for reported $100,000. KAST is licensed to Story County Broadcasting Co. and is on 1430 kc with 1 kw, day.

• KBLF Red Bluff, Calif.: Sold to Victor Industries Corp. (Victor Muscat, president) by Lynn Smoot and W.W. Boone for $60,000. The sale was handled by Lincoln Dellar & Co. KBLF is on 1490 kc with 250 w.

• WRSW Hillsboro, Ohio: Sold by David R. Winslow to McKinley Sauer and Thomas Archibald for $40,000. Mr. Sauer is broadcaster-lecturer, former newspaper owner; Mr. Archibald is assistant pastor of Hillsboro's Church of Christ. Transaction arranged by R.C. Crisler & Co. WSRW is 500 w daytime on 1590 kc.

APPROVED • *The following transfers of station interests were approved by the FCC last week (for other Commission activities see* FOR THE RECORD, *page 91).*

• KSON San Diego, Calif.: Sold by Jack O. Gross to Kenyon Brown for $550,000. Mr. Brown has interests in KGLC Miami, Okla., KFOX-AM-FM Long Beach and KCOP (TV) Los Angeles, both California, and KIMO Independence, Mo. Comr. Robert Bartley voted for a McFarland letter in this grant. KSON is on 1240 kc with 250 w.



• WPOW New York, N.Y.: Sold to WPOW Inc. (John M. Camp, president) by Tele-Broadcasters of N.Y. Inc. for $250,000 and agreement that the assignor will not compete in radio business in New York for 10 years. Comr. Robert Bartley did not participate in this decision. WPOW is on 1320 kc with 5 kw, directional.

• KXA Seattle, Wash.: Sold to Wesley I. Dumm (present 24.9% owner) by Samuel L. Savidge Jr. and others for $172,730 (for remaining 75.1% interest). KXA is on 770 kc with 1 kw, day.

NAB protests barring

Exclusion of radio-tv newsmen from coverage of public hearings on a proposed atomic waste disposal plant, held June 3 in New Britain, Conn., was protested last week (June 22) by NAB

Put the right pieces—in the right places—quickly

Experience dictates thoughtful solutions in selling your property. Be assured of a fair price from the right buyer with utmost discretion. When your station is ready for ownership transfer, the best solution to your sales puzzle reads—

exclusively with . . .

BLACKBURN & COMPANY

RADIO — TV — NEWSPAPER BROKERS

WASHINGTON, D. C. OFFICE	MIDWEST OFFICE	SOUTHERN OFFICE	WEST COAST OFFICE
James W. Blackburn Jack V. Harvey Joseph M. Sitrick Washington Building STerling 3-4341	H. W. Cassill William B. Ryan 333 N. Michigan Avenue Chicago, Illinois FInancial 6-6460	Clifford B. President Harold E. Fellows. He was joined in the protest by Robert D. Swezey, WDSU New Orleans, chairman of NAB's Freedom of Information Committee.

Coverage refusal was the result of an order by Examiner Samuel W. Jensch of the Atomic Energy Commission. It was based on the claim the hearings were quasi-judicial and therefore in line with the radio-tv ban in Canon 35 of the American Bar Assn. WNBC (TV) New Britain was denied permission to have film cameramen in the hearing room.

The NAB statement said the canon hasn't been adopted as a rule governing quasi-judicial administrative proceedings and the AEC application is contrary to its purpose.

Broadcast managers to study at Harvard

An intensive two-week seminar in broadcast management will open July 6 at Harvard Graduate School of Business Administration, Boston, with 60 broadcast managers as students. The course was conceived by Charles H. Tower, NAB manager of broadcast personnel and economics.

NAB President Harold E. Fellows will address the final seminar dinner July 17. Those taking part in the course will be presented certificates of completion.

Prof. Andrew Gyorgy, of Boston U., author and social scientist, has been added to the list of special speakers. The list includes Dr. Frank Stanton, CBS president, and John Kenneth Galbraith, Harvard economics professor.

Md.-D.C. meet

Repeal of Sec. 315, equal-time portion of the Communications Act, was advocated in a resolution adopted June 20 by Maryland-D.C. Radio & Tv Broadcasters Assn. meeting at Ocean City, Md. Passage of the Holland bill (HR 1929) providing equal-time relief for newscasts was advocated.

R. C. Embry, WITH Baltimore, association president, presided at the meeting. Newman F. McEvoy, senior vice president and media director of Cunningham & Walsh, and Edward Prager, head of his own Baltimore agency, were speakers (BROADCASTING, June 22).

The next meeting of the association will be held in October.

witness' testimony the state may have to dismiss the case.

• KFAB Omaha, Neb., has sponsored its 31st and 32nd scholarships to the U. of Nebraska. The scholarships are awarded to winners of the annual Nebraska 4H public speaking contests.

• Tv tape recordings of the Bolshoi Ballet made at KTLA (TV) Los Angeles are being transferred to 35 mm film at studios of NBC in Burbank, Calif., presumably for showing in theatres, although Matty Fox, who reportedly spent close to $1 million to record the Russian dancers on tape, still has not announced exhibition plans. NBC technicians are using the kinescope process to move the pictures from tape to film, playing the tape into a closed circuit tv system and filming the images from the face of the monitor tube.

• Thomas P. Chisman, president, WVEC - AM - TV Hampton - Norfolk, Va., has been appointed to head the Commission to Study the Feasibility of Educational Television for the State of Virginia. He is president of the Virginia Assn. of Broadcasters (At Deadline, June 22). Sam Carey, program director, WRVA-TV Richmond, Va., and Davis Paschall, superintendent of instruction for Virginia, also are on the commission. They will work with six of the state's legislators to investigate the possibilities of using etv on a statewide basis.

• WJAN Ishpeming, Mich., was to begin operations Friday (June 26). R.G. Bloomquist is president-general manager. The daytimer broadcasts on 970 kc with 5 kw.

• KBIG Santa Catalina, Calif., has installed direct uhf radio communication between the Southern California mainland and Catalina Island. Constructed in cooperation with Los Angeles Civil Defense authorities, the facility provides an emergency link with the mainland, and operates as a supplement to regular telephone service.

• CBS Foundations Inc. announced last week that it is increasing its grants to privately-supported colleges and universities from $2,000 to $3,000 for each qualifying employe of CBS, in whose name the grant is made. For 1959, CBS Foundations will contribute $60,000 to 15 colleges and universities, based on 20 graduates of these institutions who now are CBS executives. The grants are being increased, a CBS spokesman said, because of "the rising costs of higher education."

• The New Jersey Broadcasters' Assn. has organized a sports committee to "try and abolish all fees for [high school and college sports] broadcast rights that seem unjust and unwarranted." Head of the committee, Dave Moss, sports director of WKDN Camden, says they will find answers to the questions: When does one pay? What fees are paid? Where are obstacles met on broadcast rights? And what specific [New Jersey] schools offer resistance [to sports broadcasts]? The committee will present a report of its findings at the Oct. 29-31 NJBA convention at Nassau Inn, Princeton.

• Carl Byoir & Assoc. (public relations), N.Y., has awarded its annual fellowship to Robert Lindsay, instructor at the U. of Minnesota School of Journalism. The fellowship provides a five-week residency at Byoir's headquarters where the winner studies the company's operations. The award is made through the Foundation for Public Relations Research & Education of the Public Relations Society of America.

• The Blair Companies (John Blair & Co., Blair-Tv and Blair Television Assoc.) report that because of increased volume of spot broadcast activity in the Southwest, new and larger quarters will be occupied by the Dallas branch offices effective today (June 29). New address: 3028 Southland Center. Telephone: Riverside 1-4228.

• TelePrompTer Corp. (cueing devices, closed-circuit tv productions) has moved its Chicago office to 316 N. Michigan Ave. from 177 N. State St.

• Crusade for Freedom, N.Y., which earlier this year conducted a nationwide competition to promote a Radio Free Europe Truth Broadcast Program, has selected three stations for special awards consisting of a trip to Europe for a representative of each winning station. They are WEJL Scranton, Pa., KSOO Sioux Falls, S.D., and KMOX-TV St. Louis. The European tour prize includes an inspection of RFE facilities in Munich and Lisbon. The awards were for the best promotional effort to secure public participation in the 1959 Truth Broadcast Program.

• Storer Broadcasting Co. names Peter Finney & Co., Miami, Fla., as corporate and station advertising agency. Storer stations: WSPD-AM-TV Toledo, WJW-AM-TV Cleveland, WJBK-AM-TV Detroit, WAGA-AM-TV Atlanta, WVUE-TV Wilmington-Philadelphia, WWVA Wheeling, W. Va., and WGBS Miami.

• WXYZ Detroit has commenced a 24-hour broadcasting schedule. D.j. Chuck Daugherty handles the new 1-5:30 a.m. slot Monday through Saturday.

MOON-BOUNCE TV
Trans-ocean system being demonstrated

Trans-oceanic television, via the moon, may be just a few months off.

The genesis of over-the-ocean tv will be demonstrated this week in Washington when the U.S. Navy unveils its trans-Pacific moon-bounce communications circuit. The demonstration takes place at the military electronics convention of the Institute of Radio Engineers at the Sheraton Park Hotel in Washington.

The 4,829-mile, over-the-ocean circuit, is expected to be put into regular operation by the end of the current year.

The four-station system was engineered and equipment built by Continental Electronics Mfg. Co., Dallas, Tex. This is the company headed by former broadcasting consulting engineer James O. Weldon.

In the U.S. the transmitting station is located near Annapolis, Md., with its receiving terminal at Wahiawa in Hawaii. The Hawaiian transmitter is located at Opana with the receiver at Cheltenham, Md. The transmitters generate 100 kw power.

The circuit has been successfully tested, according to Continental Electronics, from the low end of the vhf band at 30 mc to the upper limit of the uhf band, 3,000 mc. Both narrow-band and wide-band signals have been used, it was reported. The circuit will be in use from four to 14 hours daily when regular serrvice is instituted, it is understood. The difference in use time is due to the varying orbits of the moon.

The importance of the moon relay, particularly to the far-flung Navy, was noted by Rear Admiral Rawson Bennett, chief of Naval Research, who called it "one of the most significant advances in radio communications in many years."

Webcor-Emerson deal remains uncertain

Is the sale of 20% of Webcor outstanding common stock to Emerson Radio & Phonograph Corp. still valid or can it be cancelled? That question was still unanswered Thursday (June 25). Principals in the stock deal of last May issued conflicting statements.

Titus Haffa, chairman of Webcor Inc. (recording equipment), Chicago, reported he has been trying to cancel the contract and would like to buy the shares back because of alleged conflict with Illinois law. Walter P. Altenburg, Webcor legal counsel, said the contract for purchase of 130,000 shares has been cancelled. Benjamin Abrams, president of Emerson Radio, said in New York that the contract could not be cancelled and that Emerson would retain the stock.

Mr. Haffa wants to repurchase the 130,039 shares because he was advised by counsel that certain provisions of the contract conflicted with Illinois corporate law. Among provisions of the contract, he said, is one calling for election of new directors. Under law, he pointed out, present directors could not be replaced without "just cause" before their terms expire. Mr. Haffa added he never intended any management changes when he and his family sold the stock.

The next stockholders' meeting is set for Oct. 31.

The controversy arose a fortnight ago when Emerson filed suit in the circuit court of Cook County, Ill., seeking access to Webcor's financial records and questioning the "validity and propriety" of transactions involving Mr. Haffa, his relatives and corporations owned or controlled by them (BROADCASTING, June 22).

RCA color ad push slated for this fall

One of the greatest advertising programs in the history of RCA Victor is planned for the last half of 1959, it was announced Tuesday by Jack M. Williams, manager, advertising and sales promotion, RCA Victor Home Instruments. A kind of reverse strategy has been adopted to introduce RCA Victor's "Newsmaker" lines of color and black-and-white tv sets, radios and stereo sets. Starting in July, the campaign will be launched first in local media, followed by national magazines and radio-tv networks.

In addition to a 50% greater number of insertions in national magazines, RCA plans a heavy schedule on television and radio, particularly for color tv sets on color programs. Some 70 minutes of color commercials will be telecast on such new NBC-TV pro-

grams as *Bonanza, Sunday Showcase* and on the 90-minute special, *The Moon and Sixpence,* set for Nov. 20. A new musical commercial for use on NBC Radio's weekend *Monitor* program as well as on local radio features a score based on the "Newsmaker" theme. RCA institutional advertising will support color tv with ads in *Time, U.S. News and World Report* and financial and trade publications.

• Technical topics

• Professional broadcast engineers get a break in New York at Harvey Radio Co., which last Wednesday (June 24) opened its new professional audio room at 103 W. 43rd St. Harvey designed the second-floor restricted-admission adjunct to its consumer showrooms as a place where visiting engineers could actually operate and test equipment they might be planning to buy. This, the company feels, is an opportunity the pro rarely gets, pointing out that most buying is done from catalogs on a "sight unseen" basis. Nearly $70,000 worth of equipment is on hand, including tape recorders and duplicators, equalizers, amplifiers, attenuators, microphones, booms and other lines of both American and foreign makes.

• All 10 directors of Allen B. Du Mont Labs Inc. were re-elected at the annual shareholders' meeting in Clifton, N.J., last Wednesday (June 24). The company's directors are Dr. Allen B. Du Mont, David T. Schultz, Barney Balaban, Armand G. Erpf, Dr. Thomas T. Goldsmith Jr., Oscar Lasdon, Robert A. Maes, Paul Raibourn, Percy M. Stewart and Edwin L. Weisl.

• Ampex Corp.'s Professional Products Div., Redwood City, Calif., has introduced 3300B duplicating master playback machine. Operating at 120 inches per second (twice the speed of former equipment), the new duplicator promises savings in production costs while maintaining the quality of 7½ ips stereo tapes. The bank of 10 slave duplicating recorders of the 3300B master playback machine will copy one hour of 7½ ips four-track material in about 45 seconds.

INTERNATIONAL

Arab world to get first commercial tv

The first commercial tv station in the Arab world is expected to go into operation by July 1 with two channels on the air simultaneously, according to Welles Hangen, NBC bureau chief in Cairo, who has prepared a report on the status of tv in the Middle East.

The new station is Television Beirut, which will program entirely in Arabic on one channel (174-181 megacycles) and in French and English on the second channel (188-195 megacycles). Beirut Tv is a closed corporation of some 14 Lebanese and Syrian businessmen, Mr. Hangen said.

Although an estimated 600,000 persons live within range of the Beirut station, only some 3,000 tv sets will be in operation in Lebanon during the station's first year. The station's franchise requires the establishment of two satellite stations within three years.

Television Beirut's facilities are housed in a modern seven story, air conditioned building, with two Thompson-Houston transmitters on the roof. The building contains in addition to offices and studios, a 500-seat theater for audience-participation shows and a "teleclub," which will offer night-club entertainment and television to the public.

If Television Beirut succeeds, as most people expect it will, it will create a rush for tv franchises in other Middle Eastern countries, Mr. Hangen predicts. Already the Cyprus tv station, formerly operated by the British Colonial Office, is converting to commercial operation, he said.

Canadian applications entered before BBG

Numerous applications for new am, fm and tv stations are to be heard by the Board of Broadcast Governors (BBG) at Ottawa July 7-9. West coast applicants will be heard July 7, central Canadian applicants July 8, with Quebec and Atlantic coast applications on July 9.

The first Canadian fm network, programming separately from affiliated am stations is being requested by Canadian Broadcasting Corp., for stations CBF-FM Montreal, CBO-FM Ottawa, CBL-FM Toronto. This is also the first time CBC, the government-owned organization, has appeared before BBG for a network. CBC is also applying for seven low power relay transmitters in the provinces of Nova Scotia and New Brunswick.

There are three applicants for a tv station at Prince George, B.C., on ch. 3, of which CKPG Prince George, is one. CKSA Lloydminster, Alta., is applying for a tv station on ch. 2. Tv

satellites are being applied for by CKX-TV Brandon, Man., at The Pas, Man., Swan River, Man., Flin Flon, Man., and Moon Lake, Man., all mining camps.

CKTM-TV Three Rivers, Que., is requesting a power boost to 42.5 kw video and 21.25 kw audio on ch. 13. CHAU-TV New Carlisle, Que., is requesting exclusive operation in French, with new tv station on ch. 12 for English-language programs. CJON-TV St. John's, Nfld., wants power boost to 62 kw video and 33 kw audio on ch. 6. CFCY-TV Charlottetown, P.E.I., has asked for a tv satellite at New Glasgow, N.S., on ch. 7. CKWS-TV Kingston, Ont., is requesting power increase on ch. 11 to 130 kw video and 78 kw audio power.

New radio stations are being asked for Hamilton, Ont., on 1280 kc with 5 kw day and 2.5 kw night; at Burlington, Ont., on 1540 kc with 1 kw; at Pointe Claire, Que., 1 kw on 1470 kc; and a new fm station at Vancouver, B.C., with 18.95 kw on 103.5 mc.

Power increases are also being requested by a number of radio stations.

CBC Radio reinstates its opinion program

The Canadian Broadcasting Corp. board of directors has reinstated an early morning radio opinion program that it had cancelled last week. The reinstatement, effective today (June 29), follows a walkout last Tuesday by 30 CBC producers and assistants at Toronto, Montreal and Ottawa. They charged political interference with opinion programs.

CBC's top management decided two weeks ago to replace the 3-minute program in which members of the news gallery at Ottawa commented on happenings in the Canadian Parliament with factual news report of the previous day's transactions in Parliament. The resignations were discussed in Parliament Tuesday and Revenue Minister George Nowlan, to whom CBC reports, stated no political pressure had been applied by the government to stop controversial programs or interfere with any CBC programs. CBC has been under investigations by a parliamentary broadcasting committee for some weeks.

Frank Peers, supervisor of talks and public affairs broadcasts, Toronto, stated in his resignation that "clandestine political influence has been brought to bear on CBC management and that decision threatens the integrity of all public affairs programs."

• Abroad in brief

• CFAX Victoria, B.C., is slated to commence operation July 18. Its studios in Central Bldg. are completed and the transmitter is being installed at Swan Lake (2¼ miles from Victoria). The daytimer will be on 810 kc with 1 kw.

• Robert Saudek Assoc., N.Y., last week anounced it had made arrangements for the telecasting Sept. 26 on Eurovision of the Venice festival appearance of conductor Leonard Bernstein and the New York Philharmonic. Telecast will be seen by estimated 60 million viewers.

• Broadcasters invited to dinner with Queen Elizabeth II and Prince Philip at Toronto, Ont., on June 29 at the Royal York Hotel, were Mr. and Mrs. H.G. Walker, director of English-language networks of Canadian Broadcasting Corp., Toronto; Mr. and Mrs. Elsworth J. Rogers, CFRB Toronto; Mr. and Mrs. Alan Waters, CHUM Toronto; Mr. and Mrs. F.H. Hewitt, CKFH Toronto; and Mr. and Mrs. Jack Kent Cooke, CKEY Toronto.

• WTOM-TV Cheboygan, Mich., is now represented in Canada by Radio & Television Sales Inc., Toronto, Ont., and has an increasing number of viewers in the uranium mining area of upper Ontario, north of Lake Huron.

• WJJD Chicago is to send a series of reports on the city's upcoming Pan-American Games to international shortwave KGEI Belmont, Calif., for transmission to Central-South America and the Caribbean area. The programs are part of *Pan-American Preview* (Fri. 9:45 p.m.), a public service series.

• Separate fm programing by CFRA-FM Ottawa, Ont., from its affiliate, CFRA, is largely responsible for boom in fm receiver sales in Canada's capital city, radio stores there report. Sales have soared from less than a dozen in February to over 200 in May, with a current estimate of some 20,000 fm receivers in the Ottawa area.

• Elliott-Haynes Ltd., Toronto, Ont., research organization, has released the first of its tri-annual sets-in-use reports for Canadian radio coverage for the months January-April 1959. The report shows an average sets-in-use figure for the four months, day and night, of 18.8, with daytime average at 21.1, and night average 13.8. By months, the daytime average was 21.1 in January, 21.6 in February, 21.4 in March and 20.2 in April. Night sets-in-use figures were 14.3 in January, 14.2 in February, 14 in March and 12.8 in April. Survey covered Montreal, both English and French, Toronto, Winnipeg and Vancouver.

• RCA Victor Ltd. opened a new concert studio and stereophonic recording facilities at 225 Mutual St., Toronto, June 10.

FK6 *TV Mag., June '59

Johnny Duggan's big day • WRCA-TV New York picked John Duggan, 10, out of 49,000 contestants for the one-game job of Yankee bat boy. With Yankee manager Casey Stengel (l) and newsman Gabe Pressman of WRCA-TV, Johnny holds a dugout conference. During his day as a Yankee batboy, Johnny appeared on three local radio and tv shows and on the *Today* NBC-TV network program. He was saluted between innings by sportscaster Mel Allen on competing station WPIX (TV) New York and saw his name in lights on the stadium scoreboard. Johnny Duggan got the Yankee assignment by writing WRCA-TV the best letter of application. It was in verse, concluding: ". . . and tell the Lord and Casey that though I'm not quite eleven, I'll be the best batboy this side of heaven."

Big boost for Little League

WANE-TV Fort Wayne, Ind., KOCO-TV Enid, Okla., and KTVW (TV) Seattle-Tacoma, Wash., are telecasting Little League baseball games weekly.

WANE-TV and KOCO-TV built diamonds at the back of the studios for convenient coverage of the games. Local sponsors of the WANE-TV Little League coverage: Rice Oldsmobile, Holsum bread; Pepsi-Cola and Eck-Rich (luncheon meats). KTVW's sponsors: Carstens meats, Double-Cola, and Pacific Van Storage Lines.

CU at the Chicago Fair

Radio and television have been carrying a strong publicity schedule since June 15 leading up to the opening Friday (July 3) of the Chicago International Trade Fair. Chicago Unlimited, civic promotional group, will open a "Star and Communications Center" at the Navy Pier to originate special fair telecast, radio pickups, recorded and filmed interviews. The Chicago Unlimited slogan for the July 3-18 event: "CU at the Fair." The CU fair participation (BROADCASTING, April 20) was organized by the group's promotion and exploitation committee, headed by James G. Hanlon, public relations manager of WGN-AM-TV Chicago.

The cleanup media

Keep America Beautiful Inc., New York, estimates that broadcasters donated more than $3 million in public service time last year to its nationwide anti-litter movement.

Some station activities cited:

KMBC-AM-TV Kansas City, Mo., ran a contest calling for the best suggestion for keeping the city clean. The prize was a three-day trip for two to Las Vegas. The stations presented 100 street litter barrels to Kansas City Mayor H. Roe Bartle during a broadcast. Cost of the contest, litter barrels and air time donated: $11,840.

Washington, D.C., and Maryland broadcasters were given a citation by Maryland Governor J. Millard Tawes for "outstanding cooperation [in] . . . campaigns to eliminate roadside litter."

The North Carolina Broadcasters Assn.'s main public service project, "Keep North Carolina Beautiful," helped reduce cleanup costs $50,000 in twelve months.

KOY Phoenix, Ariz., cooperating with the Arizona Federation of Garden Clubs, paid for 49,000 litterbags that were given to automobiles entering the state.

Other broadcasters around the country are dramatizing the local situation in a variety of ways.

New radio-tv kits of litter-prevention material (including films) are being offered by Keep America Beautiful Inc., 99 Park Ave., New York 16, N.Y.

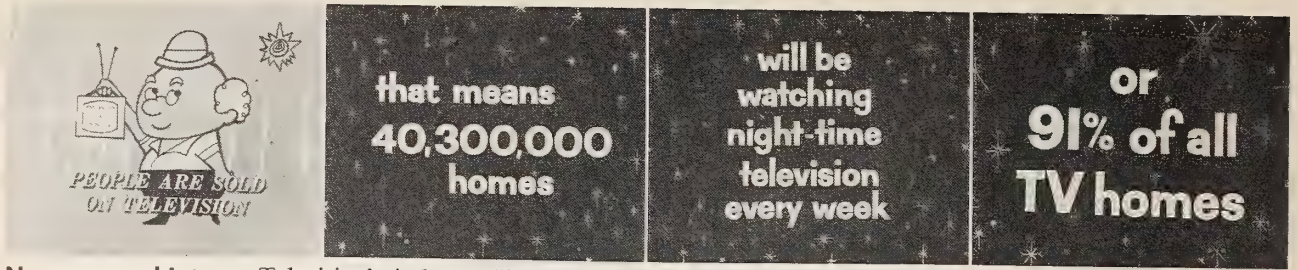
. . . would sell as sweet

Lee Bland, vice president of Leo Burnett Co., calls television commercial announcers "tv company salesmen." This definition won him an Isetta automobile in the Gothic Corp. (management consultant), New York, competition to "rename the announcer."

Runners up (presented with photographic equipment):

Jules Singer, vice president, Grey Adv.; Marshall Rothn, technical director, Kenyon & Eckhardt; Kennedy Williams, tv film producer, Benton & Bowles, and Armand Scala, film production supervisor, N.W. Ayer & Son.

Gothic, which represents several tv announcers, ran the competition for agencymen because it feels the nomenclature "announcer" is a holdover from radio.



New sound for a new state

Mainland-type "big sound" radio has come to the Union's newest state. Jock Fearnhead, vice president and general manager of WINS New York, premiered the new sound last month over KPOI Honolulu. KPOI was renamed from KHON, which Mr. Fearnhead bought earlier this year.

The new management began by cancelling many old sponsors. Anything that didn't fit the new format of musical "happy sounds" had to go.

A battery of the area's top disc jockeys was hired to marshal the "happy sounds." KPOI placed a teaser campaign in their behalf on tv and in newspapers. Phonetic pronunciation of the new call letters was stressed in radio advance promotion, and island beauties gave away 10,000 samples of poi (tropical fruit).

An aggressive news policy was adopted, encompassing enlarged staff and facilities. Revamped studios, program additions of jingles, weather and news introductions, musical promotion

No summer hiatus • Television's industry "house ads" are being sustained in a new series of spots distributed by Television Bureau of Advertising, New York. The latest batch of 13 films includes the cartoon character (above) introduced in November, now using new statistics to sell the medium. Another behind-the-screen statistic revealed by TvB as it announced the new campaign: stations since November have contributed more than $5 million in time to the "People Are Sold" effort. The Wexton Co. handled campaign production.

spots and station breaks complete the new mainland look for KPOI.

The result: billings doubled during the first month.

• Drumbeats

• WNTA Newark, N.J., in a one-day campaign against winged pests collected corpses of 1,752 flies and 30 wasps from listeners. The station paid a 10-cent bounty on each house fly and 20 cents for wasps, for a total outlay of $181.20.

• KING Seattle gave each of five air personalities a blank billboard with instructions to "decorate them as you see fit (as long as you mention KING, NBC and plug your own shows)." D.j. Ray Briem was notified of impending fatherhood while he was painting his billboard. Before dashing off to the hospital he wrote, "Wife having a baby," on the board. The next day he added: "It's a boy."

• A 30-minute film, "Passport to Glamour," containing highlights of the recent Cannes Film Festival, is being made available to tv stations throughout the country without charge by NTA International Inc. Harold Goldman, NTA International president, said last week than more than 200 tv stations already have requested the film. It was produced in Cannes by Television Monte Carlo in association with National Telefilm Assoc., New York.

• It was "*Romper Room* Day" in Atlantic City Saturday (June 27). Teachers on *Romper Room,* a weekday tv kindergarden in 73 markets, entertained children and parents from New York, Baltimore, Philadelphia, Lancaster, Pa., and Washington. Activities included a life-saving demonstration by Atlantic City's beach patrol, a children's show on the pier and *Romper Room* songs and games.

• Disc jockeys of WING Dayton, Ohio, celebrated the station's 39th year last week by dressing in 1920 bathing suits and touring the city in a model of an antique automobile.

• WKJG-AM-TV Fort Wayne, Ind., is conducting a series of open houses to acquaint clients and public with the stations' new building. Each visitor is given a souvenir brochure that outlines WKJG-AM-TV history, pictures air personalities and gives a map of the building.

• The fifth annual Treasure Hunt, conducted by Bill Burrud's *Treasure* over KCOP (TV) Los Angeles and sponsor Mary Ellen's jams and jellies, drew 21,732 hunters this month. Admission to the event at Corriganville, Calif., was a safety seal from a Mary Ellen's jar. At stake was $10,000 in buried treasure. The sponsor's agency: Guild, Bascom & Bonfigli.

• When the custom of serenading the President was revived in the capital after a century's lapse, WGMS Washington did a remote broadcast of the event. Singers were massed choristers from local churches and delegates to the ninth Washington Pilgrimage of Religious Heritage of America.

Rocky Mountain VHF. $350,000. Good potential. Already in black. Lower price for all cash. Independent now with network affiliation coming up. This station is definitely on the upgrade.

Midwestern Facility, single station market. Only available frequency. Total consideration $800,000. $250,000 down. Excellent cash flow. Valuable real estate.

of Monocacy Bcstg. Co. for new station on same frequency with 1 kw, DA-2, unl., in Gettysburg, Pa., and Times and News Publishing Co. to change facilities of station WGET Gettysburg from 1450 kc, 250 w, unl., to 1320 kc, 500 w-N, 1 kw-LS, DA-2. Ann. June 23.

Hearing Examiner Jay A. Kyle issued initial decision looking toward granting application of Farmville Bcstg. Co. for new am station to operate on 1250 kc, 500 w, D, in Farmville, N.C. Ann. June 24.

Hearing Examiner H. Gifford Irion issued initial decision looking toward granting application of Lionel B. DeVille for new am station to operate on 1390 kc, 500 w, DA, D, in Franklin, La. Ann. June 24.

Hearing Examiner Herbert Sharfman issued initial decision looking toward granting application of Plains Bcstg. Corp. for new am station to operate on 1220 kc, 250 w, D, in Independence, Iowa. Ann. June 19.

STAFF INSTRUCTIONS

Commission on June 24 directed preparation of documents looking toward (1) denying protests by Bakersfield Bcstg. Co. (KBAK-TV, ch. 29), Bakersfield, Calif., and (2) affirming Dec. 10 and Dec. 30, 1958 grants to Pacific Bcstrs. Corp. and Kern County Bcstg. Co. for new tv stations to operate on chs. 39 and 17, respectively, in Bakersfield.

Commission on June 24 directed preparation of document looking toward denying petition of American Bcstg.-Paramount Theatres Inc. (WABC), New York City, for rehearing of Commission's Sept. 5, 1958 decision in proceeding on applications of Albuquerque Bcstg. Co. (KOB), Albuquerque, N.M., involving use of 770 kc except insofar as mod. of that decision to provide for continued operation of KOB as Class II station until either June 1, 1960, expiration date of WABC's current authorization, or until such subsequent date as complete changeover can be effected.

Commission on June 24 directed preparation of document looking toward granting petition by County Bcstg. Co. for partial grant of its application for new am station to operate on 1300 kc, D, in Clarion, Pa., specifying power of 500 w in lieu of 1 kw in order to eliminate interference to WERE Cleveland, Ohio. Jan. 26 initial decision looked toward granting application for 1 kw.

OTHER ACTIONS

By memorandum opinion and order, Commission, on remand by U.S. Court of Appeals, reopened record in proceeding on applications of Plainview Radio, Plainview, Tex., and Star of Plains Bcstg. Co., Slaton, Tex., for new am stations to operate on 1050 kc, and remanded proceeding to hearing examiner for taking of evidence and for preparation of supplemental initial decision. Comr. John Cross not participating. (May 15, 1958 decision granted Plainview application and denied Star of Plains.) Ann. June 24.

By memorandum opinion and order, Commission denied motion by KEED Inc., to add issues for absolute disqualification of Liberty Television Inc., in proceeding on applications for new tv stations to operate on ch. 9 in Eugene, Ore. (Dockets 12515-6). Comr. John Cross not participating. Ann. June 24.

By memorandum opinion and order, Commission denied joint petition by Cannon System Ltd. (KIEV), Glendale; Southland Communications Co., Anaheim, Upland Bcstg. Co., Upland, and Robert Burdette & Assocs. Inc., West Covina, Calif., for severance of single proceeding into two separate proceedings on their am applications and that of South Coast Bcstg. Co., Laguna Beach. Involves use of 870, 890 and 900 kc. Ann. June 24.

By memorandum opinion and order, Commission granted petition by Suburbanaire Inc., West Allis, Wis., to extent of amending issues in proceeding on its application and that of North Shore Bcstg. Inc., Wauwatosa, Wis., for new am stations to operate on 1590 kc, 1 kw, DA, D, Ann. June 24.

Help Wanted—Management

Swivel Chair Managers Please Don't Reply

But . . . on behalf of one of our radio station clients, we have an immediate position available for a Sales Manager-Manager in one of Southern California's fastest-growing Coastal markets of 200,000. The man we seek for them has a proven local sales record and he is willing to spend 75% of his time and effort selling personally, as well as working on sales and sales ideas with station sales staff. He will be associated with one of the West Coast's most experienced multiple station owner-operators, who will train him for ever-increasing responsibility and career opportunity while he proves he can build sales volume and is strong management material. Starting compensation will be good, and will include a liberal incentive plan, based on volume and/or profits. If you feel *now* you are ready to tackle this tough assignment, but with grand rewards if you can prove your value, please tell us all about yourself at once. Your confidence will be completely respected.

Harman for leave to amend his application for new am station in Tempe, Ariz., to specify certain changes in main studio, trans. and ant. sites and to provide additional financial information regarding construction costs; application retained in hearing status. Action June 16.

By Hearing Examiner Elizabeth C. Smith

Granted petition by Goleta Bcstg. Associates, Goleta, Calif., to continue prehearing conference from June 18 to July 8 and hearing from June 30 to date to be fixed at conference in proceeding on Goleta application and that of Bert Williamson and Lester W. Spillane, Santa Barbara, for new am stations. Action June 17.

Continued hearing from June 17 to July 9 in proceeding on applications of Top Broadcasters Inc., and Natalia Broadcasting Co., for am facilities in San Antonio and Natalia, Texas, by separate memorandum opinion and order denied petition by Natalia for leave to amend its application to show changes in name, ownership and form of applicant. Action June 12.

Public opinion polls show that most Americans are not in favor of more federal "public power." They don't want the federal government to go deeper and deeper into the electric light and power business. They'd rather have the independent electric companies handle the job.

What keeps the "public power" issue alive is certainly not the American public—it's a handful of lobbyists and pressure groups.

Already, $5,500,000,000 in tax funds have gone into federal "public power." This puts into government's hands about 1/6th of the electric industry's power production. And the lobbyists are pressing for some $10,000,000,000 *more.*

This money would be spent unnecessarily. The many independent electric light and power companies of America are able and ready to supply all the low-price electricity the nation needs or will need —and *without* depending on taxes.

These companies have doubled the supply of electricity in the past 10 years, and will double the present supply in the next 10.

Heavy taxing to put the federal government into the electric business goes on only because most people don't recognize it for what it is. Nor do they realize they are paying for "public power." But it can be stopped by informed citizens.

Will *you* help spread the word?

AMERICA'S INDEPENDENT ELECTRIC LIGHT AND POWER COMPANIES

Company names on request through this magazine

OUR RESPECTS TO . . .

John Arnold Schneider

After years of seasoning in CBS' "farm league" including a top post at CBS-TV Spot Sales, John Arnold Schneider is now working broadcasting's big league.

Since last August when CBS assumed ownership of WCAU-TV Philadelphia, Mr. Schneider has been serving as its general manager. A week ago, Mr. Schneider was one of a group of 12 owned stations' general managers elected vice presidents in the CBS Television Stations Div. (BROADCASTING, June 22).

Jack Schneider's career ostensibly began in 1948 in Chicago.

But it went back further. He learned about sales and marketing on the U. of Notre Dame campus, where he passed early tests at salesmanship by running a sandwich business and booking bands for dances held on campus. Scholastically he earned his bachelor of science degree in marketing. By the time he was handed his diploma he was earning a $100 a week income from his campus business activities.

Outdoor Road to Radio • His first job —as salesman for the National Outdoor Advertising Bureau covering a territory in Illinois—paid less, $65 per week, or as he puts it, "I lost money when I was graduated."

It took Mr. Schneider only six months in 1948 to recognize a need to switch from his first fulltime job with outdoor advertising to radio sales. In his many hours spent driving on Illinois roads, radio was his constant automobile companion. He soon decided that radio advertising was the place to seek his career.

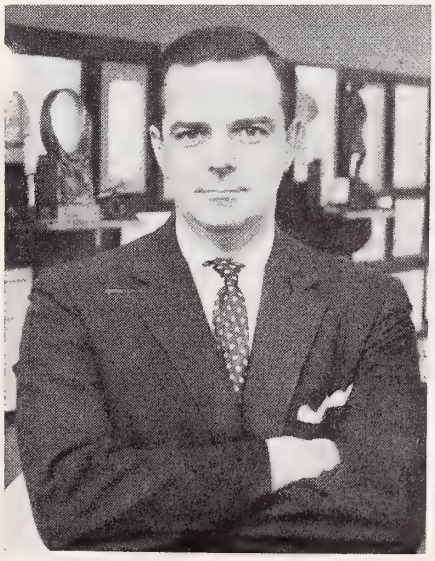
A year and a half later, Mr. Schneider had his feet planted solidly on the broadcast deck. By then he had made the grade in local sales at WGN Chicago for a year and at WMAQ there in a similar capacity.

In 1950, Mr. Schneider was busily winning his sales spurs in station representation, starting as an account executive in 1950 with CBS Television Spot Sales in Chicago; two years later moving to a CTSS sales post in New York; back to Chicago in 1954 as CTSS' midwestern sales manager; and a year later returning to New York as eastern sales manager, followed in June 1956 as general manager of CBS Television Spot Sales.

From that spot last August, Mr. Schneider was moved by CBS into the management of WCAU-TV.

Sales, Service, Stamina • Jack Schneider is vigorous, enthusiastic and deeply involved in Philadelphia and the operation of its ch. 10 station. He can capsule his career by citing a devotion to the three s's of the broadcasting business: sales, service and stamina.

Usually he can be found at his desk with his coat jacket off and his shirt sleeves rolled up. A man of expression, Mr. Schneider takes to pacing the floor as he gets warmed up to a subject close to his heart—often that subject is tv.



To his associates and others who get to know him, Jack Schneider is the dedicated man. He's known to "move fast in what he's doing" and has a command of the English language and a logic that "show in his ability to crystallize his thoughts in clear terms."

A broadcaster, Mr. Schneider says, must not forget an obligation to serve despite tv's apparent involvement in "ratings, dollars and firsts." The broadcaster role is that of custodian of the viewers' attention (or, in effect, their "minds"), Mr. Schneider feels, citing research showing more than five hours a day spent with the set.

In a more direct way, Mr. Schneider pinpoints his philosophy this way: "We must give people something in return for their having given us their time and attention."

The Viewers' Gift • Translated into station terms, management must understand and be aware of the viewers' "gift" or loan of the mind—"it's important to retain a community's respect," he says in stressing the ever-changing image of a maturing medium.

The elevation of Mr. Schneider and others on the CBS-TV station team is designed to have a multiple effect of creating a two-way channeling of information between station and network, and of recognizing and rewarding the station with representation on the corporate level. On the local scene, it will enhance the negotiating power of Mr. Schneider and his colleagues in such matters as labor agreements and local advertiser contracts.

WCAU-TV's JACK SCHNEIDER
Part of the Philadelphia scene

Mr. Schneider himself sums it up in a typical succinct comment: "No absentee management through absentee ownership."

Philadelphia's proximity to New York permits Mr. Schneider to make the trip to network (and agency) headquarters every few weeks. In New York, Mr. Schneider can bring along information from the "field" while gathering data in the technical area, in sales, promotion and research.

What Does Viewer See? • As station manager in a large metropolitan area, Mr. Schneider finds himself keeping a close look at programming. He has a philosophy—developed in years of sales (a broadcast salesman has only programming to sell)—that "a viewer only cares about what he sees on the screen. His whole impression of the station is what he sees there. He has no knowledge of what is local or network, live or film, nor does he care."

Mr. Schneider is convinced that it is not just what "New York thinks" but what all cities like or do not like which are essential to television. A "reflective management," he acknowledges is one that keeps the question in mind, of what the viewer does like away from Madison Ave. The apparent movement of CBS executives among U.S. metropolitan areas "breeds out provincialism," says Mr. Schneider, who adds, "In Spot Sales, for example, representation is for more than one market and you can't assume that all tv markets are the same. What may be good for one, may not work in another."

Mr. Schneider was born in Chicago on Dec. 4, 1926. He is married to Elizabeth Simpson. They have three children (Richard, 6; William, 4, and Elizabeth, 10 months). They live in Gladwyne, along the mainline section of Philadelphia.

A former Navy man, he still spends time sailing. He was on an international crew which won several "R" Class races (40-foot racing sloop class). He has threatened to take up golf to add to his accomplished performance on the tennis court. His club activities include membership in the Poor Richard Club and the Philadelphia Country Club as well as in the Radio & Television Executives Society of New York and in the Sales Executive Club of New York.

Face lifters

THE approval of an all-television public relations program by the NAB Television Board provided essential momentum for a needed project.

It is one thing, of course, to adopt a plan but another thing to execute it. The execution of this one will take some doing.

The broad policy of the project approved by the NAB Tv Board is sound. It envisions an operation with a high degree of autonomy from the NAB but with enough connection to the existing trade association to maintain reasonable coordination. It contemplates an adequate but not extravagant budget. It properly proposes an information headquarters for television in the information headquarters of the communications world, New York.

So much for the policy to guide the Television Information Program. The operating details will require a good deal of hard-headed thought. It is the kind of thought that may be most logically expected to come from the kind of men who fashioned the basic concept—men like those who served on the original committee formed at the NAB convention last March and headed by C. Wrede Petersmeyer, of the Corinthian group, and on the special NAB Tv Board committee formed last April 30 and headed by Clair McCollough, of the Steinman Stations.

There is no doubt that tv needs to improve its image. A strong, well-organized, well-managed information project is one important way to achieve the improvement.

Local affair

THE salvation of local television in many smaller markets could depend upon the outcome of hearings to begin tomorrow (Tuesday) before the Senate Communications Subcommittee. Before the committee is a bill to authorize the licensing of community antenna tv systems and tv translators and boosters.

Sen. Moss (D-Utah) last week introduced a revised bill (S 1886) going beyond the FCC's proposals for legislation. He says it will assure development of free local tv in smaller communities. It would allow for development of CATV, or boosters in areas where local services are not established.

To us, the Moss measure makes sense. Local tv stations should be encouraged where economically feasible. Patently, they cannot make it if CATV pre-empts the markets by providing service from a multiplicity of remote stations. If such extended service from remote stations is in the public interest, then why not stratovision or superpower?

CATV and translators are supplying needed service in certain areas. CATV, however, assumes none of the responsibilities of regular licensees, but reaps all of the benefits. It pays no program costs or music license fees. There's serious question as to whether CATV, therefore, does not constitute unfair competition.

Record of achievement

WE, along with all who know him, are sorry to see Robert H. Hinckley leave the Washington scene. Since 1946 he has served as Washington vice president of ABC, giving enhanced stature not only to his company but to all broadcasting. A top level executive with an illustrious government and business background, Mr. Hinckley, more than any other individual, is responsible for the fundamental soundness of the ABC structure. It was he who, in Ed Noble's regime, insisted upon applying for (and getting) cp's for vhf tv stations in five of the first six markets at a time when assignments were going begging and when tv's future was regarded as a sheer gamble.

Mr. Hinckley goaded the FCC (and Congress) into authorization of third v's in key markets to make ABC more competitive with the older networks. And he, almost singlehandedly, blocked corporate moves to fold ABC's radio network.

Mr. Hinckley, be it said to AB-PT's credit, will continue to serve on its board and executive committee, but will devote major attention to his personal business interests in Utah (Ogden is his home) and spend more time with his family. ABC was a bad third when Bob Hinckley took over the Washintgon beat 13 years ago. As he heads home to take it a little easier, his network is nudging the leaders, largely because of the facilities job he did.

A net gain

RADIO broadcasters have obtained a better deal from ASCAP, thanks to the earnest efforts of the All-Industry Radio Music License Committee. After a year or more of dickering and bickering, the two were brought together in a New York courthouse where the power of the bench and a consent decree resolved their differences.

Originally ASCAP had insisted on its old deal and even had talked about higher rates for its music. The cut from 2.25% to 2.125% of net time sales in the commercial license represents an important victory. The new sustaining rate will benefit most stations, it is believed. While the new agreement represents a compromise, it shows the value of joint action. Abject yielding to the original ASCAP demands would have cost broadcasters important money.

Hard, but only, road

THE controversy over Preparation H was settled the only way it could have been. The NAB Television Board, at the request of the Television Code Review Board, revoked the code memberships of those who persisted in defying a code board ban against the hemorrhoid remedy commercials.

The code lost 38 members, by revocation or resignation, in the argument over Preparation H. It would have suffered a greater loss in the form of damaged prestige if the revocation actions had not been taken. If there is to be a code, it must stand for something. Plainly the majority of subscribers felt in this case that it should stand for the elimination of Preparation H. In such circumstances a minority could not be permitted indefinitely to retain their seals while carrying the forbidden commercials—even though in all sincerity they believed they were doing right.
